# Review by the Town Council of the Administration Report of the Municipal Commissioner for Bombay for 1883-84.

1. On the 26th May 1883, the Municipal Commissioner, Mr. Ollivant, proceeded to England on three months' privilege leave, and on the 13th July following the Corporation, acting on the recommendation of the Town Council, passed a Resolution applying to Government to allow him to remain in Europe on special duty for three months from the expiration of such leave, in order, should he be willing to undertake the duty, that he might be enabled while so engaged to examine and enquire into the system of Municipal Administration in the principal cities in England, and in Paris, more especially with regard to water supply, drainage, and conservancy, including the inspection of incinerators in use in several towns in England for the destruction of garbage; and further, that he might be enabled to collect any other information which, in his opinion, might be of value to the Municipal Administration of this city. Government acceded to this request, and Mr. Ollivant, in his present report, mentions the 17 principal towns in which he prosecuted his inquiries and the nature of the information sought for. A novel feature in that report is the publication of two maps of Bombay which illustrate especially the position of the city as to Drainage and Water Supply, and assist to explain the executive history of the year.

2. For the first time, a summary is given of the chief topics which engaged the attention of the Corporation during the twelve months under review. The first meeting of the new Corporation was held on the 9th April 1883, and during the twelve months, out of 86 meetings convened, 63 were held, besides which there were 24 meetings of Committees. During the same period the Town Council held 56 meetings, and there were 9 meetings of their Committees. Much attention was given, in connection with the constitution and administration of this Municipality, to the consideration of those

principles of Local Self-Government which have recently met with such high approval, and, since the date with which this Report closes, the final recommendations thereon made by the Corporation have been submitted to Government. The amendment of the Municipal Act has not yet been taken in hand by the Legislature, but inasmuch as the defects in the existing law are not only the source of occasional difficulty, but in many instances impair the efficiency and the economy of the administration, the Council again record their earnest hope that Government will be pleased to introduce the amending Bill into the Legislative Council at the earliest date possible. Para. 51 of the Report affords a striking proof of one of the defects in the existing law, for it is shown therein that, at present, the Assessing and Collecting Department is unable to issue its bills for rates until all complaints against assessment have been heard. In this way, because there were objections raised against assessments of property valued at Rs. 11,37,278, all the bills about which there were no disputes, and relating to property valued at Rs. 1,22,22,147, had to be kept unissued until the objections just mentioned were disposed of. One of the most important objects to which the Commissioner has directed his attention has been the re-organization of the Assessment and Collection branch, and the completion of an accurate Assessment Book, but a good deal still remains to be done in the way of preparing correct registers of property, especially in the outlying districts of Mahim, Matunga, Sion, &c., and in the case of lands and buildings belonging to charitable institutions and public bodies. During the year, however, the net increase in the value of assessable properties on the books was Rs. 11,95,823, apportioned as under: (1) Registration of properties not previously on the registers, correction of under assessments, and rise in rents, Rs. 8,40,828; (2) Erection of new buildings, Rs. 2,40,000; (3) Enlargements and improvements, Rs. 1,15,000. The total of the gross rateable value, including the value of Government and Port Trust property (as represented by the compounded payments made by those two bodies), was thus increased to Rs. 1,53,03,868, and allowing for Municipal and other unregistered property, the total gross letting value of property in the city—of which an estimate is now, for the first time, available—may be put down approximately at two crores of rupees. From 25,848 in

1882-83, the number of properties on the Assessment Book for 1883-84 was increased to29,867; of these 26,535 are buildings, 109 salt pans,817 cocoanut plantations,and 2,406 vacant lands, &c. Of this total, 25,597 are assessed to the Consolidated Rate, and 4,270 exempted, or compounded for, on special terms. The new organization has taken longer to complete than the Municipal Commissioner could have wished, but the Assessor, Mr. Brunton, and most of his Staff worked with great zeal and industry.

3. Hitherto there has been no complete Valuation List of the Municipal property and assets, and the Council are now glad to learn that the Commissioner is revising, and will shortly publish, such a list as will contain all the requisite information. Meanwhile, he appends a summary thereof with the remark that when completed there will be considerable amplification of the items on the assets side. This summary is exclusive of the very valuable property included in the Vehar Water Works, but the value of the Lake and Mains is stated at Rs. 51,20,000, whilst Mr. Ollivant remarks that the debt on account thereof is either Rs. 11,54,196 or Rs. 31,17,796 according to whether the Municipal or the Accountant-General's method of calculation is adopted. The assets and liabilities which are included are briefly these :—*Assets :* Investment of Loan Funds and Building funds, Rs. 30,10,328 ; Advances, departmental and on Loan Accounts, Rs. 85,779 ; Municipal property—(1) Land and buildings, and Tulsi and Bhandarwada Water Works, Rs. 1,15,54,996 ; (2) Roads, bridges and other improvement works, Rs. 33,22,114 ; (3) Stock, Rs. 3,38,439 ; Revenue, outstanding, recoverable, Rs. 3,38,439 ; Total assets, Rs. 1,95,66,628. *Liabilities* : Various Loans, Rs. 98,51,122 ; Deposits from contractors, &c., Rs. 3,87,712 ; Adjustments for Loan Work Establishments, Rs. 82,915 ; Book balance to debit of current revenue on account of advances to Loan Works, Rs. 1,49,371 ; Total liabilities, Rs. 1,04,71,120. This leaves the total value of assets over liabilities at Rs. 90,95,508, a sum very far in excess of the New Loan of forty-four lakhs for Water and Drainage Works, &c., already sanctioned but not yet raised.

4. The total revenue of the year was Rs. 37,37,272, or more by Rs. 1,80,722 than the estimate. The increase on account

of Liquor Licenses was entirely due to the fact that one quarterly instalment in arrears from the previous year was paid in April 1883. In Tobacco Duties there was an increase of Rs. 14,000 on the average of the five preceding years, whilst Town Duties yielded Rs. 57,112 more than the estimate. The income from Water Rate was Rs. 8,827 more than in 1882. Under the heads of Consolidated Rate, Wheel Tax and Halalkhore Cess, there were fallings off, but these were consequent on backwardness in collection, and not on any actual falling off in revenue, and, as a matter of fact, the revenue collected on these accounts since the close of the year has more than covered the apparent deficit. The expenditure was Rs. 37,15,812 or less than the income, and, without going into detail, it is only necessary to point out that, from para. 28, it will be found that the net gain, over estimate, of the year was Rs. 3,43,297, exclusive of any sums still outstanding. From the statement relating to Loans, it will be observed with satisfaction that the whole of the Sinking Fund of the Market and House Rate Loans of 1867 and 1868 has now been paid up, although interest on these Loans will have to be paid until 1887-88.

5. The Refunds of Town Duties amounted to Rs. 5,68,331, the net revenue being Rs. 6,71,118, a slight increase on the revenue of 1882-83.

6. The cost of the assessment and collection of Property Rate, Wheel Tax, &c., was 4·4 per cent., the Commission paid for collection of Town Duties, including the cost of Refund arrangements, was 6·75, and the percentage of cost for collecting Tobacco Duty was 9·02.

7. The detailed information given as to the various Public Works in progress during the year indicates the extent and importance of the measures that are being taken towards providing for the sewage and surface drainage of the city. The Commissioner observes that, in order to make any satisfactory arrangement for the disposal of storm waters, at any rate from the more populous parts of the city, it is absolutely necessary that the disposal of sewage should not be ignored as the two things must be considered together. Local conditions render it impossible that a heavy fall of rain should be passed off rapidly when tides are high. The waters must, therefore, be led to a temporary resting place

where they will do as little harm as possible, "until an outlet "can be got to the sea, or they must be pumped, at a cost "which is prohibitive. The channel that carries the water "should not have sewage in it, but it has, and is thus polluted, "to an indescribable degree. These polluted waters overflow "on to the Flats, and will continue to do so until all the "sinks, gullies, and cesspools of the city are connected "with the new sewers instead of the old sewers which "also carry rain water in the monsoon and discharge on "to the Flats." In reference to house sewerage, the Commissioner records the following observations :—"I have "had occasion to notice that much greater difficulties "attend the use of syphons in this country than in England, "and I have suggested the alternative course in certain cases "of connecting the house gullies, instead of the individual "houses, with the new sewers. The great object to achieve, "for the sanitary improvement of the city, is to carry off pollut- "ed water or house sullage by means of the new sewers, and "to do this, it is absolutely necessary that a mode of ingress "inaccessible to storm waters, or, in other words, above the "ground level, should be secured. Until this is done most of "the new sewers are practically useless, and the evils for the "removal of which they were designed continue unabated." The Fort sewerage was surveyed last year, and the Council take this opportunity of expressing their earnest hope that the recommendation they made to the Corporation a few days ago, for the complete sewerage of that district, will be approved and sanctioned.

8. The works in connection with the construction of catchwater channels at Vehar and Tulsi were considerably advanced, and thanks to the raising of the dams at Tulsi, the quality and the quantity of the Tulsi water were improved. The progress with the construction of the Malabar Hill and John Hay Grant Reservoirs was not satisfactory, and although the latter was completed, it now appears that it cannot do full duty until a new main from Vehar has been laid. Much saving of water resulted from the examination of the old mains, and the Deacon meters which are to be fitted to the mains will doubtless result in still further reducing wastage.

9. The extension of the Charni Road, and the making of the new road from Chinchpukli Station to the Frere Reclama-

tion, have greatly improved the communication between certain districts, and it is anticipated that the new thoroughfares across the Old Road Course and from Warli to Parell will be equally useful. More than the usual extent of Street Improvement was effected within the twelve months, notably in the instance of the fine opening made at Mombadevi Tank, and the Council are glad to draw attention to the remarks contained in paragraphs 69, 70 and 104 of Mr. Ollivant's report. In the matter of road lighting, it appears that during the year, 178 new kerosine, 12 gas, and 4 electric arc lamps were added to those already in use, so that 72·46 miles are now lit with gas, 26 with kerosine, and 2·33 with electric arc lamps.

10. The Council record with much regret the fact that, during the first nine months of the year, the health of Bombay was unsatisfactory, the death rate being 30·79 per 1,000, although in the last quarter it fell to 24·12. The increased mortality was due to cholera, small-pox and pthisis. The number of deaths from these causes was as under :—

| | 1881. | 1882. | 1883. |
|---|---|---|---|
| Cholera ..... | 546 | 192 | 1,027 |
| Small-pox ..... | 35 | 92 | 1,461 |
| Pthisis ... ..... | 2,232 | 2,729 | 3,144 |

During the first quarter, there were 5 cases of cholera, of which 4 proved fatal, and in the second quarter, out of 169 seizures, 135 were fatal. In the third quarter, the number increased to 1,217, of which 821 were fatal ; in the fourth quarter, out of 83 cases, there were 67 deaths. The rate of mortality was far higher among Ratnaghiri-born people than any others. The temporary resuscitation of the epidemic towards the close of the year has been ascribed to the fact that, owing to a burst in the Vehar main, some quarters of the city were more or less dependent on tank and well water. With the concurrence of the Council, special measures were adopted for checking the spread of the disease, and the Council concur with the Commissioner in considering that credit is due to Surgeon-Major Weir and Surgeon Davidson for the exertions they made to cope with the epidemic. The Council also record their obligations to the Special Medical Officers mentioned by the Commissioner, who have already received the thanks of the Corporation. Of the 1,176 persons who died in the first half of the year from small-pox, 693 were natives of places outside Bombay, and the

Health Officer remarks that, in order to protect this city, vaccination should be strictly carried out in the mofussil as well as in Bombay. Of the 1,041 persons who died of small-pox in the first quarter, 560 are known not to have been vaccinated, of 133 nothing was known, and the remaining 348 are said to have been vaccinated, but the Health Officer presumes that the vaccination must have been of ancient date. The vigorous efforts made to extend vaccination during the epidemic resulted in entire success: in the first quarter there were 9,241 primary vaccinations, or nearly double the number in any three months of the previous two years. There was a remarkable increase, too, in the number of persons beyond the age of infancy who were vaccinated for the first time. Of re-vaccinations during the quarter, there were 13,778, or more than twenty-five times as many as in any quarter of the two preceding years. The Council entirely concur with Mr. Ollivant as to the necessity for the provision of special hospitals for cholera and small-pox patients, and need only express their satisfaction that the Corporation has already approved of the principle, and made the necessary grant for the provision of one of the new hospitals.

11. The number of births registered was 16,631, whilst the deaths, exclusive of still-born, were 23,530. The disproportion in Bombay between the births registered as compared with the death returns, contrasted with the same statistics of some of large towns of the United Kingdom, is as remarkable as heretofore. Thus, in London, with a population of 3,955,814, the number of births was 33·90 per 1,000, with a death-rate of 20·40 ; in Bombay with 807,905 inhabitants, the births registered were 18·79, whilst the death-rate (1883) was 29·12. Making every allowance for large and constant immigrations from Ratnagheri and other Konkan districts, the Council cannot but believe that the registration of births is very defective, and they desire to recommend the Commissioner's remarks on this subject to the consideration of Government to whom also a representation should, in their opinion, be made as to the expediency of protecting Bombay from the ravages of small-pox by the adoption of measures calculated to extend vaccination in the surrounding districts.

12. Municipal Halalkhor service is now extended to all houses, with the exception of certain properties in Military and Port Trust limits. The number of scavengering, drain cleaning and night-soil carts has been increased to 624 against 523 in 1881, and the Health Officer was asked to submit further proposals with a view to amplify the means at his disposal. Additional latrine accommodation has been provided in several parts of the city. The discharge of sewage into the Harbour will be discontinued immediately, but the Carnac Bunder Depôt will still remain in use. The question of the discontinuance of the deposit of town sweepings on the Flats is engaging the serious attention of Mr. Ollivant and a Special Committee, and estimates are being prepared of the cost of the alternatives of removal beyond the limits of the city, and of incineration.

13. In dealing with the Health Officer's Report, the Municipal Commissioner again (para. 95) insists strongly on the duty of proceeding with the complete sewerage of the city (for the removal of sullage). The Town Council express their entire concurrence in these views, and feel that it cannot but be a matter of reproach to the administration of this city that the yearly record of death causes should show such a high rate of mortality due to *preventible diseases*. With proper drainage and proper sanitation the best means of defence would be prepared against pthisis, cholera and fever.

14. The ever-increasing difficulty of finding cemeteries for burial purpose again presents itself, and the Council are not without hope that their recommendation (intended not only to mitigate that difficulty, but to obviate the manifest sanitary objections to the extension of burying grounds) for regular grants-in-aid towards the cost of cremating the bodies of the poorer classes of Hindoos will yet be acceded to.

15. In the receipt from Markets and Slaughter Houses was a large increase, testifying to the good management there of the Superintendent of Markets, who reports that there was a large increase in the consumption of mutton, the supply of which was more plentiful, and better than usual. The beef supply was very inferior, and nearly 60,000 lbs. thereof had to be destroyed.

16. From fires, the loss of property approximately was Rs. 4,35,205. The number of conflagrations was 43, or less than the average, but, until there is a constant water supply service, there will always be a risk of not obtaining an immediate and a copious supply of water. Accidents from running over people in the streets resulted in the deaths of 33 persons, and the injury of 425.

17. The Municipal expenditure on Primary Education was Rs. 22,916.

18. The Report is a very complete and methodical record of a year of hard work, and the Council feel sure that every member of the Corporation will heartily acknowledge the zeal, ability and success with which Mr. Ollivant has performed the arduous and daily increasing duties which belong to the office of the Municipal Commissioner of Bombay.

FRANK H. SOUTER,
*Chairman.*

*The foregoing Review is circulated to the Members of the Municipal Corporation under the terms of Section 33 of the Bombay Municipal Acts of 1872 and 1878.*

# ADMINISTRATION REPORT

OF THE

# MUNICIPAL COMMISSIONER.

# INTRODUCTORY.

1. I HELD the appointment of Municipal Commissioner throughout the year under report, but I was absent from Bombay for six months from the 26th May, first on privilege leave and afterwards on special duty, and during that time the Health Officer, Surgeon-Major T. S. Weir, acted for me.

2. The chief towns which I visited during my absence from Bombay, and the principal points to which my inquries were directed, are mentioned in a note.*

3. Prefixed to the title page will be found two maps which, I hope, will assist in explaining various matters of administrative interest which have been referred to in this report.

---

* **Principal Places visited.**—Barrow in Farness, Birmingham, Bradford, Brighton, Bristol, Edinburgh, Glasgow, Leeds, Liverpool, London, Manchester, Nottingham, Paris, Rochdale, Warrington, and Wrexham.

In London I obtained valuable information from the Local Government Board and Metropolitan Board of Works. The principal points of my inquiries elsewhere may be stated in interrogative form as follows :—

1.—**Buildings.** What are the regulations in force, either by Local Act or Bye-Law? Is there a fixed scale of dimensions? Are there special provisions regulating the construction of closets and house-drains? Copies of rules and standard plans are requested.

2.—**House Refuse.** What is the total number of houses? How many of these are served by water-closet, pail closet, or midden closet respectively? What is the system of removal, and how often is it effected? How is the refuse and night-soil disposed of? What is the cost of collection and manufacture (if any)? What is the quantity sold raw and manufactured (if any) respectively, and at what rates?

3.—**Street Refuse** and **Market Refuse.** How are these treated? Information is requested as to the quantity collected, its disposal, cost, and yield.

4.—**Sewerage.** Of what does the Sewage mainly consist? Where is it conducted? What process of purification, if any, is adopted? How are the sewers *ventilated*? If by road surface ventilators, at what intervals of distance? Have ventilating shafts (carried up houses) been used, with or without cowls, and if so, with what effect? Has any experience been arrived at with regard to charcoal ventilators and furnace draft? Are the sewers systematically flushed, and if so, by what means?

5.—**Numbering of Houses** and **Naming of Streets.** What system of numbering is observed, and when the name of a street is changed, is it the practice to issue formal certificate to that effect to parties applying for it?

6.—**Electric Light.** Has anything been done towards lighting the town with electricity, and if so, what patent has been adopted? Is control exercised over the laying of writes for telegraph, telephone, or electric light purposes, and if so, what are the conditions imposed?

7.—**Water Supply.** What is the total quantity of water delivered into the town, and what is the estimated supply per head? Of the total quantity, what portion may be assigned to manufacture, domestic purposes, and waste respectively? Have any, and if so what, means been taken for the detection and prevention of waste? What means, if any, are adopted for measuring the water—1st, as it leaves the storage reservoir; 2nd, as it enters the service reservoir; 3rd, as it leaves the service reservoir for supply to the town?

Is the water filtered, and if so, where? Are the reservoirs, or any of them, covered? What kind of meter finds most favour, and are standard fittings insisted on? Two copies of the "Water Regulations" are requested.

8.—**Disinfection of Clothes.** Is there a building for this purpose, and by what process is the disinfection carried out? If any particular machinery is used, it is requested that the name of the patentee may be given.

9.—**Assessment.** What method is adopted, either for Municipal or Parochial purposes, of arriving at "the yearly sum at which a building may be reasonably expected to let?" Has any standard classification been fixed, either by square yard of flooring or otherwise, for determining the assumed rental of special properties which are not usually let,—*e.g.*, Mills, Railway Stations, Public Buildings, &c., if not, how is the letting value of such properties determined.

10.—The favour of a copy of the last annual accounts, and of the last health report (Medical Officer's or Committee's) is requested, also of any regulations which there may be on the subject of Markets, Stables, Licenses, Explosives, or other matters under Municipal control.

NOTE—For places where there are Docks: How is the rateable value of the Docks arrived at? Is it fixed with reference to the structural cost, or to the revenue earned, or in what manner? What was the gross revenue and net revenue for 1882; and what is the rateable value for assessment purposes for 1883? The favour is requested of a copy of the published accounts of 1882, and of a summary of the TOTAL rateable value (all Parishes together) as fixed for assessment purposes, with an explanatory note (if the assessment is based on revenue) as to what items of revenue and expenditure are respectively included or excluded for rating purposes.

## I.—Corporation and Town Council.

4. With the beginning of the new financial year, a new Corporation came into office in accordance with the terms of the Municipal Act. The first meeting was held on the 9th April, when Mr. Raghunath Narayan Khote, C.I.E., was elected Chairman, and eight members were elected to the new Town Council. The remaining four members were appointed by Government on the 13th April, and the Town Council thus constituted held their first meeting on the 20th April. A list of members of the Corporation and Town Council is given at page 2.

5. The only changes during the year were occasioned by the death of Dr. Cody, and by the resignation of Mr. Jehangir Dosabhai Framji and Major Portman. These gentlemen were succeeded in the Corporation by Dr. W. Gray, Mr. K. N. Seervai, and Mr. G. Cotton, respectively.

6. Mr. H. W. Barrow, the Clerk to the Corporation ; and Secretary, Town Council, was absent on leave for three months from the 9th November to 8th February, during which time Mr. Sorabji N. Cooper, Controller of Municipal Accounts, officiated for him.

7. Altogether 86 meetings of the Corporation were convened during the year, and of these 63 were held. The Town Council held 56 meetings. In addition to these there were 24 meetings of Committees of the Corporation, and 9 of Committees of the Town Council. The total number of Corporation meetings was far in excess of those of any previous year. In addition to various matters connected with the administrative measures referred to in the course of this Report, which necessarily engaged the Corporation, considerable time and attention was bestowed on the discussion of the constitutional sections of the Municipal Act, and of certain proposed adjustments of charges between Government and the Municipality, specially Police, Hospital, and Educational Charges, with direct reference to the recently promulgated views of the Government of India on the subject of extension of Local Self-Government. Seven meetings (out of eleven convened) were almost exclusively devoted to deliberation on these subjects. Final conclusions had not been arrived at by the close of the year. Another subject on which no little time and labour were bestowed, was the question of providing means for putting pawn-broking business in Bombay on a better footing. The expediency of

establishing "Pawn Banks," similar to the French Monts de Piété, under Municipal Agency, was discussed, and a summary of the rules under which these institutions are conducted in Paris, was drawn up by Surgeon-Major Blanc, one of the members of the Town Council and Corporation. Eventually it was decided that it was not desirable for the Municipality to undertake such an experiment in Bombay, but that, in the opinion of the Corporation, it was advisable that a measure should be introduced into the Legislative Council for bringing the business of pawn-brokers under such terms and restrictions as to rate of interest, issue of pawn tickets, and other matters as might seem expedient to the Legislature.

8. On the 21st November last, the Corporation had the pleasure of taking part in the public reception in Bombay of Their Royal Highnesses, the Duke and Duchess of Connaught, on which occasion an address of welcome was read by the Chairman, and graciously responded to.

9. The last official act of the Corporation in the year under review was to give expression (March 31st) to the regret of the city at the untimely death of H. R. H. the Duke of Albany, and to the sympathy felt for H. M. the Queen Empress and the Royal Family.

## II.—Heads of Departments.

10. In consequence of Surgeon-Major T. S. Weir acting as Municipal Commissioner, Mr. Leask, Assistant Health Officer, was in charge of the Health Department from 26th May to 28th July. He was then relieved by Surgeon D. C. Davidson whose services were placed at the disposal of the Town Council by Government, and who continued to act as Health Officer until my return from England, and again during the three months' leave which was granted to Surgeon-Major T. S. Weir immediately after my return. Surgeon-Major T. S. Weir resumed his duties on 27th February 1884.

11. The Executive Engineer, Mr. Walton, was absent on privilege leave from 29th May to 11th June, and again from 21st December to 24th January, during which period his duties were performed by other members of the staff.

12. Whilst the Controller of Municipal Accounts was acting as Secretary to the Town Council, during Mr. Barrow's absence, his duties were performed by his assistant, Mr. Manekshah Kavashah. There were no other changes of importance.

## III.—Financial.

13. The opening balance* was Rs. 9,33,706, being Rs. 5,42,268 in excess of the balance which was anticipated when the Budget was framed : of this excess, however, Rs. 3,00,000 were due to works not completed or bills not discharged within the financial year, so that the balance actually available for expenditure proper to the year under report was better than the anticipated balance by Rs. 2,42,268.

14. The total revenue of the year was Rs. 37,37,272-0-9, or more by Rs. 1,80,722-0-9 than the estimate. It was less than that of the last financial year (15 months) by Rs. 8,74,968-0-11, but more by Rs. 66,599-0-9 than the revenue of the 12 months of 1882.

15. The total expenditure was Rs. 37,15,812-4-6, less by Rs. 5,41,531-7-10 than the estimate, and less by Rs. 10,37,819-10-6 than the expenditure of the last financial year (15 months), but more than the expenditure of the 12 months of 1882 by Rs. 2,38,916-4-6.

16. The following tables contrast the several items of revenue and expenditure under each main head : full details will be found in the Report of the Controller of Municipal Accounts and the Statements annexed thereto :—

## A.

### REVENUE.

| | Actuals for 1883-84. | Estimate for 1883-84. | Actuals for 15 Months, *viz.*, from 1st January 1882 to 31st March 1883. | Actuals for 12 Months, exclusive of adjustments as per weekly account, dated Saturday, 30th Dec. 1882. |
|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. |

| New Works ..... | 2,62,113 5 4 | 5,23,910 2 9 | 4,04,321 3 10 | 1,99,621 |
| Public Gardens..... | 20,263 7 7 | 23,916 4 0 | 26,968 12 2 | 18,601 |
| Municipal Debt..... | 8,12,060 2 5 | 9,00,458 0 0 | 12,28,881 12 2 | 9,01,525 |
| Pensions, Gratuities and Compassionate Allowances..... | 40,332 12 8 | 41,263 2 9 | 12,803 4 2 | 9,505 |
| Primary Education .... ..... | 22,500 0 0 | 22,500 0 0 | 28,125 0 0 | 22,500 |
| Goculdas Tezpal Hospital ..... | 27,832 2 0 | 36,000 0 0 | 34,947 13 4 | 25,948 |
| Miscellaneous ..... | 53,933 6 5 | 54,550 0 0 | 1,07,738 10 0 | 76,666 |
| Total... Rs. | 37,15,812 4 6 | 42,57,343 12 4 | 47,53,631 15 0 | 34,76,896 |

Differences on Revenue.

17. On comparing the revenue of the twelve months under report with that of the twelve months of 1882, it will be seen that the increase is attributable to larger receipts on account of Liquor Licenses and Tobacco Duty, Town Duties, Water Rate, and Miscellaneous items.

18. The increase on account of Liquor Licenses is entirely due to the fact that one quarterly instalment in arrears from the previous year was paid in April 1883. The Tobacco Duty yielded Rs. 1,74,306, about Rs. 14,000 more than the average of the preceding five years. The net increase from Town Duties was Rs. 57,112 as compared with the estimate, and Rs. 41,925 as compared with the actuals, of 1882. Collections on account of Water Rate (and water supplied through meter) were better by Rs. 8,827 than those of 1882. The increase under the head of Miscellaneous Items is mainly due to adjustments on account of Workshops, Stores, &c.

19. The decrease shown under Consolidated Rate, Wheel Tax and Halalkhor Rate is due not to any actual falling off in revenue, but to backwardness in collection. This decrease, as will be explained below, has been more than covered by the revenue since collected.

Differences in Expenditure.

20. On the expenditure side the chief differences occur under the heads of General Superintendence, Public Health, Public Works and Pensions and Gratuities.

21. The increase in the cost of General Superintendence is due to the increased salary of the Secretary to the Town Council, to the cost of arrangements made for the performance of the Municipal Commissioner's duties whilst I was absent on leave and on special duty, and to greater expenses incurred in legal proceedings (including arrear payments of former years).

22. The expenditure of the Health Department was increased by the extension of halalkhor service, by the scavengering and drain cleaning staff being strengthened, by the removal of street refuse having been rendered more costly through the abandonment of Navroji Hill as a place of deposit, and by special outlay in connection with the small-pox and cholera epidemics.

23. On Public Works (ordinary and establishment) the expenditure was less than the estimate by Rs. 60,355, but more than that of the former year by Rs. 43,059. The increase in cost, as compared with the expenditure of 1882, is on account of the New Pumping Station at Love Grove, and of an extension of street lighting, and road watering. The sum spent on road repairs also exceeded that of the previous year by Rs. 12,774.

24. The total grant for "New Works" was Rs. 5,23,910, of which Rs. 2,62,114 were expended: since the close of the year the grant has been renewed to the extent of Rs. 2,44,585 on account of works then incomplete. The difference, Rs. 17,211, forms part of the cash balance of the present year.

25. The very considerable increase in disbursements on account of Pensions and Gratuities is due mainly to the fact that an alteration of the law at the end of 1882 made the payment of compassionate allowances permissible for the first time. A number of these which had been previously promised were paid during 1883-84, and under the same provision of the law a sum of Rs. 9,845 was paid to the family of Mr. Hutchinson (late Assessor and Collector), who died within the year.

26. Under the head of "Fire Brigade" there was an increase of expenditure to the amount of Rs. 17,840, incurred in the purchase of new Fire Engines and consequent establishment charges.

27. Altogether the increases in expenditure (the principal items of which have been explained) amounted to Rs. 3,51,114, but against these must be placed a decrease of Rs. 1,12,198, chiefly attributable to the cessation of the annual payment to the Sinking Fund for the 6 per cent. Municipal Loans of 1867-68.

28. The actual closing balance, exclusive of deposits, was Rs. 7,40,919-0-11. If from this be deducted Rs. 3,31,256-13-9, which sum represents the lapsed grants since renewed on account of incomplete works or undischarged liabilities, the actual balance was better than the estimated balance by Rs. 3,09,662-3-2. A reference to the first paragraph of this chapter will show that Rs. 2,42,268 of this surplus must be ascribed to the opening balance, so that the actual gain of the year (exclusive of revenue in arrears) was Rs. 67,394. But inasmuch as a distinction has been made between a real and a nominal surplus by deducting, from the total balance, all lapsed grants which have since been re-appropriated, so must a corresponding addition be made by taking into account revenue of the year since collected. This amounts to Rs. 2,75,903. Thus the net gain of the year, exclusive of any sums still outstanding, stands at Rs. 3,43,297.

*Assets and Liabilities.*

29. Considerable progress was made during the year in the preparation of a complete Valuation List of all kinds of Municipal Property, to the want of which I have drawn attention on previous occasions. This List, which is still undergoing revision, will shortly be published separately, but meanwhile I am able to give the following summary, remarking only that, when the List is completed, there will be considerable amplification of the items on the Asset side.

*Summary of Assets and Liabilities, exclusive of the Vehar Property and Vehar Waters Works Account.*

| *Assets.* | Rs. |
|---|---|
| I. Investments Loan Funds and Building Fund..... | 30,10,328 |
| II. Advances, Departmental, and to Loan Works..... | 85,779 |
| III. Municipal Property— | |
| (1). Land and Buildings, also Tulsi & Bhandarwada Works ..... | 1,15,54,996 |
| (2). Roads, Bridges and other Improvement Works ... | 33,22,114 |
| (3). Stock ..... | 12,54,972 |
| IV. Revenue, Outstanding and (after making full allowance for doubtful claims) Recoverable ..... | 3,38,439 |
| Total Assets... | 1,95,66,628 |
| Deduct Liabilities ... | 1,04,71,120 |
| Value of Assets over Liabilities..... | Rs. 90,95,508 |

| *Liabilities.* | Rs. |
|---|---|
| I. By various Loans ..... | 98,51,122 |
| II. Deposits by Contractors, &c. ..... | 3,87,712 |
| III. Adjustment items*..... | 2,32,286 |
| Total Liabilities... | Rs. 1,04,71,120 |

* Reserved for Loan Works Establishment ...Rs. 82,915
Book balance to debit of current Revenue on account of Advances to Loan Works still unadjusted at close of year ..... Rs. 1,49,371

30. The value of the Vehar Lake and Mains is stated at Rs. 51,20,000, whilst the debt on account thereof is either Rs. 11,54,196 or Rs. 31,17,796 according as either the Municipal or the Accountant-General's method of calculating the interest be adopted.

31. The following statement exhibits our financial position at the beginning and close of the year, respectively, with regard to the several Loan Accounts, exclusive of the Vehar Debt, which is still a matter of dispute:—

| Name of Loan. | Amount of Liability at the beginning of the year. | Increase during the year. | Decrease during the year. | Amount of Liability at the close of the year, exclusive of future annual interest. | Year in which the whole Liability will be discharged. |
|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | |
| Consolidated Loan .. .. | 56,45,864 12 7 | a2,52,909 12 7 | 3,56,652 4 10 | 55,42,122 4 4 | 1910 |
| New Drainage Loan of 1878 .. | 25,98,000 0 0 | a1,30,325 0 0 | 1,57,325 0 0 | 25,71,000 0 0 | 1918 |
| Market and House Rate Loans of 1867 and 1868 .. .. | * | a1,04,025 0 0 | 1,04,025 0 0 | * | 1887-88 |
| Total.... | 82,43,864 12 7 | 4,87,259 12 7 | 6,18,002 4 10 | 81,13,122 4 4 | |

32. In addition to the Loans above enumerated, New Loans, aggregating 44 lakhs decided upon by the Corporation in 1881, 1882 and 1883, for various works of sanitation and public improvement, as noted in the margin, have received the requisite legal sanction. In order to save interest charges, and to command a favourable market, the raising of this sum or any portion thereof has been deferred, as the state of our current balances has been such as to admit of advances being made for the prosecution of these 'Loan Works' up to the present date and for some time further.

*Summary.*

| | |
|---|---|
| Water Works .....Rs. | 18,98,921 |
| Sewerage (House Connections) ..... „ | 14,30,764 |
| Surface Drainage *Rs. 12,12,250, minus Rs. 4,01,000, the balance* of the six lakhs loan granted by Government for Surface Drainage Works..... „ | 8,11,250 |
| Roads and Miscellaneous Buildings .. „ | 2,49,529 |
| Rs... | 43,90,464 |
| or say, 44 lakhs. | |

## IV.—Assessment, and Collection of Revenue.

### *Registration of properties.*

33. The number of properties on the Assessment Book at the close of 1882-83 was 25,848, and at the close of the year under report, 29,867. Of these 26,535 are buildings, 109

a These sums represent the interest which accrued for the year.

* The Sinking Fund to cover the whole amount of these Loans had been completed before the beginning of the year. The denominational value of the investments of which the Sinking Fund is composed is more by 2½ per cent. than the amount of the Loans. This margin has been left to cover the risk of Depreciation in the Investments.

salt pans, 817 cocoanut plantations, and 2,406 vacant lands &c.; of the total number now registered 25,597 are assessed to the Consolidated Rate, and 4,270 are exempt or compounded for on special terms. Considerable progress was made in obtaining a more accurate registration of properties, but a good deal remained to be done especially in the outlying districts, Mahim, Matunga, Sion, &c., and in the case of lands and buildings belonging to Public Bodies and Charitable Institutions.

*Valuation.*

34. The gross recorded value of these properties for the year under report is contrasted with the gross recorded value for the preceding year in the following table :—

| Closing Valuation of 1882-83. | Opening Valuation for 1883-84, Section 79. | Valuation after complaint, Section 80. | | Subsequent amendments, Section 81. | | Closing Valuation of 1883-84. | | | Increase. |
|---|---|---|---|---|---|---|---|---|---|
| | | No. of complaints. | Amount after disposal of complaints. | Reductions. | Enhancements. | Valuation chargeable with Consolidated Rate. | Valuation exempt from Consolidated Rate, Section 77. | Total. | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| 1,25,80,263 | 1,47,08,164 | 1,406 | 1,46,34,078 | 1,72,616 | 1,03,045 | 1,33,59,425 | 12,05,082 | 14564507 | 19,84,244 |

If to the figures given in columns 1 and 7 for the two years respectively, be added the gross value of Government and Port Trust property as represented by the compounded payments made by these Bodies, the totals will stand as follows:—

| 1882-83. | 1883-84. |
|---|---|
| Rs. 1,41,08,040 | Rs. 1,53,03,868 |

Allowing for Municipal and other unregistered property referred to at the close of the preceding paragraph, the total gross value of property in the city—the value that is at which it may reasonably be expected to let from year to year—may be put down approximately at two krors.

35. The difference between Rs. 1,41,08,040 and Rs. 1,53,03,868, or Rs. 11,95,828, represents the net increase in the value of assessable properties on the Books, and may be apportioned to the following heads :—

(1) Registration of properties not previously on the Books, correction of under-assessments, and rise in rents..... Rs. 8,40,828
(2) Erection of new buildings ..... „ 2,40,000
(3) Enlargements and improvements ..... „ 1,15,000

## *Property Rates.*

36. The increase in Valuation has resulted in a corresponding increase in the Demand on account of Property Rates as exhibited in the following comparative tables :—

### *Consolidated Rate.*

| 1882-83 (12 months). | | | 1883-84. | | | Increase. |
|---|---|---|---|---|---|---|
| 8 per cent. charged on Value. | Compounded payments made by Government and Port Trustees. | Total. | 8 per cent. charged on Value. | Compounded Payments made by Government and Port Trustees. | Total. | |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 8,97,490 0 5 | 1,10,000 0 0 | 10,07,490 0 0 | 9,62,423 10 1 | 1,40,000 0 0 | 11,02,423 10 1 | 94,933 9 8 |

### *Halalkhor Rate.*

| 1882-83 (12 months). | | | 1883-84. | | | Increase. |
|---|---|---|---|---|---|---|
| 3 per cent. on Value. | Special Service. | Total. | 3 per cent. on Value. | Special Service. | Total. | |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 2,30,280 5 10 | 23,533 15 7 | 2,53,814 5 5 | 2,39,892 2 8 | 26,097 12 1 | 2,65,989 14 9 | 12,175 9 4 |

### *Water Rate.*

| 1882-83 (12 months). | | | | 1883-84. | | | | Increase. |
|---|---|---|---|---|---|---|---|---|
| On Value. | Compounded. | By Meter Measurement. | Total. | On Value. | Compounded. | By Meter Measurement. | Total. | |
| Rs. a. p. | | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 2,44,987 5 9 | .. | (a) 2,74,847 6 7 | 5,19,814 12 4 | (b) 2,55,301 10 3 | 2,160 | 3,06,396 6 9 | 5,63,858 2 0 | 40,043 5 8 |

The Total Demand on account of Property Rates for the year thus amounted to Rs. 19,32,271-10-10. To this sum must be added Rs. 2,328-12-11, being Demands for previous years now for the first time brought to account.

(*a*) and (*b*).—These sums include Rs. 1,021-8-4 and Rs. 854-4-5 respectively, on account of Water Rate on Government Buildings which are occupied by private persons, the Water Rates on which were paid direct to the Municipal Account Office.

*Collection.*

37. Of the Total Demand, Rs. 1,419-8-6 were allowed as Remission or drawback under Section 76 of the Act, and Rs. 1,40,854-4-5, representing the sum payable by Government and the Port Trustees, were paid direct into the Municipal Account Office. For the recovery of the remainder, bills were prepared and issued by the Assessment Department, as follows :—

| Years. | Bills to be issued. | | Bills issued. | | Bills remaining to be issued at the end of 1883-84. | |
|---|---|---|---|---|---|---|
| | No. | Amount. | No. | Amount. | No. | Amount. |
| | | Rs. a. p. | | Rs. a. p. | | Rs. a. p. |
| 1879 and previous years ..... | 14 | 63 0 0 | 14 | 63 0 0 | .. | .... |
| 1880..... | 12 | 55 3 2 | 12 | 55 3 2 | .. | .... |
| 1881..... | 17 | 119 13 5 | 17 | 119 13 5 | .. | .... |
| 1882-83 ..... | 102 | 2,090 12 4 | 102 | 2,090 12 4 | .. | .... |
| 1883-84 ..... | 58,748 | 17,89,997 13 10 | 58,748 | 17,89,997 13 10 | .. | .... |
| Total .... | 58,893 | 17,92,326 10 9 | 58,893 | 17,92,326 10 9 | .. | .... |

For the first time no bills remained to be issued at the close of the year.

38. The outstanding balance on account of Property Rates at the end of 1882-83, as shown in last year's report (inclusive of sums on account of bills then remaining to be issued), was Rs. 2,56,347-14-7 ; of this amount Rs. 7,,281-10-6 were on account of bills previously declared to be irrecoverable, which were then time-barred, and Rs. 20,221-6-2 were due to bills recalled as erroneous, in the place of which corrected bills had been issued. The actual outstanding balance was thus Rs. 2,28,844-13-11.

39. The following table exhibits the details of this amount and the progress made in recovering the various sums due on account of outstanding as well as of current revenue :—

| Rates. | To be collected. | | | | Collected. | | | Uncollected. | Deduct Irrecoverable Bills. | | | | | Balance Outstanding at the end of 1883-84. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Opening Balance Outstanding. | Total of Bills issued during 1883-84. | Amount paid by Government and Port Trustees without Bills. | Total. | On account of former years. | On account of 1883-84. | Total. | | On account of former years. | | | On account of current year. | Total. | On account of former years. | On account of 1883-84. | Total. |
| | | | | | | | | | Time-barred Bills. | Bills cancelled as erroneous. | Total. | | | | | |

40. Of the balance (Rs. 3,67,346-3-8) shown as outstanding, Rs. 2,59,159-14-4 have since been collected; at least Rs. 15,000 may be ascribed to bills which are practically irrecoverable, and Rs. 57,293-5-3 are due to claims against the G. I. P. Railway Company, which are still *sub-judice*, and in respect of which Rs. 13,989-14-7 have already been credited, pending final settlement, to Deposit Account.

*Wheel Tax.*

41. The opening outstanding balance on account of Wheel Tax, after deducting bills time-barred (Rs. 1,252-8-7) and cancelled as erroneous (Rs. 65), was Rs. 10,291-9-2 (inclusive of the amount for which bills were awaiting issue at the close of 1882-83). The demand for the current year was Rs. 1,55,937-8-0, showing an increase of Rs. 15,032-2-0 over that for the previous twelve months. The causes of increase are shown in the following table:—

| For 1882-83. Number at the end of 1882-83. | | | | | For 1883-84. Number at the end of 1883-84. | | | | | Increase. | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 4-wheeled Carriages. | 2-wheeled Carriages. | Horses. | Ponies. | Amount for 12 months. | 4-wheeled Carriages. | 2-wheeled Carriages. | Horses. | Ponies. | Amount. | 4-wheeled Carriages. | 2-wheeled Carriages. | Horses. | Ponies. | Amount. |
| 2246 | 428 | 2540 | 227 | Rs. a. p. 1,40,905 6 0 | 2629 | 505 | 2981 | 291 | Rs. a. p. 1,55,937 8 0 | 383 | 77 | 441 | 64 | Rs. a. p. 15,032 2 0 |

42. To the amount here given must be added Rs. 798-8-0 ascertained in the year under report as due for the previous year. The total number of bills issued during the year (apart from those awaiting issue at the close of the previous year), was 8,277, and the process of recovery was attended with the results shown below :—

| To be collected. | | | Collected. | | | Uncollected. | Deduct Irrecoverable Bills. | | | | | Balance outstanding at the end of 1883-84. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | On account of former years. | | | | | | | |
| Opening Balance Outstanding. | Total of Bills issued during 1883-84. | Total to be collected. | On account of former years. | On account of 1883-84. | Total. | | Time-barred Bills. | Bills cancelled as erroneous. | Total. | On account of current year. | Total. | On account of former years. | On account of 1883-84. | Total. |
| Rs. a. p. 10,291 9 2 | Rs. a. p. 1,56,738 0 0 | Rs. a. p. 1,67,027 9 2 | Rs. a. p. 9,235 0 9 | Rs. a. p. 1,35,852 12 0 | Rs. a. p. 1,45,137 12 9 | Rs. a. p. 21,889 12 5 | Rs. a. p. 406 3 8 | Rs. a. p. 390 0 0 | Rs. a. p. 796 3 8 | .... | Rs. a. p. 796 3 8 | Rs. a. p. 1,008 12 9 | Rs. a. p. 20,084 12 0 | Rs. a. p. 21,093 8 9 |

43 It will be seen that the balance outstanding at the close of the year was Rs. 21,093-8-9; of this sum Rs. 16,743-4-0 have since been collected. To the collections on account of Wheel Tax shown above must be added Rs. 94,896-14-0 recovered from the owners of licensed public conveyances, and Rs. 16,814-4-0 realized from the toll at Mahim and Sion Causeways.

*Miscellaneous Revenue.*

44. Rs. 5,194-8-11, against Rs. 7,242-14-3, in the previous twelve months were derived from Notice and other Processes and Inspection Fees. Rs. 1,795-8-0 were received on account of hire of Water Meters.

*Tax on Fire Insurance Companies.*

45. The collections under this head amounted to Rs. 24,70 in the year under report, as against Rs. 25,600-3-9 for the 12 months of the preceding year.

*Refunds.*

46. The total of Refunds allowed, under Section 82 of the Municipal Act and on account of over-collections under all heads, amounts to Rs. 7,591-7-8, as against Rs. 15,113-7-8 during the 15 months of 1882-83. The subjoined table gives the details of these figures.

A comparison with the figures of the previous year shows a net increase of Rs. 3,767-10-9.

*General Remarks.*

48. From the foregoing paragraphs it will be gathered th the actual Revenue of the year from Property Rates, Whe Tax and Miscellaneous Items connected therewith, w Rs. 20,49,255. The entire cost of the Assessment and Co lection Department is Rs. 91,078. The Revenue from Tow Duties is Rs. 6,67,351, and the cost of the Collection through the Port Trust and the two Railway Companies and of the necessary Refund arrangements is Rs. 44,308. The Revenue from Tobacco Duty is Rs. 1,74,306, and the cost of Collection through the Customs Department is Rs. 15,723. These are the principal heads of Municipal Revenue, and it is worthy of notice that the percentage cost of Collection is as follows:—

| | |
|---|---|
| Property Rates, Wheel Tax, &c. | 4·4 |
| Town Duties | 6·75 |
| Tobacco Duty | 9·02 |

Distributing the above items of Revenue per head of population, I find the following results :—

| | | |
|---|---|---|
| Property Rates | Consolidated Rate | 1·27 |
| | Water Rate | ·70 |
| | Halalkhor Service | ·31 |
| Wheel Tax | | ·29 |
| Town and Tobacco Duties | | 1·09 |
| | Total | 3·66 |
| Total, exclusive of Water and Halalkhor Rates which are for direct services rendered | | 2·65 |

49. It will be seen from a previous paragraph ( 34 ) that there were complaints in 1,406 cases against the valuation of the Assessment Department. The property to which the complaints related was valued at Rs. 11,37,278. Reduction was allowed in 528 cases to the extent of Rs. 74,087. There were subsequent appeals to the Chief Presidency Magistrate in 164 cases, aggregating a valuation of Rs. 59,485. In 15 of these cases, compromises were accepted resulting in a reduction of Rs. 5,754. Out of the remaining 149 cases, in 8 the claims were admitted by the Magistrate chiefly on the ground of statutory exemption, and the rest were rejected, the total reduction amounting to Rs. 4,340.

---

° This includes the cost not only of Collection but also of the Assessment of properties.

50. These figures speak well for the increasing care with which the Assessment has been conducted. The progress made in obtaining a more complete registration has already been referred to, and the increase in revenue, both from the Property Rates and Wheel Tax, cannot but be satisfactory. The results already achieved, although as yet confessedly imperfect, must be encouraging to the Department and promise well for the future. The new organization has been longer than I should have wished to get into full working order: the staff, superior and inferior, were more or less devoid of experience in the work allotted to them and have only by degrees gained an insight into the method of new system of accounts which must be followed implicitly to ensure punctuality and success. But the Assessor and most of his subordinates have worked with great zeal and industry, and the new Ward Superintendents, especially Messrs. Anandrao Lakshman, Khakibhai Nensi and Babji Master performed good service.

51. The work of the Department is most unnecessarily hindered and delayed, and the Municipal Revenue affected by the present provisions of the law which require all complaints to be heard before any bills are issued. It was hoped long ere now this defect would have been remedied by a change in the laws. It is a patent absurdity that the issue of bills relating to property valued at Rs. 1,22,22,147, which are undisputed, should be delayed because certain bills relating to property valued at Rs. 11,37,278 are to be the subject of further inquiry.

52. It is also a matter of consideration whether the Section of the Act which allows in advance $\frac{1}{5}$th Remission (or Drawback) in the case of buildings let out in single rooms, should not be altogether expunged or materially altered. It is very doubtful whether the benefits conferred by this Section are at all commensurate with the trouble and delay which the inquiries necessary to its working involve. Thus in the current year there were 1,169 claims, out of which 682 were found to be inadmissible: the aggregate Remission allowable on the remaining 487 amounted only to Rs. 1,419-8-6. Pending inquiry into these 'Remission' cases, the issue of all other bills is delayed.

## V.—Public Works.

53 The principal New Works in progress during the year were as follows :—

*Works out of Loan Funds.*

*Construction.*—Storm Water Drain in Khetwadi Rs. 20,409-9-9 ; Storm Water Drain in Tarde Rs. 1,00,686 ; Storm Water Drain in Bellasis R Rs. 1,61,819-5-0 ; Storm Water Reservoir on the F Rs. 58,409-4-0; Enlarging old open Main Drain, Rs. 27,317- Laying a new 24" Main and removing old Pipes, Rs. 20,9 Ovoid Sewer in Clerk Road, Rs. 3,704-11-1 ; Ovoid Sewe Charni Road and Queen's Road, Rs. 37,494-6-9 ; Pipe S in Kamathipura, Rs. 21,770-3-8 ; Addition of two new En to the Pumping Station, Rs. 48,805 ; Service Rese at Malabar Hill, Rs. 73,926-11-9 ; Service Reservo Bhandarwada Hill, Rs. 1,22,074-3-9 ; New delivery and let Mains for the latter Reservoir, Rs. 2,15,568-4-5.

*Surveys and other Preliminaries.*—Catch-water Cha at Vehar and Tulsi, Raising Tulsi Dams, New 24" from Vehar, Rs. 10,859-1-10 ; Ovoid Sewer and new across the Old Race Course, Rs. 720 ; Ovoid Sewer Crawford Market to Mint, Rs. 560 ; Ovoid Sew Clerk Road (Extension), Rs. 720 ; Pipe Sewer in Clare Rs. 600 ; Pipe Sewer in Haines' Road, Pipe Sewer in A Road, and Pipe Sewer in DeLisle Road, Rs. 1,000 ; Connections in First Drainage Section and Kamathipu

*Works out of current Revenue.*

*Construction.*—Charni Road Extension, Rs. 10,94 Girgam Road improvement, Rs. 21,000 ; Gowalia Road improvement, Rs. 11,000 ; Kalachoki Rs. 13,724-6-0 ; New Water Mains in Jail Road Dongri Koli Street, Rs. 11,101-3-8 ; New Water Mai Gibbs and Khamballa Hill Roads, Rs. 7,721-12-3 ; H Department Stables at Nal Bazar, Rs. 10,036-10-1 ; H Department Chawls at Bori Bandar, Rs. 14,344-4-11 ; Houses at Grant Road, Rs. 10,225-1-9.

*Surveys and other Preliminaries.*—Fort Sewe Rs. 1,999-5-8 ; Dhobiwada Pipe Sewer, Rs. 50-0-0 ; I from Warli to Parel ; Street improvements in Mumba Rs. 1,20,000-0-8.

*Note.*—The sums opposite the works represent as nearly as possible the actual cost of work done during the year

54. Of the works relating to water supply those specially deserving of notice are the measures proposed and now in progress for increasing the quantity of water obtainable from the Vehar and Tulsi Lakes. When the Budget for the year under report was being considered, I addressed the Town Council on the subject with the result that the proposals then made were adopted, and that the Corporation upon the recommendation of the Town Council resolved on the 16th May 1883 that application should be made to Government for sanction to raise a loan of Rs. 20,88,000, by which provision was to be made for the works (amongst others) to which I now refer. The sanction of the Government of India to the proposed loan was communicated on the 18th January 1884. The nature and object of the works undertaken will perhaps best be explained by an extract from the explanatory memorandum which accompanied the proposals when they were laid before the Town Council, the Corporation and Government.

Water Supply.

"Many complaints have been received from time to time from inhabitants of the outlying districts, especially Mahim, Gowari, Matunga and Sion, as to the inadequacy of the present water supply. The justice of these complaints has been admitted by the Town Council, and, on more than one occasion, the Municipal Commissioner has been asked to devise some measure of relief. Speaking of Gowari, the Health Officer in his last Annual Report writes :—'This village has been 'dreadfully affected by the scourge of guinea-worm : it draws its water supply 'from a well of muddy water about a mile to the east of the village. The 'villagers have begged for Vehar water. In the village out of 297 people 'only one person had never suffered from guinea-worm.' This is an aggravated case of distress, but there is no doubt of the fact that there is not a hamlet from Kurla to Parel in which the inhabitants do not suffer from the deficiency in the supply of pure water. Kurla itself is outside the city, but its sanitary state must, if only from a selfish point of view, be a matter of concern to people living in the city. It is exceptionally prone to visitations of cholera; it has no water supply of its own, and is too poor to embark on any independent scheme for bringing in water from a distance. Something should be done to remedy this state of things, and the only question is, What shall be done?

Vehar.

Before deciding this question, I think some attention should be given to a fact in connection with the new Bhandarwada Hill Reservoir, which, as far as I am aware, has hitherto been very little noticed. When first it was determined to construct the Reservoir the idea was to build it at a height of 148 T. H. D., but afterwards, in order to increase the effective pressure of the supply of water from the Reservoir all over the city, it was determined to place the floor at a height of 175 T. H. D. Nothing less, it was thought, would suffice for the delivery of water on the upper storeys of many of the highest buildings or for an ample supply in case of

fires. This determination was doubtless a wise one, but one impor
result of it will be that the quantity of water delivered into the
servoir will be less by 1¾ million gallons per diem than that which
now obtained by the city from Vehar direct. And this loss is estimated
on the assumption that the 32″ main from Vehar will do duty exclusively
in conducting water to the Reservoir without supplying offshoots on the
way. Indeed the whole object of a Service Reservoir would be stultified if
direct connections with the main were afterwards to be allowed *ad libitum*.
Any water taken from the main before it reaches the Reservoir would
*pro tanto* increase the difference between the quantity at present supplied
to the city and that which will be delivered into the Reservoir. Seeing that
the main must not be tapped on the way, and that 1¾ million gallons per
diem now delivered in the city will not reach the Reservoir, we are (in
default of other measures) in this position, *viz* :—

That 175 million gallons more will remain in Vehar, and less will be
consumed in the city, and that to supply the areas now supplied (more or
less effectively) a large expenditure must be incurred in laying mains *back*
from the Reservoir to the northern parts of the Island.

To some extent no doubt the better control which the Reservoir will
afford over distribution and the better prevention of wastage will compen-
sate for the decrease in the quantity available for consumption, but it
appears to me that the only effective remedy will be to circumscribe the
area supplied from the Reservoir, and to provide for the supply of the re-
maining area by utilizing the balance of 1¾ million gallons per mile, which
unless something is done, will be left behind in the Lake. The only way
to utilize this balance will be by laying a new pipe from Vehar, and the
" remaining area" to which it should be applied will naturally be the
northern parts, or in other words 'the outlying districts,' of the Island.

These remarks will have sufficed to show why in my opinion the effect
of the construction of the Bhandarwada Reservoir must be considered in
connection with any proposed improvement in the water supply of those
villages which have so justly complained.

The water which cannot with the 32″ main be delivered at the level
of the Reservoir, and will therefore at present remain in the Vehar Lake
can be brought to the Reservoir by the laying of a new main at a cost of
from five to six lakhs; the provision of the necessary distributing mains
from the Reservoir would probably entail a cost of three lakhs more; the
accommodation of the filter beds would barely suffice, and from the nature of
the ground this accommodation could not be increased. But there is no ad-
vantage to be derived from laying a new main from the lake to the Reservoir
which could not equally be obtained by circumscribing the area supplied from
the Reservoir, and laying the new pipe only so far as it may be required for
the districts outside such area; the cost which this would entail would also
be about six lakhs : in other words, the cost of the distributing main would
be saved, except that for the supply of *filtered* water it would be
necessary to construct filter beds below the Vehar Dam at a cost of
Rs. 67,000. It is better, both from an economical and a sanitary point of
view, that any additional filtering accommodation which may have to be
provided should be provided at the Lakes, and not at the delivery point
when this can be done, as in the present case, without such loss of
as to reduce the supply below the quantity required.

But though an expenditure of Rs. 6,67,000 would suffice to bring
after filtration for the use of the outlying districts, the 1¾ million ga

which would otherwise be left behind upon the opening of the Bhandarwada Reservoir, this is not all that I should recommend to be undertaken. Recent surveys have shown that at a cost of Rs. 10,000 two catchment channels can be constructed on the eastern and north-eastern slopes of the Vehar Lake, which will increase the area of the present water-shed by 350 acres. Mr. Braham says :—'This work should be carried out, for when 'the Bhandarwada Reservoir is completed it will be of the greatest import-'ance to fill Vehar *every year*, because each foot the surface of the Lake 'falls materially reduces the quantity of water which the 32″ main can 'bring into the Reservoir.' In other words, without some such provision the deficit of $1\frac{3}{4}$ million gallons already referred to is liable to be increased in a bad year, and still more so in a succession of bad years. So important is this consideration that I think it will be found desirable hereafter to dam up a portion of the Kennery Valley representing a catchment area of $2\frac{1}{2}$ square miles, and to lead into Vehar the water thus impounded. This is not part of my present proposal, and therefore there is no immediate occasion for me to say more about it, but the reason for my now referring to it is that in the view of such a project being eventually carried out (as I think should be) it will be wise, instead of laying a new main capable of carrying merely $1\frac{3}{4}$ million gallons or so per diem, to lay a main that will suffice for the increased supply of 2 (altogether $3\frac{3}{4}$) million gallons per diem which will be then available. To meet these conditions the cost of the new main will be $7\frac{1}{2}$ lakhs instead of 6 lakhs. Thus the total expenditure which I recommend inclusive of catchment channels and filter beds is Rs. 8,27,000. I advocate this not only as the most practical way of meeting the wants of the population of the northern part of the Island, but as a measure of security rendered necessary by the adoption of the Bhandarwada Reservoir scheme: the greater the area that can be supplied with filtered water by a new direct main the less will be that dependent upon the reduced quantity available from the Reservoir.

Tulsi.

When, with reference to the New Works proposed for 1881, the expediency of raising the Tulsi Dam was discussed, a good deal was written on the relative advantages of a 5 ft. and a 6 ft. raising. Mr. Forde and Mr. Braham all along advocated the former, but it was determined that at first, at any rate, only the 6 ft. addition should be made. This work was only just completed at the beginning of the monsoon of 1881, so that under no circumstances could the additional raising have been undertaken then. Moreover, it was thought that a necessary consequence of such additional raising would be to submerge an area larger than that which had then been acquired by the Corporation, and therefore that a preliminary must be to acquire such further area. If the only question were as to increasing the annual water supply, the experience of two monsoons would seem to show that no further raising would be profitable, because in neither year has any water passed over the waste weir. But though this was the immediate issue before the Corporation when the 6 ft. raising was sanctioned, it is not the only one. We have to consider not only the annual supply available, and the means necessary to impound an average rainfall ; but the means for enabling us to take advantage of exceptionally good seasons, in order that by impounding such extra quantity as would then otherwise run to waste, we may secure a reserve against a season of scarcity, and a purer supply in ordinary years. We have not merely to consider whether the Tulsi basin in its present condition is quite sufficient for the average annual yield of the Tulsi gathering-ground : it would be just as

reasonable, as Mr. Forde says, to argue that as the Vehar gathering-ground can only supply on an average 3,000 million gallons yearly, it is useless to have a lake of 10,000 million gallons' capacity. At present we may say that we drink the Tulsi Lake to the dregs every year and have no reserve. If we could have the Tulsi Lake so full that at the end of the dry season we were drawing off at a level of 445 T. H. D. instead of, as hitherto, at 413, my belief is that we should hear very little more about the inferior quality of Tulsi water as compared with that of Vehar. The recent purchase of the whole of the Tulsi gathering-ground has settled the question of submergence, and therefore there is no longer on that score any obstacle to the work being undertaken.

Though the considerations which I have mentioned fully justify, in my opinion, the expenditure which will be entailed in raising the Dams to an additional height of 4 feet, I do not at all overlook the desirability of at the same time extracting from Tulsi a larger annual quantity, if that be possible, and of making the present 24" main do full duty. The present daily yield from the lake is estimated at 4½ million gallons, whereas the main is capable of discharging 5½ million gallons.

Special surveys, &c.

Special surveys have been made, and the result shows that catchwater drains to collect water which does not at pesent drain into the lake could be dug at a cost of Rs. 1,05,71

This work necessitates the diversion of four nullas: the two smaller on by earthen banks and open cuts, and the two larger by means of mason dams. The uppermost of the two former is diverted into the lower, and th again into an arm of one of the larger nullas. The water is taken from th most northerly of the larger nullas by means of a covered aqueduct whi communicates with an open channel lined with masonry. This is continu until it reaches the Tulsi Lake. Near the Lake a cutting of some dep is required. The water channels are capable of discharging a rainfall twelve inches in 24 hours on the supposition that the whole of it collected. At the two masonry dams waste weirs are provided for surpl water to the extent of 4 inches of rain per hour.

The total increase to the Tulsi gathering-ground by the construction the above works will be about 220 acres, and this area is in the high hills the north-west of the Tulsi Lake on which the heaviest rain falls. T addition to the Lake from this increased catchment will be about thr quarters of a million of gallons per diem in ordinary seasons.

The whole of the works above mentioned are on ground which belongs the Municipality."

55. Before the close of the financial year not only had t detailed surveys been completed, but considerable progre had been made with the catchwater channels, both at Veha and Tulsi. The former promised to be effective for the ensuing season, the completion of the latter entailing rock and masonry work would, of necessity, require a longer period, but there is every reason to believe that they will be serviceable for the monsoon of 1885, by which time also it is to be hoped that the dams of the Tulsi Lake may be raised to the additional height proposed. The laying of the new main (for which a contract has recently been let)

will occupy two seasons, but the half that is expected to be ready by April next (which will be connected with the existing main at Kurla) will confer an appreciable benefit in the next hot season. With reference to the Tulsi dams I may mention that the expediency of making the previous increase to the height (6 ft.) was well established by the experience of the present year, as the height of water in the Lake on the 31st March was 6 ft. over the level of the old waste weir, and consequently not only was a larger supply available but the water was purer in quality—the draw-off being at a higher level than in any previous year.

56. The progress of work at the two Reservoirs was not satisfactory, the completion of the contract work in both cases having been delayed long over contract time. The only work in hand at the Malabar Hill Reservoir was the construction of the Filter Beds, and these, though not ready for working within the year, were complete according to the design before the end of the hot season. The roofing—which will form the subject of a separate contract—has still to be done. The John Hay Grant Reservoir[o] at Bhandarwada Hill is now virtually complete, but it is very doubtful whether it can do full duty until the new main has been laid from Vehar. The work of laying the new mains (48" and 32") and making the several junctions in connection with this Reservoir was attended with considerable difficulty, and the water works staff rendered excellent service in carrying it through. The Engineer, Mr. Braham, brought specially to my notice the valuable assistance which he had received from Mr. Rowe, the Superintendent of Workshops.

57. The new main laid in Dungri Koli Street was much needed to give a better supply to that crowded section of the city, especially in cases of Fire. During the year, 71,987 feet of old mains were examined by the Waste Water Prevention Staff, and wastage to the extent of 384,000 gallons per diem was discovered and rectified. I propose as soon as possible to introduce the Deacon Meter system for the prevention of waste which has been found to answer so well in Liverpool, Glasgow, and other towns; and with the sanction of the Corporation, provision has already been made for the purpose in the Loan already alluded to.

[o] In this Reservoir the filtered water alone is roofed: in the Malabar Hill Reservoir the whole area of the Reservoir is to be roofed, unfiltered water and filter beds included.

58. During the year, 437 new connections were granted, the total number now being 13,681 ; of properties so supplied, 12,737 pay by rate, 785 by meter, and 159 by special terms.

Drainage.

59. Very good progress was made during the year with the large intercepting sewer designed to carry the storm waters from Gowalia Tank and Khambala Hill to the old open main drain on the Flats. The rainfall of that neighbourhood will no longer contribute to the flooding of Khetwadi : the monsoon of 1883 showed that the measures already carried out in that neighbourhood (Khetwadi) had by the raising of low lands and the construction of three rain water sewers produced a marked beneficial effect. But though these local sewers and the large intercepting sewer already spoken of will do much to mitigate the longstanding evil, nothing like a complete remedy can be looked for (at times when a very heavy rainfall happens to be coincident with neap tides) until the other large intercepting sewer to the east, and the storm water reservoir on the Flats have been completed. The completion of the latter sewer will still occupy another year. The waters from Pydhoni and districts eastward of the Parel Road being carried direct to the Flats will then no longer prevent the floods of Khetwadi from finding an exit in the direction of Falkland Road. There is nothing to delay the completion of the Reservoir on the Flats save the diversion of the Tulsi Pipe Line. The greater part of the new main has been laid and when the old main has been taken up, the Reservoir work will be proceeded with. If funds allow, it will be desirable to make it at once of the size originally recommended by the Consulting Engineer (200 acres), instead of confining it to the 136 acres now contemplated. Measures should also be undertaken as soon as possible for the relief of the more suburban districts from floods, especially as buildings are being rapidly extended over ground which a few years ago was swamp or ricefield.

60. But in order to make any satisfactory arrangement for the disposal of storm water at any rate from the more populous parts of the city it is absolutely necessary that the disposal of sewage should not be ignored. The two things must be considered together. Local conditions render it impossible that a heavy fall of rain should be passed off rapidly when

tides are high. It must therefore either be led to a temporary resting place where it will do as litttle harm as possible until it can obtain outlet to the sea, or it must be got rid of by pumping. The latter alternative was estimated by the late Mr. Ormiston at a cost that makes it prohibitive, the former alternative is the one which has been adopted. But it is very evident that the channel which conveys the rain water to the reservoir should not also be a carrier of sewage. Yet so it is, and this sewage pollutes the channel to an indescribable degree, and pollutes the Flats on to which the channel overflows and will pollute the Reservoir (though not quite to the same extent for periodical cleansing will be feasible). In past years there has been no help for this, but now that a thoroughly good sewage carrying sewer leading to the new Pumping Station has been constructed, there will be no excuse for allowing the intolerable nuisance to continue. Yet it must continue until all the sinks, gullies and cesspools of the city are connected with the new sewers instead of the old sewers which also carry rain water in the monsoon and discharge on to the Flats.

61. The new Pumping Station was fitted with its full complement of engines and has been found so far to answer admirably. The machinery is calculated to accommodate the whole of the sewage of that portion of the Island to which the Report of the Drainage Commission of 1877 applied. The old Pumping Station with its outfall into the Love Grove channel was finally abandoned, and the Municipality were after 14½ years freed from the liability of paying Rs. 300 per mensem on account of the nuisance caused by that outfall. The erection of a covered chamber and kiln for the disposal of the refuse collected at the point where the main sewer reaches the Pumping Station, is much needed.

62. The Intercepting Sewer (known as the Queen's Road Sewer) designed to prevent the discharge of sewage into Back Bay was in course of construction the whole of the year. The early progress was good, but after the monsoon when the work became more difficult it was not satisfactory. So great was the sewage nuisance on Back Bay in the early part of 1883 that the Corporation offered a bonus of Rs. 10,000 if the contractor would in return undertake to complete

the sewer by the commencement of the monsoon of 1884 instead of in February 1885, the contract time, and this he agreed to do. This agreement was entered into on the 1st February 1884. The month of March had hardly expired when the Contractor threw up the work, and I had to make arrangements for carrying it out departmentally. This was done under the Executive Engineer, Mr. Walton, and the energy with which the work was brought to a conclusion by the end of June reflects the greatest credit upon him and the staff employed under him. In alluding to the completion of the work I am, strictly speaking, going beyond the limits of the year under review, but this brief reference seemed to be desirable.

63. The new ovoid sewer in Clerk Road to the Six Roads Junction was completed, and a further extension to the Victoria Gardens was sanctioned and commenced before the close of the year. This main sewer will serve the branch sewers which are to be laid from the gas works and Parel on the one side, and from Byculla and Clare Road on the other. Provision for these works was made in the new loan already alluded to, and contracts were let in March. This district, in which fresh buildings are constantly springing up, has hitherto been undrained, and has been the subject of frequent complaints. Similar arrangements were made with regard to a new ovoid sewer from the Mint to the Crawford Market, by which the sewage of the Fort and of the southern portion of the Port Trust Estate, hitherto discharged into the Harbour, will be conducted to the New Pumping Station at Love Grove. But, during the monsoon, the sewage of the Fort must, until separate branch sewers are provided for the segregation of sewage from storm water, continue as heretofore to find an outlet into the Harbour. So too on the western side of the city from the Secretariat to Chaupati, notwithstanding the Queen's Road Intercepting Sewer, the continuance of the numerous sewage outfalls into Back Bay is subject to the same conditions. Careful surveys were made of the sewerage of the Fort. The condition of most of the existing sewers is as bad as it can be, and plans were prepared for a complete new system estimated to cost Rs. 4,53,329. The execution of this work should not be delayed. Together with the sewerage of Nagpada, so repeatedly brought into prominent notice by the Health Officer, and of the districts immediately

abutting on the Queen's Road, it merits the earliest possible consideration of the Corporation.

64. The pipe sewerage of Kamathipura was completed, and tenders were invited for the supply of iron materials for house connections there and in the First Drainage Section,* and for the execution of the work of laying and fixing them. No tender for the work was received; subsequently one firm of contractors made an offer on terms too high to be entertained. For the supply of iron work for Kamathipura only a tender was eventually accepted on the 13th March 1884. The work will be proceeded with as soon as the materials are received. All other house connection work is in abeyance, pending the further sanction of the Corporation. I have had occasion to notice that much greater difficulties attend the use of syphons in this country than in England, and I have suggested the alternative course in certain cases of connecting the house gullies, instead of the individual houses, with the new sewers. The great object to achieve for the sanitary improvement of the city is to carry off polluted water or house sullage by means of the new sewers, and to do this it is absolutely necessary that a mode of ingress inaccessible to storm waters, or, in other words, above the ground level, should be secured. Until this is done, most of the new sewers are practically useless, and the evils, for the removal of which they were designed, continue unabated. Old house connections, where they exist in many parts of the city, are generally in a most deplorable condition, and so are the drains into which they discharge.

Roads and Building.

65. One of the greatest improvements carried out in the year was the extension of Charni Road to Grant Road effected partly by making a new road altogether through the cultivated ground lying between Girgám and Khetwadi, and partly by widening the street known as Khetwadi 15th Lane. This extension has created a new thoroughfare which was much needed: it should, to make the work complete, be carried on to the Falkland Road Dharamsala. An entirely new Road was also made from Chinchpokli Station to Sewri road, giving a better access to the quays on the Frere Reclamation. It has

* This comprises Market, Mandvi, Umarkhari, and parts of Bhuleshwar, Khetwadi and Girgám.

also been the means of assisting to improve the sanitary conditions of adjacent properties and of opening up new building sites.

66. Roads from Warli to Parel and from the Byculla Hotel across the Old Race Course to the centre of the Flats were also undertaken, but further reference to them will be more appropriate to next year's Report. The latter road was provided for in the New Loan already alluded to.

67. Besides these new roads there was a very material addition to the roads under Municipal control and dependent on Municipal maintenance caused by the transfer of Port Trust roads on the Elphinstone Estate about 4·14 miles in length. These roads would have been transferred before, but that they failed to comply with the requirements of the Municipality as to sewerage. They were taken over as soon as a settlement was arrived at regarding these requirements.

68. The purchase of 3,000 square yards of land at the Mombadevi Tank deserves special notice. Until recently, this property has been covered with firewood sheds and cattle stables of inferior construction. By the acquisition additional air space has been obtained in the very heart of the city, and a new outlet has been formed for the traffic of some of the busiest streets which converge at this point. Other important street improvements were the widening of the Girgám Road by 18 feet for a length of 300 yards, and the removal of an awkward corner at the point where the Girgám, Gamdevi, Gowalia Tank and Tardev Roads meet.

69. The steady application of the "Set Back" provisions of the Municipal Act has undoubtedly produced good results, and better results will follow if the amendments to the Act now under consideration are adopted. Nevertheless, this process of street improvement can at the best be but a gradual one, and being carried out piece-meal it very often does not get as much credit as it deserves. There are, however, some quarters of the city, notably the 'Mandvi' District where more immediate and comprehensive measures of street improvement might be introduced with advantage. For such action as is here contemplated, special legislation would probably be required, and a leading feature of the scheme should be the right to acquire not only land to

be utilized as roadway, but such frontages on the road as would derive an enhanced value from the work undertaken.

70. The paving of footpaths made satisfactory progress. One of the chief difficulties that the Municipality has to deal with is the never-ending encroachment which beginning with a plank, a box, or a stool advances to a semi-attached bench, which again is insidiously converted into an 'otla,' first temporary, then permanent, and this becomes (unless detected in time) the boundary line of the future wall of the house.

Road Watering.

71. The watering of roads was done departmentally, and was more efficient than in former years, but a good deal of dissatisfaction is still expressed especially when strong winds are blowing and clouds of dust are swept along the streets from the open spaces of the Esplanade or Kennedy Sea Face.

Street Lighting.

72. During the year, 178 new kerosine, 12 gas, and 4 electric arc lamps were provided. Complaints as to streets not being lighted are found very often to proceed from persons living in private streets, which, if put in proper order by their owners, would be maintained and lighted by the Municipality. Altogether there are now 72·46 miles lighted with gas, 26 miles with kerosine, and 2·33 with electric arc lamps.

73. 1,802 Summonses were issued for offences against the Building Sections of the Municipal Act; in 1,596 of these cases the demands were complied with before further proceedings were taken; in 96 cases the parties were warned and discharged after compliance; in the remaining 110 cases, fines (aggregating Rs. 875) were inflicted by the Magistrate. The want of amended 'Building' Sections and By-Laws thereunder is much felt. An allusion to this subject is made in the Health Officer's Report.

74. The only new buildings erected by the Municipality during the year were the Relief or Rest Houses in Grant Road, and stables and quarters for the Health Department at Nal Bazar and Bori Bandar. The Grant Road Rest Houses were intended primarily, as stated in a former report, to accommodate poor persons who might have been rendered houselese during an epidemic, but they have been most useful during the year as a Cholera Hospital (no other being available). The

extension of stables at Nal Bazar and of labourers' chawls at Bori Bandar was undertaken in order to concentrate the scavenging establishment of the Fort, Mandvi, and Bhuleshwar Wards at their own Ward centres and to set free the Mody Bay Stables, hitherto used by the Health Department, for Milch Cattle.

Public Gardens.

75. I have nothing special to say on the subject of Municipal Gardens that I have not said on former occasions. I may refer to Mr. Walton's remarks. Several improvements in detail have been effected in the Victoria Gardens, and the Northbrook Garden, since it was opened out to the Grant Road by the removal of the walls of the Old Jewish Burial Ground, presents a marked change for the better in its appearance. I still think that a new garden should be formed by terracing the slopes of Malabar Hill below the Reservoir. The question of putting all Municipal Gardens under trained Botanical Superintendence has engaged a good deal of attention, and is still under consideration.

## VI.—Public Health.

76. For the calculation of vital statistics, the Health Officer assumes a population of 807,905, or an increase of 34,709 over that given by the census of 1881. This estimate, following the practice adopted in England, is based on the supposition that the same rate of increase has prevailed since the last census as obtained during the previous decade; such an estimate is necessarily only approximate and liable to error, but is the best available.

77. The number of births registered during the year was 16,631 (15,182 living and 1,449 still-born). The number of deaths, exclusive of still-born children, was 23,530. In the two preceding years the number of births and deaths was as follows :—

| | Births (exclusive of still-born Children) | Deaths (exclusive of still-born Children) |
|---|---|---|
| 1881..... | 16,638 | 21,856 |
| 1882..... | 15,366 | 20,468 |

78. A comparison between the birth-rate and death-rate of Bombay, and that of some large towns in the United Kingdom, presents, in marked contrast, the proportion which the

number of registered births bears to that of registered deaths in this city.

| Towns. | Estimated population, 1883. | No. of births per 1,000. | No. of deaths per 1,000. |
|---|---|---|---|
| 1. London | 3,955,814 | 33·90 | 20·40 |
| 2. Liverpool | 566,753 | 35·20 | 26·60 |
| 3. Glasgow | 515,589 | 38·50 | 28·10 |
| 4. Birmingham | 414,846 | 35·40 | 21·00 |
| 5. Dublin | 349,685 | 28·70 | 29·10 |
| 6. Manchester | 339,252 | 35·90 | 27·60 |
| 7. Leeds | 321,611 | 34·70 | 23·20 |
| 8. BOMBAY | 807,905 | 18·79 | 29·12 |

79. During the first nine months of the year the health of the city was not good. The death-rate averaged 30·79 per 1,000, but fell to 24·12 in the last quarter. The increased mortality was due to cholera, small-pox, and pthisis; the number of deaths from each of these diseases during the past three years having been as follows :—

| | 1881. | 1882. | 1883. |
|---|---|---|---|
| Cholera | 546 | 192 | 1,027 |
| Small-pox | 35 | 92 | 1,461 |
| Pthisis | 2,232 | 2,729 | 3,144 |

80. Comparing the number of deaths in the several sections of the community, that is, in those which constitute the permanent residents, I find that as usual the highest death-rate (58·31) is amongst the Jains, and the lowest (22·96) amongst the Parsis. It will be seen from the Health Officer's Report that the greatest number of deaths occurred in the Umarkhári district, and that the percentage of deaths on population was highest in Tarwádi, the sub-division situated on the confines of Mazagon and Byculla. Both circumstances are attributable to the epidemic of cholera.

81. During the first quarter of the year there were 5 cases of cholera, of which 4 proved fatal: in the second quarter there were 169 seizures and 135 deaths: in the third quarter the number of cases increased to 1,217, of which 821 proved fatal: and in the last quarter the number of cases was 83, and of deaths 67. In his Quarterly Reports the Health Officer again drew attention to the fact that the rate of mortality from cholera was far higher among Ratnagiri-born people than amongst any others. The temporary resuscitation of the epidemic towards the close of the year is ascribed to the fact that, owing to a burst in the Vehar main, certain quarters of the city were more or less dependent on tank and well

water. Doubtless, one of the best safeguards against the danger of recurring epidemic will be to secure such a supply of lake water as will be equal to a constant service, and to close the contaminated sources to which either of necessity or of prejudice many people still resort for their drinking water.

82. Both Dr. Weir and Dr. Davidson deserve the greatest credit for the manner in which they devoted themselves to the assistance of sufferers and to checking the spread of the disease. Special measures were taken, with the concurrence of the Town Council, by the former officer when acting as Municipal Commissioner. For the more thorough cleansing and disinfection of affected areas, the strength of the subordinate establishment was increased : the services of seven medical men were engaged, one for each section of the city; and a temporary hospital was opened in the newly-erected Rest Houses at Grant Road. This hospital was maintained under the careful management of Dr. D. MacDonald from the 28th July to the 13th Octr., during which period 145 cases were treated, of which 74 terminated fatally.

| Names | Wards. |
|---|---|
| Dr. P. Palanji..... | A |
| „ J. Vaz ..... | B |
| „ H. N. Seervai ... | C |
| „ A. Atmaram ... | D |
| „ N. N. Katrak ... | E & F |
| „ W. G. Balfour... | E & F |
| „ P. C. DeSouza... | G |

All these gentlemen received the thanks of the Corporation for the good services rendered by them. One of them, Dr. P. C. DeSouza, being a member of the Corporation, accepted no fees, but gave his services gratuitously.

83. Again, from the 6th January 1884 to the 9th February 1884, a temporary hospital was organized on the same premises as before under the personal superintendence of the Acting Health Officer. Out of 42 persons admitted to this hospital, 33 died.

84. The special measures taken in connection with the two outbreaks of cholera entailed altogether an expenditure of Rs. 21,547, under the following heads :—

| | Rs. | a. | p. |
|---|---|---|---|
| Remuneration to Medical Officers and Hospital Staff ..... | 3,205 | 13 | 2 |
| Medicines and Diet of Patients..... | 1,689 | 10 | 6 |
| Increased cost of scavenging and disinfection..... | 15,100 | 14 | 9 |
| Water supplied in carts to the inhabitants of out-lying districts..... | 1,010 | 15 | 9 |
| Miscellaneous ..... | 539 | 7 | 7 |
| Total...Rs. | 21,546 | 13 | 9 |

85. The great mortality from small-pox occurred in the first half of the year, more than one-third of the total number of deaths having been in the month of March. Of 1,176 persons who died between January and July, no less than 693 were natives of places outside Bombay, and the Health Officer truly observes that, in order to protect Bombay from this scourge, it is not only necessary that vaccination should be rigidly carried out in the city itself, but also in the mofussil. Out of 1,041 persons who died of small-pox in the first quarter of the year, 560 are known not to have been vaccinated, of 133 nothing is known, the remaining 348 are said to have been vaccinated, but the Health Officer presumes that the vaccination must have been of ancient date.

86. During the prevalence of the epidemic active steps were taken for the purification of infected buildings, and a hospital camp was pitched in the walled enclosure belonging to the Municipality on Arthur Road. Here, between 22nd February and 31st May, 245 patients were admitted, of whom 38 died. Every effort was made to extend vaccination as much as possible, and the result was most marked, for it will be seen by a reference to the Vaccination Return, printed at page 224, that the number of persons primarily vaccinated during the first quarter of the year was 9,241, that is, nearly double the number vaccinated in any quarter of the previous two years. The increase in the number of adults and persons beyond the age of infancy, who were vaccinated for the first time during this quarter, is specially noticeable, and still more remarkable as showing the impetus given to vaccination is the increase in the number of persons re-vaccinated. These cases numbered 13,778—more than 25 times as many as were reported in any quarter of the previous two years. The return does not show how this great increase in the number of re-vaccinations is distributed amongst the various races or castes, but looking at the yearly total of the primary vaccinations, I see that, as far as they are concerned, the improved result is accountable to Parsis, Native Christians, and Low-Caste Hindus.

87. The total number of infants under one year who were successfully vaccinated was 14,352. This compares favourably with 13,316 in 1882 and 13,220 in 1881, and bears a

better relation to the registered number * of births than did the figures of those years. It is desirable that in future there should be furnished, with the Health Statistics, a statement showing, against the total number of births, the percentage of children who have been vaccinated, or who have died before vaccination, or whose vaccination has been postponed for some cause or other.

88. The health history of the past year has made it more than ever apparent that special hospitals should be provided for the reception of cholera and small-pox patients. The subject attracted the attention of Government, and is now being considered by a Special Committee of the Corporation. As it will shortly be dealt with in a separate report, I need not further allude to it here. It is sufficient to say that the proposed hospitals will be of the simplest possible structure, consisting, like the recently erected Rest Houses in Grant Road (which have proved exceedingly useful), of little more than a good plinth and a roof supported by iron columns. The walls, consisting of matting or other inflammable material, will be put up when required, and destroyed when the particular occasion for them has ceased. The chief difficulty lies in the acquisition of suitable sites on terms commensurate with the means of the Corporation.

89. Before passing from the subject of hospitals, I should mention that one of the best known Hindu families in Bombay have most liberally offered to provide a hospital accommodating 75 beds, and to pay the cost of the necessary establishment for one year if the Municipality will undertake its further maintenance. The hospital may either be a General Hospital or a Fever Hospital, and the only proviso is (subject to a certain limit of expenditure) that it is to be established in some central situation between Bhuleshwar and Girgam. This project will be discussed in the separate report already alluded to.

---

* Comparing the number of recorded vaccinations with the number of recorded births, it would appear that 5·46 per cent. of the children born in Bombay are not vaccinated, but from what has already been stated there is but too good reason for believing that the recorded number of births must be considerably short of the actual number ; hence I conclude that a large percentage of children still escapes vaccination.

90. The following is a summary in the usual form of the main heads of Expenditure and Receipts in the Health Department :—

THE EXPENDITURE IN THE VARIOUS BRANCHES OF THE HEALTH DEPARTMENT.

| | Rs. | a. | p. |
|---|---|---|---|
| General Supervision | 41,068 | 1 | 8 |
| Conservancy Branch | 7,53,406 | 14 | 11 |
| Cemeteries | 4,002 | 8 | 9 |
| Registration of Births and Deaths | 18,796 | 14 | 10 |
| Vaccination | 14,622 | 15 | 7 |
| Laboratory | 356 | 2 | 2 |
| Mahalakshmi Dhobiwada | 1,845 | 9 | 1 |
| Milch Cattle Stables | 1,826 | 8 | 9 |
| Conveyance of Disinfected Persons | 11 | 9 | 11 |
| Licenses | 3,276 | 9 | 2 |
| Census | 3,993 | 9 | 0 |
| Tank Conservancy | 3,116 | 11 | 8 |
| Total...Rs. | 8,46,324 | 3 | 6 |

INCOME OF THE HEALTH DEPARTMENT.

| | Rs. | a. | p. |
|---|---|---|---|
| Halalkhor Cess | 2,43,556 | 9 | 11 |
| Milch Cattle Stables | 10,611 | 2 | 2 |
| Mahalakshmi Dhobiwada | 11,664 | 8 | 0 |
| Rent of Chawls, &c. | 13,191 | 6 | 3 |
| Supplying Copies of Office Records | 49 | 0 | 0 |
| Cleaning Privies and emptying Cesspools | 4,035 | 4 | 11 |
| Rent of Sweeping Grounds at Kurla, Sion, Tardeo Flats, &c. | 10,965 | 0 | 0 |
| Sale of Bones, Manure, Cowdung Cakes, Waste Papers, &c. | 954 | 7 | 9 |
| Miscellaneous and License Fees | 39,428 | 0 | 0 |
| Do. Fines | 5,211 | 1 | 6 |
| Total...Rs. | 3,39,666 | 8 | 6 |

91. The expenditure was more by Rs. 1,14,252 than the average of that of the two previous years. This is due to the extension of halalkhor service to other sections of the city, to increased establishment for street scavenging, drain cleaning and tank conservancy, to the special measures taken on the outbreak of cholera and small-pox, to the increase of the Vaccination Grant, and to the cost of the Acting Health Officer's salary whilst the Health Officer was absent on leave.

92. The receipts were less than those averaged in the previous two years by Rs. 36,811, but the decrease is nominal only. Certain rents due for this year, were credited in advance before the close of the preceding financial year and collec-

tions on account of halalkhor cess were recovered after the year had expired. The only actual decrease was on account of the sale of stable refuse and rubbish, for which there was not the usual demand at auction.

93. During the year Municipal halalkhor service was extended to the out-lying districts of the city, so that now, with the exception of certain properties in Military and Port Trust limits, all houses are served by Municipal halalkhors. Special attention was given to scavenging and general conservancy, more particularly in those quarters affected by cholera and small-pox. In 1881 there were 523 carts employed on scavenging, drain cleaning and night-soil work, there are now 624, and the Health Officer has recently been asked to submit further proposals, with a view to amplify the means at his disposal, for the removal of street refuse and cesspool contents. The pumping arrangements at the Carnac Bandar Depôt were improved, and, since the close of the year, it has been determined to stop the harbour outfall at that point, though the Depôt itself will remain.

94. Much dissatisfaction was occasioned during the monsoon by the nuisance arising from the disposal of street sweepings (garbage) on the Flats. This was, in a great measure, due to particular circumstances, and every effort has been used to guard against a recurrence of these, but whatever opinions may be held as to the present system of disposal, two things require to be borne in mind—1st, that the available area is becoming more and more circumscribed; 2ndly, that to make satisfactory arrangements *in the rainy season* for depositing sweepings and covering them with a coating of good earth is extremely difficult. This subject has engaged the attention of a Committee, and it is pretty well established that the refuse must either be removed by rail or tram beyond Kurla, and there deposited on the swamps or taken to incinerating furnaces conveniently situated within Municipal limits. Estimates of alternative schemes are being prepared. I may mention in passing that there appears to be practically an unlimited area of waste land in Salsette which could be converted to good * agricultural account by the application of town refuse, and that any process of incineration

* That portion of the Kurla swamp which has been reclaimed with the town sweepings of former years now yields Rs. 130 per acre.

should be considered not as an independent scheme but as a * possible and valuable solution of the question as to the best means of disposing of the fœcal matter from many parts of the island.

95. Provided there be an efficient system for the speedy removal of night-soil, it matters little (except from a financial point of view) whether that system be "wet" or "dry"; the latter is at present, at any rate, the more in accord with the customs and ideas of the inhabitants: but for the removal of sewage other than night-soil, the duty of proceeding at once with a complete system of sewerage cannot be too strongly insisted on. Once more the Health Officer alludes to this subject in the 12th paragraph of his Report, and I commend his remarks to the careful attention of every person who is interested in the health of this city. In the following paragraph he comments on the insanitary condition of many private streets in the city. Action is continually being taken with regard to such streets within the terms of the Municipal Act, and the conditions under which alone they can be taken over by the Municipal Commissioner and declared public, are precisely stated in the Act. The main cause of their present insanitary state is reported to be the want of drainage.

96. The Health Officer has also remarked on the nuisance existing on the Mody Bay portion of the Port Trust Estate and on the want of latrine accommodation. Both these matters, I am glad to say, have been attended to. Cattle sheds will no longer be allowed there, and I see that no less than 686 persons were prosecuted for nuisance at the instance of the Trustees. They have been called upon to see that sufficient latrines are provided where workmen are employed, or where there are tenanted buildings on their Estate. Out of Municipal Funds altogether 14 new latrines and urinaries were provided in the course of the year, and further similar provision will be made in the current year. In many parts of the city, other than the Port Trust Estate, there are

---

* I have before me information as to the results of applying this system in several large towns in England where there are few water closets. Poudrette manure yields there £6 per ton, and good manure here ought to fetch a good price.

The difficulties here would be (1) more liquid matter to dispose of, (2) absence of coal ashes which contribute so largely to the house refuse of English towns, (3) much higher price of coal.

miserable huts and foul patches of open ground to which the attention of the owners and of the Health Department may well be directed.

97. Owing to the ever increasing difficulty of finding space in the present cemeteries for the disposal of the bodies of low-caste Hindus, and of providing sites for new cemeteries, which, whilst reasonably accessible, might be free from sanitary objections, I proposed in the Budget to allot Rs. 30,000 for the establishment of a crematorium in the neighbourhood of Tank Bandar, being assured that almost all those who availed themselves of the public cemeteries did so only because they could not afford, like the higher castes of the Hindu community, to pay for the more expensive process of burning their dead. This proposal adopted by the Town Council was negatived by the Corporation, who, however, at a later date sanctioned a sum of Rs. 55,000 for extending the cemetery at the extreme end of Haines Road. A portion of the ground required for the extension was obtained during the year, and negotiations for the acquisition of the remainder are in progress.

Markets and Slaughter-Houses.

98. The tabulated statements (page 420) furnished by the Superintendent of Markets testify to his continued good management. The total revenue from the Municipal Markets and Slaughter-Houses was Rs. 2,67,529, more by Rs. 16,021 than that of the preceding twelve months. Year by year the income has been steadily increasing, and it is now better by Rs. 54,970 than it was nine years ago. In the year under report the increased Market receipts are mainly on account of the Arthur Crawford Fish and Vegetable Markets, Godowns, and Fowl Rooms and the Erskine Road Fish, Mutton, Fruit and Vegetable Markets.

99. The Superintendent reports that the quantity of apples and grapes imported from France and Italy greatly exceeded that of any previous year. Since the closing of the old Ice Factory, the supply of American apples has ceased. Country fruits and vegetables were comparatively scarce, until late in the year, owing to the exceptionally heavy monsoon, but towards the end of the year they were abundant.

100. On comparing the meat consumption of the past

year with that of the two previous years, I find the following results: —

| Animals slaughtered at Bandora for public and Commissariat purposes (exclusive of the local supply to Bandora)— | 1881. | 1882. | 1883-84. |
|---|---|---|---|
| Buffaloes | 3,301 | 2,909 | 3,001 |
| Bullocks &c. | 19,462 | 17,751 | 17,946 |
| Sheep and Goats | 416,578 | 426,156 | 4,35,652 |
| Pigs | 930 | 787 | 730 |
| Animals taken from Bandora for private slaughter in Bombay— | | | |
| Horned Cattle | 976 | 1,280 | 876 |
| Sheep and Goats | 37,816 | 37,469 | 36,985 |

It will be seen that there has been a very perceptible increase in the mutton consumption, the supply was both better and cheaper than usual, and there was a larger number of purchasers in the markets. The beef supply was very inferior ; the quantity destroyed was 59,907 lbs. as compared with 41,020 lbs. in the previous year.

101. The number of convictions for market offences was 263, against 146 in 1882 and 120 in 1881. Under Section* 244 of the Municipal Act, there were 116 convictions, against 48 and 56 in the preceding years. The amount of fines levied under this Section was not, however, in proportion to the increased number of convictions, being only Rs. 319, against Rs. 250 in 1882 and Rs. 359 in 1881.

## Fires and Street Accidents.

102. 43 fires were reported during the year. In 1882 there were 61, and in 1881, 56. The loss of property is stated approximately to have been Rs. 4,35,265. The four most serious fires were :—

| | Rs. | |
|---|---|---|
| May 1st...Medows Street—Godown | 1,09,500 | ...Partly insured. |
| June 1st...Colaba—Cotton Godown | 73,000 | ...Not insured. |
| Dec. 8th...Mandvi—Godown (Sandalwood, &c.) | 90,200 | ...Partly insured. |
| Dec. 21st.. Don Tad Street—Godown | 70,000 | ...Not insured. |

103. All these fires occurred either in the night or early in the morning. Efforts have been made to render the telephone system more effective with a view to secure a copious supply of water at the scene of a fire with as little delay as possible, but until the present intermittent supply can be superseded by a constant service—(for which the present quantity of water is inadequate)—there must always be risk of delay. For the

* Exposing for sale unwholesome food.

better extinction of fires in the city, the improvement most urgently needed is an additional water supply.

104. The Commissioner of Police states that 458 persons were run over in the public streets, of these 33 were killed and 425 injured. This is the largest number yet reported. One of the most fatal streets—(perhaps the most fatal in proportion to its length)—was the one leading from Mombadevi Tank to Màsjid Bandar Bridge. This is a road which has pre-eminent claims on Expenditure for Street Improvement.

## VII.—Education.

105. The usual statements furnished by the Educational Inspector, C.D., concerning the schools towards the support of which the Municipality contributes, are given below. At the instance of Government, the Corporation considered the propriety of undertaking the direct management of all Primary Schools within Municipal limits, and, with the assistance of a Special Committee appointed for the purpose, drew up proposals for the constitution of a School Board. A report on the subject was submitted to Government on the 29th December 1883, and a letter received in reply thereto, just before the close of the financial year, has since been referred for consideration to a Special Committee.

RECEIPTS.

| Government Grant. | Fees. | Municipal Contribution. | Miscellaneous. | TOTAL. |
|---|---|---|---|---|
| Rs. | Rs. a. p. | Rs. a. p. | | Rs. a. p. |
| 11,563 | 18,433 6 0 | 22,916 10 8 | ..... | 52,913 0 8 |

EXPENDITURE.

| Salaries, including Pension Fund. | House Rent, Contingencies, &c. | Contribution to Anjuman-i-Islam Mahomedan Schools. | Scholarships and Prizes. | Rewards to Indigenous Schools. | Buildings and Repairs. | TOTAL. |
|---|---|---|---|---|---|---|
| Rs. a. p. | Rs. a. p. | Rs. | Rs. a. p. | Rs. | Rs. a. p. | Rs. a. p. |
| 30,635 3 4 | 15,048 13 1 | 7,500 | 290 0 0 | 250 | 60 13 8 | 53,784 13 8 |

106. The following Statement shows the number of

Schools with their attendance on roll in the Island of Bombay as it stood on the 31st March 1884 :—

| | Names of Schools. | Attendance. |
|---|---|---|
| | *Under the Deputy Educational Inspector, Marathi Schools.* | |
| 1. | Amerchandwadi Vernacular School | 141 |
| 2. | Byculla do. | 70 |

| 23. | Musjid Bandar Girls' School | 65 |

E. C. K. OLLIVANT,
Municipal Commissioner.

# CONTROLLER'S REPORT FOR 1883-84.

---

No. 777 A OF 1884-85.

To

E. C. K. OLLIVANT, ESQ., C.S.,

*Municipal Commissioner*

*for the City of Bombay.*

SIR,

As directed in your No. 13541, dated 22nd March last, and two subsequent reminders, I have the honor to submit the Annual Report of the working of this Department for the year 1883-84.

From the following Statement **A**, it will be seen that the total income (excluding the adjustment item of Rs. 49,988-13-9 on account of profit on stores) exceeded the estimate by Rs. 1,30,733-3-0, notwithstanding the falling off of Rs. 87,741-0-7 under certain heads, which has been explained in detail at page 34, 4 8

# A.

*STATEMENT showing the Net Receipts during the Financial Year* 1883-84 *from all Sources contrasted with the Budget Estimate.*

The actual collections on account of the different rates and taxes were Rs. 47,531-8-8 less than the Budget estimate of the past year; adding, however, Rs. 1,00,000 estimated to be received during 1883-84 in excess of the estimates of Consolidated and other rates, at the time of framing the Budget for the current year, the deficit would amount to Rs. 1,47,531-8-8 as detailed in the margin. This was no real deficit but a mere short collection as proved by the fact that the recoveries up to date during the current year, on account of arrears of rates and taxes for and prior to 1883-84, amount to upwards of 2 lacs of rupees.

| Net decrease.. | Rs. | 47,531 8 | 8 |
| *Add*— | | | |
| Anticipated increase not recovered ..... | „ | 1,00,000 0 | 0 |
| Total decrease .. | Rs. | 1,47,531 8 | 8 |

Out of the Government contribution of Rs. 90,000 towards Police expenses, we had to refund Rs. 4,327-11-6 on account of certain contingent expenses disbursed by the Accountant General direct.

The increase of Rs. 35,937-8-0 under Liquor Licenses was due, as already stated in my last report (page 43), to the contribution for the quarter ending 31st March 1883, having been received from Government during 1883-84.

This sum together with the anticipated increase from rates and taxes of one lac of rupees, above referred to, has already been appropriated in the current year's Budget.

The balances of Land Conveyance Licenses for two years (1881 and 1882) were paid by the Police Commissioner during the past year, hence the increase of Rs. 1,617-4-3 under this head.

The yield under Town Duties was Rs. 57,112-13-11 better than the Budget estimate, as more fully explained in my remarks on Appendix II.

Tobacco Duties also produced Rs. 13,306-0-2 more than our expectation.

The increase of Rs. 12,148-11-5 under Market Receipts, was wholly derived from Stall Rents and Squatters Fees.

The falling off of Rs. 2,734-13-8 under Pension Contributions, Tax on Insurance Companies, Miscellaneous Savings and Public Gardens, and the increases of Rs. 366-13-8 and Rs. 799-9-7 under Tramway Rent and Miscellaneous Receipts do not require any particular explanation.

There was an increase of Rs. 6,575-1-0 in the revenue under Miscellaneous Fines, principally from those recovered through the Presidency Magistrates and those levied on Contractors.

From Miscellaneous Fees we realized Rs. 11,059-14-10 more than the estimate, as under :—

| | | |
|---|---|---|
| (Through Police Commissioner) music licenses and occupying road fees | Rs. | 5,405 |
| ( „ Health Officer) digging graves, offensive and dangerous trades and removing dead animals fees | „ | 2,628 |
| ( „ Executive Engineer) gallery and scaffolding fees | „ | 5,012 |
| | Rs. | 13,045 |
| *Deduct*— | | |
| Falling off in warrant and notice fees through Assessor and Collector | „ | 1,985 |
| | Rs. | 11,060 |

Owing to large advances made from Surplus Cash Balance for meeting Loan Works expenditure, we were enabled to defer drawing from the Loan Funds deposited with the Bank of Bombay, on which interest amounting to Rs. 27,928 was realized during the past year. This sum would have been still greater but for our utilizing the Loan Funds for meeting expenditure of Loan Works sanctioned in 1882, 1883 and 1884, thus putting off the raising of the sanctioned loans for some time to come.

Rs. 15,900 on account of Loan Works Establishment percentage, charged in 1881 to current revenue for preparation of plans and estimates of Malabar Hill Reservoir Roof &c., works and of House Connections (1st Section of the Drainage Scheme), were recovered by debit to the 15 Lacs Loan, out of which these works were sanctioned.

There was a profit of Rs. 2,574-14-2 on the working of the Municipal Workshops, as explained in detail while reporting on Workshop Accounts (page 58).

The profit of Rs. 49,988-13-9 on Stores must be treated as a nominal item, as it was simply derived by the adjustment of plant, dead and live stocks, &c., purchased out of Budget grants by debit to different stock accounts, and credit to this head as surplus, as noted in all previous reports.

The preceding Statement **B** shows that the expenditure sanctioned as per Budget for 1883-84, amounted to Rs. 38,03,588. Additional grants, aggregating Rs. 4,53,755-12-4, were voted by the Corporation from time to time, during the past year, for Town Council and Corporation Establishment, Municipal Commissioner's Department, Law Charges, Assessment Department, Acting Health Officer's Salary, earth for covering, sweeping Reclamations, Small-pox and Cholera Hospitals, arrears of Toll on Meat Vans, Moombadevi Tank improvement, purchase of land for burial grounds and construction of roads, drains, pensions and gratuities, illuminated address (with casket) to His Royal Highness the Duke of Connaught, and reception of their Royal Highnesses the Duke and Duchess of Connaught. The transfers sanctioned by the Town Council from one Budget head to another amounted to Rs. 31,407-7-6. The total grant thus amended amounted to Rs. 42,57,343-12-4 as shown in column 5.

# C.

Total Water Works Expenditure, see Detailed Statement No. 6. Rs. 5,36,118 6 1

The foregoing Statement **C** shows that, of the total amended grant of Rs. 42,57,343-12-4, Rs. 5,41,531-7-10 remained unexpended at the close of the past year. Rs. 3,31,256-13-9 are, however, required during the current year to meet the unpaid liabilities of 1883-84. Thus the actual savings on expenditure amount to Rs. 2,10,274-10-1, of which Rs. 86,900 have already been appropriated in the Budget of the current year.

The net available savings consequently amount to nearly rupees one lac and a quarter.

The causes of the different savings are given below in detail.

The saving of Rs. 1,553-7-9 under Town Council and Corporation Establishment was chiefly caused on contingencies and fees of Councillors.

In consequence of the Municipal Commissioner, in accordance with rules which apply to similar cases in Government service, having only drawn half pay, plus travelling, &c., expenses, during the 3 months, he was requested by the Corporation to stay in Europe on special duty, and the unexpended balance of the additional grants for Law charges and printing Voters' List there resulted a saving of Rs. 3,492-10-2 under Municipal Commissioner's Department.

There was a saving of Rs. 859-6-5 on the Office Establishment, stores, and contingent grants of the Controller's Department.

Of the unexpended balances of the Office and Out-door Establishments and the contingent and furniture grants of the Assessment and Collection Department, aggregating Rs. 6,566-0-1, Rs. 2,776-13-1 will be required in 1884-85 to defray cost of furniture and printing forms obtained during the past year.

The acting arrangements made from 26th May to 26th July 1883 when the Health Officer acted for the Commissioner, and from 1st March 1883 to 14th February 1884 when the Assistant Health Officer acted as Assessor and Collector, almost wholly caused a saving of Rs. 3,248-9-7 under General Supervision.

There were savings, aggregating Rs. 33,516-0-11 (of which Rs. 8,839-12-7 will be required during the current year), in the grants of the different Sections of Conservancy Branch, as noted below :—

| | | | | | | |
|---|---|---|---|---|---|---|
| I. | Superintendence | Rs. | | | 584 | 8 5 |
| II. | Labour, including Feed of Cattle | „ | | | 6,553 | 7 5 |
| III. & IV. | Disposal of Town Sweepings, and Veterinary | „ | | | 6,680 | 2 10 |
| V. | Repairs | „ | | | 3,131 | 8 1 |
| VI. to IX. | Stores, Reserve Live Stock, Rent and Waterproof Clothing | „ | | | 640 | 11 6 |
| X. | Halalcore Branch— | | | | | |
| | A. Superintendence | Rs. | 1,572 | 7 4 | | |
| | B. Labour | „ | 5,345 | 10 9 | | |
| | C. Feed of Bullocks | „ | 4,302 | 7 11 | | |
| | D & E. Stores and Repairs | „ | 2,375 | 5 0 | | |
| | G, H, I. Rent, Lighting Night-soil Depôt, Maintenance of Carnac Bunder Night-soil Pumping Station | „ | 1,904 | 3 9 | | |
| XI. & XII. | Temporary Small-pox and Cholera Hospitals | „ | 425 | 12 11 | 15,925 | 15 8 |
| | | | | | 33,516 | 0 11 |

Under Registration of Births and Deaths, Cemeteries, Laboratory, Vaccination, Maintenance of Dhobi Lines, Conveyance of Infected Persons and Disinfection, Milch Cattle Stables, Licenses, Tank Conservancy and Census, there accrued a saving of Rs. 13,570-12-0, of which Rs. 1,838-11-11 on account of past year's unpaid repairs charges of Dhobi Lines, Milch Cattle Stables and Cemetery Chowkies will be required during 1884-85.

Deducting Rs. 10,723-10-6 required during the current year to meet the unpaid liabilities of 1883-84, from the total savings of Rs. 50,335-6-6, the Health Department's net savings amounted to Rs. 39,611-12-0.

The saving of Rs. 15,339-15-8 under Markets and Slaughter-houses Establishment was chiefly caused on Market repairs and meat carriage. Rs. 12,807-6-8 will, however, be required during the current year to pay unpaid repair bills.

In the Engineer's Office, Survey and Out-door Establishment and contingent grants, there remained a saving of Rs. 2,197-6-4.

Rs. 2,195-0-1 were saved on the grants under Sections I., II. and III., Road Watering.

The Budget provisions under the different Sections of Road Repairs were not fully spent, thus leaving an available balance of Rs. 11,214-6-8, of which Rs. 556-12-9 will be required during the current year.

Rs. 1,450-15-9 of the unexpended balance of Rs. 4,021-10-0 of the grant for Repairs to Municipal Buildings will be required during 1884-85.

The whole of the Improvement of Street balance (Rs. 11,891-0-10) will have to be expended during the current year.

Rs. 1,889-7-5 were saved on the Drainage Staff, as only a Plumber on Rs. 60 per mensem was employed instead of an Inspector on Rs. 200 per mensem, and Rs. 6,076-6-10 of the grant of Rs. 10,000 for Miscellaneous Drains remained unexpended, causing a total saving of Rs. 7,965-14-3 under Drainage. The whole of the Miscellaneous Drains balance of Rs. 6,076-6-10 will have to be spent during this year.

The saving of Rs. 4,324 was chiefly caused on the repairs, rent, and contingent grants of the Love Grove Pumping Station. The saving on rent was due to the payment of Rs. 300 per mensem to Mr. Varjeewandas, having been stopped from 1st December 1883. Of the above saving Rs. 311-5-8 for certain unpaid repairs and stores charges will be required during the current year.

The small savings under Maintenance of Sluices and Elphinstone Circle, Falkland Road, Northbrook, Sir Cowasjee Jehanghir Mahim, Bazaar Gate Street and Flat Gardens, aggregated Rs. 1,608-14-5.

Out of the available balance of Rs. 2,177-6-10 of the Victoria Garden grant, Rs. 1,712-12-8 will be required during the current year for unpaid contingent, store and other sundry bills.

The gross savings of the Engineer's Department amounted to Rs. 47,595-11-5. If from this sum the unpaid liabilities of this Department of the past year, aggregating Rs. 22,081-1-6, were deducted, the net savings would amount to Rs. 25,514-9-11.

The small savings under Music License Department, Tobacco Duty Establishment, Interest, Loan Charges, Pensions, Discretional Contingencies, Gratuities and Compassionate Allowances and cost of casket for the illuminated address of welcome to His Royal Highness the Duke of Connaught, aggregated Rs. 3,169-2-5. Of this sum Rs. 2,768-7-2 on account of unpaid Interest, Pensions and Discretional Contingencies will be required during the current year.

As already taken credit for in the current year's Budget, the whole of the Sinking Fund provision of Rs. 86,900 was not required to be invested.

Rs. 8,167-14-0 were received from Government on account of the unexpended balance of the contribution paid by the Municipality during the year 1882-83 towards the maintenance of the Goculdas Tejpal Hospital.

Rs. 2,44,585-9-4, out of the available balance of Rs. 2,61,796-13-5 under New Works, will be required during the current year for incomplete and uncommenced works. Thus the net saving on completed works or those not required was only Rs. 17,211-4-1 as shown below :—

| | | | | | |
|---|---|---|---|---|---|
| Unexpended balance on account of incomplete works ..... | Rs. | | | 2,33,571 | 9 4 |
| Allotment of works not commenced..... | „ | | | 11,014 | 0 0 |
| | | | | Rs. 2,44,585 | 9 4 |
| Works not to be executed..... | Rs. | 10,745 | 10 0 | | |
| Savings on completed works..... | „ | 6,465 | 10 1 | | |
| | | | | 17,211 | 4 1 |
| | | | | Rs. 2,61,796 | 13 5 |

The saving of Rs. 9,505-9-0 under Police Account is entirely due to our having paid Government every month, during the past year, $\frac{1}{12}$th of the actual Police expenditure for 1882, plus the extra personal allowance sanctioned by the Corporation to the Police Commissioner in January 1883.

The Budget allotments for stores, horses, buggy-hire and new charges, Fire Brigade Department, remained unspent to the extent of Rs. 29,836-6-3. From this sum Rs. 20,836 will be required

during the current year for construction of New Fire Stations and completion of the Dongrey Cooley Fire Main.

From Rs. 3,856-7-0 saved principally on Lighting contingent grants, Rs. 1,298-8-3 will be required during the current year for unpaid contingent bills preferred by the Gas Company.

The whole of the available balance of Rs. 12,555-2-0 with the exception of Rs. 251-6-9 will be required during the current year for unpaid stores and contingent bills (Water Works Account).

The chief heads, on which the aggregate saving of Rs. 5,41,531-7-10 accrued, are shown in the margin.

| | | | |
|---|---|---|---|
| General Superintendence | Rs. | 5,905 | 8 4 |
| Assessment and Collection | „ | 6,566 | 0 1 |
| Health Department | „ | 50,335 | 6 6 |
| Engineer's Department | „ | 47,595 | 11 5 |
| Markets and Slaughter-houses | „ | 15,339 | 15 8 |
| Gocouldas Tejpal Hospital | „ | 8,167 | 14 0 |

| | Rs. | 5,41,531 | 7 10 |

I have contrasted the actuals with the estimates of the opening balance, income and expenditure, in the following table, from which it will be seen that the gross result was Rs. 12,64,522 to the good :—

| | | Estimate. | Actuals. | Better than Estimate. |
|---|---|---|---|---|
| | | Rs. | Rs. | Rs. |
| Opening Cash Balance | | 3,91,438 | 9,33,706 | 5,42,268 |
| Revenue | | 35,56,550 | 37,37,272 | 1,80,722 |
| | | 39,47,988 | | |
| Expenditure | Original Estimate | 38,03,588 | | |
| | Subsequent do. as per Statement B | 42,57,344 | 37,15,812 | 5,41,532 |
| | | | | 12,64,522 |

The large excess of the actual over the estimated opening balance included, as already stated in my last report (*vide* page 53, Municipal Commissioner's report for 1882 and 1st Quarter of 1883), Rs. 3,00,000 required during the past year to pay for supplies made and works, &c., not commenced or completed up to 31st March 1883 and not paid for prior to that date. The renewal of these lapsed grants of 1882-83, during 1883-84, raised the amount of the additional grants of the past year to the large sum of Rs. 4,53,755-12-4, as shown in Statement **B**.

The causes of the large surplus revenue and the savings on expenditure have been explained in detail in my remarks on the revenue and expenditure Statements **A** and **C**.

The following figures show to what extent and in what manner the above large surplus, after allowing for adjustment items, has been

appropriated, and what sum remains available for our future requirements :—

| | | | | | Rs. | a. | p. |
|---|---|---|---|---|---|---|---|

| *Less*— | | | | | | | |
| Actual Balance at the Bank of Bombay | | | „ | 76,415-7-2 | | | |
| | | | | 1,50,740-3-10 | | | |
| *Less*— | | | | | | | |
| Cash in Office Treasury | | 1,368-8-9 | „ | 1,49,371 11 1 | | | |
| | | | | | 4,68,998 | 9 | 0 |
| | | | | | 6,40,919 | 0 | 11 |
| *Less*—Already appropriated in the Budget for 1884-85 | | | | | 3,00,000 | 0 | 0 |
| Amount available | | | | | Rs. 3,40,919 | 0 | 11 |

This sum will be wholly required to meet the payment of lapsed grants, aggregating Rs. 3,31,256-13-9, renewed by the Town Council and Corporation during the current year.

As, however, upwards of 2 lacs of rupees have been recovered up to date since 1st April 1884, against the short collections of Rs. 1,47,531-8-8 of past year's rates and taxes as stated at page 34 of this report, we can safely say that a further sum of 1½ lacs is available for extraordinary expenditure over and above the 3 lacs reserved in the Budget for 1884-85.

## APPENDICES.

No. 1 A and B. From the former it will be seen that Rs. 4,000 worth of 6 per cent. Municipal Bonds were transferred from Bombay to London. The latter shows that the unpaid interest at the close of the past year amounted to Rs. 2,430 against Rs. 2,175 in 1883-84.

No. 1 C and D. From these Statements it will be observed that the balance due on 31st March 1884 on account of the 5 per cent. Loan (of 1878) of Rs. 26,94,000 was Rs. 25,71,000, and that the unpaid interest on the same date amounted to Rs. 100 against Rs. 525 at the close of 1882-83.

No. 2 is the Town Duty statement showing the amount of duty levied and of refunds allowed on different articles under the provisions of the Municipal Acts of 1872 and 1878. I have contrasted below the revenue, &c., from this source during the past year with that for the 15 months ending 31st March 1883.

| | 15 months ending 31st March 1883. | | 1883-1884. | |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Opening Balance | 52,269 | | 15,177 | |
| Revenue | 14,78,098 | | 12,39,449 | |
| | | 15,30,367 | | 12,54,626 |
| *Deduct*— | | | | |
| Refunds | 6,97,991 | | 5,74,092 | |
| Closing Balance | 15,177 | | 13,421 | |
| | | 7,13,168 | | 5,87,513 |
| | | 8,17,199 | | 6,67,113 |
| *Less*—Cost of Collection, &c. | | 52,884 | | 44,308 |
| | | Rs...7,64,315 | | Rs. 6,22,805 |

While framing the Budget for 1883-84 it was estimated that the gross revenue from Town Duties would amount to Rs. 11,55,000, and that the refunds would aggregate Rs. 5,45,000. Hence a net income of Rs. 6,10,000 was budgetted for under this head. The gross yield, however, was Rs. 84,449 better than the estimate, the refunds granted were Rs. 29,092 more than what we anticipated, and the closing balance was Rs. 1,756 less than the opening one. The net income was thus Rs. 57,113 larger than the Budget provision as mentioned at page 34 of this report.

From the marginal figures, showing a comparison between the actuals of the past year and those of the preceding 15 months, it will be noted that the decrease in wines and spirits and beer was proportionate to the extra collections for the quarter ending 31st March 1883, included in the 1st column, but it was not so in the other items. It was smaller in grain and sugar and larger in ghee and firewood and, there was an increase in timber. If ¼th of the 15 months' collections were deducted, the actuals of 1883-84 would show (1) increases of about Rs. 22,000 and Rs. 9,000 in grain and sugar instead of the decreases shown against these items; (2) a falling off of only Rs. 5,000 and Rs. 4,000 instead of the large decreases shown against ghee and firewood; and (3) an increase of Rs. 32,000 instead of a surplus of only Rs. 6,755 shown against timber.

| Articles. | Actuals for 15 months ending 31st March 1883. | Actuals for 1883-84. | Increase. | Decrease. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Grain ..... | 6,07,119 | 5,07,682 | ... | 99,437 |
| Wines & Spirits | 2,27,146 | 1,83,962 | ... | 43,184 |
| Beer..... | 8,649 | 6,673 | ... | 1,976 |
| Sugar ..... | 2,50,302 | 2,09,209 | ... | 41,093 |
| Ghee ..... | 1,55,376 | 1,18,671 | ... | 36,705 |
| Timber ..... | 1,34,358 | 1,41,113 | 6,755 | ..... |
| Firewood ..... | 95,148 | 72,139 | ... | 23,009 |
| | 14,78,098 | 12,39,449 | 6,755 | 2,45,404 |
| | | | Net Decrease. | 2,38,649 |

No. 3 is the usual Cash Account, showing in detail all cash and book receipts and disbursements, inclusive of the adjustment items.

It will be gathered from this statement that the ordinary income of the year exceeded the expenditure by Rs. 90,149-11-10* which was more than sufficient to meet the Debt and Building Fund payments shown at the end of Statement **C**, amounting to Rs. 80,220 as detailed below :—

* Municipal Fund (exclusive of Water Works).
Income .....Rs. 31,89,625 2 0
Expenditure „ 30,99,475 6 2

Owing to cash advances during the past year for Loan Works, the debt due by the Water Works Fund to the Municipal Fund was enhanced from Rs. 46,36,123-3-9 to Rs. 50,08,681-7-7.

*Loan Works.*

Further payments during the past year, amounting to Rs. 5,37,775-5-9, raised the Surface Drainage Works expenditure

from Rs. 2,77,016-5-6 to Rs. 8,14,791-11-3 as shown in detail below :—

* This includes Establishment charges on the extra works marked A.

Rs. 2,46,961-5-3 were spent up to the 31st March last as detailed below for the purchase of two more pumping engines, construction of the Queen's Road Sewer, and for establishment for works sanctioned out of the 15 Lakhs Loan authorised to be raised from the public by the Government of India in 1883-84. Pending the raising of the Loan, the above sum was advanced from Surplus Cash Balance and other available Loan Funds :—

| | Amount expended up to 31st March 1883. | Amount expended during 1883-84. | TOTAL. |

The 10 per cent. establishment charge of Rs. 36,309 on account of the Drainage Works, included in the Loan of Rs. 20,88,000 sanctioned to be raised in 1884, will be adjusted as soon as the Loan is raised.

The advances made to the Deputy Engineer during the past year for cleaning the Malabar Hill Reservoir, and for other Loan and Budget works to be adjusted hereafter, raised the advances to Municipal Officers from Rs. 5,430-12-1 to Rs. 7,818-5-4.

The stock accounts of the different heads of Municipal, &c. Departments stood on 31st March 1884 at Rs. 12,54,971-9-10, against Rs. 12,48,892-14-10 on 31st March 1883.

The Private and Departmental works and Workshop outstanding advances at the close of the past year were Rs. 10,748-10-7 higher than those on 31st March 1883. The increase was principally due to Workshop bills for iron work for Malabar Hill Reservoir and for the construction of the shred-lifter cage for the new Love Grove Pumping

Station remaining unadjusted during the year under report, and to certain repair and other works remaining incomplete, and consequently uncharged for, on 31st March 1884.

As anticipated the Sinking Fund without the investment of the usual annual instalment of Rs. 86,900 amounted to Rs. 18,30,883-13-2, representing Government Paper of the value of Rs. 17,63,100 (Rs. 10,36,600 of 4 per cent. and Rs. 7,26,500 of 4½ per cent.). These, at the ruling market rates of Rs. 100 and Rs. 102, respectively, would realize Rs. 17,77,630, thus leaving a margin of Rs. 39,630 (to cover any depreciation in the value of Government Paper) over the amount of the local 6 per cent. Loans, aggregating Rs. 17,38,000, which cannot be paid off under the terms on which they were raised before September 1887 and April and August 1888.

The whole of the 5 per cent. Loan of 1878 deposited with the Bank was drawn before the close of the past year, leaving a balance of Rs. 1,47,560-2-0 at the Bank out of the 2 lakhs profit made on the sale of the Drainage Paper in January 1881.

Nothing was drawn during the past year from the balance of Rs. 4,40,882-7-9 (of the 6 Lakhs Surface Drainage Loan) also deposited with the Bank on 11th January 1881.

The Building Fund at the Bank of Bombay was raised from Rs. 3,00,000 to Rs. 3,20,000 by a further contribution of Rs. 20,000 paid to the credit of the Fund during the past year.

No. 4.—*Liabilities.*—The Consolidated Loan Debt was reduced to Rs. 55,42,122-4-4 by two half-yearly payments, aggregating Rs. 1,03,742-8-3.

54 Drainage Loan (1878) 5 per cent. bonds of the value of Rs. 27,000 were paid off during the past year.

The cash deposit from Contractors, &c., rose to Rs. 1,30,047-8-6 on 31st March last from Rs. 97,214-6-11 on 31st March 1883, principally on account of the deposits lodged by different parties for the supply of water and by the G. I. P. Railway Company on account of rates and taxes due by the Company, they having disputed our assessment of their properties.

The recovery of Rs. 3,750 made by us during the past year on account of License Tax was paid to Government during the current year.

Owing to uncashed cheques adjusted on 31st March 1884, amounting to Rs. 2,27,155-11-0, there was a debit book balance at the close of last year of Rs. 1,49,371-11-1. The actual amount at the Bank and Office Treasuries was Rs. 77,784-15-11.

The total liabilities of the Corporation (exclusive of Rs. 11,54,195-11-0 the unbooked Vehar Debt) at the close of the last year amounted to Rs. 1,04,71,120-13-4.

No. 5.—*Assets.*—The recoverable advances and investments amounted to Rs. 30,96,107-8-4. The value of Stock was Rs. 12,54,971-9-10. The value of property and buildings, as per lists furnished by the Deputy Engineer, was upwards of 65 Lakhs of Rupees of which property, &c. of the value only of Rs. 19,62,164-4-1 were booked up to the close of the past year. The property, &c. representing the difference, have not been booked as the lists which were furnished only on the last day of the past year will have to be properly revised. Our investments and advances and the value of Stock, and buildings aggregate Rupees 1 Crore and 8½ Lakhs. The value of roads, overbridges, and drainage works executed out of Loan Funds amounted to Rs. 33,22,113-13-8.

The debt of the Water Works Fund account amounted to Rs. 50,08,681-7-7 (representing Tulsi and Bhundarwada Works of the value of Rs. 50,54,995-10-7 as per Appendix No. 6, which does not include about Rs. 46 Lakhs, the cost of the Vehar Lake, as the Government Vehar debt is not booked owing to a dispute with the Accountant General as to the mode of calculating simple interest on the debt). The Deputy Engineer's list above referred to gives the value of the Tulsi and Vehar Lakes, including the Malabar Hill and Bhundarwada Reservoirs, at Rupees 1 Crore and 1¾ Lakhs, which sum alone equals the total liabilities of the Corporation amounting to Rupees 1 Crore and 4¾ Lakhs. Our total Assets consequently amounted to more than double the gross liabilities as shown in the margin.

No. 6 is the Water Works account, which has, by law, to be kept separate and distinct from the other accounts of the Municipal Fund.

The revenue exceeded the expenditure by Rs. 82,052-8-8. This Surplus was more than sufficient to meet the payment of Rs. 70,524 (as per Statement C) towards the liquidation of the Government Tulsi Loans of 40 lakhs.

Rs. 92,237-2-1 were spent during the past year on account of lining Tunnel at Vehar and construction of the Malabar Hill Reservoir Filter Beds and new Catch-water Channels.

Out of the Bhandarwada works allotment of Rs. 10 lakhs, Rs. 8,18,242-12-6 were spent up to the close of last year.

## STORES.

The balance of stock in charge of the Store Clerk at the close of the past year was Rs. 2,72,834-12-0, against Rs. 2,69,079-8-10 on 31st March 1883.

The contrast of the principal items of the above balances is shown below :—

| Total | ..... | | 2,52,965 | 0 | 5 | | | ..... | | | 2,58,817 | 10 | 1 | | |

The sum realized by the sale of pipes, meters, &c., to private parties amounted to about Rs. 1,500.

In my last report I had quoted extracts from my reports for 1875, 1876 and 1877 regarding Heads of Departments, utilizing the stores as per items marked **A** to **J**.

It will be seen from the above statement that all the 10 latrines of the value of Rs. 15,430-10 in stock on 31st March 1883 were issued during the past year for being erected at different places in the city.

The reduction in other items of stores was more than counterbalanced by new meters and their spare parts ordered out from England, and by surplus articles purchased and manufactured before the new rules came into force.

The new rules framed by you in April 1883 and circulated in the following month for the management of the workshops and stores were put in force from 16th July of that year.

With a view to secure the chief object of these rules, viz., to admit of the store establishment having entire supervision independent of the workshop staff of all stores received and issued, the Chief Clerk, who was formerly attending the stores every morning and evening and working in my office during the intermediate period, and the Assistant Store Clerk who was entirely working in this office were permanently stationed at the stores.

The result of this arrangement with the use of telephone has been very satisfactory. Only such stores were purchased from Municipal contractors as were not in stock, and as no work was done except on indent there has, since the introduction of the rules, been no accumulation of surplus articles as was formerly the case.

The following figures show the value of stores, &c., purchased from Municipal contractors and received from the Superintendent of Workshops during the 8 months of the past year during which the new rules were enforced as compared with the corresponding period of the preceding year. The totals for the whole of the past year as compared with those for 1882-83 are also given below :—

| | During 1882-83. | During 1883-84. | During 8 months, July 1882 to February 1883. | During 8 months, July 1883 to February 1884. |
|---|---|---|---|---|
| Purchase from contractors ..... | 62,407 | 41,596 | 51,411 | 25,214 |
| Castings, &c., delivered by the Superintendent of Workshops. | 34,128 | 30,198 | 29,978 | 27,647 |
| Total..... | 96,535 | 71,794 | 81,389 | 52,861 |

The stores which were heaped here and there in different sheds and the open yard have been thoroughly overhauled, properly arranged, and stacked.

This will facilitate the taking of stock or ascertaining the exact balances in hand at any moment.

The Store Clerk on the closing of the Stock Accounts has begun comparing the actual balances in hand with the book balances. He will, however, be unable to do so with regard to heavy stores like large iron castings, pig iron, earthenware pipes, &c., without employing a lot of laborers to weigh, count and restack them.

I am quite satisfied with the manner in which Mr. Sorabji Burjorji, the Chief Store Clerk, and the establishment under him performed their respective duties during the past financial year.

## WORKSHOPS.

The receipts and disbursements of the Municipal Workshops for the past year are contrasted in the following table with those for the 15 months ending 31st March 1883 :—

| | 1882 AND 1ST QUARTER OF 1883. | | | | 1883-84. | | | |
|---|---|---|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | | Rs. a. p. | Rs. a. p. | Rs. a. p. | |
| To Balance of last year's account ... | | 12,104 2 6 | | | | | 13,008 10 0 | |
| ,, Payments— | | | | | | | | |
| On account of Establishment ... | 56,511 2 8 | | | | | 51,303 13 8 | | |
| ,, Do. Stores ..... | 93,059 10 1 | | | | | 72,527 9 2 | | |
| | | 1,49,570 12 9 | | | | | 1,23,831 6 5 | |
| | | 1,61,674 15 3 | | | | | 1,36,840 0 5 | |
| ,, Do. Profit ..... | | 6,943 4 8 | | | | | 2,574 14 2 | |
| | | 1,67,618 3 11 | | | | | 1,39,414 14 7 | |
| By Recoveries— | | | | | | | | |
| Private works ..... | 44,514 4 11 | | | | 99 12 9 | | | |
| Departmental works ..... | 1,10,095 5 0 | | | | 1,06,598 15 7 | | | |
| | | | | | | 1,06,698 12 4 | | |
| ,, Iron, &c., sold ..... | ..... | 1,54,609 9 11 | | | | 1,371 10 8 | 1,08,070 7 0 | |
| ,, Outstandings— | | | | | | | | |
| Departmental works ..... | 9,131 5 7 | | | | | 15,925 3 9 | | |
| | | | | | | | | |
| ,, Incomplete Departmental works | 3,877 4 5 | 13,008 10 0 | | | | 15,419 3 10 | 31,344 7 7 | |
| | | 1,67,618 3 11 | | | | | 1,39,414 14 7 | |

The above figures show that the outlay for the past twelve months exceeded that of the preceding 15 months, deducting therefrom Rs. 44,514-4-11, the value of Government work done in July, August and September 1882 on account of the Egyptian expedition. The increase in the outlay was due to the making of iron work for Malabar Hill Reservoir; and to the construction of a shred lifter cage, 10 new water, 21 night-soil and 40 scavengering carts; and of a moveable shop for the Arthur Crawford Markets.

The net profit on the works, including Rs. 1,371-10-8 realized by the sale of scrap iron, &c., amounted to Rs. 2,574-14-2.

The percentage of profit on the different works executed by the Superintendent during the past year is given in the following table :—

| Nature of works. | Actuals. | Amount charged. | Profit. | Loss. | Percentage of Profit or Loss. |
|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | |
| Private works ..... | 77 5 11 | 99 12 9 | 22 6 10 | .... | About 28½ % Profit |
| Departmental works ..... | 1,03,443 0 11 | 1,09,515 9 4 | 6,072 8 5 | | „ 5$\frac{8}{9}$ % „ |
| | | | 6,094 15 3 | | |
| Scavengering & drain carts. | 10,860 14 5 | 14,021 0 0 | 3,160 1 7 | .... | „ 29$\frac{1}{16}$ % |
| Night-soil carts ..... | 6,890 2 5 | 6,765 0 0 | .... | 125 2 5 | „ 1$\frac{8}{16}$ % Loss. |
| Watering carts ..... | 8,415 11 9 | 8,112 0 0 | .... | 303 11 9 | „ 3$\frac{2}{5}$ % „ |
| Scavengering, drain and night-soil carts..... | 17,751 0 10 | 20,786 0 0 | 3,034 15 2 | .... | „ 17$\frac{1}{11}$ % Profit |

The gross profit on Departmental Works, including the small profit of Rs. 22-6-10 on two Government jobs executed in the shops last year, amounted to Rs. 9,018-8-7.

There was, however, a loss of Rs. 2,923-9-4 on iron castings made in the shops, which reduced the profit to Rs. 6,094-15-2, out of which charges on account of repairs to machinery, tools, &c., aggregating Rs. 4,891-11-9, were defrayed. Thus there was a clear profit of Rs. 1,203-3-6 only on the works. This sum together with Rs. 1,371-10-8 realized by the sale of scrap iron, &c., made up the aggregate net surplus of Rs. 2,574-14-2 on the past year's transactions of the Municipal Workshops.

The increase in the Departmental Works outstanding was due to the bills for iron work in connection with the Malabar Hill Reservoir Sluice arrangement and for the construction of a shred-lifter cage for the New Pumping Station at Love Grove, remaining unadjusted at the close of the past year.

There was also a very large increase in the value of incomplete

works, principally on account of the following jobs not having been finished on 31st March 1884 :—

Repairs to 32′ sluices.
Taking to pieces the Panwel Brick Works machinery.
Sawing timber.
Making felloes.

The shop and supervision charges during 1883-84 amounted to 15 per cent. and 7 per cent. respectively, against 14¾ per cent. and 9⅙ per cent. in the 15 months ending 31st March 1883.

## GENERAL REMARKS.

The cash which annually passed through the Paymaster's hand since 1874 and the unpaid wages credited to savings are given in the following table :—

| Year. | Payments. | Savings. |
|---|---|---|
| 1872 | There was no Paymaster | 2,177 |
| 1873 | 8,40,451 | 3,098 |
| 1874 | 8,50,000 | 4,246 |
| 1875 | 8,56,265 | 3,751 |
| 1876 | 8,62,202 | 3,395 |
| 1877 | 9,43,565 | 4,077 |
| 1878 | 9,84,255 | 9,233-4,300 |
| 1879 | 10,35,050 | 3,800 |
| 1880 | 10,18,476 | 3,244 |
| 1881 | 10,14,139 | 3,478 |
| 1882 | 10,27,034 | 3,792 |
| 1st Quarter, 1883 | 2,63,746 | |
| 1883-84 | 11,32,907 | 3,427 |

| | | |
|---|---|---|
| Cash received... | Rs. | 54,38,783 |
| „ paid..... | „ | 52,93,117 |
| | Rs. | 1,07,31,900 |
| Adjustments ... | „ | 10,13,320 |
| Total... | Rs. | 1,17,45,220 |

The marginal figures show that the total out-turn of the past year amounted to Rs. 1,17,45,220 against

Rs. 140¼ lacs in 15 months ending 31st May 1883.
„ 175 „ 1881
„ 125 „ 1880
„ 108 „ 1879
„ 171 „ 1878
„ 109 „ 1877
„ 81 „ 1876
„ 82 „ 1875
„ 76 „ 1874

| Year. | No. of certificates. | |
|---|---|---|
| 1873 | 3,182 | |
| 1874 | 4,467 | |
| 1875 | 6,555 | |
| 1876 | 7,259 | |
| 1877 | 7,987 | |
| 1878 | 12,754 | |
| 1879 | 16,374 | |
| 1880 | 16,031 | |
| 1881 | 17,651 | |
| 1882 | 15,878 | 20,521 for 15 months. |
| 1st Qr. of 1883 | 4,643 | |
| 1883-84 | 16,023 | |

The number of refund certificates annually passed from 1873 to the end of last year is shown in the margin.

The following table gives the number of receipt and disbursement vouchers passed by this Department during the past eight years :—

| Year. | No. of Receipt Vouchers. | | No. of Disbursement Vouchers. | | Total |
|---|---|---|---|---|---|
| 1876 ..... | 4,862 | + | 12,045 | = | 16,907 |
| 1877 ..... | 5,013 | + | 14,384 | = | 19,397 |
| 1878 ..... | 5,511 | + | 18,731 | = | 24,242 |
| Average per annum during the past five years..... | 5,946 | + | 25,798 | = | 31,744 |

During the year under report the inward letters, exclusive of 32,000 vouchers and 10,000 ward remittance reports, and the outward letters, excluding intimations to parties to call for payments, were respectively 2½ and 3½ times those received and despatched in 1875.

The above facts and figures show very forcibly that there has been a considerable increase in the work of this office during the past six years. The establishment from the assistants downwards have all worked very hard for prolonged hours all throughout the year, cheerfully relinquishing most of their holidays and in many cases, their well-earned privilege leave. With this constant pressure of work, the Department could hardly have maintained its efficiency were it not for the extra establishment sanctioned by the Corporation on your recommendation in the current year's Budget.

Notwithstanding the above strain on the Department, its work was rendered still heavier by Heads of Departments submitting a great portion of vouchers for previous months during the last month of the year as will be seen from the following contrast :—

| | |
|---|---|
| Vouchers passed and paid in March 1883 | 3,161 |
| Do. do. do. 1884 | 3,977 |
| | 816 |

To go through 4,000 vouchers (*i. e.*, little less than $\frac{1}{6}$th of the total disbursement vouchers) in the last month of a year was too much for an already overworked establishment.

The adjustment vouchers, stock returns and sanctions for excesses were also not forwarded to my office in time. Some of them were received so late as the 16th instant.

Under the circumstances I regret that I was unable to forward this report in the time required by you.

In conclusion, I have to mention that while I acted for the Secretary, Town Council, when he proceeded to Europe on 3 months'

leave in November last, my First Assistant, Mr. Manockshaw Cowashaw, was appointed to act for me. He conducted the heavy and responsible work of this Department with admirable zeal and efficiency at the sacrifice of his health. On the retirement on pension of Mr. Govindrao Ramshankar, my able and valuable Audit Branch Assistant, in August last, Mr. Dadaji Bhanaji, an equally old and trustworthy servant of the Municipality, was appointed in his place, and has given me great satisfaction in the discharge of his onerous duties. His services in the Audit Branch, and those of my hardworking and zealous Office Assistant, Mr. Balaji Nilaji, in the Correspondence Branch, proved of very great use to the Acting Controller during my aforesaid absence from the Department for 3 months.

I have the honour to be,

Sir,

Your most obedient Servant,

SORABJI NAVAROJI COOPER,

Controller of Municipal Accounts.

BOMBAY, 21*st June* 1884.

* Actual Balance on 31st March 1884 was Rs. 2,895. The difference of Rs. 465 was due to the double payment, explained in the following note.

† House Rate Loan Debentures Nos. 1 to 18 and 44 to 54 and Supplementary Market Loan Debentures Nos. 925 to 931 enfaced for payment of interest in London since 1868 having been re-enfaced, for interest being paid in Bombay in January 1884, interest thereon for the 2nd half of 1883 amounting to Rs. 360 and Rs. 105, respectively, total Rs 465, which had been as usual remitted to England on 7th December 1883, had again to be paid in Bombay in January 1884. The amount remitted to England remained unpaid in the hands of Messrs. Crawford, Colvin & Co., and has been adjusted when the usual half yearly remittance of interest for the 1st half of 1884 was forwarded to our Agents on 10th June 1884.

E. C. K OLLIVANT,
Municipal Commissioner.

E. C. K. OLLIVANT,
Municipal Commissioner.

# REPORT OF THE EXECUTIVE ENGINEER, FOR 1883-84.

---

No. 1267 OF 1884-85.

FROM RIENZI WALTON, ESQ.,
Executive Engineer, Municipality,

To E. C. K. OLLIVANT, ESQ., C.S.,
Municipal Commissioner
for the City of Bombay.

BOMBAY, 21*st May* 1884.

SIR,

I have the honour to submit my Report on the various works which have been under my charge during the past year 1883-84.

These were as follows :—

1. First portion of the new Sewerage Works.
   (*a*) Pumping Station, Love Grove.
   (*b*) Pipe Sewers.
   (*c*) House connections.
2. (*a*) Queen's Road Intercepting Sewer.
   (*b*) Charni Road extension from Girgaum Back Road through Khetwadi 15th Lane to Grant Road.
3. Clerk Road Ovoid Sewer and extension ; also Arthur Road and DeLisle Road Pipe Sewers.
4. (*a*) Sewerage of Kamathipura.
   (*b*) Surface Drainage of ditto.
   (*c*) House connections.
5. Hornby Road Sewer.
6. Byculla Race Course Sewer.
7. Agripada Pipe Sewers.

8. Surface Drainage Scheme.

(*a*) Raising Khetwadi.

(*b*) Gowalia Tank, Tardeo, and Arthur Road Drain.

(*c*) Widening Old Main Drain.

(*d*) Clerk Road Culvert and Sluice Gates.

(*e*) Bellasis Road and Bellasis Road Junction Drain.

(*f*) Mahaluxumi Stormwater Reservoir.

(*g*) Diversion of Tulsi Main from the site of Stormwater Reservoir to Haines Road and Clerk Road.

9. Malabar Hill Reservoir construction of Filter beds.

10. Miscellaneous Drainage Repairs, rebuilding and extension, including erection of latrines and urinals and supervision of Private House Connections.

11. Carnac Bunder Pumping Station.

12. (*a*) Love Grove Sluices.

(*b*) Blasting out obstructions in old channel at Love Grove.

(*c*) Worli Sluices.

(*d*) Dharavi Sluices.

13. Khetwadi Depôt accounts.

14. Sewerage of the Fort.

15. Surveys and Estimates.

(*a*) Survey of portion of the Flats for filling up, construction of a road from Clerk Road to Arthur Road, and fixing levels for future Park on the Flats.

(*b*) Dhobiwada New Pipe Sewer.

(*c*) Ovoid Sewer from J. J. Hospital through Bellasis Junction Road to the Byculla Hotel.

(*d*) Levels from the Main Pipe Sewer for sewerage of Parel village.

I have the honour to be,

Sir,

Your most obedient servant,

RIENZI WALTON,

Executive Engineer, Municipality.

## 1—FIRST PORTION OF THE NEW SEWERAGE WORKS.

### (*a*) *Love Grove Pumping Station.*

The first pair of engines, pumps and boilers at this station were practically completed by the middle of December 1882, but it was not until the 12th day of March 1883 that they were fairly started in a condition to do daily duty. The lifting capacity of the pumps was tested, and found to be equal to the quantity specified by the contract, but great difficulty was found in keeping the suction roses of the pumps free from kutchra ; the holes in the rose plates being only 9/16" in diameter. It was, therefore, decided to enlarge them to 13/8" diameter, and the result of the alteration was completely satisfactory, for afterwards, not only was there no occasion to stop the engines for the purpose of clearing the suction roses; but the pumps were found able to pass a larger quantity of kutchra than they were expected to do.

When the engines were first started, they made considerable noise, and the vibration in the engine house was more than it should have been. This, however, was soon rectified by the engineer of the makers who also undertook some other slight alterations and additions such as are usually required with new engines until they have worked down to their bearings, and which have much improved the working of both the engines and pumps.

On the 6th August, the engines, boilers, and pumps of the 2nd contract were started, and were found to work satisfactorily in so far that they lifted the specified volume of sewage, *viz.*, 1,638 cubic feet per minute.

Advantage was taken by the makers of the experience gained in the erection of the 1st pair of engines, thus the 2nd pair was found to work more easily and with less vibration than the first. As soon, therefore, as the 2nd pair could be depended upon, the contractors' engineer overhauled the 1st pair, and made such alterations as appeared to him to be required, and the result was the engines and pumps worked much better with less noise and vibration.

All the prime movers connected with the station work satisfactorily, but considerable inconvenience was caused by the leather valves of the pumps, the material of which, it appears, is unable to withstand contact with sewage in this country. I have, however, included the cost of furnishing one of the valve boxes with metal valves as an experiment in my report to you on certain requirements to complete the station. During the year under report 289 new leathers have been put on the pump valves, at a cost of Rs. 750 for material alone.

The Engineer, Mr. Reid, reports that the engines have worked very well during the year, considering the damp state of the steam and the high temperature of the injection water for the condensers. Both of these detractions can, however, be overcome and will be so

if the suggestions made by me, and approved by the Consulting Engineer, are carried out. The first condition is caused by the condensation of the steam as it passes through uncovered steam pipes from the boilers to the engines, and the second is the result of insufficient area of the lodge or water tank from which the water is pumped for condensation purposes.

The total consumption of coal during the year was 1,530 tons 17 cwts. 2 qrs., showing a saving of 111 tons 13 cwts. on the estimated consumption. A steam winch was purchased to assist in lifting the shred screens, and has proved itself of the greatest convenience and most economical.

The health of the men employed on the station was good during the year, and, notwithstanding the fact that there were cases of cholera in the vicinity during the epidemic of 1883-84, none of those employed by the Municipality were attacked. There is now no offensiveness in the neighbourhood of the Pumping Station, and persons may now pass by it without being aware of its duties.

The contractors for the construction of the Pumping Station, Messrs. Vithul Tukaram and Co., completed their work with some small exceptions in *February* 1884, and a final certificate for Rs. 70,536-5-7 was passed by me on *7th March* 1884, deductions being made for all incompleted works.

STATEMENT showing Quantities and Cost of Work of the Erection of a New Pumping Station at Love Grove near Worli, done by Messrs. Vithul Tukaram and Company :—

| Quantities. | | Particulars. | Rate. | | | Per | Amount. |

## 1.—FIRST PORTION OF THE NEW SEWERAGE WORKS

### (*b.*) *Pipe Sewers in the First Sanctioned Portion of the Drainage Scheme.*

*Contractors*—Messrs. DADABHAI NASARWANJEE & Co.

In the last Annual Report it was stated that all the pipes had been laid, and the manholes and lampholes constructed, except as regarded certain sections, expressly excluded from the contract, and a list of streets in which pipes had been laid was given, besides a list also of streets which had, for the time, been excluded from the operation of the contract.

It is unnecessary to repeat these lists as they are correct at the present time.

During the past year the contractors have, by the passage of suitable instruments, proved all the pipes to be clear, have completed the floors and channels of manholes, and have re-instated such portions of the work as I was previously unable to pass.

The whole of the work has now happily been completed.

The quantities and cost of the work are as follows :—

## 1.—FIRST PORTION OF THE NEW SEWERAGE WORKS.

### (*c*) *House Connections in the First Sanctioned Portion of the Drainage Scheme.*

Specifications and contracts were prepared, and tenders invited for (*a*) the supply of cast iron and zinc work, and (*b*) the labour in fixing the same, including cost of stoneware branch pipes, gully traps, &c., for the house connections in the first sanctioned portion of the Drainage Scheme. The tenders, not being satisfactory, were not accepted.

## 2.—QUEEN'S ROAD INTERCEPTING SEWER.

This work was let by contract to Mr. John Hewson, on the 17th November 1882, at a cost of Rs. 1,38,104, and to be completed by 1st February 1885. In my Annual Report, 1882-83, I stated that the work had progressed satisfactorily during that period.

Satisfactory progress was also maintained during the first period of the year under report, viz., from 31st March 1883 to the commencement of the monsoon ; within that time Mr. Hewson completed Rs. 10,317 worth of work, making a total expenditure of Rs. 28,096 out of the contract.

Owing to unusually late and heavy rains at the latter part of last year, the Contractor was unable to resume his work until the middle of November 1883.

In consequence of public complaint about the nuisance created by the sewers discharging into Back Bay, it was considered advisable, if possible, to expedite the completion of the sewer. Accordingly, Mr. Hewson entered into an agreement with the Corporation by which he was to receive the additional sum of Rs. 10,000, provided he completed the whole work by the 15th day of June 1884. Within two months, however, of the date of this agreement, Mr. Hewson intimated to the Commissioner his inability to continue the contract, and finally withdrew from the same on 14th day of April 1884, having completed Rs. 58,240·76 worth of work out of the whole contract.

The following statement gives the total quantity of work done under the contract by Mr. Hewson up to the 31st March 1884, and the contract value of the same :—

To this total is added the quantity and value of work done between the 31st March 1884 and the 13th April 1884, the date of Mr. Hewson's withdrawal from the contract.

## STATEMENT showing Quantities and Cost of Work in connection with Queen's Road Sewer, done by Mr. John Hewson down to 31st March 1884.

| Quantities. | Particulars. | Rate. Rs. a. p. | Per | Amount. Rs. |

## (*b*) CHARNI ROAD EXTENSION.

This road extending from Girgaum Back Road through Khetwadi 15th Lane to Grant Road has been completed, and affords a convenient and handsome thoroughfare to the public.

The total cost of the work, not including the purchase of land, was Rs. 10,944-9-3.

The details of this expenditure are as follows :—

STATEMENT showing Quantities and Cost of Work in the construction of a road from Girgaum Back Road to Khetwadi Main Road done by Mr. J. Hewson.

## 3.—CLERK ROAD BRANCH OF MAIN SEWER (AND PIPE SEWERS IN DeLISLE ROAD AND ARTHUR ROAD).

*Contractors*—Messrs. NAGU SAYAJEE & Co.

This sewer has been completed from the Bellmouth Junction on the main sewer near the Clerk Road culvert to the Sixway Central Station on the Flats, that is, as far as the contract referred to in the last Annual Report extended.

The soffit of the arch has been pointed, the walls and invert cleaned of mortar droppings, and the whole sewer handed over in good order.

A portion of the 15" pipe sewer, included under the same contract, is to be laid in Arthur Road from Parel Road to DeLisle Road, but the work has been deferred until the DeLisle Road pipe sewer is laid.

The quantities and cost of the work done are shown in the accompanying statement;—

| Quantities. | Particulars. | Rate. Rs. a. p. | Per | Amount. Rs. a. p. |
|---|---|---|---|---|
| 1,76,553·05 c. ft. | Excavation for ovoid sewer, including filling in &c. | 4 4 0 | 100 c. ft. | 7,503 8 0 |
| 9,758·84 „ | Brick arching, including cement pointing to the soffit | 58 0 0 | „ | 5,660 2 0 |
| 13·94 „ | Brick wall in hydraulic mortar | 50 0 0 | „ | 6 15 6 |
| 12,069·40 „ | Cement concrete for the shields, including ½" cement plaster in side | 75 0 0 | „ | 9,052 0 10 |
| 1,476·30 „ | Cement concrete for invert blocks | 1 3 0 | 1 c. ft. | 1,753 1 8 |
| 15,796·58 „ | Plastering to the top of the arch ½" thick (1 of cement to 1 of sand) | 12 0 0 | 100 s. ft. | 1,895 9 5 |
| 14 Nos. | Manholes on ovoid sewer with covers, dust-boxes, steps, brick work, &c., complete | 192 12 7 | Each. | 2,699 0 2 |
| 91 „ | 6" Junction blocks for ovoid sewer | 4 0 0 | „ | 364 0 0 |
| 91 „ | Unglazed earthenware disc plugs | 20 0 0 | 100 | 18 3 2 |
| 7,868·92 c. ft. | Rock excavation | 14 0 0 | 100 c. ft. | 1,101 10 5 |
| | Total..Rs. | | | 30,054 3 2 |

Surveys, plans, and estimate, together with a specification and a contract, were prepared for the extension of the Clerk Road sewer from the Sixway Station to Parel Road, including an 18" pipe sewer along DeLisle Road from Elphinstone Road to Clerk Road. Tenders having been invited, Messrs. Nagu Sayajee and Company's tender was accepted, and a contract signed on the 20th March 1884. The amount of the contract is Rs. 96,648. The time which has since expired is too short to have admitted of any progress worth reporting.

## 4.—(*a*) KAMATIPURA SEWERAGE WORKS.

*Contractors*—Messrs. NAGU SAYAJEE & Co.

The works under this contract are virtually completed as what remains to be done will be finished in a few weeks.

The pointing of the arch of the ovoid sewer and the clearing of droppings of mortar and concrete from the walls and invert have been done, and the three brick sewers in Bazar Street, Centre Street, and Kharsetjee Street have been connected with it.

The New Sewer has, therefore, for several months been carrying nearly the whole of the sewage of Kamatipura, the exception being those houses adjacent to the Umarkhari Sewer Road which drain into the Umarkhari Sewer and must continue to do so until down-take pipes are fixed to shoot the sewage into the gully traps which have already been provided and are in commuication with the new sewer. Although the sewage of the main portion of the district is being conveyed by the new sewer, yet it should be pointed out that, until down-take pipes are provided, it cannot be received in the intended manner, but only by temporary provisions which cannot be considered satisfactory.

The delay which has taken place in the execution of these works is much to be regretted, but it must at the same time be admitted that the contractors have had very great and unusual difficulties to contend with, undoubtedly much greater than would be found in any other district of equal area in Bombay. Most of these difficulties have been pointed out in the last Annual Report, and although the most obnoxious part of the work was done twelve months since, yet the knowledge of what had to be previously endured by the workmen has become so well known that but few men will go on with the work. The contractors have stated positively that they have employed as many men as they could get, and that they have been continually trying to obtain more, but workmen on being told to go to Kamatipura have firmly refused and have gone away preferring to remain idle.

The quantities of the work and the expenditure are as follows :—

| Quantities. | Particulars. | Rate. | Per | Amount. |
|---|---|---|---|---|
| | | Rs. a. p. | | Rs. a. p. |

## (*b*) KAMATIPURA SURFACE DRAINAGE WORKS.

Messrs. Nagu Sayajee and Company have been entrusted with the work of improving the south end of Kharshedjee Sukhlajee Street, comprising the raising of the road as far as the plinth of existing houses would allow the relaying of water-tables, the extension by 370 feet of the drain on the west side of the street, and the fixing of cast iron street gully traps. The estimated cost of the work is Rs. 3,678.

The relaying of the water-tables and the raising and reforming of some of the roads has been undertaken by the Road Department. The work is still in progress.

Several pieces of low-lying ground which would otherwise have been swamps, have been filled up, but the whole of the work is not yet completed. The cost will be about Rs. 1,355.

## (*c*) KAMATIPURA HOUSE CONNECTION.

The five privies referred to in the last Annual Report as having been fitted up under the new system have continued to be extensively used and have worked well.

The nahanies, outdoor sinks, and stables also referred to therein as having been connected in the improved manner, have continued in good working order.

During the current year a few other nahanies, outdoor sinks, and stables have been connected under the new system, the special conditions of such cases having rendered the connections urgent.

Tenders were invited for the supply of cast iron nahani fittings and of ventilating shafts and for the work of fixing them. For the supply, Messrs. Richardson and Cruddas's tender amounting to Rs. 16,010 has been accepted, and the fittings are in course of manufacture. For the work of fixing, only one tender was received, but as the rates were very high it was rejected. Another much lower offer has since been made by another Firm though, as the fittings are not yet ready, it has been deemed advisable to not let the contract at present.

## 5.—OVOID SEWER FROM THE CRAWFORD MARKETS ALONG HORNBY ROAD AND THE EASTERN BOULIVARD TO THE MINT.

*Contractors*—Messrs. Fakir Mahomed Babunbhai & Co.

Plans, specifications, and a contract were prepared for the construction of an ovoid sewer 2′ 6″×3′ 9″ from the Bellmouth Junction at the south end of Shaik Memon Street to the Mint (by way of Hornby Road and the eastern Boulivard) intended to intercept the sewage of the Fort at the Mint outfall which now discharges into the Harbour.

Tenders were invited and that of Messrs. Fakir Mahomed Babunbhai and Company (amounting to Rs. 81,226) having been accepted the contract was signed on the 20th March 1884. The progress has been necessarily but very small.

## 6.—OVOID SEWER ACROSS THE BYCULLA RACE COURSE.

*Contractors*—Messrs. Rughoonath Bhaskerjee & Co.

Surveys, plans, and estimates were prepared for a new road and an ovoid sewer across the Byculla Race Course from the Byculla Hotel to the Sixway Central Station on the Flats.

Specifications and a contract having been prepared for the construction of the sewer, tenders were invited, and that of Messrs. Rughoonath Bhaskerjee and Company, amounting to Rs. 58,933, was accepted.

The contract was signed on the 20th March 1884, but the progress, owing to the shortness of the time, has of course been small.

## 7.—PIPE SEWERS IN THE AGRIPADA DISTRICT.

*Contractors*—Messrs. Fakir Mahomed Babunbhai & Co.

A specification and contract were prepared for these works, and tenders invited.

The tender of Messrs. Fakir Mahomed Babunbhai and Company for Rs. 1,00,907 was accepted, and a contract was signed by them on the 20th March 1884.

Too short a time has elapsed for any progress worth recording.

## 8.—SURFACE DRAINAGE SCHEME.

### (*a*) *Raising Khetwadi.*

This contract was let to Messrs. Cowasjee Sorabjee Bhedwar and Company for a sum of Rs. 65,687-2-8, but was completed at the commencement of June 1883 for the sum of Rs. 53,420-12-7, showing a saving of Rs. 12,266-6-1 on the sanctioned amount.

The result of raising the roads and compounds in Khetwadi, as ascertained by the last monsoon, is highly satisfactory. During the whole of the season and even on those occasions of abnormally heavy rainfall, no floods accumulated. There was, however, a slight accumulation of flood water at the entrance to the drain at the south end of Khetwadi Back Road, a circumstance accounted for by the contractedness of the water way. This has however been remedied by the construction of a new water entrance, so that the water may pass away freely into the large drain.

In connection with the steps taken for the relief of Khetwadi from floods, three large storm water drains were constructed at a cost of Rs. 30,628-9-0.

The work was undertaken by Messrs. Syed Ebrahim Oosman and Company and was completed, with the exception of a few minor details, by the end of May 1883.

### (*b*) *Gowalia Tank, Tardeo, and Arthur Road Drain.*

By the terms of the contract the contractors, Messrs. Syed Ebrahim Oosman and Company, are not required to complete their work before 1st December 1885, but, owing to the energy with which the work has been carried out, the progress has been very good, and the percentage of work done is 71·34 against 44·44 of the time, *i.e.*, they have completed nearly ¾ of the whole work in less than half of the time agreed upon. There is every probability of this work being completed by the monsoon.

The amount paid for this work up to date is Rs. 1,01,303·58, and the total value of the contract is Rs. 1,66,679.

STATEMENT showing Quantities and Cost of Work in the construction of Storm Water Drain, Entrances and Manholes, &c., in Tardeo District, done by Messrs. Syed Ebrahim Oosman & Co.

| | Total ..Rs. | | | 1,01 303·58 |

### (*c*) *Widening Old Main Drain.*

The whole of this work has been completed with the exception of a small portion of the dry stone pitching on the slopes.

The contractors have however promised to get this completed by the monsoon.

This work formed a portion of Messrs. Syed Ebrahim Oosman and Company's Surface Drainage contract. The estimated cost was Rs. 83,167·45, and the work up to date has cost Rs. 44,367.

### (*d*) *Clerk Road Culvert and Sluice Gates.*

This portion of the Surface Drainage Scheme is included in the contract let to Messrs. Syed Ebrahim Oosman and Company. It consists of four masonry arches of 9 feet span each and four ordinary lock gates. It also entails the reconstruction of that portion of the Clerk Road which passes over it, and which had to be demolished with the old culvert to make way for the new one.

The new culvert is an important feature in the Surface Drainage Scheme. By the lock gates connected with it, the storm waters brought down by the old main drain are admitted into and kept stored up on the Reservoir now under construction on the Flats.

The work has progressed very favourably and shows every promise of completion before the coming monsoon though the contract time extends to 1st December 1885.

The following certificate gives the details of work done up to 31st March 1884.

STATEMENT showing Quantities and Cost of Work of widening the existing Old Main Drain, south of Clerk Road, done by Messrs. Syed Ebrahim Oosman & Co.

(*c*) *Bellasis Road and Bellasis Junction Road Drain.*

*Contractors*:—MESSRS. NAGU SAYAJI & Co.

The progress of the work during the current year has been very satisfactory, the contractors having shown considerable energy.

A small portion of the largest section of drain near the Byculla Hotel and another short length near the south-east end of Bellasis Junction Road are in progress, but with these exceptions the whole of the larger section is finished, including the crossing under the B. B. & C. I. Railway, and that over the New Main Sewer both near Bellasis Bridge. The mouth of the New Drain cuts the east wall of the old open Main Drain at an angle of 35°, and the end of the arch to a width of 10 feet parallel with the wall of the old Main Drain has been built on the skew principle; a parapet wall has been carried up above the arch and coped with a double-weathered stone coping.

One side-entrance at Gilder Street and one water-entrance on the south side of Bellasis Road have been built, and three cast iron gully traps have been fixed in Bellasis Junction Road, but it is not probable that the contractors will be able this season to complete a sufficient number of openings to receive storm-water to render the Drain of any great utility during the next monsoon. Indeed the Drain is intended to receive principally the water from the high ground to the east of Parel Road, and the Parel Road portion has yet to be undertaken.

The following Statement shows the Quantities and Cost of the Work :—

| Quantities. | Particulars. | Rate. Rs. a. p. | Per | Amount. Rs. |

| | Total ..Rs. | .... | | 1,80,980·61 |

## (f) MAHALUXMEE STORM-WATER RESERVOIR.

*Contractors*:—MESSRS. NAGU SAYAJI & Co.

Fair progress has been made with these works.

The bank over the New Main Sewer from Clerk Road to Love-Grove is practically complete, though the next rains will probably cause a subsidence which the contractors will afterwards have to make up The raising of the manholes is finished besides three of the culverts or water ways, the remaining water ways being in various stages of progress.

The bank against the Hornby Vellard (which will increase the width of it by 50 feet), the bank against the Race Course and the banks to the north and north-east of the Reservoir are all well in hand.

The following Statement shows the Quantities of the Work and the Expenditure thereon :—

| Quantities. | Particulars. | Rate. | Per. | Amount. |
|---|---|---|---|---|
| | | Rs. a. p. | | Rs. |
| 5,913,464·33 c. ft. | Earth work in embankments on the Flats, including excavating earth for the bank from the selected site of the Reservoir .. | 1 8 0 | 100 c. ft. | 88,701·96 |
| | WORK DONE IN 7 CULVERTS. | | | |
| 22,579 c. ft. | Excavation in earth, moorum, boulders, &c., for foundation ..... | 1 0 0 | 100 c. ft. | 225·79 |
| 4,105·18 „ | Concrete in hydraulic mortar in foundation..... | 40 0 0 | „ | 1,642·07 |
| 9,314·32 „ | Rubble masonry in hydraulic mortar in foundation ..... | 27 0 0 | „ | 2,514·86 |
| 5,09·30 „ | Rubble masonry in hydraulic mortar in superstructure ..... ..... | 27 0 0 | „ | 1,374 65 |
| 1,152·00 s. ft. | 4 stone pavement, blue ..... | 45 0 0 | 100 s. ft. | 518·40 |
| 40·20 c. ft. | Blue cut stone work ..... | 3 0 0 | c. ft. | 120·60 |
| 194·03 „ | Teakwood work, complete..... | 3 8 0 | „ | 670·10 |

| 76 Nos. | Cast iron steps, including painting..... | 10 0 0 | Dozen. | 63·33 |
| | Total ..Rs. | .... | | 96,219·00 |

## (g) DIVERSION OF THE TULSI MAIN AT MAHALAKSHMI.

*Contractors*:—Messrs. NAGU SAYAJI & Co.

The work for the diversion of the Tulsi Main from the site of the Storm-water Reservoir is progressing favourably.

The laying of the new main along Haines Road, behind the Mahalakshmi Railway Station, and along Clerk Road to the Mahalakshmi Police Chauki is in progress.

It is, of course, necessary that the new main should be laid throughout, or as nearly so as possible, before the existing main is disturbed, so that the final connection at each end may be done in as short a time as may be, and the supply of water to the Malabar Hill Reservoir be stopped for the shortest period practicable. Nothing whatever has therefore yet been done in removing the present main.

The Quantities and Cost of the Work are as follows :—

| Quantities. | Particulars. | Rate. | Per | Amount. |
|---|---|---|---|---|
| | | Rs. a. p. | | Rs. a. p. |
| 1,677·33 rg. ft. | Laying 24" main, including carrying the pipe from Chinchpoogly Depôt, excavating, laying, jointing, &c., and filling over the pipe. (The main being supplied by the Contractors) ..... | 12 8 0 | rg. ft. | 20,966 0 0 |
| | Total..Rs. | | | 20,966 0 0 |

## 9.—FILTER BEDS MALABAR HILL RESERVOIR.

The contract for this work was let to Messrs. Burjorjee Rustomjee Mistri and Company for the sum of Rs. 1,37,776, and the date for completion was fixed for April 18th, 1883. The work is not completed though it is now twelve months past the contract time. The explanation offered by the contractors for this delay, is their inability to obtain Naosari bricks in sufficient quantity in time to enable them to push on the work. This may have been the cause of a part of the delay, as it is, I believe, a fact that the contractors lost a large accumulation of bricks and firewood by the flood which visited Naosari in the latter part of the year 1882, but I am of opinion that if such excuses are admissible, it will be difficult to keep contractors within the terms of their contracts.

With my No. 3312 of 10th October 1883, I submitted a revised estimate of the probable total cost of the work which amounted to Rs. 1,17,298·06.

The work done up to date amounts to Rs. 1,12,478·23, and about Rs. 926·8 worth of work remains to be done, bringing the amount due under the contract up to Rs. 1,13,405.

This, however, does not include the construction of the iron work at the Workshops which amounts to Rs. 5,639. If this be added to Messrs. Burjorjee and Companys' contract the total expenditure will be as follows :—

| | Rs. |
|---|---|
| By Messrs. Burjorjee and Company's contract ... | 1,13,405 |
| By Workshops ..... | 5,639 |
| Total.....Rs. | 1,19,044, |

or a saving of Rs. 18,732 on the whole work.

The work which remains to complete the contract is very little, and the Filter Beds will most probably be ready for work before the commencement of the monsoon.

The following are the details of the Certificate up to date 31st March 1884 :—

STATEMENT showing Quantities and Cost of Work of the Service Reservoir, Malabar Hill, done by Messrs. Burjorjee Rustomjee Mistry & Co.

| Quantities. | Particulars. | Rate | Per | Amount. |

The total amount sanctioned for Miscellaneous Drains was Rs. 17,059-2-7, of this a sum of Rs. 2,247-4-1 remained unexpended at the close of the financial year.

## 11.—CARNAC BUNDER PUMPING STATION.

This station has been worked with its usual staff and efficiency during the year under report. The condensing pumps have been bored out and lined up with gunmetal bushes, which will last about 10 years. New feed and suction pipes have been substituted for the old ones which were entirely eaten away with rust, and therefore had to be replaced by others.

The following New Works have been done at a cost of Rs. 1,055, for which special sanction was obtained :—

Making and fixing 2 new main gratings.

Making and fixing 2 new hopper gratings together with 2 new suction pipe gratings.

Repairing the crab winch and making and fitting 9 new gunmetal cocks and iron handles to fit leather hose, fitting 2 galvanised pipes with flanges, T pipes and elbows, and taking down roof ventilating side plates.

Making new iron ladders for tanks.

The engines as well as the donkey pump boilers, &c., and other parts have been well looked after by the man in charge, and have done their work well. No casualty of any kind has taken place to stop the working of the Engine and pump except the minor contingency of a temporary stoppage of the pumps caused by large material getting into them. Everything connected with the Engine and pumps is in good working order.

## 12.—(*a*) LOVE GROVE SLUICES.

These Sluices have been thoroughly repaired during the past year as it was found on examination just before the rains that many of the doors were eaten away, and had therefore to be replaced with new ones, and faced with sheet India rubber. There has not been the slightest smel of sewage in the channel since the new Station has been

working, and the water is now perfectly clear. The alteration recently carried out at this outfall has certainly been the means of ridding Bombay of one of the worst cesspools it ever had. The men in charge of the Sluices now take a pleasure in doing their work and in looking after their Sluices.

### (*b*) BLASTING OUT OLD CHANNEL AT LOVE GROVE.

For this work a sum of Rs. 2,056-14-6 was sanctioned, and up to date of this amount Rs. 1,617-11-10 have been expended.

The work is being carried out departmentally, and as the rock is situated chiefly at the level of low water springs it is only possible (without taking special and expensive measures) to work during a few hours each month.

Advantage has therefore been taken of such occasions, when the low tide permitted it to blast the rock by the ordinary process, and nearly the whole of the obstructing ridge of rock has now been removed. The portion which remains will probably be removed before the commencement of the coming monsoon.

### (*c*) WORLEE SLUICES.

These Sluices have worked well during the year, and have also had a fair share of repair during that period.

In repairing the Sluices rubber was put on those that required refacing as was done to the gates at Love Grove, and the result is satisfactory.

### (*d*) DHARAVEE SLUICES.

These Sluices are getting old, and will, next year, require some new doors and frames fitting to them, for which provision can be made in the next year's Budget, but they can be made water-tight so as to work them this year. It would be a great advantage to have the channel to these Sluices deepened as it has silted up very considerably.

## 13.—KHETWADI DEPOT.

This Depôt in Khetwadi 10th Lane has continued to be of the greatest use for the storage of stoneware pipes and specials, cast-iron fittings, and cement, and their issue to the Municipal Contractors for various works.

A tender of Messrs. Doulton & Co. (through their agents, Messrs. Richardson and Cruddas) for the supply of an additional quantity of stoneware for the several new works previously mentioned was accepted on the 5th March 1884.

A contract for the supply of 500 casks of Portland cement by Messrs. Edward Bates & Co., at Rs. 8 per cask, was entered into in the early part of March.

On the 10th March a contract was signed by Messrs. Walsh, Lovett & Co. for the supply of 2,000 casks of Portland cement at Rs. 7-7-0 per cask.

The following statements show the receipt and issue of stores at the Depôt during the past year :—

# STATEMENT of Stoneware Pipes, &c., received and issued on account of Drainage and other Works during the year ending 31st March 1884.

## 14.—SEWERAGE OF THE FORT.

On the 24th May 1883, sanction was given to proceeding with the survey for a New System of Sewerage for the Fort, and a Staff was engaged as early as possible after that date.

Plans, sections, estimates, details of volume, velocity and discharge of sewage, and a report were submitted to the Municipal Commissioner on the 7th November 1883. The drawings were 27 in number.

The cost of this preliminary work was Rs. 2,260, the sanctioned amount being Rs. 2,500.

Among minor works undertaken by this Department in the year under review are the following, viz. :—

(*a.*) Filling up portions of the Flats with surplus material from Drainage Works, forming a new road from Clerk Road to Arthur Road with a branch road to the Mahalakshmi Road about midway between the Mahalakshmi and Tardeo Police Chowkies, and taking and fixing levels (with masonary bench works) for a future park on the Flats.

(*b.*) Surveys, plans and estimates for a new pipe sewer and connections passing along Haines Road from the New Dhobiwada to the Six-Way Central Station on the Flats.

(*c.*) Surveys and plans for a suggested future ovoid sewer from the J. J. Hospital through Bellasis Junction Road to the Byculla

Hotel to avoid a dead end in Obelisk Road and the new road across the Byculla Race Course.

(*d.*) Surveys for suggested trunk pipe sewer from Parel village to Arthur Road.

And many other smaller works and projects.

In addition to the above surveys, which were carried out by the ordinary Office Staff, an additional grant was obtained for a survey of the New Sewerage System of the Fort.

# REPORT OF THE DEPUTY EXECUTIVE ENGINEER FOR 1883-84.

No. 2061 OF 1884-85.

MUNICIPALITY OF BOMBAY,

DEPUTY EXECUTIVE ENGINEER'S OFFICE,

*Bombay*, 17*th May* 1884.

FROM

THE DEPUTY EXECUTIVE ENGINEER,

Municipality,

To

E. C. K. OLLIVANT, ESQ., C.S.,

Municipal Commissioner.

SIR,

I have the honour to submit my Annual Report of the working of the Department under me during the year 1883-84.

The new works sanctioned during the year, and carried out or in progress were as follows :—

| No. | Nature of Works. | Budget Grant. Rs. a. p. | Actual Expenditure. Rs. a. p. |
|---|---|---|---|
| 1 | Addition to Byculla Police Quarters ..... | 9,120 8 4 | 7,319 9 1 |
| 2 | Laying 20" and 18," &c., water mains in Jail Road, Chinch Bunder Row and Dungree Cooly Street. | 36,012 0 0 | 25,357 0 0 (work in progress.) |
| 3 | Laying 9" and 4" water mains on Gibbs and Altamount Roads ..... | 8,501 0 0 | 7,721 12 3 |
| 4 | Lining with masonry a portion of the Vehar Outlet Works Tunnel ..... | 8,068 0 0 | 7,238 5 5 |
| 5 | Construction of Chawls at Boree Bunder..... | 16,357 12 2 | 14,775 1 10 |
| 6 | Construction of Bullock Stables at Null Bazar for the Health Department ..... | 10,304 3 0 | 9,605 10 2 |
| 7 | Construction of Stables at Mody Bay ..... | 18,339 0 0 | ..... |
| 8 | Ditto of Relief Houses at Grant Road ..... | 11,015 0 0 | 10,225 1 9 |
| 9 | Paving a portion of the footpaths of Musjid Bunder Bridge ..... | 5,000 0 0 | 5,000 0 0 |
| 10 | New fencing to approaches of Bellasis Road Over-bridge ..... | 5,709 0 0 | 3,809 3 3 |
| 11 | Construction of a Chawl for the Staff at the Tulsi Lake ..... | 2,310 0 0 | ..... |

| No. | Budget Grant. Rs. a. p. | Actual Expenditure. Rs. a. p. |
|---|---|---|
| 12 Construction of an Ovoid Sewer from Belvedere Road to Waree Bunder Road | 1,313 0 0 | 1,313 0 0 |
| 13 Construction of a New Road (Kala Chowky Road) from Arthur Road to Chinchpoogly Road. | 25,928 0 0 | 13,724 0 0 |
| 14 Construction of Ward Offices for the Engineer's Department | 20,000 0 0 | 12 14 0 |
| 15 Ditto for the Assessor's Department | 15,000 0 0 | 39 14 8 |
| 16 Purchase of Private Road from Ghorupdeo Road to Chinchpoogly Road | 6,000 0 0 | ..... |
| 17 Purchase of land for New Road from Parel Station Level Crossing to the Junction of Haines and Worlee Roads | 25,178 0 0 | ..... |
| 18 Diversion of 24" main from under the Rifle Butts at Bandora | 2,932 0 0 | ..... |
| 19 Establishment and Stores for the prevention of waste of water | 10,392 0 0 | 4,024 0 0 |
| 20 Additional Lighting | 11,500 0 0 | 5,172 0 0 |
| 21 Fixing of Street Sign Boards and No. Plates on houses | 10,516 0 0 | 8,851 0 0 |
| 22 Purchase of meters for consumers | 35,000 0 0 | 23,853 0 0 |
| 23 Purchase of new sluices for Water Works Maintenance | 9,508 0 0 | ..... |
| 24 Purchase of land near the Moombadevi Tank Road for a New Street | 1,20,000 0 0 | 1,20,000 0 0 |
| 25 Purchase of ground for a New Cemetery at the Junction of Haines and Worlee Roads | 55,000 0 0 | 2,468 0 0 |
| 26 Purchase of ground for the extension of the Arthur Road Cemetery | 4,457 0 0 | 4,457 0 0 |
| 27 Purchase of Upwards Patent Drills for water mains | 2,000 0 0 | 2,000 0 0 |
| 28 Purchase of spare water pipes for the maintenance of the Tulsi Water Works | 9,971 0 0 | ..... |
| 29 Purchase of spare water pipes for the maintenance of the Vehar Water Works | 6,000 0 0 | ..... |
| 30 Removal of private service pipes from sewage gullies | 4,312 0 0 | ..... |
| 31 Fixing of Water Posts for the Fort and Malabar Hill Wards | 249 14 4 | 118 13 4 |
| 32 Additions and alterations to Police Quarters stables at Pydhowni | 793 3 6 | 792 11 1 |
| 33 Supplying cast iron Griffin figures to the Henry Memorial | 600 0 0 | 600 0 0 |
| 34 Enlarging cattle trough of Kesowjee Naik's fountain | 452 0 0 | 410 13 9 |
| 35 Construction of earthen embankment across the Worlee marsh near the Worlee sluices | 6,575 0 0 | 6,183 4 6 |

| | Rs. a. p. |
|---|---|
| Petty works were carried out during the year amounting to | 1,493 0 0 |
| Annual repairs to Municipal Buildings in charge of the Engineer's Department at a cost of | 2,677 8 11 |
| Annual repairs to Municipal Buildings in charge of the Health Department at a cost of | 3,127 7 8 |
| Annual repairs to Municipal Buildings in charge of the Commissioner of Police at a cost of | 762 15 2 |
| Annual repairs to Markets and Slaughter-Houses at a cost of | 13,614 14 2 |

The total income of the Engineering Department was as follows :—

| | | Rs. | a. | p |
|---|---|---|---|---|
| 1 | Opening Roads for water pipes and drains | 3,192 | 0 | 0 |
| 2 | Do. Footpaths for carriage entrances | 270 | 0 | 0 |
| 3 | Projecting Galleries | 4,902 | 12 | 6 |
| 4 | Do. Rewases | 3,003 | 2 | 11 |
| 5 | Do. Scaffolding and building materials | 3,302 | 13 | 11 |
| 6 | Do. Weather-frames | 708 | 8 | 7 |
| 7 | Licenses to Plumbers | 775 | 0 | |
| 8 | Miscellaneous Fees | 158 | 0 | 0 |
| 9 | Sale of Building Application Forms | 1,050 | 0 | 0 |
| 10 | Sale of Application Forms for water connections | 482 | 4 | 0 |
| 11 | Sale of Privilege of Catching Fish in Municipal waterways, &c., including rent for fields at Panwell | 1,689 | 0 | 0 |
| 12 | Cutting grass at Vehar, &c. | 489 | 8 | 0 |
| | Total Rs. | 20,023 | 1 | 11 |

Surveys for the New Works mentioned below with the preparation of the Contract Drawings and Estimates were undertaken and nearly completed during the year :—

| | Nature of Works. | Date of Sanction. | Amount of Sanction. | When commenced. | When completed. |
|---|---|---|---|---|---|
| 1 | Works for raising the Tulsi Lake Dams and Waste Weir ... ... | 15th May 1883. | 8,000 | 22nd May 1884. | End of January 1884. |
| 2 | Catchwater Channel on the west of Tulsi Lake ... ... ... ... | | | | |
| 3 | Do. do. on the N. E. of the Vehar Lake ... ... ... | | | | |
| 4 | Do. do. on the west of the Vehar Lake ... ... ... | | | | |
| 5 | The provision of Filter Beds at the Vehar Lake ... ... ... ... | | | | Not completed. |
| 6 | The laying of a 24" Main from Vehar to Bombay ... ... ... | | | | |

The object of, and necessity for, these important works have been stated elsewhere. I will only here mention, therefore, that the Tulsi dams and waste weir are to be raised four feet :—1st, to increase the water supply to the city ; 2nd, to provide for a reserve in the Lake in seasons of bad rainfall ; 3rd, to obviate the necessity of draining the Lake, down to an injuriously low level when its water becomes dirty and impure. The estimated cost is Rs. 1,20,000.

A catchwater channel in the Kennery Valley gathering-ground has been provided. This will intercept the water of four nullas and convey it into the Tulsi Lake, the object being to insure the filling of the Lake every year when its capacity has been increased by the raising of its dams and waste weir. The estimated cost is Rs.1,05,716. This channel can be extended to advantage to catch the water of a

large nulla 2,500 feet further in the Kennery Valley. This should be done if found necessary hereafter.

The catchwater channels at Vehar have been provided—1st to increase the supply of water to the Vehar Lake; 2nd, to enable a larger quantity to be drawn from it and delivered to consumers than is now practicable. The estimated cost is Rs. 10,000.

A 24″ main is to be laid from the Vehar Lake to Bombay—1st, to supplement the loss occasioned by the determination to place the reservoirs and filter beds on Bhundarwada Hill at an elevation 32 feet higher than originally intended and proposed; 2nd, to enable the larger supply of water to be given to the city (than is practicable with the 32″ main) as a consequence of the construction of the catchwater channels for the Vehar and Tulsi Lakes (any additional gathering-ground to the Tulsi Lake being available to supplement the supply to the Vehar Lake when the former overflows in seasons of excessive rainfall); 3rd, to prevent the supply of water to the city from the Vehar Lake being diminished as the season advances. The Lake falls about 12 feet between two monsoons. At the end of the monsoon it is at its highest level, and the head of pressure in the 32″ main to the city being then greatest, it delivers nearly one million gallons per diem more than it is capable of doing at the end of the hot season, in the month of May, when the head of pressure in the 32″ main is at its lowest. It is found that a much larger quantity of water is required in the city for domestic consumption as well as for trade purposes during the hot season (in the months of April and May) than in any other period of the year. The tanks attached to the mills from which the large spinning and weaving mills draw their water throughout most of the year, dry up in the month of April, and recourse is then had to the Vehar supply. Notwithstanding, however, the increased demand for water in these months the supply from the Vehar Lake is greatly reduced. The laying of the new 24″ main will remedy this defect, and will also enable the city to receive a million gallons per diem more in the months of April and May than in the other months of the year. This extra two million gallons a day, which will be given to the city in the hot months over and above what can now be supplied, will be an inestimable boon and will allay, to a very great extent, the great outcry for water at that time of year; 4th, to enable the reservoirs in Bhundarwada Hill to be rapidly refilled when through an accident to the Vehar main they have to be emptied, or partially emptied, to supply the city while the repairs to the main are being effected. Without the new main the reservoirs could not be refilled until after the lapse of several days, and the full 24 hours' supply from the Vehar main cannot be given to the city during those days; this would cause considerable inconvenience to the public.

Filter beds are to be provided at Vehar to filter 2½ million gallons per diem, the 24″ main supplying all its Districts (until it is connected with the works in Bhundarwada Hill) direct from the Vehar

Lake. The estimated cost of the new main and filter beds is Rs. 8,15,000.

No expenditure was incurred in the items below mentioned for the following reasons :—

Item No. 7.—These stables could not be commenced until item No. 5 was completed, because their site was occupied by chawls, which could not be vacated until those in item 5 were completed.

Item No. 11.—Tenders were advertised for this work, but the rates being very exorbitant it was thought advisable to include the work in the larger contract for the raising of the Tulsi dams when lower rates were certain to be obtained.

Items Nos. 14 and 15.—The designs for these Ward Offices have not yet been finally decided upon.

Items Nos. 16 and 17.—The negotiations for the purchase of the ground were not completed. There were many owners who had to be communicated with.

Item No. 18.—Tenders were advertised for this work, but, as the rates were high, it was decided to carry out the work departmentally after the Musketry Instruction Season was over.

Items Nos. 23, 28 and 29.—These articles being obtained from England, contracts were entered into, but the final delivery of them was not completed.

Item No. 30.—This work was sanctioned by the Corporation in October 1883, and as complete lists had to be prepared, and samples shown of the service pipe to be altered, of which there are 834, the work could not be undertaken earlier.

## BUILDING DEPARTMENT.

The number of applications for permission to build and re-build during the year under report amounted to 951, out of which 607 were sanctioned, and the remaining 344 were refused on sanitary and other grounds.

Permission to repair was granted in the case of 369 houses.

306 Notices for pulling down houses and ruinous portions of houses, and 126 Notices requiring the carrying out of repairs to houses, were issued.

321 Orders were issued to Inspectors for the removal of ruinous houses in whole or in part ; 47 were executed by them, while no action was taken in the remaining 274 cases, as the owners themselves complied with the Notices.

176 Orders were issued for removing door shutters opening outwards, projections, encroachments, and other objectionable constructions made without permission ; of these 54 were executed by Inspectors and the remainder by the parties themselves.

32 Removal Orders were issued for the pulling down of new huts built without the permission of the Municipal Commissioner, and contrary to the rules and regulations in force ; all of these were executed by the Inspectors.

As regards dangerous houses, compound walls, &c., coming under Section 200 of the Municipal Act, there were 48 cases during the year, of which 46 were trifling and 2 of a serious nature. In one of these 2 persons were killed and 3 slightly injured.

The attached statement **A** gives the whole of the abovementioned cases in detail.

The following is the list of Notices and Removal Orders issued by the Building Department :—

| | | | |
|---|---|---|---|
| 1. | Notices for removing inflammable materials | | 1,254 |
| 2. | Do. | pulling down ruinous houses | 306 |
| 3. | Do. | repairing houses | 126 |
| 4. | Do. | forwarding plans | 578 |
| 5. | Do. | building privies without permission | 155 |
| 6. | Do. | removing buildings, erected contrary to sanctioned plans | 72 |
| 7. | Do. | fencing and enclosing wells, tanks and dangerous places | 2 |
| 8. | Do. | removing old projections | 53 |
| 9. | Do. | removing new projections | 456 |
| 10. | Do. | removing door shutters which opened on to the public roads | 74 |
| 11. | Do. | payment of Municipal fees | 473 |
| 12. | Do. | levelling and metalling private streets | 208 |
| 13. | Do. | cutting and trimming trees | 23 |
| 14. | Do. | building sheds contrary to Municipal By-Laws | 32 |
| 15. | Do. | providing rain water troughs and pipes | 234 |
| 16. | Do. | 24 hours' notice of entry of houses | 755 |
| 17. | Do. | removing temporary projections | 215 |
| 18. | Do. | Removal Orders for pulling down ruinous houses, privy doors, benches, and other encroachments | 497 |
| 19. | Do. | Removal Orders for pulling down objectionable huts | 258 |
| 20. | Do. | fixing telephone brackets to buildings | 67 |
| | | Total... | 5,838 |

The number of Summonses issued for different offences committed under the Act were 1,802. In 1,596 of these, the parties complied before the service. Convictions were obtained in all the remaining 206 cases. In 96 of these, the parties were warned and then discharged by the Magistrate on account of their complying with the requirements of the Municipality immediately after the service of the Summonses. In the remaining cases the parties were fined.

The total amount of fines inflicted was Rs. 875-7-8.

The amount allowed for street improvement was Rs. 40,000. The total amount expended was Rs. 28,108-15-2.

Statement marked **B** shows the locality and area of each plot, and statement **C** those cases in which compensation, according to the rates approved by the Town Council, has been paid. Statement marked **D** is a list of sales of plots of ground belonging to the Corporation.

## WATER WORKS DEPARTMENT.

The total rainfall on the gathering-ground of the Vehar Lake during the past year was 99·54 inches. During the previous four years it was as follows:—

| | |
|---|---|
| 1882-83 | 54·63 |
| 1881 | 59·10 |
| 1880 | 72·42 |
| 1879 | 76·42 |

The level of the Lake at the commencement of the monsoon was 40·70 feet on the gauge, and at its close 59·15. The level of the waste weir is 59·00 on the gauge. In 1882-83 it was 43·10 feet at the commencement, and 51·90 at the close, of the monsoon.

The total rainfall on the gathering-ground of the Tulsi Lake during the past year was 109·46 inches. During the previous three years it was as follows :—

| | |
|---|---|
| 1882-83 | 74·22 |
| 1881 | 86·11 |
| 1880 | 93·76 |

The level of the Lake at the commencement of the monsoon was 17·14 feet on the gauge, and at its close 52·95. The highest level during the monsoon was 53·29. The level of the waste weir is 53·15 on the gauge. In 1882-83 it was 20·42 feet at the commencement, and 47·17 at the close, of the monsoon. Attached is a statement of rainfall and height of water in the Lakes for the year under report.

There were two extensions made during the past year.

| No. | Locality. | Size of Main. | Length of Main. | Cost. Rs. a. p. |
|---|---|---|---|---|
| 1 | Gibbs Road | 9″ | 817 | 4,332 1 2 |
| 2 | Altamont Road | 4″ | 2,266 | 3,389 11 1 |
| | | | Total Rs... | 7,721 12 3 |

There were three bursts in the 32″ Vehar main, and three in the 24″ Tulsi main, and several in the smaller mains.

| Size of Mains. | Number of Bursts. |
|---|---|
| 32″ | 3 |
| 24″ | 3 |
| 14″ | 4 |
| 8″ | 3 |
| 7″ | 4 |
| 6″ | 6 |
| 5″ | 5 |
| 4″ | 29 |
| 3″ | 73 |
| Total... | 130 |

The following list shows the number of dipping wells, drinking fountains, standpipes, &c., in use :—

| Wards. | Dipping Wells. | Drinking Fountains. | Stand-Pipes. | Large Ornamental Fountains. | Cattle Troughs. | Total. |
|---|---|---|---|---|---|---|
| A | 7 | 10 | 3 | 7 | 4 | 31 |
| B | 6 | 4 | 1 | 1 | 7 | 19 |
| C | 7 | 11 | 3 | 1 | ... | 22 |
| D | 5 | 4 | 1 | ... | 1 | 11 |
| E | 11 | 17 | 5 | 4 | 3 | 40 |
| F & G | 10 | 10 | 11 | ... | 2 | 33 |
| Total... | 46 | 56 | 24 | 13 | 17 | 156 |

All the dipping wells, drinking fountains, &c., were cleaned one at short intervals. A new drinking fountain was fixed at Erskine Road, and five cattle troughs with water posts attached were taken over from the Port Trustees, and are now in charge of the Municipality and kept up for the benefit of the public.

25 houses that have no water connections, but the tenants of which have access to the adjacent houses in which water is laid on, have agreed to pay water rate on the assessed value of their houses. In 1882-83 there were 204 such cases, and in 1881 there were 54.

There were 416 new connections made, and 115 connections were cut off, giving an increase of 301.

The following shows the number of connections standing in each year from 1880 :—

1880 .....12,494
1881 .....12,817
1882-83.....13,244
1883-84.....13,545

The total number of meters in use up to 31st March 1884 were :—

| Private Meters. | Government Meters. | Total. |
|---|---|---|
| 690 | 95 | 785 |

On 31st March 1883 there were 737 meters in use. In 1881 there were 636.

3,089 Notices were served for repairing leaks, &c.

The total number of mains examined in the Vehar Districts by the Waste Prevention Staff was 147, of an aggregate length of 71,987 feet; 23 of these were found wasting water to the extent of 384,000 gallons per diem. The total length of mains examined by the Staff up to date is 250,802 feet.

## ROAD DEPARTMENT.

The amount sanctioned under the head of Road Repairs was Rs. 2,59,467; of this sum Rs. 30,000 was apportioned for paving footpaths (detailed further on), Rs. 9,000 for the rebate allowed to the Port Trustees, and Rs. 12,000 for road-scraping, leaving an available balance of Rs. 2,08,467 for actual repairs to roads.

The whole of the roads on the Elphinstone Estate to the east of the Frere Road belonging to the Port Trustees were taken over from them, and declared public streets. These include the Argyle Road, Clive Road, Ahmadabad Road, Baroda Street, Bharuch Street, Surat Street, Masjid Bridge Street, Kurla Street, Thana Street, Kalian Street, Puna Street, Sholapur Street, Raichor Street, Elphinstone Bridge Road, Nasik Street, Bhusawal Street, Nagpor Street, and Malet Road.

The following footpaths were paved with blue stone at a cost of Rs. 27,495-4-0 :—

| | Square feet. |
|---|---|
| Carnac Road up to old Kaji Street ..... | 21,998·50 |
| North of Paltan Road near Beef Market..... | 1,429·00 |
| Kolaba Causeway near Tramway Company's Office. | 362·00 |
| East side of Hornby Road near Warrant Officers' Quarters ..... | 8,285·53 |
| Hornby Road near the G. I. P. Ry. Terminus..... | 23,402 73 |
| Green Street, south side ..... | 982·37 |
| Masjid Bander Footpath, north and south side ..... | 15,307·28 |
| | 71,767·41 |

## TRAMWAYS.

No extension has been made by the Tramway Company during the year under report.

## ROAD WATERING AND SCRAPING.

The watering by carts as in the previous years was carried out departmentally at a total cost of Rs. 36,519-10-11, and much more satisfactorily than by contract. Those roads watered by Bhistis have been done as before by contract at a total expenditure of Rs. 8,315-12-10. The Contractors were Messrs. Rahimtulla Bhaijibhai & Co.

The expenditure on road-scraping has been Rs. 10,884-15-7.

## BHANDARWADA WATER WORKS.

The annexed statement gives the progress under Messrs. Yellapa Balaram's contract on the Bhandarwada Hill, up to the 31st March 1883, and the work remaining to be done, &c.

The work of laying the 48," 32" and other mains under Mr. Cavasjee Sorabjee Bhedwar's contract was, with the exception of a few short lengths, completed in the year under report.

No. 1337 of 1884-85.

From RIENZI WALTON, Esq.,
Executive Engineer, Municipality,

To E. C. K. OLLIVANT, Esq.,
Municipal Commissioner.

Bombay, 26*th May* 1884.

Sir,

I have the honour to submit the following report on the different Public Gardens in Municipal charge :—

## VICTORIA GARDENS.

During the year under report considerable improvements have been made in these gardens. Several acres of new lawns have been formed ; the lake has been enlarged and deepened, the banks turfed, and the site of the old Deer Park improved. A large new fernery, about 250 feet in length, has been erected and filled with a rare collection of palms, crotons, caladinus, ferns, dracencas, anthiruns, orchids, and other foliage and flowering plants. The nursery has been re-arranged, and made much more attractive for visitors. All the lawns have been kept in very good order, and the show of annuals from seeds obtained from Germany has been very good. All the principal roads have been repaired and covered with shell sand. Several new plants have been introduced. The animals have, on the whole, done very well, and but very few deaths took place. Several very fine specimens of birds have been added to the aviary. A number of animals and birds have been presented to the gardens, and the donors duly thanked.

| | | | |
|---|---|---|---|
| The amount sanctioned for the gardens, including keep of animals, &c., was..... | Rs. | 18,252 | 4 0 |
| The total expenditure..... | ,, | 17,787 | 9 10 |
| Saving..... | Rs. | 464 | 10 2 |

The amount of income received amounted to Rs. 7,717 12 6

## NORTHBROOK GARDEN.

This garden has been improved considerably during the past year, and has now a very fine appearance. The class of people who frequent this garden give the Mallees much trouble, and I would recommend that, in next year's Budget, a police peon be added to the staff to be constantly in attendance at the garden.

| | | | | |
|---|---|---|---|---|
| The grant for the year was ..... | Rs. | 878 | 11 | 7 |
| The expenditure ..... | „ | 715 | 11 | 8 |
| Saving ..... | Rs. | 162 | 15 | 11 |

## FALKLAND ROAD GARDEN.

This garden has been kept in very good order, and is a nice cool resort for a number of people during all hours of the day.

| | | | | |
|---|---|---|---|---|
| The grant was ..... | Rs. | 290 | 0 | 0 |
| The expenditure was ..... | „ | 244 | 8 | 11 |
| Saving ..... | Rs. | 45 | 7 | 1 |

## SIR COWASJEE JEHANGIR GARDEN.

This garden remains still unfinished. It has been kept in fair order, but will never look neat until completed.

| | | | | |
|---|---|---|---|---|
| The grant was ..... | Rs. | 421 | 4 | 5 |
| The expenditure ..... | „ | 404 | 12 | 1 |
| Saving ..... | Rs. | 16 | 8 | 4 |

## ELPHINSTONE CIRCLE GARDEN.

| | | | | |
|---|---|---|---|---|
| The amount sanctioned for this garden was... | Rs. | 1,664 | 0 | 0 |
| The amount expended was ..... | „ | 1,466 | 9 | 10 |
| Leaving a saving of ..... | Rs. | 197 | 6 | 2 |

During the whole of the year this garden has looked well. It has been stocked with flowers, and the lawns and footpaths have been well kept.

## BAZAR GATE GARDEN.

This garden has been re-constructed during the past year. It requires, however, a monsoon to pass over it before the grass and shrubs will show up to advantage. The state of the fencing was, however, a great drawback to its appearance, but as this has now been put into better order, and the general effect is neat and good.

The sanctioned expenditure for the year was Rs. 1,510-0-0, of this amount Rs. 1,104-3-2 was expended, leaving a balance of Rs. 405-12-10.

I have the honour to be,
Sir,
Your most obedient servant,
RIENZI WALTON,
Executive Engineer, Municipality.

# EIGHTEENTH ANNUAL REPORT OF THE HEALTH OFFICER.

---

MUNICIPAL COMMISSIONER'S OFFICE,
Public Health Department,
BOMBAY, *February* 1884.

From

D. C. DAVIDSON,
Surgeon, H. M.'s Indian Medical Service,
*Acting Executive Health Officer*,

To

E. C. K. OLLIVANT, ESQ., C.S.,
*Municipal Commissioner*
for the City of Bombay.

SIR,

Having been appointed to act as Health Officer, I took over charge on the 28th July 1883 from Mr. Leask, Assistant Health Officer, who had been in charge from 26th May, while Dr. Weir, the Health Officer, was acting as Commissioner.

2. I have the honour now to submit the Annual Report for 1883.

3. During a considerable portion of the period under review, the health of the city was not good. There were 3,062 deaths more than in the previous year, and 931 more than the average of the previous five years. The gravity of this large increase is not lessened when we reflect that it was mainly due to the most prominent of what are termed *preventible* diseases, chiefly cholera and small-pox; but the mortality from fevers was 1,656 less than the average, it is right to mention.

4. Exclusive of still-born, 23,530 deaths were registered. The death-rate, estimating for increase of population, is equal to 29·12 per 1,000, as compared with 25·89 in 1882. The death-rate amongst a large permanent and non-fluctuating class of the population—the Parsis—is but 22·96.

5. In each of the four Quarterly Reports for the past year, I have brought forward, in the most urgent manner, the absolute necessity that exists for a permanent hospital* for infectious diseases, and the Municipal Commissioner, in a letter published in the local newspapers, called attention to the want of an institution of this description. The necessity, however, for a permanent epidemic hospital must be so apparent to every one that it would be useless to add more on the subject. Now that this most important and pressing want has been brought again so prominently to their notice, there can be no doubt that the Municipality will, without delay, sanction the necessary expenditure in order to provide this ordinary and necessary means of precaution for dealing with epidemic diseases.

6. In the Report for the 3rd Quarter of 1883, I thus write on the epidemic of cholera which developed in the 3rd Quarter:

"The mortality from cholera is 686 more than in the last three "months, and 789 more than in the corresponding period of the past "year. 821 deaths were referred to this disease, which was declared "to be epidemic in Bombay during the week ending 31st July 1883, "previous to which time measures were taken to combat the disease. "Seven special Medical Officers were, through the forethought of the "Acting Municipal Commissioner, appointed for the various wards "of the city, and a Cholera Hospital was later on established at Grant "Road. Here I would again beg to bring forward the desirability "of being always provided with an epidemic hospital, and at least the "rudiments of a staff, which could be increased at the shortest notice."

7. I would beg to draw attention to the extreme desirability of increasing the working establishment of this department. The scavenging branch is inadequate for the requirements of the city which cannot be kept in a completely clean, healthy and sanitary condition without the increase which I have elsewhere asked for. The number of bullocks should be augmented. They are too few in number and get quickly worn out owing to their powers being over-

* The importance of providing hospital accommodation for the treatment of diseases of an infectious nature has been frequently referred to. In the Annual Report of 1881, the Health Officer writes:—"The responsibility has become so "manifest in regard to providing hospital refuge (beyond already existing hospital "relief) in central positions for persons suffering from zymotic diseases, more "especially cholera, that in this year I have suggested to you that five open hospital "buildings should be erected in central positions, and kept ready for receiving "persons stricken with zymotic diseases, or for those other sufferers who, removed "from buildings by our orders, are homeless and can find no home. Estimates are "being prepared of the cost of the erection of these buildings; they will not cost "much as they will be of light structure, and the more open they will be the "better; simply open buildings are required, when there are patients to be admitted, "partitions of a combustible and cheap nature can be put in, and when the period of "emergency has passed away these partitions can be destroyed."

In 1883 Dr. Weir formed, after sanction, a large camp for small-pox on the outskirts of the city at Arthur Road. The camp was opened on the 22nd February 1883, and kept open till 31st May. When Dr. Davidson took over charge of the duties of Health Officer, he found that a Cholera Hospital had been erected in Kamahtipura by the Assistant Health Officer in charge, Mr. Leask, under the orders of the Acting Municipal Commissioner. Both Hospitals were in charge of Dr. MacDonald. Therefore, it appears that, since 1876 whenever it was necessary, temporary hospitals have been erected, and this shows the need of permanent hospitals.

taxed, thus entailing a pecuniary loss upon the Municipality, while the work is not thoroughly done.

8. The question of the disposal of town sweepings has lately given rise to much discussion, but as it has been agreed to by all parties that under no circumstances will it be possible to continue to deposit cutchra on the Flats for any length of time, it is unnecessary to enter into any discussion in regard to that matter beyond expressing a decided opinion on my part that, under no circumstances whatever, should the present system of removing sweepings to the Flats be continued one day longer than is absolutely necessary. Some experiments have been made in burning cutchra, the results of which have only gone to strengthen the opinion previously entertained that this means of getting rid of the sweepings would, during the rains, prove a financial failure. The proposal to carry them out to sea would, during the monsoon, be attended with risk, so that the only other alternative seems to be to remove the cutchra to Kurla, and for this purpose I would again strongly advise that a tramway, which you have had under consideration for some years, should be constructed, which would in the end pay itself, and be the property of the Municipality. Moreover it will not be lost sight of that a large revenue would be realized from reclaimed land at Kurla. There would, no doubt, be some difficulty in obtaining suitable places for sidings. In certain parts of the town tanks might be filled in as originally recommended, by the Sanitary Commissioner, and used for this purpose. But whatever means of conveyance be adopted, the more the question of the disposal of cutchra is considered in all its bearings, the more desirable will its removal to Kurla appear to be. It is a simple, practicable and, from a sanitary point of view, wholly unobjectionable solution of the difficulty.

9. In my Report for the 3rd Quarter I have called the attention to the fearful condition of the Port Trust property at Mody Bay in the following manner :—

"I cannot conclude this report without bringing to your notice "the serious nuisance arising from the filthy condition of the foreshore "at Mody Bay. To this place hundreds of people resort for natural "purposes, and the night-soil is allowed to remain from week to "week and month to month, without any adequate effort being made "by the Port Trust to remove it. It is useless for the body to contend "that there is a sufficient excuse in the fact that latrines do not exist. "They have not provided latrine or privy accommodation for a large "number of their workmen and tenants, and until such time as they "have complied with this requisition, which both decency and health "alike demand, they should be held legally responsible for the sani-"tary condition of their property. The breeze from the open sea "sweeping over the putrefying night-soil carries infection and disease "to the neighbouring European General Hospital, and many other "buildings, inhabited both by Natives and Europeans. The nuisance "has now reached such a pitch that it almost surpasses any other in "Bombay, and immediate measures are therefore imperatively "called for."

It seems preposterous that while lakhs of rupees are being spent for the removal of sewage, the Trust should permit masses of night-soil to accumulate and putrefy on the foreshore at Mody Bay, thus poisoning the air within a short distance of inhabited houses. It is absolutely necessary, in the interests of the public health, that active measures should be taken to induce the Port Trust to abate this nuisance.

10. The Back Bay nuisance, which had disappeared for some years, I believe, has been a source of grave anxiety during a few months of the past year, but I have already submitted a full and exhaustive report in regard to it, pointing out, amongst other things, that the Sonapur Main Drain, though one, is not the only cause of the nuisance. Every effort was made, and successfully, to mitigate it.

11. Much attention has been devoted to the condition of the Carnac Bandar Night-soil Depôt. The Tulsi water was at my suggestion turned on at this place, and affords generally an abundant supply with which to flush the tank. Before this, salt water and Vehar water were used for cleansing the Depôt, but towards the end of 1883 the supply fell short and was not sufficient. Hoses have been provided, and new gratings made which, it is hoped, will admit of the night-soil being dropped direct through the hoppers into the tank without the intervening barrier of a grating to remove cutchra, such as rags, stones, &c. The nuisance, however, must continue to exist in a greater or less degree until such time as the night-soil is deposited elsewhere. Were a tramway constructed to convey the street sweepings out of the island, it would be a matter worthy of serious consideration whether the night-soil could not be removed by the same means.

12. It is a matter of congratulation, from a sanitary point of view, that the drainage of the city is being gradually, if not rapidly, proceeded with. Whether the whole of the sewage will ultimately be carried by the sewers, or whether the more highly scientific and sanitary mode of conveying by them only the sullage and subsoil water and of returning the night-soil to the land be adopted, it is a matter for sincere congratulation that—it is to be hoped—at no very distant date the larger number of the eighteeen hundred *cesspools* which are to be found scattered over Bombay will be done away with, and the disease producing subsoil water, in a measure, removed. When this has been accomplished and a sufficient supply of wholesome drinking water provided, two of the chief causes of disease in this city will have been swept away. It is vain to hope that districts, damp and saturated with sullage which has no outlet, can be other than hot beds of disease. It is most desirable, therefore, that the drainage system should be pushed on as quickly as possible, and every effort made to obtain a proper supply of pure drinking water for the city, and until this is done frequent epidemics of cholera and other diseases must be expected.*

* Attention is drawn to the description, in the Annual Report of 1882, of outbreaks of cholera probably due to the contamination of well-water from cesspools. Dr. Weir found the well-water very much contaminated.

13. I beg to draw your attention to the condition of private lanes and roads generally throughout the city. I think all such places ought to be taken over by the Municipality, and cleaned in the same manner as public thoroughfares. At the present time it is impossible to get the owners to keep them in a sanitary condition, and in many cases it is only after a disagreeable prosecution that they can be induced to clean them at all. They are, moreover, badly paved and metalled, and frequently not paved or metalled at all, but filled with ruts and holes where dirt and stagnant water lodge, and are occasionally impassable during the rains. Were all such private roads, lanes, &c., taken over by the Municipality, properly paved or metalled by the Engineers, and cleaned by the Health Department, with, of course, an increased establishment for doing so, the gain from a sanitary point of view would be incalculable.*

14. Examining the deaths according to place of birth, we observe that 11,424 were born in Bombay and 11,865 elsewhere, and that the place of birth of 241 was unknown, relatively to place of birth the excess over the previous year consists of 1,328 amongst those born in Bombay and 1,719 born outside of Bombay. In this table is shown the mortality according to place of birth :—

RETURN SHOWING THE NUMBER OF DEATHS ACCORDING TO PLACE OF BIRTH IN 1883, EXCLUSIVE OF STILL-BORN.

| Months. | Bombay. | Elsewhere. | Unknown. | Total. |
|---|---|---|---|---|
| January | 950 | 1,003 | 20 | 1,973 |
| February | 1,020 | 1,144 | 19 | 2,183 |
| March | 1,162 | 1,205 | 38 | 2,405 |
| April | 1,087 | 992 | 19 | 2,098 |
| May | 988 | 927 | 19 | 1,934 |
| June | 857 | 761 | 12 | 1,630 |
| July | 1,071 | 1,035 | 18 | 2,124 |
| August | 1,098 | 1,365 | 27 | 2,490 |
| September | 880 | 923 | 17 | 1,820 |
| October | 797 | 738 | 17 | 1,552 |
| November | 736 | 745 | 16 | 1,497 |
| December | 778 | 1,027 | 19 | 1,824 |
| Total... | 11,424 | 11,865 | 241 | 23,530 |

The mortality arranged according to groups of important death-causes is shown in the table which follows, except under measles and diseases of the respiratory system, from which there is a less mortality ; there is an excess mortality from other causes over that of 1882. The death-rate from small-pox is 1·70, cholera 1·03, fevers 0·41, phthisis 0·44, diarrhœa 0·05, increased since 1882.

* This has been previously referred to in the Annual Reports.

RETURN SHOWING THE NUMBER OF DEATHS FROM DIFFERENT CAUSES, IN 1883.

| Causes of Deaths. | Number of Deaths. | Rate per 1,000 of Population. | REMARKS. |
|---|---|---|---|
| Small-pox | 1,461 | 1·81 | Annual increment of population is calculated. |
| Measles | 319 | 0·39 | |
| Fever | 5,903 | 7·31 | |
| Cholera | 1,027 | 1·27 | |
| Phthisis | 3,144 | 3·89 | |
| Diseases of Nervous System | 2,849 | 3·53 | |
| Do. Respiratory do. | 3,394 | 4·20 | |
| Diarrhœa | 1,160 | 1·43 | |
| Dysentery | 646 | 0·80 | |
| Accidents | 357 | 0·44 | |
| All other causes except still-born | 3,270 | 4·05 | |
| Total... | 23,530 | 29·12 | |

This table exhibits the total number of deaths since 1877, and the rate of mortality amongst distinct and great classes of the population :—

RETURN SHOWING THE TOTAL NUMBER OF DEATHS AND THE RATE OF MORTALITY IN THE FOLLOWING CLASSES SINCE 1877, PER 1,000 OF POPULATION.

| | Total No. of Deaths in the City. | Brahmin. | Parsi. | European. | Mussulman. | REMARKS. |
|---|---|---|---|---|---|---|
| 1877... | 33,511 | 29·93 | 23·04 | 30·33 | 45·26 | These calculations are made on the population of 1872. |
| 1878... | 26,999 | 31·83 | 24·99 | 31·98 | 49·12 | |
| 1879... | 22,527 | 27·99 | 20·45 | 24·81 | 41·57 | |
| 1880... | 21,146 | 27·60 | 20·14 | 26·88 | 37·44 | |
| 1881... | 21,856 | 19·05 | 20·10 | 22·77 | 31·05 | These calculations are made on the population of 1881. Increment of population is not calculated. |
| 1882... | 20,468 | 21·02 | 18·43 | 17·70 | 29·87 | |
| 1883... | 23,530 | 23·06 | 22·96 | 18·94 | 34·53 | |

In 1883 we find that 10,087 children under 5 years of age died. The mortality in 1883 is 123·40, and in 1882 the mortality was 108·99 ; the deaths of infants under 1 year of age in 1883 are 815 more than in 1882 ; the death-rate of infants under one year of age in 1883 is 290·73 per 1,000 to 254 per 1,000 in 1882. The deaths under 5 years of age are 42·46 per cent., and the deaths under

1 year 27·96 per cent. of the total deaths; in 1883 the deaths under 1 year of age equal to 43·34 per cent. of the births. The deaths from fevers amongst children under 5 years of age are 435 more than in 1882.

THE NUMBER OF DEATHS AND RATE OF MORTALITY AT DIFFERENT PERIODS OF LIFE UNDER 5 YEARS OF AGE.

| | Deaths 1882. | Per 1,000 of Population. | Deaths 1883. | Per 1,000 of Population. |
|---|---|---|---|---|
| Under 1 year | 5,766 | 254·72 | 6,581 | 290·73 |
| „ 1 to 2 years | 1,775 | 112·38 | 1,746 | 110·54 |
| „ 2 to 3 „ | 788 | 55·93 | 892 | 63·31 |
| „ 3 to 4 „ | 315 | 23·01 | 520 | 37·99 |
| „ 4 to 5 „ | 267 | 17·17 | 348 | 22·37 |
| Total... | 8,911 | 108·99 | 10,087 | 123·40 |

RETURN OF CAUSES OF DEATHS UNDER 5 YEARS OF AGE DURING 1883.

| All other Causes | 5 |
| Total..... | 10,087 |

As in previous years the mortality and death-rate of male children under 1 year of age are higher than females. There is in this year, as in all previous years, an excessive female mortality between 12 and 40 years of age; the excessive female mortality at the nubile period is 475 more than in 1882.

## Return showing the Death-Rate at different Periods of Life.

The lowest mortality in 1883 is registered amongst Europeans; the European mortality is 4·02 per 1,000 less than the Parsi mortality; the European death-rate is 18·94 to 17·70 in 1882.

TABLE EXHIBITING THE MORTALITY AMONGST EUROPEANS, EURASIANS AND PARSIS DURING A SERIES OF YEARS.

| Years. | Parsis. | Europeans. | | Eurasians. |
|---|---|---|---|---|
| | Per 1,000 of Population. | Per 1,000 of Population. | Remarks. | Per 1,000 of Population. |
| 1872 | 28 44 | 29·22 | | 14·45 |
| 1873 | 21·97 | 24·54 | | 18·28 |
| 1874 | 22·31 | 25·21 | | 17·73 |
| 1875 | 24·08 | 32·53 | | 21·68 |
| 1876 | 23·74 | 24·67 | These calculations are based on the | 21·68 |
| 1877 | 23·04 | 30·33 | population of 1872. | 28·91 |
| 1878 | 24·99 | 31·98 | | 25·80 |
| 1879 | 20·45 | 24·81 | | 17·85 |
| 1880 | 20·14 | 26·88 | | 23·80 |
| 1881 | 20·10 | 22·77 | These calculations are based on the | 37·67 |
| 1882 | 18·48 | 17·70 | population of 1881. | 31·67 |
| 1883 | 22·96 | 18·94 | | 50·51 |

15. Examining the mortality according to classes, we find that, of the principal races occupying this city, the lowest mortality is registered amongst Europeans, but this is, no doubt, largely due to the fact that sick Europeans, when practicable, leave Bombay as quickly as possible and die in England or elsewhere, thus reducing the mortality far below what it would be were they placed under the same conditions as other communities. The Parsis are the next healthiest. The mortality amongst Europeans, though more than in 1882, is less than in 1880 and 1881.

The highest death-rate is found amongst the low-caste Hindus, the rate being 34·05 per 1,000. The Hindus as a class furnish a death-rate of 28·80 per 1,000, that of Brahmins being 23·06 per 1,000, and of Bhatias 34·76.

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY AMONGST DIFFERENT CLASSES IN 1883.

| Classes. | Population by Census of 1881. | Number of Deaths. | Per 1,000 of Population. |

16. The mortality from small-pox is very high, yet it is less than in 1876. There can be no doubt that as vaccination is more extended, and hygienic measures more carefully attended to, small-pox will, or at least ought to, become a disease of the past. But in order to protect Bombay from this scourge, it is not only necessary that vaccination should be rigidly carried out in the city itself, but also in the mofussil. A very large number of those attacked were strangers in Bombay, and in the ordinary course of things would not have been vaccinated here. A Small-pox Hospital is an absolute necessity, the want of which has been acutely felt in dealing with epidemics of this disease, and it is sincerely to be trusted that another year will not be permitted to pass without providing Bombay with such an institution.*

In all 1,461 deaths were registered from small-pox; 519, the greatest number, occurred in March. The mortality in each month is shown in this statement :—

| | | | |
|---|---|---|---|
| January | 150 | February | 372 |
| March | 519 | April | 294 |
| May | 81 | June | 35 |
| July | 7 | August | 1 |
| September | 0 | October | 1 |
| November | 1 | December | 0 |

In Mahalakshmi and 1st Nagpada, the highest mortality is registered, and in Dhobi Talao, the second highest fatality; in Fort, Southern, no deaths from small-pox occurred; the lowest mortalities were registered in Warli, Mahim, Walkeshwar and Sion.

---

* Dr. Weir in the Annual Report for 1882 thus writes in regard to the commencement of the epidemic in 1882 :—

"It is possible that the resuscitation of small-pox in a severe type in "December 1882, may have been influenced by the importation on board ships "of cases of a severe type; one very notorious instance of importation of cases "of small-pox occurred, and the taking ashore of dead and living affected, "unquestionably is a most serious danger; at the same time in the number of "susceptible adults and infants there are susceptible elements for the infection "and propagation of small-pox. I think the time has come when vaccination "of adults and re-vaccination should be made compulsory, and when there should "be some special law dealing with unprotected stranger adults."

BOMBAY, 29th *January* 1884.

ANANTA CHANDROBA,
Superintendent of Vaccination, Presidency Circle,
*Bombay.*

224

Examining the fatality from small-pox according to classes we find that the highest mortality is recorded amongst Lingaets, Eurasians and Jains ; the lowest death-rate is registered amongst Europeans.

RETURN SHOWING THE NUMBER OF DEATHS FROM SMALL-POX DURING 1883.

| Castes. | Population of 1881. | Number of Deaths. | Per 1,000 of Population. |
|---|---|---|---|
| Jains | 17,218 | 56 | 3·25 |
| Brahmins | 35,428 | 38 | 1·07 |
| Lingaets | 1,167 | 6 | 5·14 |
| Bhatias | 9,417 | 13 | 1·38 |
| Hindus of other Castes | 407,717 | 871 | 2·13 |
| Do. Low-Castes | 49,122 | 77 | 1·56 |

| Eurasians | 1,168 | 4 | 3·42 |
| Europeans | 10,451 | 6 | ·57 |
| Negro Africans | 689 | 9 | 13·06 |
| Buddhists | 169 | ..... | ..... |
| Other and unknown Castes | ..... | ..... | ..... |
| Total ... | 773,196 | 1,461 | 1·81* |

* Increment of population is calculated.

The most fatal period of life was from 1 to 6 months. The next most fatal period between 7 to 12 months of age; the mortality from small-pox amongst children under 1 year of age was equal to 25·04 per 1,000. Taking all periods of life under 5 years of age, 12·01 of each 1,000 children died. Up to 4 years of age; more females died. Taking all periods of life, 759 males died to 702 females ; the total mortality from small-pox being equal to 1·81 per 1,000 of population, being 3·11 less than in 1876.

TABLE SHOWING THE RATE OF MORTALITY FROM SMALL-POX AMONGST MALES AND FEMALES AT DIFFERENT PERIODS OF LIFE.

| AGES. | DEATHS FROM SMALL-POX. | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Male Population of 1881. | Males. | Per 1,000 of Population. | Female Population of 1881. | Females. | Per 1,000 of Population. | Population of 1881. | Persons. | Per 1,000 of Population. |

The mortality from measles is 672 less than in 1882 ; 319 deaths were registered ; the greatest mortality occurred in the 1st Quarter, 190 deaths being registered.

| | | |
|---|---|---|
| 1st | Quarter | 190 |
| 2nd | do. | 90 |
| 3rd | do. | 22 |
| 4th | do. | 17 |

Examining the mortality from measles according to classes, we find that the mortality is divided amongst all classes; the lowest death-rate is registered amongst Europeans.

* Increment of population is calculated.

17. The cholera epidemic, properly so called, which had raged for several months from May to October 1883, had subsided, and in November there were only four deaths from the disease, and in December up to the 18th of the month six, when a sudden out-break occurred almost co-incident with the breaking of the Vehar main, which deprived Bombay of its larger source of supply of pure drinking water for three consecutive days. It has often been suggested that cholera is communicated or caused by impure drinking water, but in no instance that I know of has this surmise received more support than in the present instance. That the people, on being deprived of their ordinary supply of water, had recourse to impure wells and tanks, is undoubted. In many cases this has been clearly proved, and where the quantity of water was scantiest, there was cholera most virulent. On and in the neighbourhood of Navroji Hill where sanitation was in the very worst state for this city, and the water supply least, cholera was most prevalent. The gullies, drains, cesspools and general surroundings of the houses were in a bad condition ; many of the dwellings in which this disease broke out were badly ventilated, badly drained and dangerously over-crowded, while imperfectly constructed, and uncleansed cesspools were to be found in various quarters. Near one house in C. Ward, where five cases occured, the condition of the cesspools was truly appalling ; they were so large and so constantly filled with a dilute solution of sewage that we, with our inadequate establishment, were unable to keep them clean. At some distance from those receptacles was a well of drinking water from which the supply for all domestic purposes was too surely drawn during the break in the Vehar water main.

18. With regard to Navroji Hill, the sanitary measures adopted were of a most energetic description. Extra carts were employed for removing cutchra, and additional biggaries and sweepers, under Europeon Inspectors, entertained for properly cleansing this portion of the city. Every lane, gully, drain and privy throughout the Hill was thoroughly cleansed, and the drains and gullies were freely flushed with a rough mixture of crude carbolic acid and lime. In every house in which cholera occurred the following and usual process was adopted: the floors of the rooms were dug up, and saturated with strong carbolic acid ; the walls scraped and washed with phenyle, sulphur and dammer burnt in the rooms with closed doors for three days ; the walls white-washed at the expense of the Municipality ; the privies, drains, gullies, &c., cleansed and flushed with a mixture of carbolic acid and lime, while the privies themselves were white-washed, and large fires with sulphur and dammer burnt in them and around the houses and along the streets. So convinced was I that impure water, consequent on the breaking of the Vehar main, was the cause of the out-break, that at its commencement I expressed a decided opinion to that effect. I also expressed an opinion, which has been fully justified by subsequent events, that as the outbreak in all probability was due to a local remediable cause, it would probably be of short duration and numerically not serious.

19. The character of the out-break at its commencement was of a deadly type; the greater number of those attacked rapidly dying, and even in the J. J. Hospital and the Cholera Hospital at Grant Road, where everything practicable was done for the patients, the deaths largely preponderated over the recoveries. As time went on, however, the disease assumed a milder form, and recoveries were much more frequent.

1,474 cases of cholera, 867 males and 607 females, came to my notice; 1,027–624 males and 403 females–of which terminated fatally; the mortality therefore was equal to 1·27 per 1,000 of population.

Of the 1,474 persons who were reported to have sufferred from cholera, 298 were born in Bombay, and 1,176 were born outside of Bombay; of the cases born in Bombay 188 died, and of the cases born outside of Bombay 839 died; these facts are exhibited in this table.

| | Attacked. | Died. | Per cent. |
|---|---|---|---|
| Born in Bombay ..... | 298 | 188 | 63·08 |
| Elsewhere ..... | 1,176 | 839 | 71·34 |

On examining the mortality according to period of residence in Bombay, we find that 213 of the cases had been under 3 months in Bombay, and that 148 out of the 213 died, and that of residents over 3 but under 6 months in this city, 155 were attacked, 119 dying; in all 368 out of the total cases and 267 deaths were residents under 6 months in Bombay.

1,176 of these attacked are reported to have drunk Vehar and Tulsi waters, 828 dying; 198 are said to have drunk well-water, of which 142 died. In 100 cases we were unable to ascertain whether Vehar, Tulsi, or well-water was consumed, 57 of these cases proved fatal.

| | Attacked. | Died. |
|---|---|---|
| Vehar and Tulsi water drinkers ..... | 1,176 | 828 |
| Well-water do. ..... | 198 | 142 |
| Not known ..... | 100 | 57 |

The number of cases and deaths in each class is shown in the following table:—

As in the previous years, a greater fatality of males than females is observed, 624 males to 403 females dying, giving a death-rate on their respective population of 1·34 and 1·30 per 1,000.

It will be observed that the period of male life most susceptible to choleraic influences is between 20 and 40, the greatest mortality of females occurred between 20 and 35.

* Increment of population is calculated.

Examining the distribution of mortality from cholera over the city by districts, we observe that the highest mortalities were registered in Sewri, Mahim, Mazagon, Parel and Warli. The high death-rate from cholera in Mazagon is not to be wondered at.

20. The pipe water-supply is insufficient and subject to interruptions, while the wells are liable to be constantly contaminated by percolation from adjoining cesspools, of which there are one hundred and seventy-four in this small section, the contents of which saturate the ground, giving rise to that semi-fated humidity of soil which combined with impure water is so almost universally associated with cholera. Parel enjoys no advantages in regard to these particulars, and in certain portions of Mahim the water-supply during the recent epidemic was so notoriously bad that I had the wells shut up, and water was sent round in carts, which was followed by the most beneficial results. In Warli also the principal ostensible factors in the production of this disease were humidity of soil and an absence of a pure water-supply, so frequently, indeed almost constantly, are those two factors associated with out-breaks of cholera that it is impossible to avoid arriving at the conclusion that they are the two principal causes or means of conveying the disease.

21. The number of deaths from fever was more than the number registered in 1882 by 450, and below the average of the previous five years by 1,656. Of the deaths from fevers 4,439 are referred to remittent fever, being 251 more than in 1882, and 2,207 less than the quinquennial mean ; to simple continued fever 1,169 deaths are referred, being 242 more than 1882 ; and to ague 275, being 41 less than in 1882 ; to enteric fever 20 deaths are referred, being 2 less than in 1882.

22. As in the previous year, the female mortality is higher than the male ; the male mortality is 6·79 and the female mortality is 8·89, 3,158 males to 2,745 female died.

3,144 deaths were referred to phthisis, 415 more than in 1882.
The highest mortality occurred in Nal Bazar (Khara Talao), 2nd Nagpada, Chuckla, and Bhuleshwar than in 1881 and 1882.

The number of deaths from phthisis is not greater than might be expected, considering the badly ventilated and fearfully overcrowded buildings in which a large number of the inhabitants of Bombay live. Much has been done by this department to improve the ventilation of dwelling-houses, but much still remains to be done. Until such time, however, as the Municipal Act is amended, and the By-Laws passed, the Municipality will remain in a measure paralysed in their efforts to improve the condition of dwelling-houses. It will hardly be credited, but the Municipality have no power to compel an owner to improve the ventilation of his house, unless the required alterations can be carried out within twenty-four hours. The report of the following case will clearly exemplify this. The decision of the Presidency Magistrate was reversed by the High Court of Bombay, not because the chawl in question was found to be in anything but an unwholesome state which the Magistrate had declared it to be, but because the Municipal Commissioner had no power, under the Municipal Act, to compel the owner to make such alterations as would render his chawl wholesome and non-injurious to the health of his tenants. The newspaper report of the case from the "Bombay Gazette" of September 29th, is as follows :—

RESPONSIBILITIES OF HOUSE-OWNERS.

"MR. SUDANUND SHRICRUSTNAJEE, a wealthy landlord, was charged on Tuesday last, at the Girgaum Police Court, before Mr. Dosabhoy Framjee, with not complying with the Municipal Commissioner's notice requiring him to put his chawl in a proper state as per said notice, under Section 220 of Bombay Act III. of 1872.

Dr. Davidson was sworn and said :—I am Acting Health Officer. I have seen the chawl No. 4, Breach Candy Road, on the side of the old Remount Stables. The chawl consists of 29 rooms, 13 feet by 7·7 feet. There is a door in front in the middle of each room. The doors are made of panels of wood. There is a window at the back of each room—about the middle. The window is about 2 feet 10 inches wide and 18 inches high. Most of the rooms were occupied. I visited the chawl on the 20th of August—morning. Poor people live there. I saw in each room about half a dozen of a family. I saw families in each of the rooms. There is no ventilation in the rooms sufficient for the persons who live in them. If the door and window were shut, as they would, doubtless, be at night, there would be no ventilation at all. The result upon the health of the persons sleeping in the room under such conditions would be most injurious. There is no separate place for cooking, so the cooking must be going on in the same room. When I say I saw a family in each room, I say I also saw children there. I do say that this want of ventilation, or proper ventilation, makes the rooms unwholesome for human beings to live therein. There would not be a sufficient supply of pure air, and the rooms would therefore be considered unwholesome.

There would not be a sufficient supply of pure air even if the windows were open and the doors shut. In certain diseases if one member of the family suffered, it would tend to infect the others. The remedy is ridge ventilation by double roof. More light is wanted in the room.

Cross-examined by Mr. Khunderow.—When I went to the place I saw the windows of most of the rooms shut up. The doors were open. The windows have no shutters. When I went there most of the windows were shut up by boards of wood. I have not heard that anything has happened in the rooms. I cannot say how many people sleep in each of the rooms at night. Mere openings in the roof with some covering over them will not make the rooms properly ventilated. A window by the side of the door will not answer. In the first place, there is hardly space enough in the wall, and people who live in the rooms would always shut the window. One foot diameter hole over each room inthe roof would be too small. A hole in the roof or wall would, to a certain extent, improve ventilation, but not sufficiently. The rooms wanted pure air, light and ventilation.

By the Court.—Ill-ventilated rooms subject the occupants to consumption and diseases of the respiratory organs.

Mr. Thomas Forrest, Inspector, Health Department, proved the service of the notice, and said that it had not been complied with it up to this day. He added that Dr. Weir had first ordered action to be taken in this case.

Mr. Khunderow Morojee, on behalf of the defence, contended that the rooms were sufficiently ventilated, and called Mr. Rughunath Mukund, who said:—I am a Licentiate of Civil Engineering and Architect. I have seen the chawl in question. There are about thirty rooms in this chawl. I did not count them. I went there twice, once with Dr. Davidson. Each room has a door in front and a window behind. Some of the windows are shutterless, and some are boarded, by whom I cannot say. If the door and window were shut there would be no ventilation in the room. Considering the small space in the room, there would be pretty good ventilation if the window were kept open. I have not visited all the rooms. I did not inquire how many tenants lived in one room. This is the report I made after my inspection of the chawl. The windows have wooden bars in them. I believe ten bars in each. I propose to put a nine inches shaft ventilator so placed as to ventilate two rooms at the same time. If a simple hole were made in the roof, it would not materially add to the ventilation of the room. I am not prepared to say anything about the unwholesomeness of the rooms, that is more in the province of a doctor.

By the Court.—I did not inquire how many persons lived in each room. I believe four persons live in each room. If the rear window were left open, there would be sufficient ventilation for four persons, but not sufficient for more than four persons. In some houses holes are made in the roofs for light. They are glassed. In my opinion a hole in the roof is not sufficient for pure air and ventilation. I propose to put a nine inches shaft ventilator, but ridge ventilation would do better. The people cook in the same room. It would produce smoke in the morning and evening. If the door were shut and smoke is produced in the room, the mere opening of the window would not be sufficient for the smoke to issue out ; but if the door and the window were both open, the smoke could issue out freely. A draft from the door might make the flames die out, and the people cooking might shut the door to prevent it.

Re-examined.—I have not examined the present roof with a view to say whether it is sufficiently strong to stand a double roof for ridge ventilation. To put a double roof for ridge ventilation is a costly thing.

Seetulpursad Rambukus solemnly affirmed—I am a watchman of the chawl in question, and recover rents. I have been so for the last eight or ten years. I have been collecting the rents of the said chawl since it was built. Each room is occupied by two persons. Some rooms are occupied by three persons. Each room has a window in the rear and a door in front. During the last eight years I have not known of a single instance in which tenants were sick of anything. On the contrary, a man who was suffering from fever came to live in a room there and became well.

By the Court.—Some of the widows are boarded, and some matted. The rooms are small ones. I occupy one of the rooms. I feel cold by the wind which comes in through the window, and I have to cover myself with a blanket at night.

In disposing of the case the Magistrate said that people who built chawls for the purpose of letting them and deriving large profits ought to pay some regard to the health and convenience of their tenants. He had no doubt that the rooms were unwholesome because of the want of ventilation complained of by the Health Department. The case had been postponed three times to enable defendant to arrange with the Municipality for the proper ventilation of the chawl, but he did nothing. He would therefore be fined Rs. 50, and also be ordered to pay a fine of Re. 1 per day for such time as the chawl was continued in its present unwholesome state."

From diseases of the respiratory system 3,394 deaths were registered, 8 less than in 1882, but 673 more than the average ; 1,828 were referred to bronchitis, 233 less than in the preceding year ; 1,159 to pneumonia, 173 more than in 1882.

To diseases of the digestive system 2,371 deaths were referred, being 226 more than in the preceding year, but 466 less than the mean of the previous five years ; 1,160—being 67 more than the past year and 56 more than the average of the previous five years—were referred to diarrhœa ; and 646—being 121 more than in 1882 and 446 less than the mean of the previous five years—to dysentery ; to all other diseases of the digestive system 565 deaths were ascribed, being 38 more than the past year, and 76 less than the mean of the previous five years.

From diseases of the nervous system 2,849 deaths were registered being 292 more than the past year, and 793 more than the average of the previous five years.

134 deaths were referred to diseases of the circulatory system, which is 15 less than the last year, but 13 more than the mean of the previous five years.

Under the general term dropsy 117 deaths were registered, being 13 less than in the last year, and 29 less than the mean of the preceding five years.

The deaths from leprosy are 3 less than the last year, but 22 more than the mean of the previous five years ; 72 deaths are referred to this disease.

220 deaths, 43 more than in 1882 and also more than the mean of preceding five years, were registered from the diseases of the generative system.

To diseases of the urinary system 68 deaths, 10 more than in 1882 and 17 more than the average, were ascribed.

93 deaths were due to affections of the organs of locomotion and cellular tissue.

To diseases of the cutaneous system 39 deaths, 12 more than in the last year and 3 more than the average of the previous five years.

Rheumatism was ascribed as the cause of death in 23 cases.

To cancer, 16 deaths were ascribed.

From syphilis 31 deaths were registered.

To old age and debility 1,266 deaths, being 279 more than in the last year and 270 more than the mean of the previous five years, were referred.

To accidents and violence 357 deaths were due, being 11 more than in 1882 and 14 less than the mean of the previous five years; 62 were referred to poisoning, of which 17 were accidental, 36 suicidal; 6 deaths were due to snake-bite, and 3 to the effects of breathing poisonous gases; 77 were caused by drowning, 36 were accidental, 28 suicidal, 2 culpable homicide, and in 11 cases, verdict found drowned.

15,182 living births, and 1,449 still-born births, were registered; of the children born living 7,902 were males and 7,280 females; the proportion of male to female births is 108 to 100; the birth-rate is equal to 18·79 per 1,000.

The highest birth-rate is registered among Eurasians, 67 per 1,000.

23. I cannot conclude this report without bringing to your notice the satisfactory manner in which all the Special Medical Officers, appointed during the late cholera epidemic, discharged their duties. Arrangements ought to be made by means of which we would be in a position to again avail ourselves of their valuable assistance, in the event of another epidemic.

Mr. Leask has performed the duties of Assistant Health Officer ably and zealously. He will, I am convinced, prove a worthy successor to Mr. Brunton, whose loss cannot but be severely felt by this Department.

Mr. Leask was for two months in charge of the Health Officer's duties, during the absence of the Health Officer, in addition to his own.

I have the honor to be,

Sir,

Your most obedient servant,

D. C. DAVIDSON,*

Acting Health Officer.

* The footnotes at pages 212, 214, 215, and 222 were written by Dr. Weir.

# Appendix A.

## AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1883.

TABLE showing for the year 1883 the Sums of Velocities, and the Mean Velocities, in miles per hour, of the Winds which blew in each month, from each of the Sixteen Principal Directions, and also the number of Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several months, and of different Winds during the same month.

# ANNUAL REPORT

OF THE

# MUNICIPAL AUDITORS.

To

H. W. BARROW, Esq.,

*Secretary, Town Council; and Clerk, Corporation,*

BOMBAY.

SIR,

In accordance with the XXXII. Section of the Bombay Municipal Acts of 1872 and 1878, we have the honour to send in our Report on Municipal Accounts for the year 1883-84, for submission to the Town Council and Corporation.

We have the honour to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

*Municipal Auditors.*

BOMBAY, 29*th August* 1884.

## REPORT OF THE CONCURRENT AUDITORS ON THE MUNICIPAL ACCOUNTS OF THE YEAR 1883-84.

The Municipal Corporation, at their meeting, held on the 10th day of December 1883, having appointed us Concurrent Auditors to audit the accounts of the Municipality for the year 1883-84, we have the honour to submit our Report thereon for the information of the Town Council and Corporation.

2. The last Annual Report comprized a period of 15 months, from 1st January to 31st December 1882, and the 1st Quarter of the year 1883.

3. The official year under Report comprizes 12 months, commencing from 1st April 1883 to 31st March 1884.

4. In order to ascertain whether the receipts and disbursements under the several heads of accounts of the past 12 months exceed, or are under the receipts and disbursements of the previous year, it would be necessary to deduct $\frac{1}{5}$ part of the receipts and disbursements of the 15 months, to make a fair and approximately correct comparison with the results of the 12 months of 1883-84.

5. We have examined the whole of the vouchers and papers relating to receipts and disbursements, and have compared the Day-book with General Ledger and Subsidiary Ledgers, Journal, &c., and found them all in order.

6. We have been able from our attendance, now given daily for four consecutive hours, owing to the work having, since the last seven years, greatly increased, to keep the concurrent audit of the daily accounts as close up to date as they were booked.

7. The number of vouchers which have passed our scrutiny amounted to about 33,000 in the year 1881; about 41,900 in the 15 months of the year 1882-83; and 32,171 in 1883-84.

8. In addition to the concurrent audit, we have also examined weekly statements of receipts and expenditure of Municipal accounts at the end of each week and before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month by our preparing a summary of all accounts directly from the General Ledger and independently of the weekly statements. The summary contained totals of receipts and expenditure of each account as it stood in the Ledger at the end of the last week of the month, and which always tallied with the aggregate total of each head of accounts given in the weekly statements of the month added together. By this method of scrutiny, any omission or error could not remain undetected for more than a month at the most.

9. The summary so prepared by us was regularly forwarded every month to the Secretary for submission to the Town Council.

## Receipts.

10. The total Receipts (proper) of the Municipal Fund for 12 months ending 31st March 1884, including receipts for Water Rate, amounted to Rs. 37,37,272-0-9, against Rs. 46,12,240-1-8 for 15 months of the year 1882-83, being Rs. 47,480-15-6 comparatively more than the receipts of the past year.

## Expenditure.

11. Exclusive of Rs. 1,03,744 paid towards the reduction of the Consolidated Loan and Rs. 27,000 paid on account of New Drainage Loan Instalment and Rs. 20,000 deposited in the Bank of Bombay on account of the Municipal Building Fund, the total expenditure for 12 months, ending 31st March 1884, amounted to Rs. 35,65,069-12-3, including the amount of Sinking Fund on account of House and Market Loans, against Rs. 44,86,922-14-0 expended in 15 months, being Rs. 24,468-8-9 comparatively less than the expenditure of last year.

12. Taking the whole of the ordinary receipts of 12 months at Rs. 37,37,272-0-9, and the whole expenditure at Rs. 35,65,069-12-3, *inclusive* of the receipts and expenditure of Water Works, there was, on the 31st day of March 1884, a credit balance of Rs. 1,72,202-4-6, and *exclusive* of Water Works account, of Rs. 90,149-11-10.

## Receipts.

13. *Consolidated Rates.*—The total revenue under this head, comprising *House*, *Police*, and *Lighting* Rates, and Government and Port Trust contributions, collected in 12 months, amounted to Rs. 9,83,538-1-11, against Rs. 12,34,975-1-7 collected in 15 months; refunds amounted to Rs. 4,933-12-10 in 12 months, against Rs. 9,131-5-7 in 15 months; the net revenue realized in 12 months being Rs. 4,441-15-3 comparatively less than the revenue of the last year.

Budget Estimate, Rs. 9,94,000.

Collections, recovered on account of arrears of 1879 to 1882, amounted to Rs. 31,448-9-9; of the 1st Quarter of 1883 there were collected Rs. 54,715-15-5, and for the year 1883-84 Rs. 7,62,285-12-0.

Government and Port Trust contributed Rs. 50,000 and Rs. 90,000, respectively.

14. *Government Contribution to Police Expenses* amounted to Rs. 85,672-4-6, against Rs. 91,124-14-1 last year.

Budget Estimate, Rs. 90,000.

15. *Water Rate* realized Rs. 5,47,646-14-9 in 12 months, after paying refunds amounting to Rs. 1,745-2-10, and including Rs. 851-4-5, being Water Rate paid by the Presidency Engineer,

Budget Estimate, Rs. 5,14,500.

Rs. 545, proceeds of sale of grass growing on the lands about the Vehar Lake, and Rs. 5,000 on account of water supplied for extinguishing fires, against Rs. 6,70,677-1-0, realized in 15 months, being Rs. 11,105-4-4 comparatively more than realized last year.

Total expenditure on account of Vehar Water Works Fund amounted to Rs. 4,65,594-6-1 in 12 months, against Rs. 6,35,213-12-10 in 15 months, being Rs. 42,576-10-7 comparatively less than the expenditure of last year.

Total expenditure on account of Maintenance of Vehar Water Works amounted to Rs. 58,751-10-4 in 12 months, against Rs. 85,627-15-9 in 15 months; Rs. 6,438-3-0 were less expended in establishments; Rs. 3,308-7-1 in labourers' wages; Rs. 7,071-7-2 in miscellaneous stores; and Rs. 3,210 in contingencies. No earth embankments, nor any work for raising dams, were required this year, which cost the Municipality about Rs. 7,000 last year.

16. *Wheel Tax* amounted in 12 months to Rs. 2,40,092-8-9, against Rs. 3,90,687-0-6 in 15 months, being Rs. 72,457-1-3 comparatively less than the receipts of the last year.

Budget Estimate, Rs. 2,90,000.

Collections on account of arrears of 1879 to 1882 amounted to Rs. 12,789-0-9; of the 1st Quarter of 1883, were collected Rs. 2,469-8-0, and for the year 1883-84 Rs. 2,24,888-2-0. Toll Tax levied on carts which pass the Sion and Mahim Causeways, and collected by the Officers of the Port Trust Department, amounted in 12 months to Rs. 15,134-4-0, against Rs. 21,340-0-0 in 15 months, being Rs. 1,938 comparatively less than the receipts of the last year.

17. *Halalkhore Cess* yielded Rs. 2,43,556-9-11 in 12 months, against Rs. 3,28,915-8-10 in 15 months, being Rs. 19,575-13-2 comparatively less than the receipts of the last year. Collections on account of arrears from 1881 to 1882 amounted to Rs. 3,253-11-2; for the 1st Quarter of 1883, Rs. 15,866-14-11; and for 1883-84, Rs. 2,26,052-0-11.

Budget Estimate, Rs. 2,63,000.

18. *Liquor Licenses.*—The receipts under this head amounted to Rs. 1,79,687-8-0; Rs. 35,937-8-0, the amount due, for the 1st Quarter of 1883 was paid in April 1883.

Budget Estimate, Rs. 1,43,750.

19. *Town Duties.*—The receipts under this head for 12 months amounted to Rs. 12,41,205-1-11, against Rs. 15,15,190-1-2 in 15 months. Deducting $\frac{1}{5}$ part of the receipts of 15 months, there was comparatively an increase of Rs. 29,053 under this head over the receipts of the last year.

Budget Estimate, Rs. 6,10,000.

Refunds of Town Duties amounted in 12 months to Rs. 5,74,092-4-0, against Rs. 6,97,991-0-0 in 15 months, showing, after similar deductions of $\frac{1}{5}$ part, an increase of Rs. 15,699-7-2 over the refunds paid last year.

Similarly, charges on account of commission paid for collecting Town Duties were also proportionately greater, amounting in 12 months to Rs. 44,307-10-9, against Rs. 52,884-8-2 in 15 months, being Rs. 2,000 comparatively more than paid last year.

Deducting $\frac{1}{5}$ part of the total receipts of 15 months, and comparing them with the receipts of the 12 months of 1883-84, deduced from figures given in the Controller's Report for 1883-84, the following is the result :—

| Increase. | | Decrease. | |
|---|---|---|---|
| In Grain ..... | Rs. 21,987 | In Beer ..... | Rs. 247 |
| „ Wines and Spirits..... | „ 2,245 | „ Ghee ..... | „ 5,630 |
| „ Sugar ..... | „ 8,967 | „ Firewood ..... | „ 3,980 |
| „ Timber ..... | „ 33,626 | | |
| | Rs. 66,825 | | Rs. 9,857 |

21. *Tobacco Duty Licenses.*—Receipts for 12 months amounted to Rs. 1,74,306-0-2, against Rs. 2,06,014-8-4 in 15 months, being about Rs. 9,500 comparatively more than the receipts of the last year.

Budget Estimate, Rs. 1,61,000.

The expenditure for the establishment for Tobacco Duty Licenses, paid to the Commissioner of Customs, amounted to Rs. 15,723-8-1 in 12 months, against Rs. 19,034-8-4 in 15 months, being Rs. 496-1-5 comparatively more than the expenditure of the last year.

22. *Land Conveyance Licenses.*—Under this head were collected and paid by the Police Commissioner Rs. 3,417-4-3, being the arrears of 1882-83 and for the year 1883-84 in the month of March 1884.

Budget Estimate, Rs. 1,800.

23. *Market and Slaughter House receipts.*—The receipts amounted to Rs. 2,69,338-11-8 in 12 months, against Rs. 3,17,001-3-4 in 15 months, being Rs. 15,737-12-2 comparatively more than the receipts of the last year.

Budget Estimate, Rs. 2,42,000.

The comparative increase in the receipts of Markets, &c., of Rs. 15,737-12-2 is explained as follows :—

| | Comparatively more. | | | Comparatively less. | | |
|---|---|---|---|---|---|---|
| | Rs. | a. | p. | Rs. | a. | p. |
| Slaughter Fees yielded comparatively ..... | 1,136 | 8 | 7 | ..... | | |
| Stall Fees ,, ..... | 1,807 | 0 | 5 | ..... | | |
| Fair Ground and Feeding Fees (from Contractors) ..... | 7,495 | 0 | 0 | ..... | | |

| | 18,523 | 2 | 11 | 2,787 | 5 | 1 |
| *Less*..... | 2,787 | 5 | 1 | | | |
| Net Increase ... Rs. | 15,735 | 13 | 10 | | | |

The expenditure of the Market Establishment amounted to Rs. 73,268-0-4 in 12 months, against Rs. 89,838-8-6 in 15 months, being Rs. 1,397-3-1 comparatively more than the expenditure of the last year.

24. *Contribution from Municipal Servants towards Pension, &c., Fund* amounted to Rs. 9,200-5-6 in 12 months, against Rs. 11,282-11-4 in 15 months, being Rs. 174-2-10 comparatively more than that of the last year.

Budget Estimate, Rs. 9,500.

25. *Tramway Rent* yielded Rs. 28,366-13-8 in 12 months, against Rs. 26,096-12-2 in 15 months, being Rs. 2,270-1-6 more than the receipts of the last year; the increase being due to extension of Tramway Lines to the Prince's Dock, &c.

Budget Estimate, Rs. 28,000.

26. *Contribution from Insurance Companies* amounted to Rs. 24,708-0-0 in 12 months, against Rs. 32,000-4-8 in 15 months, being Rs. 892-3-9 comparatively less than the income of the last year.

Budget Estimate, Rs. 25,000.

27. *Miscellaneous Fines and Penalties* amounted to Rs. 15,575-1-0 in 12 months, against Rs. 18,642-8-10 in 15 months, being Rs. 661-0-4 comparatively more than the receipts of the last year, which was chiefly derived from Halalkhore Department and from Contractors.

Budget Estimate, Rs. 9,000.

28. *Miscellaneous Fees* amounted to Rs. 78,559-14-10 in 12 months, against Rs. 92,363-5-8 in 15 months, being Rs. 4,667-13-11 comparatively more than the fees received last year.

Budget Estimate, Rs. 67,500.

This increase of Fees is explained as follows :—

| | Comparatively more. Rs. | Comparatively less. Rs. |
|---|---|---|
| From Assessor and Collector..... | ..... | 1,739 |
| „ Municipal Engineer..... | 8,502 | ..... |
| „ Health Officer ..... | ..... | 4,123 |
| „ Police Commissioner ..... | 2,029 | ..... |
| | 10,531 | 5,862 |
| Deduct ..... | 5,862 | |
| Comparative increase.....Rs. | 4,669 | |

The excess of the receipts were obtained chiefly from the Municipal Engineer's Department under the heads of Projecting Galleries, Projecting Rewas, Scaffoldings, and from the Police Commissioner under the head of Music Licenses.

29 *Miscellaneous Savings* amounted to Rs. 1,639-0-4 in 12 months, against Rs. 3,792-15-9 in 15 months, being Rs. 1,395-5-11 comparatively less than the savings of the last year.

Budget Estimate, Rs. 3,000.

30. *Miscellaneous Receipts* amounted to Rs. 80,799-9-7 in 12 months, against Rs. 96,495-6-0 in 15 months, being Rs. 3,603-4-9 comparatively more than the receipts of the last year.

Budget Estimate, Rs. 80,000.

This increase is explained as below :—

| | Comparatively more. | Comparatively less. |
|---|---|---|
| | Rs. | Rs. |
| Sale of land yielded, 1883-84 | 6,995 | ..... |
| Materials do | ..... | 909 |
| Assessor and Collector's Department | 51 | ..... |

| „ Commissioner's do. | ..... | 61 |
| „ Engineer, Special Duty | 1,615 | ..... |
| Rent of Police Quarter | 3,489 | ..... |
| Sundries | ..... | 130 |
| | 12,923 | 9,297 |
| Deduct..... | 9,297 | |
| Increase..... Rs. | 3,626 | |

31. *Public Gardens.*—Receipts under the head of Victoria Gardens amounted to Rs. 7,717-12-6 in 12 months, against Rs. 9,667-0-8 in 15 months, being only Rs. 16 comparatively less than the receipts of the last year.

Budget Estimate, Rs. 8,500.

For expenditure relating to public Gardens *vide* para. 43 under the head of Expenditure Account.

32. *Municipal Workshops.*—The total recoveries of 12 months amounted to Rs. 1,08,070-7-0, which included Rs. 13,008-10-0, being the balance of outstandings for 1882-83. Deducting this balance from the total recoveries, the net recovery of the 12 months amounted to Rs. 95,161-13-0, and Rs. 31,344-7-7 were to be recovered from private and departmental works and for works which were completed and some works left incomplete, making a total of Rs. 1,26,406-4-9, thereby leaving a credit balance of Rs. 2,574-14-2 as profit on account of Workshops for 12 months, against Rs. 5,943-4-8 in 15 months, being Rs. 2,179-12-0 comparatively less than the profit of the last year.

The total expenditure of the Workshops for 12 months ending 31st March 1884, was booked at Rs. 1,23,831-6-5, being the amount of payments on account of establishment and of stores, against Rs. 1,49,570-12-9 expended in 15 months, being Rs. 4,174-12-2 comparatively more than the expenditure of the last year.

33. *Interest on Drainage Loan Deposit*, amounting to Rs. 27,928-9-10, was received from the Bank of Bombay.

34. *Recoveries from Loan Works Establishment Charges*, amounting to Rs. 15,900, which were expended out of current revenue in 1881, were recovered from the Loan Funds of Loan Works Establishment Charges.

35. *Profit and Loss on Stores.*—A credit entry of Rs. 49,988-13-9 is shown for 12 months in the Statement of Total Receipts and Disbursements, against a similar entry of Rs. 38,724-15-7 for 15 months of 1882-83, being Rs. 19,008-14-1 comparatively more than the credit entry in the accounts of the past year. It may, however, be observed that this is a mere entry of adjustment account, representing the value of dead and live stock purchased during the year as allowed by the Budget grant, after deducting the value of live stock which have died and for the depreciation of unserviceable live and dead stock sold.

## EXPENDITURE.

36. *General Superintendence.*—Under this head the total expenditure amounted to Rs. 2,01,021-5-6, against Rs. 1,82,714-11-6 expended in 15 months, being Rs. 54,849-9-1 comparatively more than expended in the last year.

Budget Grant, Rs. 2,06,926-13-10.

This excess is explained as follows:—

| | Rs. | $\frac{4}{5}$ of 15 Months' Expenses in 1882-83. Rs. | 12 Months' Expenses in 1883-84. Rs. | More. Rs. | Less. Rs. |
|---|---|---|---|---|---|
| 1. Town Council and Corporation expended | 65,782 | | | | |
| *Less*—Law Charges transferred to Municipal Commissioner's Department | 12,807 | | | | |
| | 52,975 | 42,380 | 43,678 | 1,298 | ... |
| 2. Municipal Commissioner's Department | 59,316 | | | | |
| *Add*—Law Charges transferred from Town Council as mentioned above | 12,807 | | | | |
| | 72,123 | 57,699 | 1,09,213 | 51,514 | ... |
| 3. Controller's Department | 57,616 | 46,093 | 48,131 | 2,038 | ... |
| | | 1,46,172 | 2,01,022 | | |
| | | Less..... | 1,46,172 | | |
| | | Increase .....Rs. | 54,850 | 54,850 | |

The increase of Rs. 51,514 in the Municipal Commissioner's Department is explained as follows.

There was an extra expenditure incurred on account of the Acting Municipal Commissioner having been allowed full salary of the Commissioner for (6) months, the first three months during his absence on leave and second three months during his travels in Europe on special duty, and Rs. 300 the salary of his Assistant, making a total of Rs. 17,675; Rs. 29,599 having been more expended in Law Charges, and Rs. 4,240 in Office and General Establishment, Contingencies, Printing, &c.

37. *Assessor and Collector's Department.*—This department expended in 12 months Rs. 83,878-5-6, against Rs. 1,10,468-0-9 in 15 months, being Rs. 4,496-1-6 comparatively *less* than the expenditure of the last year.

Budget Grant, Rs. 90,444-5-7.

This decrease is explained as follows :—

| | ⅘ of 15 Months' Expenses in 1882-83. Rs. | 12 Months' Expenses in 1883-84. Rs. | More. Rs. | Less. Rs. |
|---|---|---|---|---|
| Salaries of Assessor and Collector | 10,932 | 7,467 | ..... | 3,465 |
| Out-door and extra Establishment | 69,580 | 65,718 | ..... | 3,862 |

| Cost of binding Assessment Old Books. | 171 | 34 | ..... | 137 |
| Auditor, Wheel Tax | 600 | ..... | ..... | 600 |
| Contingencies, Stationery and Printing | 5,002 | 8,272 | 3,270 | ..... |
| Furniture for New Ward Offices | ..... | 1,140 | 1,140 | ..... |
| Peons' Clothing | 685 | ..... | ..... | 685 |
| | | | 4,410 | 8,908 |
| | | Less..... | | 4,410 |
| | | Decrease.....Rs. | | 4,498 |

38. *Public Health Department.*—The total expenditure of the Health Department in 12 months amounted to Rs. 8,46,324-3-6, against Rs. 9,29,221-12-11 in 15 months, being Rs. 1,02,946-12-4 comparatively *more* expended than last year.

Budget Grant, Rs. 9,85,257-10-0.

This increase explained below:—

| | ¾ of 15 Months' Expenses in 1882-83. | 12 Months Expenses in 1883-84. | More. | Less. |
|---|---|---|---|---|

| Kerbing, per rg. ft. | 0 5 0 | 0 6 0 | 0 6 0 | 0 7 0 |
| Winding Clocks, per annum | ..... | 195 0 0 | 195 0 0 | 400 0 0 |

* For three months.

40. *Watering Roads* cost Rs. 53,834-0-5 in 12 months, against Rs. 66,734-9-5 in 15 months, being Rs. 446-5-8 comparatively more than expended last year.

Budget Grant, Rs. 56,029-0-6.

41. *Road Repairs.*—Under this head were expended Rs. 2,45,892-0-10 in 12 months, against Rs. 3,03,034-1-1 in 15 months, being Rs. 3,464-12-9 comparatively more than last year.

Budget Grant. Rs. 2,571,06-7-6.

This increase is explained as follows :—

| | ⅘ of 15 Months' Expenses in 1882-83. Rs. | 12 Months' Expenses in 1883-84. Rs. | More. Rs. | Less. Rs. |
|---|---|---|---|---|
| Road Metal | 40,086 | 47,765 | 7,679 | ... |
| Sand Stone | 17,543 | 19,124 | 1,581 | ... |
| Stones for Kerbs, Water Tables, &c. | 3,091 | 4,951 | 1,860 | ... |
| Ground Rent for Stacking Metal. | 216 | 352 | 136 | ... |
| Walls and Drains, repairing and cleaning | 4.411 | ... | ... | 4,411 |
| Labourers | 62,537 | 67,491 | 4,954 | ... |
| Hire of Carts | 19,837 | 22,384 | 2,547 | ... |
| Hire of Bullocks | 16,376 | 16.236 | ... | 140 |
| Proper ⅘ cost of Cart Repair | 924 | 1,014 | 90 | ... |
| Scraping Roads | 10,291 | 10,885 | 594 | ... |

| Paving Footpaths | 28,614 | 27,495 | ... | 1,119 |
| Repairing other Footpaths | 3,852 | ... | ... | 3,852 |
| Repairing and retaining Parapet Walls at Wodehouse Road | 1,712 | ... | ... | 1,712 |
| | | | 19,441 | 15,976 |
| | | Less | 15,976 | |
| | | Increase ..... Rs. | 3,465 | |

42. *Drainage Account.*—Rs. 57,064-13-0 were expended in 12 months under this head, against Rs. 53,804-14-3 in 15 months, being Rs. 14,020-14-5 comparatively more than last year's expenditure.

Budget Grant, Rs. 69,488-4-1.

This increase is explained as follows:—

| | ⅘ of 15 Months' Expenses in 1882-83. Rs. | 12 Months' Expenses in 1883-84. Rs. | More. Rs. | Less. Rs. |
|---|---|---|---|---|
| Drainage Staff | 6,592 | 13,893 | 7,301 | ..... |
| Maintenance of Love Grove Pumping Station | 35,276 | 39,421 | 4,145 | ..... |
| Do. of Love Grove, Worlee and Dharavi Sluices | 1,176 | 3,750 | 2,574 | ..... |
| | | Increase ..... Rs. | 14,020 | |

The increase of Rs. 7,301 in the Drainage Staff is explained below:—

| | ⅘ of 15 Months' Expenses in 1882-83. | 12 Months' Expenses in 1883-84. | More. | Less. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Inspectors | ... | 2,910 | 2,910 | ... |
| Cleaning Miscellaneous Drains | ... | 5,713 | 5,713 | ... |
| Repairs and alterations to Miscellaneous Drains | ... | 2,979 | 3,158 | 179 |
| Construction of new Drains and Gutters | 2,243 | 2,112 | ... | 131 |
| Panwel Brick Works Establishment | 1,370 | ... | ... | 1,370 |
| | | | 8,802 | 1,500 |
| | | Less | 1,501 | |
| | | Increase | Rs. 7,303 | |

Increase of Rs. 4,145 in Maintenance of Love Grove Pumping Station is explained below :—

| | ⅘ of 15 Months' Expenses in 1882-83. | 12 Months' Expenses in 1883-84. | More. | Less. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Establishment | 2,427 | 8,398 | 5,971 | ... |
| Coals | 25,818 | 26,558 | 740 | ... |
| Repairs to Machinery | 2,356 | 125 | ... | 2,231 |
| Rent of Bungalow at Love Grove. | 3,600 | 2,400 | ... | 1,200 |
| Contingencies and Stores | 1,075 | 1,276 | 201 | ... |
| Removing and refixing Coal Shed. | ... | 664 | 664 | ... |
| | | | 7,576 | 3,431 |
| | | Less | 3,431 | |
| | | Increase | Rs. 4,145 | |

Increase of Rs. 2,574 in Maintenance of Love Grove, Worlee and Dharavi Sluices is explained as follows .—

| | ⅘ of 15 Months' Expenses in 1882-83. | 12 Months' Expenses in 1883-84. | More | Less. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Establishment | 965 | 1,083 | 118 | ... |
| Materials | 73 | 457 | 387 | ... |
| Repairs | 141 | 1,104 | 963 | ... |
| Contingencies | ... | 1 | 1 | ... |
| Supervision | ... | 1,105 | 1,105 | ... |
| | | Increase | Rs. 2,574 | |

43. *Maintenance of Public Gardens.*—Expenditure under the head of all Public Municipal Gardens amounted to Rs. 20,263-7-7 in 12 months, against Rs. 26,968-12-2 in 15 months, being Rs. 1,311-8-7, comparatively less than the expenditure of the last year.

Budget Grant Rs. 33,915-11-0.

The decrease is explained as follows :—

| | 4/5 of 15 Months' Expenses in 1882-83. | 12 Months' Expenses in 1883-84. | More. | Less. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Victoria Gardens, (Budget Grant Rs. 18,252)..... | 19,035 | 16,074 | ... | 2,961 |
| Elphinstone Circle Garden (Budget Grant, Rs. 1,664)..... | 11,115 | 1,466 | 351 | ... |
| Fackland Road Garden (Budget Grant, Rs. 290)..... | 262 | 244 | ... | 18 |
| Northbrook Garden (Budget Grant, Rs. 878-11-0) ..... | 904 | 715 | ... | 189 |
| Sir Cowasjee Jehangir Mahim Garden (Budget Grant, Rs. 421)..... | 259 | 404 | 145 | ... |
| Bazar Gate Garden (Budget Grant, Rs. 1,510) ..... | ... | 1,104 | 1,104 | ... |
| Garden on the Flats (Budget Grant, Rs. 900) ..... | ... | 252 | 252 | ... |
| | | | 1,852 | 3,168 |
| | | | | 1,852 |
| | | | Less..... | |
| | | | Decrease.....Rs. | 1,316 |

44. *Interest on Loans.*—Rs. 3,15,333-1-6 were paid on account of interest on various Loans in 12 months, against Rs. 4,44,545-14-2 in 15 months, being Rs. 40,303-9-10 comparatively less than paid last year, as per following detail :—

Budget Grant, Rs. 3,15,688.

| | 4/5 of 15 Months' paid in 1882-83. | 12 Months' paid in 1883-84. | More. | Less. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Market and House Rate Loan... | 98,064 | 1,04,025 | 5,961 | ... |
| Balance of second 15 l acs Loan. | 67.462 | 54,999 | ... | 12,463 |
| Drainage Loan of 1878 ..... | 1,58,240 | 1,30,325 | ... | 27,915 |
| Surface Drainage Loan ..... | 31,871 | 25,984 | ... | 5,887 |
| | | | 5,961 | 46,265 |
| | | | Less..... | 5,961 |
| | | | Decrease.....Rs. | 40,304 |

*Charges on account of Loans* amounted to Rs. 18,857-13-7 in 12 months, against Rs. 17,123-4-11, being Rs. 5,157 comparatively more than paid last year.

45. *Primary Education.*—The whole of the grant was expended in 12 months.

Budget Grant, Rs. 22,500

46. *Goculdas Tejpal Hospital.*—Rs. 36,930-6-0 were expended in 12 months in paying Hospital expenses against Rs. 45,155-12-0 expended in 15 months, being Rs. 806 comparatively more than expended last year. Refund from Government, being the unexpended balance of the Municipal contributions to this Hospital, amounted to Rs. 9,098-4-0, against Rs. 10,208-14-8 received last year.

Budget Grant, Rs. 36,000.

47. *Pensions, Gratuities, and Compassionate Allowance.*—Rs. 16,354-0-2 were paid under the head of Pensions in 12 months, against Rs. 12,526-5-11 in 15 months, being Rs. 6,187 comparatively more than expended in the last year. The increase was due to Pension having been given to several old hands in the Assessor's department, whose services were dispensed with.

Budget Grant..... Rs. 17,225
" ..... " 24,038
Rs. 41,263

Rs. 23,978-12-6 were expended in giving Gratuity and Compassionate Allowance to old Municipal servants or to their surviving widows or orphans. The reason for the payment of such a large amount for Compassionate Allowance in this year is that there had been no provision made in the Act previous to the year 1883-84 for such allowances ; hence the several claims which had accumulated before the passing of the Act had all to be paid in the year under report.

48. *Discretional Contingencies.*—Rs. 4,514-10-5 were expended in 12 months, against Rs. 11,060-2-10 in 15 months, being Rs. 733 comparatively less than expended last year.

Budget Grant, Rs. 5,000.

49. *Auditors' Allowance.*—Full grant was expended in the payment of this allowance. The Auditors regret to observe that neither the Corporation nor the Town Council have paid any attention to the suggestion they made in their last report, for the employment of an intelligent clerk to assist them in doing certain clerical work.

Budget Grant, Rs. 5,000.

50. *Rent of Municipal Office.*—Full grant was expended in 12 months at Rs. 1,400 per month, being the rent of the Municipal Office.

Budget Grant, Rs. 16,800.

51. *Contribution towards Public Entertainments to Royal Personages.*—Rs. 5,000 were contributed by the Municipality during the year 1883-84 towards the public subscription raised for the suitable reception of Their Royal Highnesses the Duke and Duchess of Connaught ; another sum of Rs. 1,869 in the preparation of an illuminated address of welcome to these Royal Personages, and of a casket to contain the address ; and Rs. 750 for illuminating and decorating the Municipal Office on that occasion.

52. *New Works.*—Rs. 2,62,113-5-4 were expended in 12 months, against Rs. 4,04,321-3-10 in 15 months, being Rs. 61,343-10-7 comparatively less than expended last year.

Budget Grant, Rs. 5,23,910-2-9.

| | Amount expended in 1882-83. Rs. | Amount expended in 1883-84. Rs. |
|---|---|---|
| Making and replacing street name boards and new number plates for houses | 8,413 | 7,373 |
| Additional lighting of streets | 1,702 | 5,173 |
| New water posts in Fort and Malabar Hill | 3,350 | 119 |
| Police Quarters, Byculla | 1,52,177 | 3,432 |
| Constructing road from Sewri by Frere Road to Arthur Road at Chinchpoogly | 1,300 | 13,724 |
| Improving and altering Northbrook Garden | 2,068 | 928 |
| Total... Rs. | 1,69,000 | 30,748 |
| For particulars of the remainder of the New Works executed in 1883-84 amounting to ... | ... | 2,31,365 |
| *vide* Appendices to the Controller's Accounts. | | |
| Total of New Works | ... | 2,62,113 |

53. *Police Account.*—Under this head were expended Rs. 4,17,897-0-9 in 12 months, against Rs. 5,27,698-4-6 in 15 months, being Rs. 4,261-9-3 comparatively less than expended last year. In General Police Account Rs. 719 were less expended, and Rs. 3,543 were less expended in Police Hospital, compared with the expenditure of the last year.

Budget Grant, Rs. 4,57,239.

54. *Lighting Account.*—Cost of lighting the city amounted in 12 months to Rs. 2,76,820-8-9, against Rs. 3,31,399-14-2 in 15 months, being Rs. 11,700-10-2 comparatively more than expended last year.

Budget Grant, Rs. 2,80,676-15-9.

The increase is explained as follows :—

| | ⅘ of 15 Months' Expenses in 1882-83. Rs. | | 12 Months' Expenses in 1883-84. Rs. | More. Rs. | Less. Rs. |
|---|---|---|---|---|---|

LOAN WORKS—

56. (*a*) *Surface Drainage Works.*—The total expenditure on these works during the past 12 months amounted to Rs. 5,37,775-5-9,

making, with the amount already expended on these works, a total of Rs. 8,14,791-11-3, from the commencement up to 31st March 1884. For particulars of the above, *vide* Appendices to the Controller's Accounts.

57. (*b*) *New Drainage Works.*—Further payments of Rs. 3,58,262-15-10, including receipts of Rs. 11,327-8-0, on account of materials, &c.,were made during the past 12 months on account of Drainage Works, raising the total, with the amount previously expended, to Rs. 23,63,263-15-10.

The total credits for the 12 months of the year 1883-84 amounted to Rs. 11,327-8-0, making the aggregate total of receipts, from the commencement up to 31st March 1884, to Rs. 5,02,474.

Deducting these receipts, the net expenditure on account of New Drainage Works amounted to Rs. 18,60,789.

58. *Assets and Liabilities.*—The total of Assets of the Municipality amounted, on the 31st day of March 1884, to Rs. 1,91,81,874-7-5, including Rs. 50,08,681-7-7 on account of Water Works Fund.

The total of Liabilities amounted to Rs. 1,04,71,120-13-4.

The total of Assets is summed up as follows :—

| | | | | *Assets.* | | |
|---|---|---|---|---|---|---|
| Recoverable Personal Stock advanced to Municipal Officers and Contractors— | | | | | | |
| | Rs. | a. | p. | Rs. | a. | p. |

The total of Liabilities is summed up as follows :—

| | *Liabilities.* Rs. | a. | p. |
|---|---|---|---|
| On account of 4 Consolidated Loans amounting to Rs. 58,40,000 | 55,42,122 | 4 | 4 |
| Do. Local Debt, consisting of House Rate and Market Loans and New Drainage Loan of 1878. | 43,09,000 | 0 | 0 |
| Do. Deposits in Cash and Promissory Notes from Contractors, and sundry other accounts. | 4,70,626 | 13 | 11 |
| Do. Cash Balance | 1,49,371 | 11 | 1 |
| Total of Liabilities... Rs. | 1,04,71,120 | 13 | 4 |

59. *Scrutiny of Collection and of Outstanding Bills of Rates and Taxes for the year* 1883-84 *and of previous years.*—There was some delay in closing of the Assessment and Collection Books and in striking off balances of collection of the year 1883-84 and of previous years.

The delay was due to the Municipal Commissioner having introduced a much more methodical system in the keeping of Assessment and Collection Books, the whole department had to work under a system which was new to them, and which, in the commencement, was found somewhat difficult for the department to follow.

The new sets of Books introduced are regularly tabulated Assessment Registers of Properties, Collection Ledgers and Check Ledgers, and some forms of returns, all systematically arranged so as to show at one glance all details of Assessment.

The system introduced, so far as we have been able to follow, appears complete in itself for the nature of work for which it is intended, and we believe, if it were properly and vigilantly followed and worked up by the department, it will produce very satisfactory results.

The introduction of the system was commenced by a general revision of the valuation of all properties in Bombay, including those of Port Trust and of new buildings constructed since the year 1883. All vacant lands which were not before included in, and some properties which had escaped from, Municipal taxation were all brought to book, and a considerable increase in assessment-revenue has thereby been secured by this department.

*Collections.*—During the year 1883-84 there were issued by the Assessor and Collector 66,988 net demand assessment bills, amounting in value to Rs. 19,45,935-5-10.

To the above number of bills were added bills for the 1st quarter of 1883 and of previous years up to 1877 inclusive, 1,577 more bills

of the value of Rs. 35,633-15-9 and including Government and Port Trust bills, amounting to Rs. 1,40,854-4-5; the total of Collection bills amounted to 68,565 of the value of Rs. 21,22,423-10-0.

Add to this the amount of arrears of outstanding for the year 1882-83, amounting to Rs. 2,35,507-15-1, the total amount for Collection in the year 1883-84 amounted to Rs. 23,57,931-9-1.

Out of the abovementioned amount, Rs. 17,81,863-1-1 were collected by the Assessor and Collector, and Rs. 1,40,854-4-5 were paid by Government and Port Trust direct to the Municipality, making total of Collections received Rs. 19,22,717-5-6, which left a balance of Rs. 4,35,214-3-7.

From this balance, deducting Rs. 11,891-9-3, the amount of time-barred bills, and Rs. 20,286-6-2, amount of Remission allowed on old bills from 1879 to the 1st quarter of 1883, there remained Rs. 4,03,036-4-2 outstanding on the 31st day of March 1884.

We give in detail, in the annexed four Appendices marked **A**, **B**, **C** and **D**, the result of the scrutiny of the outstanding balances for the year 1883-84 and of previous years.

Appendix **A** shows outstanding balances of the year 1883-84, amounting to 15,693 bills of the value of Rs. 3,35,109-1-2.

Appendix **B** shows outstanding balances of the 1st quarter of 1883 and of each previous year up to 1879 inclusive, 2,377 bills amounting to Rs. 65,184-0-7.

Appendix **C** shows outstanding balances of Remission, and disputed and law-suit bills.

Appendix **D** is a summary of the abovementioned three Appendices, which shows the grand total of all outstanding balances on the 31st day of March 1884, being 15,693 bills amounting to Rs. 4,03,036-4-2, being about Rs. 1,67,500 more than the outstandings of the year 1882-83.

The total Remission granted in 12 months of 1883-84 amounted to Rs. 21,705-14-8 against Rs. 36,209-8-0 in 1882-83, being Rs. 14,503-9-4 less than the amount granted last year.

From the old bills of Rates and Taxes of the year 1873 up to the end of 1878, amounting to Rs. 11,913-2-10, only Rs. 21-9-7 were recovered in 1883-84, the remaining time-barred bills, amounting to Rs. 11,891-9-3, the Municipal Commissioner proposes should be written off the accounts.

We give below a resumé of the above in figures.

| | | | No. | Rs. | a. | p |

60. We have examined the adjusting and other cross entries, and compared them with the books of the Municipality and Appendices Nos. 3, 4, 5 and 6, and find they have been correctly extracted from the Books.

We have the honour to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

*Municipal Auditors.*

BOMBAY, 29*th August* 1884.

# Review by the Town Council of Bombay, of the Administration Report of the Municipal Commissioner for 1884-85.

1. THE financial condition of the Municipality at the close of last year was highly satisfactory; the actual receipts for the twelve months exceeded the estimates by Rs. 3,73,525, whilst the saving on sanctioned expenditure was Rs. 3,28,409. The revenue, estimated to yield Rs. 31,44,550, amounted to Rs. 35,17,662. The principal items of increase were: Consolidated Rate, Rs. 70,807; Wheel Tax, Rs. 21,366; Town Duties, Rs. 1,63,480; Tobacco Duties, Rs. 10,622; Halalkhor Cess, Rs. 26,616; Market Receipts, Rs. 22,201; Miscellaneous Receipts, Rs. 13,284; and Interest and Profit on Building Fund Investment, Rs. 27,310. In consequence of this large increase the Corporation were enabled during the course of the year to augment the expenditure originally sanctioned, by Rs. 85,981. The increase in the yield from Consolidated Rate, Wheel Tax, and Halalkhor Cess was not due to greater yield by those sources of income, but owing to the fact that during the year nearly three lakhs of rupees were received on account of Outstandings for 1883-84 and previous years. The expenditure for the year was originally sanctioned at Rs. 37,23,045, but was increased eventually to Rs. 48,75,233, namely, Rs. 11,52,188 by additional grants and Rs. 49,387 by transfers.

2. These increases included Rs. 3,83,776 for new works, Rs. 1,58,750 towards the cost of roofing the Malabar Hill Reservoir, Rs. 62,000 on account of the new Municipal Office Building, Rs. 1,60,997 (an amount not expended, but merely written off as loss) to the debit of the Panwell Brick Works, Rs. 85,789 for special improvement of streets, Rs. 91,957 for interest charges, Rs. 30,400 for extra cost of supplies for road repairs, Rs. 39,724 for improvements to the Love Grove Pumping Station, Rs. 15,975 for additional works, Queen Road Sewer, Rs. 59,892 for improving the Conservancy Departments, and Rs. 14,000 for carrying out

the arrangements for laying the foundation stone of the new Municipal Offices and Hall by the Marquis of Ripon, and the cost of presenting addresses to H. E. Lord Ripon and to H. E. the Earl of Dufferin. The actual saving on the grand total of Rs. 48,75,233 was Rs. 3,28,409, of which two lakhs and a half were appropriated in the Budget for 1885-86. The expenditure on account of Drainage Works included in the Fifteen-lakhs Loan was Rs. 3,71,787, and that on Drainage provided for in the Loan of Rs. 20,88,000, Rs. 2,18,224, or a total of Rs. 5,90,011, which was met by advances from Cash Balances. At the close of the year the liabilities on account of debt (Consolidated Loan, New Drainage Loan, Market and House Rate Loan, and Vehar Water Works debt) was Rs. 1,10,43,843, exclusive of future annual interest. The valuation of the permanent assets had not been completed on March 31st last, but the aggregate already arrived at, of investment, advances, stock and buildings was Rs. 99,63,198.

3. The Council record their satisfaction at the great improvement made in the system of assessment and collection, as shown by the fact that, whereas at the end of March 1884 the number of properties on the register was only 29,867; by the 31st March 1885 the number was increased to 36,093, of which 33,409 were buildings, 116 salt-pans, 820 cocoanut plantations and 1,748 vacant lands. Of the total number registered, 31,525 were assessed to the Consolidated Rate, whilst 4,568 were either exempted, or compounded for on special terms. The increase in the valuation represented Rs. 8,18,237. Of this amount, nearly five lakhs and a quarter were in respect of properties which were not previously on the books, or were under-assessed, or the rents of which had risen; two lakhs were on account of new buildings; and one lakh consequent on enlargement and improvements. A good deal still remained to be done in the outlying districts of Mahim, Matunga, Sion, and the neighbourhood, but the valuation of the Port Trust Estate was completed. The result finally arrived at in regard to the rating of this estate does not properly form part of the report under consideration, but it may be mentioned that, under the terms of Government Resolution No. 400, Marine Department, dated 19th September last, the annual sum payable by the Trust was raised, from one lakh per annum, to Rs. 1,61,190, for the years 1884-85 and 1885-86 and for three following, subject to the proviso, that this compounded rate will be liable

to proportionate enhancement in the event of there being any increase in the general Consolidated Rate. For the very valuable and successful services rendered by him in this matter, Mr. Ollivant has already received the cordial thanks of this Council and of the Corporation. It may be taken that the increased assessment thus secured to the Municipality amounts to Rs. 61,190 yearly.

4. Considerable progress was made with various public works, some of which are of great utility and value. The new twenty-four inch main from Vehar intended for the supply of the northern and outlying districts of the Island is rapidly approaching completion. The main within the Island itself was all laid by the end of March, and on 6th April last, Mr. Braham, the Deputy Executive Engineer, was able to connect it with the thirty-two inch main at Kurla. The anticipated result was satisfactorily realized by the diminution and in fact almost total absence of the usual hot weather complaints of the want of water in the districts supplied with Vehar water. Mr. Braham states that the thirty-two inch main does not deliver as much water into the John Hay Grant Reservoir as it has been assumed to do from calculations based on the recognized theoretical formula. It would appear that, through corrosion and incrustation of the interior of the main, and the consequent contraction of its area, and increase to the resistance to the flow of water through friction, that the formula applied to a main something about thirty inches would give more accurately the actual present discharging capability of the thirty-two inch main. This is an additional reason for the completion of the twenty-four inch main direct from Vehar, and when finished, it will allow of the whole additional available supply from Vehar being drawn off, increased as the lake supply is by the water brought in by the new catch-water channels which were completed in time for use in the monsoon of 1884, and materially increased the quantity of water impounded. The works for raising the dams and construction of catch-water channels at Tulsi were practically completed. The ironwork for the Bhundarwada Water Works, manufactured in Glasgow by Messrs. Macfarlane, Strange and Co., and supplied through the agency of Messrs. Wallace and Co., was subjected to unusually severe tests, and found to be of the best description and quality. The Bhundarwada Works themselves were well carried out by Messrs. Ellapa Ballaram and Co., the contractors, who were, however, behind

time. In the districts supplied with Tulsi water, the quality of the water was very much better in the hot season of last year than it had ever been before ; and the Commissioner is sanguine that when the roofing of the Malabar Hill Reservoir is completed and the new twenty-four inch main from Vehar is in full working order, the quantity and quality of the supply will be as perfect as it is possible to make them with the present sources of supply. Valuable results as regards the waste of water are anticipated from the use of "Deacon's Meters," and meantime the staff employed to prevent wastage have been able to discover and check leakage to the extent of a quarter of a million gallons per diem. Three hundred and sixty-four new connections were made during the twelve months, at the end of which the whole number was thirteen thousand, nine hundred and nine. Turning to the subject of road improvement, it seems that the Ripon Road over the old Race Course and the Fergusson Road from Parel to Warli were taken in hand, the thoroughfares at Paidonee were greatly improved and good progress was made with the widening of the Girgam Road. Complaint is again made by the Commissioner as to the difficulties of enforcing the sections in the Municipal Acts for the acquisition of land required for street improvement, and of the so-called "building sections," which, in perhaps the majority of cases, are set at defiance by persons intending to build.

5. Regarding the subject of drainage, Mr. Walton, the Executive Engineer, reports at considerable length on the progress made and points out that the net work of pipe sewers in the First Drainage Section, although completed, are scarcely doing any duty from the want of house connections to conduct the sewage into the pipes. Only in a few cases of new buildings and the reconstruction and diversion into the pipes, of some old drains, have connections been made with the new pipe sewers at the expense of the owners. The Commissioner urges the advisability of pushing on with the construction of these sewers as he considers there is no reason why the work should be delayed pending the settlement of the question whether the cost of house connections is to fall on the Municipality or on the house owners, since whatever the decision arrived at is, it will not affect the necessity for their construction. Until the system of branch sewers is completed, the nuisance on the Flats will not and cannot cease to exist. The new main sewers being designed to carry sewage only, to the exclusion of storm-

water, have necessarily to be disconnected during the rains from the old branch sewers which carry both. During the wet season, therefore, the greater, portion of the sewage finds its way into Back Bay, the Harbour, or the old Main Drain. And whatever goes into the latter floods the Flats more or less over the site of the new reservoir. If, however, the whole system was once completed, all the sewage going by the new main drain to the pumping station and the Flats would cease to be a nuisance. Great credit is attributed to Mr. Walton and his staff for the remarkable energy with which the Queen's Road Intercepting Sewer was completed departmentally, when the Contractor virtually threw up his contract. By the completion of this work and of the Marine Lines pipe sewer, and the laying down of a drain from the Girgam Night-soil Depôt to the Queen's Road, the nuisance arising from the out-fall of sewage into Back Bay is at end, except during the rains, as before explained. Satisfactory progress was made with the extension of the Clerk Road sewer, the Arthur Road pipe sewer, the ovoid sewer from the Mint to Crawford Markets, the sewer along Ripon Road, and the pipe sewers in Agripada, although rock excavation in one case, and the difficulties in the way of coming to terms with the owners of land for the site of the Ripon Road considerably retarded the efforts of the engineers. The work of fixing the house sullage connections in Kamathipura was begun in October 1884, and was being continued at the end of the year. With regard to the question of surface drainage which is so intimately connected with the sewerage scheme that the two must always be considered together, it is anticipated that the storm-water reservoir will be completed by the end of the current year; but the Commissioner observes that until all the sources of sewage in the city are connected with the new main drains, the channel—as he showed in his previous Report—which conveys the rain water to the reservoir must also be a carrier of sewage. By the completion of the Gowalia Tank, Tardeo and Arthur Road storm-water drains, the flooding of Khetwadi and the low-lying places adjacent has been materially relieved. The storm-water drain from Bellasis Bridge to the point where Bellasis Junction Road meets Parel Road, was completed, together with the side entrances and water entrances thereto. The surface drainage for

Kamathipura was also finished. An improved outlet for the storm-waters of the Parel and Chinchpokli districts has still to be provided. The surveys for the pipe sewerage system connected with the Queen's Road drain have been completed, and the plans and estimates for the same will shortly be placed before the Corporation. One of the chief features of the year's administration was the diversion of the night-soil from the Harbour to Love Grove. The pumping arrangements were so designed by Mr. Walton as to reduce the nuisance at the Carnac Bunder Depôt to the lowest possible minimum, whilst by the copious use of sea-water the necessity of the former large consumption of Vehar Water for flushing purposes was obviated. The engines at Love Grove worked very well, but neither so well nor so economically as they will work when the improvements and additions to the station are in full force. The total quantity of sewage lifted was 11,883,274·8 tons at an expenditure on coal of Rs. 26,503-0-6.

6. The Acting Health Officer, Surgeon Davidson, reports that, exclusive of still-born, 22,542 deaths were registered during the year, a mortality 988 less than in the preceding year, but 637 more than the mean of the previous five years; and allowing for the increase of population, this was equal to 27·9 per one thousand. Of this, the mortality among males was 25·29, and that among females 34·96 per thousand, but examining the population by classes, it is found that the proportion of male to female deaths is highest among the immigrating class. Kamathipura still maintains its high rate of mortality among children as well as adults, and in the period under review the death-rate among children was higher there than in any other section of the city except First Nagpada. It is in Kamathipura that the experiment of house connections has been tried, but sufficient experience had not been gained at the end of the year to allow of any decided opinion being formed as to the effect which the connections will have upon the health and death-rate of the locality. The mortality increased quarter by quarter, until in the quarter October to December there were 5,715 deaths, or 27·68 per mille. In several divisions of the city a mortality exceeding forty per thousand was registered. This was so in Kamathipura for three quarters

of the year, in First Nagpada during the second and third quarters, and in Second Nagpada in the second and fourth quarters. In Parel and Sewri, which had been comparatively healthy for the greater part of the year, the mortality rose to 46·12 and 47·52 per thousand from October to December, the highest rate recorded in any part of the city during the twelve months. The highest mortality among children was in First Nagpada Division—78·46 per 100 births—where the drains are so bad that, though a special grant for flushing them was made, yet later on, the Executive Engineer reported that the drains are so rotten and out of repair that he doubted whether flushing them would be of any good. The Commissioner expresses the hope that the combination of a copious water-supply with efficient drainage will lay the foundation of a permanent improvement in the public health of these insanitary portions of the city; that in six years the Tansa scheme will have given the water-supply, and that in less than that period the drainage will have been completed. On these points the Corporation are again reminded by the Health Officer that the admission of more water necessitates the construction of more channels to remove it, or, in other words, progress in drainage operations. Water delivered in the city must be drawn out of it, for if the water remains in the soil, the most serious dangers from soil-moisture, to the public health may be apprehended. As a dry foundation is to house sanitation, so is a dry soil to public health. The deaths were principally from the following causes :—

| | No. of deaths. | Rate per mille |
|---|---|---|
| Fever | 6,830 | 8·27 |
| Diseases of respiratory system | 3,744 | 4·53 |
| Phthisis | 3,091 | 3·74 |
| Diseases of Nervous System | 2,422 | 2·93 |
| Diarrhœa | 1,081 | 1·31 |
| Dysentery | 635 | ·77 |
| Cholera | 576 | ·70 |
| Measles | 456 | ·55 |
| Small-pox | 112 | ·13 |

7. Throughout the year cholera was endemic, the highest number of deaths from it recorded being 175 in the third quarter, and the lowest 96 in the second quarter. In January, when the temporary hospital in Grant Road was opened, the number of deaths from this cause was 101. The highest death-rates from cholera were in Chaupati and Girgam. The Council are glad to find that there was a marked diminu-

tion in the mortality from small-pox, for, with the exception of the years 1881 and 1882, the number of recorded deaths from this cause was the smallest that had been registered since 1849. There were 15,855 successful vaccination of children, and it is extremely satisfactory to note how rapidly vaccination has advanced, and how little opposition there is to its operations. The death-rate from fever was unusually large, the deaths being 927 over those of the previous twelve months. It was owing to this disease that the mortality of Parel and Sewri was so high. From phthisis there were less deaths than in 1883, but considerably in excess of the average of the previous five years. On the whole the city was more healthy than in 1883, the total number of deaths, exclusive of still-born, having been 22,542 as against 23,520 in 1883. The improvement was chiefly due to the fact that there was nothing that could be called an epidemic of cholera in 1884, while in the previous year 1,027 persons died of it. The difficulty in the way of establishing cholera hospitals was due to the objections raised by or on account of the neighbours resident about the various sites that were proposed, and during the current year it was decided that the best course was to convert the Grant Road Rest House into a permanent hospital, and to place a second hospital on the vacant Municipal ground to the east of Arthur Road. The district in which such a hospital is most required, however, is Dhobi Talao, as it is there that cholera generally makes its first appearance ; and although a fairly good site may be secured there at considerable expense, it may be that the neighbours will raise strong opposition to the introduction of such a hospital into their midst.

8. The number of births registered was 16,148, including 1,479 still-born, giving a rate of 17·72 per thousand in an estimated proplation of 825,839. Regarding the important subject of milch cattle stables, upon the condition of which depends to so great an extent the purity, or otherwise, of the food of an immense number of the population, the Acting Health Officer assumes that the remedy for the unwholesome condition of buffalo stables "is entirely in the hands of the Corporation." He bases this statement on the theory that the Corporation ought to build sufficient stables for all milch cattle on some suitable position

or positions on the outskirts of the city, and that thereupon there could be no hesitation in taking rigorous and persistent action against the owners of all insanitary stables, and insisting on such stables being vacated. Every public milch cattle stable in Bombay, he contends, should be under the entire control of the Municipality, and cleansed, flushed, and kept in order by them at the expense of the owners. The Town Council, agreeing with Mr. Davidson that the question of a pure milk supply is of vast importance, feel that the subject is one which is surrounded with great practical difficulties, and are in a position now only to recommend the Commissioner's remarks with regard to it to the careful consideration of the Corporation.

9. The question of removing town sweepings elsewhere than to the Flats again occupied the attention of the executive, but until the question of incineration of the garbage has been fairly tried, which means that the experiment must be on a large scale, the Commissioner states that it cannot be positively asserted that any one particular system of disposal is the best or most economical. Meantime, plans and estimates are being prepared of the cost of constructing a tramway to Kurla for the conveyance thither of the garbage, as also the cost of maintenance and of the necessary live and dead stock required for such work. It is possible, moreover, that it may be found necessary to continue the deposit on the Flats, where the improvement of such parts as have been reclaimed with sweepings and the luxuriant crops which grow on great part of the reclaimed ground must be evident to any one who remembers what the swamps were before their reclamation was attempted.

10. The Mahomedan Graveyard in Grant Road, one of the worst in Bombay, will have to be closed on sanitary grounds as soon as other burying space for the community concerned can be provided. During the current year the Jewish Cemetery in Grant Road was closed, and another cemetery made over to the Jewish community at DeLisle Road; but besides this, it is obvious that all cemeteries should be removed from the crowded part of the city.

11. The expenditure on the Health Department was Rs. 8,38,548, whilst its earnings were Rs. 3,99,880, from

which figures it is found that, as compared with the previous year, the expenditure was nearly eight thousand less and the earnings more than sixty thousand to the good.

12. Under the management of the experienced Superintendent, the Markets and Slaughter-Houses continue to increase in popularity and value to the Corporation as a source of income, the net increased income being Rs. 15,647 as compared with the revenue of the previous year, and of Rs. 62,427 as compared with that of 1875. Mr. Higgins reports that the markets were well stocked with fruit and vegetables, and that the mutton supply was, as usual, plentiful. The quality of beef continued to be inferior to that of former years, and the fish supply was not equal to the demand. More than thirty-three tons of unwholesome food, valued at Rs. 74,108, were destroyed in the markets and at Bandora Slaughter-Houses, and of this, Rs. 54,112 were referable to beef alone. There were 148 convictions before the Magistrates, but the fines only averaged about five rupees each ; and as the Magistrates take so lenient a view, the punishments thus inflicted are quite useless as deterrents to the offence of offering bad food for sale. In one case where cystic beef, the eating of which so frequently results in tape-worm, was exposed for sale, the fine was Rs. 5. Mr. Ollivant adds that seventeen cases of exposing putrid fish for sale were met by fines averaging less than four rupees four annas each, whilst a butcher who was convicted of fraudulently using false weights was only made to forfeit five rupees. As soon as funds permit, it will be desirable to add a separate mutton market to the Arthur Crawford Markets, to extend the Bhuleshwar market, and provide a small market at Colaba.

13. There were thirty-nine fires during the year, a few of which were serious, and with reference to some of which there were complaints of the insufficiency of water—a defect which unfortunately cannot be remedied until the present intermittent supply is superseded by a constant service. By street accidents twenty persons were killed and two hundred and eighty-five injured, numbers which were far below those of the previous twelve months.

14. The Municipal contribution towards education was Rs. 22,500.

15. The number of meetings of the Corporation held, at which business was transacted, was fifty-seven, and there were twenty-eight Committee meetings. Of the Town Council, there were fifty-five meetings and a large number of meetings of Committees. Within the period under review the Corporation presented addresses to H. E. the Earl of Dufferin, K.P., the Viceroy, and Lord Reay, Governor of Bombay, as also an address to the retiring Viceroy, the Marquis of Ripon, K.G., by whom the corner-stone of the proposed Municipal office building was laid. Subsequently a vote of thanks was passed to His Excellency Sir James Fergusson, the late Governor of Bombay, for his presence and assistance at the corner-stone ceremony.

HENRY COOK,
Chairman, Town Council.

*The foregoing Review is circulated to the Members of the Municipal Corporation, under the terms of Section* 33 *of the Bombay Municipal Acts of* 1872 *and* 1878.

H. WYNFORD BARROW,
Clerk, Municipal Corporation;
and Secretary, Town Council.

# ADMINISTRATION REPORT

OF THE

# MUNICIPAL COMMISSIONER.

# INTRODUCTION.

1. I held the appointment and discharged the duties of Municipal Commissioner throughout the year 1884-85.

## I.—Corporation and Town Council.

2. The total number of meetings of the Corporation held during the year was 57, and 11 other meetings were convened, but postponed for want of a quorum. In the case of a quarterly meeting a quorum of 20 members and of a Special General Meeting a quorum of 25 members, besides the Chairman, is required by the Act, and these proportions to the total number of members (64) are considerable enough to account for the postponements referred to. There were also 28 meetings of Committees of the Corporation.

3. Mr. Ragunath Narayen Khote, C.I.E., vacated, and Mr. Pherozeshah Mehrwanji Mehta was elected to the chair of the Corporation on 7th April 1884.

4. Three members of the Corporation, Messrs. Dinanath Ragunath Khote, Homejee Cursetjee Dady, and Khan Bahadur Sheik Hyder Cassum, died during the year, and seven, *viz.*, Drs. Blanc and Gray, Messrs. Dwarkadas Lulloobhoy, J. H. Grant, C.S., Magnus Mowat, Stevens, and Captain Morland, resigned. Messrs. Freeborn and Kemp vacated their seats in consequence of absence from Bombay, but were both, as well as Captain Morland, re-appointed during the year.

5. The Town Council held 52 regular and 3 special meetings, and 129 meetings of Committees of the Council were assembled. Sir Frank H. Souter, Kt., C.S.I., retained the Chairmanship during the year. Dr. Blanc and Captain Morland resigned their seats during the year, but the latter was re-appointed. Dr. Cook and Mr. Thorburn were appointed to fill the places thus vacated, but the latter resigned his seat on 6th January 1885, on which date Captain Morland returned to the Council.

6. Lists of Members of the Corporation and Town Council are given on page 1. The members of the Corporation had the pleasure during the year of presenting addresses to their Excellencies the Earl of Dufferin and Lord Reay on their arrival in India ; and an address was also presented to the retiring Viceroy, H. E. the Marquis of Ripon, on the occasion of his laying the foundation stone of the new Municipal Hall on 19th December 1884. This ceremony was attended with great success, and the thanks of the Corporation were subsequently voted to H. E. Sir James Fergusson, Governor of Bombay, for his presence and assistance, and also to Colonel Beville and the Officers of the Marine Battalion, which furnished the band and guard of honour.

## II.—Heads of Departments.

7. Mr. C. B. Braham, Deputy Executive Engineer, was on privilege leave from 3rd September to 18th November 1884, his current duties being carried on by Mr. Walton, the Executive Engineer. Mr. MacEwen, Assistant Engineer, was granted privilege leave from 28th May to 26th August 1884, and his place was taken by Mr. Poondlik Gunesh. Surgeon-Major Weir, the Health Officer, has been absent on furlough since 4th September 1884, and Surgeon D. C. Davidson has acted for him. Mr. R. P. Brunton, the Assessor and Collector, was absent on privilege leave from 1st June to 1st July 1884, and Rao Saheb Virprasad Tapiprasad acted in his place.

## III.—Financial.

8. The opening balance amounted to Rs. 7,40,919-0-11. It had been estimated at Rs. 4,00,000, and the excess of Rs. 3,40,919-0-11 was due to charges belonging to the year 1883-84, amounting to Rs. 3,31,256-13-9, remaining unpaid at the close of that year. The revenue, which was estimated to yield Rs. 31,44,550, reached the sum of Rs. 35,17,662-7-3, or if profit on Municipal Workshops (Rs. 240-6-10) and Water Rate (Rs. 5,96,123-3-5) be added, the sum of Rs. 41,14,026-1-6. With the single exception of contributions by Municipal servants towards pension and other funds, every head of revenue showed an improvement on the Budget Estimate. Town Duties showed the most remarkable increase, yielding Rs. 7,73,430-9-0, or an excess of Rs. 1,63,430-9-0 over what was anticipated when the

Budget was framed. The causes of this will be referred to farther on. There was a considerable increase over the anticipated yield from Consolidated Rate, Wheel Tax and Halalkhor Cess, but this was to a great extent nominal and due to recovery during the year under report of sums due in the preceding year.

9. Expenditure which was estimated at Rs. 48,75,233-9-0 reached only Rs. 38,81,020-11-3, or Rs. 9,94,212-13-9 less than the estimate. Of this balance, about two-thirds, or Rs. 6,65,803-4-9, have been appropriated, or, it would be more correct to say, renewed during the current year to meet unpaid liabilities from the past year. The actual saving on expenditure must therefore be taken as being Rs. 3,28,409-9-0.

10. The following tables show revenue and expenditure under each of the main heads :—

## A.

## REVENUE.

| | Actuals for 1884-85. | Estimate for 1884-85. | Actuals for 1883-84. |
|---|---|---|---|
| | Rs. a. p. | Rs. | Rs. a. p. |
| Consolidated Rate at 8 per cent. (including Rs. 1,50,000 contributed by Government and Port Trust, Rs. 50,000 and Rs. 1,00,000, respectively). | 11,80,307 0 6 | 11,10,000 | 9,83,538 1 11 |
| Government contribution towards Police Expenses | 90,000 0 0 | 90,000 | 85,672 4 6 |
| Wheel Tax, License Fees under Public Conveyance Act and Toll Fees ..... | 3,13,857 1 11 | 2,88,800 | 2,58,644 1 0 |
| Liquor Licenses, Tobacco Duty and Licenses ..... | 3,16,372 1 3 | 3,05,750 | 3,53,993 8 2 |
| Town Duties ..... | 7,73,430 9 0 | 6,10,000 | 6,67,112 13 11 |
| Halalkhor Cess ..... | 2,89,616 1 6 | 2,63,000 | 2,43,556 9 11 |
| Water Rate ..... | 5,96,123 3 5 | 5,96,000 | 5,47,646 14 9 |
| Returns from Property and Miscellaneous ..... | 6,54,161 12 0 | 4,77,600 | 5,97,107 10 7 |
| Total Rs.... | 42,13,867 13 7 | 37,40,550 | 37,37,272 0 9 |

## B.

## EXPENDITURE.

| | Actuals for 1884-85. | | | Estimate for 1884-85 (including subsequent grants and transfers). | | | Actuals for 1883-84. | | |
|---|---|---|---|---|---|---|---|---|---|
| | Rs. | a. | p. | Rs. | a. | p. | Rs. | a. | p. |
| General Superintendence | 1,65,257 | 14 | 10 | 1,69,284 | 1 | 3 | 2,01,021 | 5 | 6 |
| Assessment and Collection Departments | 1,61,570 | 6 | 8 | 1,75,977 | 2 | 0 | 1,45,040 | 11 | 6 |
| Police and Fire Engines | 4,26,725 | 12 | 0 | 4,56,239 | 0 | 0 | 4,17,897 | 0 | 9 |
| Public Health Department | 9,23,313 | 14 | 5 | 10,12,864 | 7 | 4 | 9,19,592 | 3 | 10 |
| Public Works, Ordinary | 10,09,886 | 15 | 7 | 10,94,051 | 12 | 3 | 7,93,225 | 10 | 6 |
| Do. Extraordinary | 1,41,664 | 5 | 6 | 3,83,776 | 12 | 10 | 2,62,113 | 5 | 4 |
| Public Gardens | 22,737 | 9 | 11 | 25,296 | 12 | 8 | 20,263 | 7 | 7 |
| Municipal Debt | 7,37,608 | 6 | 11 | 9,79,758 | 5 | 6 | 8,12,060 | 2 | 5 |
| Pensions, Gratuities and Compassionate Allowances | 23,292 | 6 | 4 | 25,217 | 1 | 11 | 40,332 | 12 | 8 |
| Primary Education | 22,500 | 0 | 0 | 22,500 | 0 | 0 | 22,500 | 0 | 0 |
| Goculdas Tejpal Hospital and Jaffer Suleman's Dispensary | 34,511 | 8 | 7 | 42,000 | 0 | 0 | 27,832 | 2 | 0 |
| Miscellaneous | 2,11,951 | 6 | 6 | 4,88,268 | 1 | 3 | 53,933 | 6 | 5 |
| Total... Rs. | 38,81,020 | 11 | 3 | 48,75,233 | 9 | 0 | 37,15,812 | 4 | 6 |

11. It will be seen from the above statements that there was an improvement during the year under report as compared with the previous year in the revenue derived from Consolidated Rate, Wheel Tax, &c., Town Duties, Halalkhor Cess and Water Rate, while there was a falling off in that from Liquor and Tobacco Duty and Licenses.

12. The causes of the increase in the Property Rates have already been referred to. As regards Town Duties, there was a heavy increase in the imports of almost all articles liable to them, excepting timber and firewood, especially in sugar, to which the improvement in the revenue under this head is principally due.

13. In the expenditure statement the difference between actuals and estimate under the head of General Superintendence is principally due to savings in Town Council fees and contingent charges. The saving under Assessment and

Collection was due to the full budget salaries not being drawn by all the members of that department, and to the fact that certain grants for furniture and printing remained unspent within the year.

14. The saving under the head "Public Health Department" has been considerable. It is to a great extent due to diminished charges for labour, and for the feed and purchase of bullocks. In one particular item, "XII. Better scavenging of the city," which shows a saving of Rs. 40,478-0-5, the grant for the work was not made till the end of December 1884, and could not be fully made available within the account year.

15. On public works, ordinary and extraordinary, the expenditure appears less than the estimate by Rs. 3,26,277. The difference is partly due to miscellaneous savings in the Engineer's Department (about Rs. 25,000), but the bulk of it is atributable to the fact that no expenditure was incurred to the debit of the appropriations for the Municipal Building Fund and the Nesbit Road over-bridge and that many works now in progress were not sanctioned until late in the year. All grants on these accounts have since been renewed.

16. Under the head of Municipal Debt there is a decrease, which is attributable partly to payment of some interest on Local Loans having been made out of the interest that accrued on the Sinking Fund invested in Government Paper, and partly to applications for interest having in a few cases not been made until after the conclusion of the year.

17. The total expenditure on account of the Drainage Works sanctioned to be executed out of the 15-Lakh Loan of 1883-84 was Rs. 3,71,787-7-1, the whole of which was advanced from Surplus Cash Balance pending the raising of the loan. For the Drainage Works sanctioned out of the loan of Rs. 20,88,000, advances out of cash balance amounting to Rs. 2,18,224-3-1 were made. The total advances on account of Loan Fund works made up to the close of the year aggregated 17¼ Lakhs.

18. The net profit on the Municipal Workshops was only Rs. 240-6-10. This poor result is due to the loss on

iron castings, concerning which the Controller makes some remarks which are receiving my attention. It may possibly be advisable to close the Iron Foundry as he suggests, but the question is not yet ripe for decision.

19. The closing balance was Rs. 10,60 586-6-1, or Rs. 2,94,783-1-4 better than the estimate after taking into account the amount of lapsed grants aggregating Rs. 6,65,803-4-9 which have lately been renewed by the Corporation. Deducting opening balance the actual gain of the year (exclusive of outstanding revenue) was Rs. 2,85,120-14-2. But as the amount of the lapsed grants has been deducted from the total balance in order to show the real surplus, a corresponding credit must similarly be taken from arrears of revenue of the past year since collected. This, up to 8th August 1885, amounted to Rs. 1,23,528-14-11. Thus the net surplus of the year, exclusive of arrears, still outstanding on the last mentioned date, was Rs. 4,08,649-13-1.

20. The following statement shows our position with respect to all loans, and a comparison of liabilities and assets will be found at page 58 of the Controller's report :—

| Name of Loan. | Amount of liability at the beginning of the year. | Increase during the year. A | Decrease during the year. | Amount of liability at the close of the year exclusive of future annual interest. | Year in which the whole liability will be discharged. |
|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | |
| Consolidated Loan ... | 55,42,122 4 4 | 2,48,188 13 9 | 3,56,652 4 10 | 54,33,658 13 3 | 1910 |
| New Drainage Loan of 1878 ..... | 25,71,000 0 0 | 1,26,062 8 0 | 1,54,562 8 0 | 25,42,500 0 0 | 1918 |
| Market and House Rate Loans of 1867 and 1868 amounting to Rs. 17,38,000..... | | Fully invested. | | | |
| Total...Rs. | 81,13,122 4 4 | 3,74,251 5 9 | 5,11,214 12 10 | 79,76,158 13 3 | |
| Vehar Debt ..... | B31,13,759 1 7 | 1,25,088 13 10 | 1,75,200 0 0 | 30,67,684 13 7 | 1915 |
| Total...Rs. | 112,26,881 5 11 | 4,99,340 3 7 | 6,86,414 12 10 | 110,43,843 10 10 | |

A—*These sums represent the interest which accrued for the year.*

B—*As per Accountant-General's Statement.*

## IV.—Assessment and Collection of Revenue.

*Registration of Properties.*

21. The number of properties on the Assessment Book at the close of 1883-84 was 29,867, and at the close of the year under report 36,093. Of these 33,409 are buildings, 116 salt pans, 820 cocoanut plantations, and 1,748 vacant lands, &c.; of the total number now registered, 31,525 are assessed to the Consolidated Rate, and 4,568 are exempt or compounded for on special terms. Further progress was made in obtaining a more accurate registration of properties, but a good deal still remained to be done in the outlying districts, Mahim, Matunga, Sion, &c.

*Valuation.*

22. The gross recorded value of these properties for the year under report is contrasted with the gross recorded value for the preceding year in the following table :—

| Closing Valuation of 1883-84. | Opening Valuation for 1884-85, Section 79. | Valuation after complaint, Section 80. | | Subsequent amendments, Section 81. | | Closing Valuation of 1884-85. | | | Increase. |
|---|---|---|---|---|---|---|---|---|---|
| | | No. of complaints. | Amount after disposal of complaints. | Reductions. | Enhancements. | Valuation chargeable with Consolidated Rate. | Valuation exempt from Consolidated Rate, Section 77. | Total. | |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. | Rs. |
| 1,45,64,507 | 1,56,45,176 | 1,928 | 1,52,25,727 | 98,285 | 5,63,621 | 1,45,95,300 | 7,87,444 | 1,53,82,744 | 8,18,237 |

The increase shown by column 10 may be apportioned to the following heads :—

(1) Registration of properties not previously on the books, correction of under-assessments, and rise in rents .....Rs. 5,18,237
(2) Erection of new buildings..... ,, 2,00,000
(3) Enlargements and improvements ..... ,, 1,00,000

23. The valuation of the Port Trust Estate was completed in the year under report. That valuation and the Consolidated Rate payable by the Trustees for 1884-85 have formed the subject of a lengthy discussion, and the whole matter is under the consideration of Government under Section 36 of the Bombay Port Trust Act of 1879. The figures in the preceding table do not account for the valuation of this estate, nor for all Government properties the valuation of which is still in progress.

## *Property Rates.*

24. The increase in valuation has resulted in a corresponding increase in the demand on account of Property Rates as exhibited in the following comparative tables :—

### *Consolidated Rate.*

| 1883-84. | | | 1884-85. | | | Increase. |
|---|---|---|---|---|---|---|
| 8 per cent. charged on Value. | Compounded payments made by Government and Port Trustees. | Total. | 8 per cent. charged on Value. | Compounded Payments made by Government and Port Trustees. | Total. | |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 9,62,423 10 1 | 1,40,000 0 0 | 11,02,423 10 1 | 10,01,431 15 11 | *1,50,000 0 0 | 11,51,431 15 11 | 49,008 5 10 |

* The amount payable by the Port Trustees for 1884-85 has not yet been determined by Government under Section 36 of the Port Trust Act, and the amount shown here is the Rs. 1,00,000 paid by the Trustees on account.

### *Halalkhor Rate.*

| 1883-84. | | | 1884-85. | | | Increase. |
|---|---|---|---|---|---|---|
| 3 per cent. on Value. | Special Service. | Total. | 3 per cent. on Value. | Special Service. | Total. | |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 2,39,892 2 8 | 26,097 12 1 | 2,65,989 14 9 | 2,49,844 3 4 | 27,472 12 3 | 2,77,316 15 7 | 11,327 0 10 |

### *Water Rate.*

| 1883-84. | | | | 1884-85. | | | | Decrease. |
|---|---|---|---|---|---|---|---|---|
| On Value. | Compounded. | By Meter Measurement. | Total. | On Value. | Compounded. | By Meter Measurement. | Total. | |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 2,55,301 10 3 | Rs. 2,160 1 0 | 3,06,396 6 9 | 5,63,858 2 0 | 2,63,555 5 6 | Rs. 3,133 2 6 | 2,85,265 9 8 | 5,51,954 1 7 | 11,904 0 5 |

It will be observed that though the water rate on value and by compounded payments show a considerable increase, the revenue from water supplied by meter shows a marked falling off, which not only swallows the whole of the increase under the other two heads, but leaves a net decrease of

Rs. 11,904-0-5 on the whole. The decrease is attributed mainly to unusually small quantities of water drawn by mills and by the G. I. P. Railway Company as shown by the meter readings supplied by the Deputy Executive Engineer.

The total demand on account of Property Rates as shown by the preceding tables for the year under report amounted to Rs. 19,80,703-1-1, to which must be added Rs. 2,345-9-1, being demands for previous years now for the first time brought to account.

*Collections.*

25. Of the total demand, Rs. 1,652-4-11 were allowed as remission or drawback under Section 76 of the Act, and Rs. 1,50,000 were paid direct into the Municipal Account Office by Government and the Port Trustees. For the recovery of the remainder bills were prepared and issued by the Assessment Department as follows :—

| Years. | Bills to be issued. | | Bills issued. | | Bills remaining to be issued at the end of 1884-85. | |
|---|---|---|---|---|---|---|
| | No. | Amount. | No. | Amount. | No. | Amount. |
| | | Rs. a. p. | | Rs. a. p. | | Rs. a. p. |
| 1881 | 4 | 7 11 5 | 4 | 7 11 5 | .. | .... |
| 1882 | 9 | 16 15 6 | 9 | 16 15 6 | .. | .... |
| 1st quarter, 1883 | 5 | 6 9 10 | 5 | 6 9 10 | .. | .... |
| 1883-84 | 536 | 2,314 4 4 | 536 | 2,314 4 4 | .. | .... |
| 1884-85 | 61,346 | 18,29,050 12 2 | 61,346 | 18,29,050 12 2 | .. | .... |
| Total .... | 61,900 | 18,31,396 5 3 | 61,900 | 18,31,396 5 3 | .. | .... |

As at the end of 1883-84, so at the end of 1884-85, no bills remained to be issued at the close of the year.

26. The outstanding balance at the end of 1883-84 was Rs. 3,67,346-3-8. To this must be added the total demand for current and former years as ascertained in the year under report as above, and the total revenue for collection amounted to Rs. 23,48,742-8-11, the details and collection of which are accounted for in the following statement :—

| Rates. | To be collected. | | | | Collected. | | | Uncollected. | Deduct Irrecoverable Bills. | | | | | Balance Outstanding at the end of 1884-85. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | | On account of former years. | | | On account of current year. | Total. | | | |
| | Opening Balance Outstanding. | Total of Bills issued during 1884-85. | Amount paid by Government and Port Trustees without Bills. | Total. | On account of former years. | On account of 1884-85. | Total. | | Time-barred Bills. | Bills cancelled as erroneous. | Total. | | | On account of former years. | On account of 1884-85. | Total. |
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| Consolidated Rate | 2,24,043 0 2 | 9,99,802 12 5 | 1,50,000 0 0 | 13,73,845 12 7 | 1,49,396 9 11 | 10,35,620 15 7 | 11,85,017 9 6 | 1,88,828 3 1 | 352 1 5 | 4,496 11 0 | 4,848 12 5 | .. | 4,848 12 5 | 69,820 11 3 | 1,14,158 11 5 | 1,83,979 6 8 |

27. Of the balance Rs. 2,66,825-9-5 shown as outstanding at the end of the year under report, Rs. 1,24,947-3-5 have since been collected, about Rs. 6,300 may be ascribed to bills which are practically irrecoverable, and Rs. 92,927-14-11 are due to claims which have not yet been paid by the G. I. P. Railway Company, but against which, as also against the demand for the first half of 1885-86, Rs. 1,00,244-6-5 have been credited, pending final settlement, to deposit account.

*Wheel Tax.*

28. The opening outstanding balance on account of Wheel Tax was Rs. 21,093-8-9. The demand for the current year was Rs. 1,69,333-13-0, showing an increase of Rs. 13,396-5-0 over that of 1883-84. The causes of increase are shown in the following table :—

| 1883-84. Number at the end of 1883-84. | | | | | 1884-85. Number at the end of 1884-85. | | | | | Increase. | | | | Decrease. |

| | | | | Rs. a. p. | | | | | Rs. a. p. | | | | Rs. a. p. | |
| 2629 | 505 | 2981 | 291 | 1,55,937 8 0 | 2749 | 597 | 3150 | 273 | 1,69,333 13 0 | 120 | 32 | 169 | 13,396 5 0 | 18 |

29. To the amount here given must be added Rs. 57-12-0 ascertained in the year under report as due for 1883-84. The total number of bills issued during the year was 9,116, and the process of recovery was attended with the following results :—

| To be collected. | | | Collected. | | | Uncollected. | Deduct Irrecoverable Bills. | | | | | Balance Outstanding at the end of 1884-85. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | On account of former years. | | | | | | | |
| Opening Balance Outstanding. | Total of Bills issued during 1884-85. | Total to be collected. | On account of former years. | On account of 1884-85. | Total. | | Time-barred Bills. | Bills cancelled as erroneous. | Total. | On account of current year. | Total. | On account of former years. | On account of 1884-85. | Total. |
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 21,093 8 9 | 1,69,391 9 0 | 1,90,485 1 9 | 17,656 10 0 | 1,59,412 9 0 | 1,77,069 3 0 | 13,415 14 9 | 81 0 0 | 234 10 0 | 315 10 0 | .... | 315 10 0 | 3,179 0 9 | 9,921 4 0 | 13,100 4 9 |

30. It will be seen that the balance outstanding at the close of the year was Rs. 13,100-4-9. Of this sum, Rs. 6,646-7-6 have since been collected. To the collections on account of Wheel Tax shown above must be added Rs. 1,15,752-12-0 recovered from the owners of licensed public conveyances, and Rs. 16,785-12-0 realized from the toll at the Mahim and Sion causeways.

*Miscellaneous Revenue.*

31. Rs. 6,429-11-0, against Rs. 5,194-8-11 in the previous year, were derived from Notice and other Process and Inspection Fees. Rs. 2,518-12-0 were received on account of hire of water meters against Rs. 1,795-8-0 in the preceding year.

*Tax on Fire Insurance Companies.*

32. The collections under this head amounted to Rs. 25,517 in the year under report as against Rs. 24,708 for the preceding year.

*Refunds.*

33. The total of refunds allowed under Section 82 of the Municipal Act and on account of over-collections under all heads amounts to Rs. 6,105-4-11 as against Rs. 7,591-7-8 during 1883-84. The subjoined table gives the details of of these figures :—

| YEAR. | Consolidated Rate. | Water Rate. | Halalkhor Rate. | Wheel Tax. | Miscellaneous. | Total. |
|---|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p | Rs. a. p. | Rs. a. p. |

*Appeals.*

34. There were nine appeals to the Chief Presidency Magistrate under Sections 127 and 128 of the Municipal Act ; of these, eight were dismissed and one was settled by consent.

*Town Duty.*

35. Full particulars as to the income derived from Town Duty and the refunds granted on re-exportation under Section

120 of the Municipal Act will be found in the following table :—

| Name of Article. | COLLECTIONS. | | | | | | REFUNDS. | | | | | | NET REVENUE. | | | | | |

A comparison with the preceding year exhibits a net increase in revenue under this head of Rs. 83,076-14-7.

## V.—Public Works.

Water Supply.

36. In the Muncipal Commissioner's Report for last year (s. 54) the reasons for laying a new 24″ main from Vehar to supply the northern and outlying districts of the city, and to carry the supply which could not be conveyed to the Bhandarwada Reservoir, were fully detailed. This main has now been laid as far as Kurla where it is connected with the 32″ main to Bhandarwada, and the work of completing it between Vehar and Kurla and of constructing filter beds at Vehar, is being pushed on. The connection between the 24″ and 32″ mains at Kurla was only made on 6th April last, and the subject comes, therefore, more properly within the scope of next year's report; but I may mention here that the anticipated result was satisfactorily realized by the diminution and, indeed, almost total absence of the usual hot-weather complaints of want of water in the Vehar districts. Mr. Braham reports that the 32″ main, owing, he supposes, to internal corrosion and incrustation, and the friction that is caused thereby, does not deliver as much water into the Bhandarwada Reservoir as it is theoretically capable of discharging, and he compares its actual capacity with that of a 30″ main. This is an additional reason in favor of the 24″ main direct from Vehar; and when this is completed, there can be no doubt that the whole available supply from the Vehar Lake will be drawn off, increased as it is by the new catch-water channels which were completed in time to be brought into use before the monsoon of 1884, and which materially increased the quantity of water impounded.

37. The work of raising the Tulsi dams and constructing new catch-water channels is now practically completed, sufficiently so to impound and retain the water of this year's monsoon.

38. The Bhandarwada Water Works are now completed. Mr. Braham accords considerable praise to all the contractors concerned, and their work was on the whole well done. The iron work supplied by Messrs. Wallace and Co., and manufactured by Messrs. Macfarlane, Strange and Co., of Glasgow, was subjected to unusually severe tests, and has proved to be of the best description and quality. But there were various delays on the part of Contractors, which were not altogether

satisfactory, and the work should have been completed much sooner than they actually were.

39. The filter beds at the Malabar Hill Reservoir were completed during the year under report, and have been in use during nearly the whole year. The roofing of the reservoir is in progress. The filter beds will in a short time be completely roofed in. The water supplied to the Tulsi districts during the past hot weather was very much better than any that has ever been supplied to them before. When the roofing of the Malabar Hill Reservoir is completed and the new 24" main laid from Vehar it will be safe to say that the quantity and the purity of the water distributed over the city are as ample and as perfect as it is possible to make them with the present sources of supply.

40. This leads me to the subject of the Tansa Project, which cannot be passed by without some reference, though it can hardly be said to fall to any extent at all within the scope of the present report. The Corporation sanctioned, on 27th November last, a grant of one lakh for the Tansa survey, and the work was begun by Mr. W. Clerke, Executive Engineer, whose valuable services were put at the disposal of the Municipality by Government for the purpose on 27th February 1885. It is as yet premature to enter into any of the details of the project, but I may safely say that if it be carried out, the difficult question of water supply to the present city of Bombay and to any possible future Bombay will be set at rest finally and for ever.

41. The contractor for the supply of Deacon's patent differentiating waste water meters engaged to despatch an efficient Superintendent to supervise the fixing of them and to train the staff required for working them. The Superintendent arrived in Bombay at the end of December last. Eighty six meters were fixed in the year under report. It is expected that the advantage derived in the prevention of waste will be great. In those towns where they have been adopted they are most highly spoken of, and when I was in England I had opportunities of judging of the excellent results obtained from them both in Liverpool and Glasgow. The duty of preventing the improper waste of water, especially when the quantity available is so restricted as it is in Bombay, and will be, till the Tansa project is carried out, comes next in importance to the duty of securing an adequate supply,

and the finances of the Municipality will be very far from suffering from expenditure to that end.

42. The total number of water connections has risen from 13,545 in 1883-84 to 13,909 in the year under report. The aggregate length of the mains examined by the Waste Prevention Staff was 34,945 feet, and leakage to the extent of 250,000 gallons per diem was discovered and checked. This staff is at present under the orders of the Superintendent for fixing Deacon's meters.

Roads and Buildings.

43. The acquisition of the ground required for the new Ripon Road, which extends from the Byculla Hotel to the Central Station on the Flats was nearly completed. The road is now marked out and will be constructed during the current year. The new Fergusson Road from Warli to Parel made good progress during the year, and is now almost ready for traffic. A further improvement was effected at Paidhoni by opening out a new entrance into Bapu Khote Street and the gradual widening of Girgam Road and other throughfares was proceeded with. A sum of more than three lakhs was provided for road repairs, out of which Rs. 30,000 were appropriated to the cost of paving foot-paths. Road watering by carts was carried out departmentally at a cost of Rs. 44,189-2-8, while a contract was entered into, amounting to Rs. 11,764-8-3, for the watering of those roads on which bhistis do the work. The lighting of roads by the Gas Company has been satisfactory. The electric lights continue, however, to be very uncertain in their operation. They have a tendency to flicker and even to go out altogether which deprives them of half their value. It is advisable, nevertheless, to offer a fair trial to the enterprize of electric lights in Bombay, and the new Charni Extension Road is proposed to be thus lighted.

44. Beyond the partial construction of milch cattles stables at Mody Bay, which have since been completed, not much was done during the year in the way of new buildings. The Building Department have, however, been fully occupied with their ordinary duties, among which the application of the "Set Back" Sections of the Municipal Acts are perhaps the most important, as they are certainly the most difficult and troublesome. The so-called "Building Sections" of the existing Acts are not sufficiently complete for effective action,

and are in a great number, perhaps the majority of cases, simply set at defiance by persons intending to build. The need for amended Building Sections and By-Laws was alluded to in last year's report. The number of summonses issued for various offences under these sections, as they at present stand, was 1,101. In 610 of these cases the parties complied with the requistions made and were not taken into court. In all the remaining 491 cases convictions were obtained. In 410 of them the parties were warned and discharged, having complied after service of the summonses, and the remainder were fined in sums aggregating Rs. 464-10-8.

45. The Municipal Workshops have turned out work to the value of Rs. 15,300, and 170 tons of castings have been made in the Foundry.

46. There is not much to be said on the subject of the Municipal Gardens. The zoological collection at the Victoria Gardens has been increased by a horde of young ostriches hatched during the year; and by some Australian specimens, including emus, kangaroos and dingos or wild dogs received from the Zoological Gardens at Adelaide. It is proposed to send to Adelaide in return some specimens of the fauna of this Presidency.

Drainage.

47. Mr. Walton reports the final settlement with the contractors of all claims, &c., relating to the laying of the pipe sewers in the first portion of the drainage scheme. He also reports that from the absence of means for admitting the house sullage to these sewers they are practically useless. This subject, which has frequently been pressed on the attention of the Corporation, was, at the end of the year under report, still being considered by a Committee which was appointed to consider whether the necessary house pipes and fittings should be paid for by the Municipality as at first determined, or by the house-owners. It is very advisable that the construction of pipe sewers throughout the city should be pushed on, nor is there any reason why it should be delayed pending the settlement of the question whether the cost of the house connections is to fall on the Municipality or on the house-owners. Whatever decision on this head be arrived at will not affect the necessity for the construction of pipe sewers. Until the

system of branch sewers is complete the nuisance on the Flats will not and cannot cease to exist. The new main sewers being designed only to carry sewage, to the exclusion of storm water, have necessarily to be disconnected during the rains from the old branch sewers which carry both. During the rains, therefore, the greater portion of the sewage of the city (the whole except what is put into the new system at the night-soil depôts) finds its way into Back Bay and the Harbour at the old outfalls, or into the old main drain. Whatever goes into the latter floods the Flats more or less over the site of the future surface drainage reservoir. Were the system once completed, the old main drain would be used exclusively for carrying the storm waters, the whole of the sewage going by the new main drain to the pumping station, and the Flats would cease to be a nuisance.

48. The completion of the Queen's Road Intercepting Sewer was noticed in para. 62 of the Municipal Commissioner's last report, though it fell within the year now being reported on. It will be remembered that a bonus was offered to the contractor at his suggestion if he would complete the work by the monsoon of 1884, instead of in February 1885, and though those terms were agreed to, and for the more speedy prosecution of the work the Queen's Road was opened up, much to the inconvenience of the public, for a long distance, the contractor virtually threw up his contract on the 14th April 1884. The work was then undertaken departmentally and so vigorously was it pushed on that by the 2nd July it was completed, though it involved the construction of no less than 5,180 feet of ovoid sewer. Great credit is due to Mr. Walton for the remarkable energy shown in the completion of this work ; and he speaks very highly (and deservedly so) of several of his subordinates. By the construction of the Queen's Road Intercepting Sewer and the Marine Lines Pipe Sewer in continuation of it, which was also constructed by departmental agency during the past season, the nuisance arising from the outfall of sewage in Back Bay is over except during the rains. In the monsoon, as has been already explained, the old outfalls have to be resumed, because the old branch sewers, carrying storm water as well as sewage, have then to be detached from the New Queen's Road Intercepting Sewer, which is designed only for sewage. For the pipe sewerage system connected with the Queen's Road drain the requisite surveys have been made, and plans and

estimates prepared, and this subject will shortly be brought before the Corporation. I should observe, however, that the abating of the Back Bay nuisance is also partly due to the construction of the pipe sewer from the Girgam Night-soil Depôt to Queen's Road Sewer, which was carried out during the year under report, and by means of which the outfall of sewage on to the foreshore of Back Bay, west of the level crossing, has been stopped.

49. The extension of the Clerk Road Sewer from the Central Station to the Parel Road proceeded satisfactorily, and will be completed within the contract time. The progress of the DeLisle Road 18′ pipe sewer was delayed by the rock blasting required, and the Arthur Road 15′ pipe sewer, which is to be connected with it, has been retarded by the same cause, but it could in no case be used till the DeLisle Road sewer is ready for use, which Mr. Walton anticipated would be by 15th June.

50. The work of constructing ovoid sewers from the Crawford Market to the Mint and along the new Ripon Road has proceeded as rapidly as the difficulties caused by rock excavation in the former case and by making terms with the owners of land in the other would allow. The work of laying pipe sewers in the Agripada District has been kept well in hand, and Mr. Walton anticipates its completion within the contract time. The work of fixing the house sullage connections in Kamathipura was begun at the end of October last, and was carried on till the close of the year.

51. Turning to the subject of surface drainage, which is so intimately connected with the sewerage scheme that the two must always be considered together, the first thing to observe is that the greater portion of the Mahalakshmi storm-water reservoir has been excavated down to the required level of 77 T.H.D.; the banks have been constructed as far as the excavated material would allow ; and the completion of the whole work is anticipated by the 31st December next. The diversion of the Tulsi pipe line has been effected. But as was observed in my annual report for last year, "it is very evident that the channel which conveys the rain water to the reservoir should not also be a carrier of sewage." But so it will continue to be until all the sources of sewage in the city are connected with the new main drains. Till this is

done, the old branch sewers must be used. The connection of these with the new main sewers presents no difficulties during the fair weather, but as soon as the rains commence, they must be detached and reconnected with the old system. The old main drain, therefore, during the rains continues to pour sewage as well as storm water over the Flats, that is, over what will be the surface drainage reservoir, and thus at present there can be no abatement of the nuisance on this part of the Flats.

52. The Gowalia Tank, Tardeo, and Arthur Road storm-water drain has been completed, and the flooding of the low-lying parts of the city about Khetwadi has been materially relieved. The storm-water drain from Bellasis Bridge to the point where Bellasis Junction Road meets Parel Road has been completed with the side entrances and water entrances thereto. The section from Bellasis Junction Road to Jail Road is now in progress; it is rendered difficult by the small space to spare between the tramway line and the gas main. The surface drainage of Kamathipura has been completed. Mr. Walton draws attention to the necessity of providing an improved outlet for the storm water of the Parel and Chinchpokli neighbourhoods.

53. The discharge of the night-soil that used to be pumped into the harbour at Carnac Bandar into the new main sewer at the same place is one of the chief features of the year's administration. The pumping arrangements have been so designed by Mr. Walton as to cause a minimum of offence on the spot. The whole of this night-soil is now carried away to the Love Grove Pumping Station, where the engines have worked very well throughout the year, though neither so well nor so economically as they will work when the improvements and additions which are being made are completed. The chief of these is an extra condensing tank which has been rendered necessary since the number of engines has been increased from two to four. The total quantity of sewage lifted during the year was 11,883,274-8 tons at an expenditure on coal of Rs. 26,503-0-6, which was well within the Budget allowance. I may mention here, though it is properly a subject for next year's report, that the construction of a chamber within which the offensive matters raised by the shred-lifter may be incinerated is being pushed on and will soon be complete.

## VI.—Public Health.

54. The earlier part of the Health Officer's Report is occupied by a discussion of reforms, more or less urgent, which are all confessedly needed and have long been under consideration, and the most important of which, it is hoped are now about to be rendered practicable by long deferred legislation. In these cases the difficulty consists, not in detecting the blot, for that is patent, but in providing a remedy which shall at once be effective and inflict the least possible hardship. We have to deal with insanitary habits of very ancient standing, which the great body of the population regard as perfectly innocent. In the carrying out of many of the most important sanitary reforms we have to encounter opposition not merely from the ignorant, but from a large population of the educated classes, and hasty or ill-advised action would simply stimulate that opposition to an extent which would render all action impossible. During the past five or six years there has been marked progress towards improvement in milch cattle stable accommodation. The progress should be greater, and I look to the Health Department and the Magistracy to insist on sanitary requirements being complied with. In the power of licensing there is virtually full power of control, and I am quite opposed to the Municipality entering into a speculative business so far beyond their means, as that of providing accommodation for all the milch cattle of Bombay and their attendants.

55. The closing of the Mahomedan burial-ground at Grant Road is a pressing matter, as Mr. Davidson reports, and will be delayed no longer than until another suitable, spot is ready. Land for the burial of low-caste Hindus has been acquired by the Municipality at great cost at the junction of Haines and Warli Roads, but it requires yet some preparation in the way of raising the surface by filling with sweet earth, which will be proceeded with when the weather allows. The Jewish burial-ground at Grant Road has been practically disused for some years; and measures have been adopted since the close of the year under report for formally closing it, a course to which the trustees of the ground, Messrs. David Sassoon and Company, make no objection, as the community possess another cemetery at DeLisle Road. The advisability of removing all cemeteries from the crowded parts of the city into the suburbs is obvious.

56. The question of removing town sweepings elsewhere than to the Flats is undoubtedly pressing, but it is possible that room may be found there for them for a longer term than the Health Officer anticipates; and, moreover, until the question of incinerators has been fairly tried, which it has not yet been, it cannot be positively asserted that any one particular system of disposal is the best or most economical. The Health Officer has, however, been asked to obtain and submit, in conjunction with the Deputy Executive Engineer, plans and estimates for a tramway line to Kurla, with the cost of live and dead stock, and of the upkeep. The improvement of that part of the Flats which has been already reclaimed, and on a portion of which luxuriant crops are growing, must be evident to any one who remembers what they were.

57. The fourth quarter of the year was the most fatal in 1884. There was a steady though very slight increase in mortality in each succeeding quarter of the year, beginning with a total of 5,553 deaths, or 26·89 per mille, in the three months, January to March, and ending with 5,715 deaths, or 27·68 per mille, in October to December. In several divisions of the city a death-rate exceeding 40 per mille was registered during more than one quarter, of the year. This was the case in Kamathipura in all but the fourth quarter, in 1st Nagpada in the second and third quarters, in 2nd Nagpada in the second and fourth quarters. In Parel and Sewri, which had been comparatively healthy for the greater part of the year, the mortality rose to 46·12 and 47·52 per mille from October to December, rates which exceed anything recorded either in those or any other division of the city during the year. The death-rate among children in Kamathipura is higher than in any other section of the city excepting 1st Nagpada. It is in Kamathipura that house connections have been tried, though they have not yet received a fair trial, nor have the people become habituated to them, and 1st Nagpada enjoys the contrary distinction of being perhaps the worst-drained portion of the city. So bad are the drains that though a special grant has been made for flushing them, and the details of the manner in which the flushing is to be performed decided on, the Executive Engineer has lately reported that the drains are so rotten and out of repair that he doubts whether flushing will be of any use. The combination of a copious water supply with efficient drainage will, it may be

foretold with some confidence, lay the foundation of a permanent improvement in the public health of these insanitary portions of the city. It may be hoped that six years hence the Tansa scheme will have given us the first and that in less than six years the second may have been completed. With regard to this, some words contained in the Health Officer's Report for the first quarter may appropriately be quoted : "It is right to remember, as I have before pointed out, that the admission of more water necessitates the construction of more channels to remove it, or in other words, progress in drainage operations ; water delivered in the city must be carried or drawn out of it, for if the water remains in the soil the most serious dangers, from soil-moisture, saturated and humid, to the public health may be apprehended. *As a dry foundation is to house sanitation, so is a dry soil to public health.*" The advantages of a water supply are more obvious to a superficial view than those of drainage ; about the latter there is but a half-hearted energy in the people of this city, but it will be well when they realize the soundness of the scientific opinion that the value of a thorough system of drainage stands second only—if in two absolute essentials of health one can be said tobe second to the other—to that of a pure and copious supply of water.

58. The following table shows the number and rate per mille of deaths by each of the diseases that were most prevalent during the year :—

| Disease. | No. of Deaths. | Rate per Mille. |
|---|---|---|
| Fever ... ... ... ... ... | 6,830 | 8·27 |
| Diseases of Respiratory System ... | 3,744 | 4·53 |
| Phthisis ... ... ... ... | 3,091 | 3·74 |
| Diseases of Nervous System ... ... | 2,422 | 2·93 |
| Diarrhœa ... ... ... ... | 1,081 | 1·31 |
| Dysentery ... ... ... ... | 635 | ·77 |
| Cholera ... ... ... ... | 576 | ·70 |
| Measles ... ... ... ... | 456 | ·55 |
| Small-pox ... ... ... ... | 112 | ·13 |

Cholera was endemic throughout the year, the highest number of deaths recorded from it being 175 in the third quarter, and the lowest 96 in the second quarter. The greatest number of deaths from cholera in any one month

was in January, when the temporary hospital at Grant Road was re-opened. There were 101 deaths in January, but the number dropped to 33 in February and 34 in March, and in only two other months in the year did the number of deaths exceed 70. The highest death-rate from cholera was in Chaupati and Girgam. The mortality from small-pox was, with the exception of the years 1881 and 1882, the smallest that has been registered since 1849. The number of children under 1 year of age who have been stated in the Health Officer's quarterly reports to have been successfully vaccinated was 13,655, while the number of living births was 14,637. The number of children over 1 and under 14 years of age who were vaccinated was 2,200, giving a total of 15,855 successful vaccinations of children. The number of deaths from fever was unusually large, being 927 over last year and 480 more than the average of the five preceding years. It appears that it is to fever that the high death-rate at Sewri and Parel during the last quarter of the year, and to which I have already referred, is attributable. The first (1,725 deaths) and last (1,777 deaths) quarters of the year were specially marked by high fever mortality, though the number of deaths was large also (1,648) in the third quarter. In the second quarter, April, May and June, that is, during the hot weather, the disease was far less fatal, the number of deaths being only 1,298. The deaths from phthisis were less numerous than in 1883, but considerably in excess of the preceding five years' average, while diseases of the respiratory system exceeded both the average and the record of the previous year. On the whole the city was more healthy than in 1883, the total number of deaths (exclusive of still-born children) having been 22,542 as against 23,520 in 1883. The advantage, however, is chiefly due to the fact that there was nothing that could be called an epidemic of cholera in 1884, while 1,027 persons died of it in the previous year.

59. The number of births registered during the year was 16,116 (14,637 living and 1,479 still-born), giving a rate per mille of 17·72 as compared with 16,631 and a rate of 18·79 in the previous year. In all calculations of rates it will be borne in mind that the annual increment to the population, referred to in para. 76 of my last year's report,

is taken into consideration, which makes the population for 1884 number 825,839.

60. The difficult subject of establishing Cholera Hospitals in the city is engaging attention at the present time. It is, however, retarded by the almost impossibility of finding sites for the buildings it is wished to erect. Every one remembers what a storm was raised over the proposal to attach a cholera hospital to the European General Hospital, building it in the same compound; and how the best medical opinions in the Presidency differed as to the expediency of doing so. Almost every other site that has been selected has either been objected to on the score of insanitary situation, or is unattainable on the score of expense. It is probable that the first step that will be taken will be to convert the Grant Road rest-houses into permanent cholera hospitals. They have been used temporarily as such from time to time, are tolerably well situated, and very well built. It is, however, of more importance to build a hospital in C Ward (Dhobi Talao), where cholera generally makes its first appearance. A site that is fairly unobjectionable has been selected here; but it will cost much to acquire, and it is impossible to say what opposition may not be excited in the neighbourhood.

61. The following table shows the expenditure and receipts of the Health Department under the main heads of account :—

*Expenditure.*

| | Rs. | a. | p. |
|---|---|---|---|
| General Supervision ... ... ... ... | 33,898 | 0 | 10 |
| Conservancy ... ... ... ... | 7,51,779 | 5 | 5 |
| Registration of Births and Deaths ... ... | 18,648 | 12 | 7 |
| Cemeteries ... ... ... ... ... | 4,337 | 4 | 2 |
| Laboratory ... ... ... ... ... | 567 | 6 | 2 |
| Vaccination ... ... ... ... ... | 14,034 | 6 | 9 |
| Mahalakshmi Dhobis' Lines ... ... ... | 3,843 | 1 | 9 |
| Conveyance and Disinfection ... ... ... | 1 | 7 | 5 |
| Milch Cattle Stables ... ... ... ... | 2,736 | 8 | 3 |
| Licenses ... ... ... ... ... ... | 3,346 | 7 | 6 |
| Tank Conservancy ... ... ... ... | 5,355 | 2 | 0 |
| Total... | Rs. 8,38,547 | 14 | 10 |

| *Income.* | Rs. | a. | p. |
|---|---|---|---|
| Halalkhor Cess... ... ... ... ... | 2,89,616 | 1 | 6 |
| Milch Cattle Stables ... ... ... ... | 11,399 | 10 | 1 |
| Mahalakshmi Dhobiwada ... ... ... | 11,700 | 0 | 0 |
| Rent of Chawls, &c. ... ... ... ... | 13,518 | 10 | 0 |
| Supplying copies of office records ... ... | 133 | 12 | 0 |
| Cleaning Privies and emptying Cesspools ... | 1,152 | 5 | 11 |
| Rent of sweeping grounds at Kurla, Sion, Tardeo, Flats, &c. ... ... ... ... | 19,100 | 13 | 4 |
| Sale of Bones, Manure, Cowdung Cakes ... | 958 | 10 | 3 |
| Miscellaneous and License Fees ... ... | 42,792 | 15 | 4 |
| Do. Fines ... ... ... | 9,456 | 12 | 8 |
| Total... Rs. | 3,99,880 | 5 | 1 |

The expenditure as compared with that of the preceding year shows a decrease of Rs. 7,776-4-8 and the income an increase of Rs. 60,213-12-7. The causes of the latter are the increased revenue derived from extension of Halalkhor service and higher rents for sweeping grounds at Kurla, Sion, &c.

62. The Markets and Slaughter Houses continue, under the energetic superintendence of Mr. Higgins, to increase in popularity and profit. They show for the year under report a net increased revenue of Rs. 15,647-8-7 as compared with the previous year, and of Rs. 62,427-3-10 as compared with the revenue for 1875, or ten years ago. As soon as funds will permit, it will be very desirable to add a separate Mutton Market to the Arthur Crawford Market buildings; to increase, if possible, the extent of the Bhuleshwar Market, which is much overcrowded; and to erect a small market at Colaba, the necessity for which is established by the numbers of fish and vegetable sellers who daily crowd there in one particular quarter.

63. More than 33 tons of unwholesome food, valued at Rs. 74,108, were destroyed within the year, either at Bandra or at Bombay. Of this total, Rs. 54,112 are referable to beef, an article which Mr. Higgins still reports to be inferior to the quality of former years. The number of convictions obtained before the Presidency Magistrates for offences against the Municipal Acts or Market Bye-Laws was 148, and the fines inflicted amounted to Rs. 775. The average punishment inflicted is thus about Rs. 5 for each offence, and in many cases it seems to me that the Magistracy take

so lenient a view of the offence that their punishments are quite useless as deterrents. For instance, a case in which cystic beef was exposed for sale was only punished with a fine of Rs. 5 ; 17 cases of exposing putrid fish for sale were met by fines averaging less than Rs. 4-0-4 each ; a butcher convicted of fraudulently using false weights was fined Rs. 5, and so on. If the penalties assigned by law for offences relating to the markets are intended for the protection of the public, as I suppose they are, the discretion as to the admeasurement of them which the Magistracy possesses, exercised as it is, seems calculated altogether to defeat the object.

### Fires and Street Accidents.

64. The number of fires reported during the year was 39. In the preceding year there were 43. Of these, one of the most serious was that at the Ice Factory, when property valued at one lakh of rupees was destroyed. The cause was said to be a leak of ether, which being ignited by a gas jet burning in the room, spread to the condenser, which exploded. But the most destructive fire was in Upper Duncan Road, where property valued at two and a half lakhs was destroyed, the cause of fire being unknown. There were other serious fires in Argyle Road, New Foras Road, Paidhoni, Khadak Street, and Balu Sarang Street. There were several complaints of insufficient water-supply, which unfortunately cannot be remedied until the present intermittent supply is superseded by a constant service. This was pointed out in last year's report.

Two hundred and eighty-five people were injured and 20 killed by street accidents, numbers which are far below those of last year.

## VII.—Education.

65. The receipts and expenditure on schools to the support of which the Municipality contributes are given below:—

Receipts.

| Government Grant. | Fees. | Municipal Contribution. | Total. |
|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| 11,563 | 18,988 11 0 | 22,500 0 0 | 53,051 11 0 |

## EXPENDITURE.

| Salaries, including Pension Fund. | Contingencies. | Rewards to Indigenous Schoolmasters. | Public Works Expenditure. | Contribution to Scholarships in Male and Female Training Colleges. | Contribution to Anjuman-i-Islam Mahomedan Schools. | TOTAL. |
|---|---|---|---|---|---|---|
| Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. a. p. | Rs. | Rs. a. p. |
| 32,691 2 11 | 16,301 14 6 | 633 8 0 | ..... | ..... | 3,750 | 53,376 9 5 |

The Special Committee on the subject of the management of primary schools by the Corporation has submitted its recommendations, and these are now before Government.

66. The following statement shows the number of schools, with their attendance on roll, in the Island of Bombay as it stood on 31st March 1885 :—

| No. of Schools. | Name of School. | No. on the Roll. | Attendance on the Roll. |
|---|---|---|---|
| 1 | Bhuleshwar 2nd Grade Anglo-Vernacular Boys' School | 184 | 162 |
| 2 | Bhuleshwar Girls' School | 104 | 65 |
| 3 | Budhivardhak 2nd Grade Anglo-Vernacular School | 260 | 228 |
| 4 | Chandanwadi Boys' School | 219 | 190 |
| 5 | Chandanwadi Night School | Opened | in April. |
| 6 | Charni Road Girls' School | 64 | 53 |
| 7 | Fort, No. I. Boys' School | 238 | 213 |
| 8 | Do. No. II. do. | 152 | 131 |
| 9 | Do. No. III. do. | 57 | 52 |
| 10 | Girgam Boys' School | 80 | 70 |
| 11 | Jairajbhai Pirbhai Girls' School | 55 | 37 |
| 12 | Kappad Bazar Boys' School | 264 | 237 |
| 13 | Kalbadevi Girls' School | 127 | 104 |
| 14 | Musjid Bandar Boys' School | 52 | 50 |
| 15 | Musjid Bandar Girls' School | 53 | 29 |
| 16 | Mumbadevi 2nd Grade Anglo-Vernacular School | 208 | 179 |
| 17 | Mahim Boys' School | 63 | 51 |
| 18 | Mazagon Hindustani Boys' School | 41 | 36 |
| 19 | Nal Bazar Boys' School | 132 | 114 |

E. C. K. OLLIVANT,
Municipal Commissioner.

# CONTROLLER'S REPORT FOR 1884-85.

No. 1268 OF 1885-86.

To

E. C. K. OLLIVANT, Esq., C.S.,

*Municipal Commissioner*

*for the City of Bombay.*

SIR,

With reference to your Circulars Nos. 13264, 1126, and 4298, dated the 16th March, 27th April, and 6th July 1885, respectively, I have the honor to forward my report on the past year's working of this Department, together with the usual Account Statements.

The Income and Expenditure Statements, the Appendices, and the Workshop and Store Accounts have been explained in detail in their order.

The revenue, with the exception of a trifling falling off under the head Contributions from Municipal servants towards Pensions, &c., Fund, exceeded the estimate under every item detailed in the following Statement A. Exclusive of the nominal item of Rs. 99,841-12-1 on account of Profit accrued by the adjustment in Stock Accounts of Stores, &c., charged to Budget Grants or Loan Funds, the Surplus Revenue amounted to Rs. 3,73,476-1-6, of which Rs. 2,87,495 have already been appropriated in the current year's Budget.

# A.

*STATEMENT showing the Net Receipts during the Financial Year* 1884-85 *from all Sources contrasted with the Budget Estimate.*

The increase in the property rates detailed in the margin was entirely due to Rs. 2,92,377-7-2 having been received during the past year on account of outstandings for 1883-84 and previous years. The outstandings for and prior to 1884-85 recoverable in the current year amounted to Rs. 3,07,721-13-8, the sum actually recovered up to date being Rs. 1,23,528-14-11.

| Halalcore Cess..... | „ | 26,616 | 1 | 6 |
| Water Rate ..... | „ | 123 | 8 | 5 |
| | Rs. | 1,19,198 | 8 | 5 |

The balance of Land Conveyance License fees for 1883-84 paid by the Police Commissioner during the past year was Rs. 2,904-14-11 more than the estimate from this source of our revenue.

The large increase of Rs. 1,63,430-9-0 from Town Duties has been explained in detail in my remarks on Appendix II. (page 53).

The yield from Tobacco Duties was Rs. 10,622-1-3 more than the estimate.

Rs. 22,201-14-11 were received in excess of the Budget Estimates of Market revenue, principally on account of larger stall rents and slaughter fees.

The falling off of Rs. 412-10-1 in the Pension, &c., contributions of Municipal employés was chiefly due to the employés of the Assessment Department appointed on probation not having been confirmed in their appointments, and consequently not admitted to the Pension Fund during the past year as anticipated.

The small savings under the heads Tramway rent, Contribution from Insurance Companies, Miscellaneous Fines, Fees, and Savings and Public Gardens aggregated Rs. 4,154-13-7.

There was an increase of Rs. 13,284-6-4 in Miscellaneous receipts, chiefly on account of sale of land, coal ashes, By-laws, voters' lists, Building certificates, and water connection forms, and rent of reclaimed grounds, of telephone lines and electric cables.

The balances of the Drainage and Surface Drainage Loan Funds lodged with the Bank of Bombay yielded Rs. 8,308-1-10 for interest. The amount of interest would have been much larger if these balances had not been appropriated for meeting expenses on account of works sanctioned out of the 44 lakhs Loans, the raising of which we were thereby enabled to defer until the middle of the current year.

Rs. 2,232-6-11 were recovered from Government during the past year on account of moiety of Census charges incurred by us in 1883-84 in excess of the originally sanctioned amount of Rs. 27,000, half of which had already been paid by Government in advance.

Of the sum of Rs. 27,310-7-7 shown as realizations from Interest and Profit on the Building Fund Investments, Rs. 24,506-11-7 were received on account of interest, and the balance Rs. 2,803-12-0 for profit on the 4½ per cent. Government Paper belonging to the Fund sold during the past year for meeting expenditure of the loan works above referred to.

The past year's working of the Municipal workshops resulted in a net profit of Rs. 240-6-10 as explained hereafter (page 62).

Rs. 99,841-12-1, shown as profit on Stores, must as usual be treated as a nominal item, as the profit only accrued by taking as surplus in the different Stock Accounts the value of plant, dead and live stocks, &c., already charged to Budget Grants and Loan Works.

From the foregoing Statement **B** it will be observed that the expenditure for 1884-85 was sanctioned in the Budget at Rs. 37,23,045; that supplementary grants for Conservancy Branch, Markets and Slaughter-houses, Watering, Road Repairs, Improvements of Streets, New Works, Fire Brigade, Foundation ceremony of the New Municipal Hall, Municipal Building Fund, Prizes for the designs of the New Municipal Hall, Queen's Road Sewer Works, Malabar Hill Reservoir Roofing, Worlee Pumping Station, Panwell Brickworks, &c., aggregating Rs. 11,52,188-9-0, were allotted from time to time during the past year, and that the Town Council sanctioned transfers of Rs. 49,386-15-1, from savings in certain Budget heads, to meet excesses in others. The gross sanctioned expenditure, with the above additions and modifications, thus amounted to Rs. 48,75,233-9-0 as shown in the last column of Statement **B**.

| | | | | | | 9,94,212 13 9 | |

A. Total expenditure on account of Street Improvement during 1884-85.. .. .. Rs. 1,35,497 15 0
*Deduct*—Amount expended out of the Invested Road Improvement Fund.. .. .. „ 19,000 0 0

Net Expenditure .. Rs. 1,16,497 15 0

B. This excess has been more than met from the increase of Rs. 574-6-7 in the estimated revenue, *viz.*, Rs. 353-10-7, on account of fines and sale-proceeds of confiscated Tobacco, and Rs. 220-12-0 on account of recoveries from Government Contractors for payment of fees to Establishment on account of extra work.

It will be seen from the preceding Statement **C** that the total sanctioned grant of Rs. 48,75,233-9-0 as per Statement **B** was not wholly expended during 1884-85. Rs. 6,65,803-4-9 of the available balance of Rs. 9,94,212-13-9 having been renewed during the current year to meet past year's unpaid liabilities, the balance only, *viz.*, Rs. 3,28,409-9-0, must be treated as the saving on expenditure, of which Rs. 2,50,000 have already been appropriated in the current year's Budget.

All the 12 Councillors not having attended at all the meetings of the Town Council, and the whole of the additional grant of Rs. 3,752 sanctioned for Contingencies not having been expended during 1884-85, caused a saving of Rs. 3,261-9-8.

The savings of Rs. 172-12-11 and Rs. 591-11-10 in the Commissioner's and Controller's Department chiefly accrued on Office Establishments and Contingencies.

Owing to the full salaries of the Budget appointments not having been sanctioned to be paid to most of the members of the Assessment and Collection Staff, and to the grants of Ward Office furniture and printing 200 copies of the Assessment books remaining altogether unspent, there accrued a saving of Rs. 14,642-6-8, of which, however, Rs. 5,170-1-8 required for printing Assessment books, purchase of Ward Office furniture, &c., have been renewed during the current year.

Rs. 5,745-9-10 were saved under General Supervision entirely on account of the Acting Health Officer's salary having been fixed at Rs. 1,300 during the absence of Dr. Weir on furlough, and the Assistant Health Officer not having been allowed the maximum salary provided in the Budget for Mr. Brunton.

The various sections of the Conservancy Branch under which the large saving of Rs. 72,239-6-11 accrued are given below. Of this sum, Rs. 17,417-10-1 required for purchase, &c., of plant, live stock, &c., in connection with the better scavengering of the City, and for covering cutchra deposits with earth, have been renewed during the current year :—

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| I. | Superintendence | | | | Rs. | 1,946 | 2 7 |
| II. | Labor (including feed of cattle) | | | | „ | 12,042 | 13 6 |
| III. | Disposal of Town Sweepings | | | | „ | 6,592 | 4 11 |
| IV & V. | Veterinary and Repairs | | | | „ | 1,013 | 3 0 |
| VI to IX. | Stores Reserve, Live Stock, Rent and Waterproof Clothing | | | | „ | 162 | 5 7 |
| X. | Halalcore Branch— | | | | | | |
| | A. Superintendence | Rs. | 1,115 | | | | |
| | B. Labor | „ | 3,195 | 0 | | | |
| | C. Feed of Bullocks | „ | 3,901 | 13 6 | | | |
| | D & E. Stores and Repairs | „ | 977 | 4 7 | | | |
| | G, H, I. Rent, Lighting Night-soil Depôt and Maintenance of Carnac Bunder Night-soil Depôt | „ | 601 | 2 7 | | | |
| | | | | | | 9,790 | 7 4 |
| XI. | Temporary Cholera Hospital | | | | Rs. | 214 | 1 7 |
| XII. | Better Scavengering of the City | | | | „ | 40,478 | 0 5 |
| | | | | | Rs. | 72,239 | 6 11 |

The large saving in Section XII. was entirely due to the labor charges having been incurred only during the last two months of the past year, and to feed charges not having been incurred at all, as bullocks could not be purchased within the year in consequence of the extra grant for the work having been sanctioned so late as 22nd December 1884.

The other savings, principally in Sections I., II., III., and X., were chiefly due to the full Budget strength of bullocks not being available all throughout the past year.

The unexpended balances of the Registration of Births and Deaths, Cemeteries, Laboratory, Vaccination, Dhobiwada, Infected persons, Milch Cattle Stables, Licenses and Tank Conservancy grants aggregated Rs. 5,987-1-1, of which Rs. 495-15-5 have been renewed during the current year for repairs to hearses and Klenis' Micro-organisms purchased for the use of the Laboratory.

Thus the total savings of the Health Department, deducting Rs. 17,913-9-6 renewed during the current year for unpaid liabilities of 1884-85, amounted to Rs. 66,058-8-4.

Under Meat Carriage, Repairs, Stores and other grants of the Market and Slaughter Houses Department there was a saving of Rs. 5,578-7-1.

The saving of Rs. 522-5-8 in the Engineer's Department principally accrued in Contingencies and Out-door Establishment.

In consequence of our not watering the Roads for 18 days more than the three monsoon months a saving of Rs. 1,493-2-5 was caused on Road watering.

The whole unexpended balance of Rs. 19,045-12-9 of the Road Repairs grant has been renewed during the current year principally on account of unexecuted footpath pavement work.

There was a saving of Rs. 1,193-4-7 on the grant for annual repairs to Municipal Buildings.

The unexpended Street Improvement balance of Rs. 9,291-12-4 has been renewed during the current year to meet unpaid compensation claims of the past year.

In place of an Inspector on Rs. 200 for supervising the construction of Sundry Drains a Plumber on Rs. 60 only was entertained. This accounted for Rs. 297-0-10 of the saving of Rs. 6,068-14-0 on Drainage Staff; the balance was wholly due to the unspent Miscellaneous Drainage grant, which has been renewed during the current year.

There was a saving of Rs. 3,713-12-7 under Coals, Repairs to Machinery, Stores and Establishment of the Love Grove Pumping Station. Rs. 720 on account of Workshop charges for making two shred-lifter cages have been renewed during the current year.

Rs. 203-11-3 were saved chiefly on repairs of the Love Grove, Worli and Dharavi sluices, of which Rs. 119-15-10 for making a platform for the sluices have been renewed during the current year.

The savings under the different Public Gardens amounted to Rs. 2,559-2-9. Of this sum, Rs. 1,102-2-0 required for renewing service pipes of, and seeds supplied to, the Victoria Gardens, and repairing roads of Elphinstone Circle Garden, have been renewed during the current year.

It will thus be seen that the gross savings of the Engineer's Department amounted to Rs. 44,091-14-4. If the sum of Rs. 36,295-15-2 renewed during current year to meet the unpaid liabilities of 1884-85 were deducted, the net savings would amount to Rs. 7,795-15-2.

Under the heads Music and other License Department, charges on account of Loans, Pensions, Gratuities and Compassionate Allowances, Discretional Contingencies, General Police, Addresses to His Excellency the Marquis of Ripon and the Right Hon'ble the Earl of Dufferin (including cases to contain the addresses), and fees to professional advisers consulted by the Municipal Commissioner in the selection of the competitive designs for the Municipal Offices and Hall, there were small savings, aggregating in all to Rs. 3,702-7-5 ; of which Rs. 1,577-10-2 were renewed during the current year for unpaid pensions, compassionate allowances, &c.

The excess of Rs. 409-1-11 under Tobacco Duty Department was no real excess, as this extra amount of rewards and fees paid to the Tobacco Duty Establishment was more than covered by the extra fines and fees, amounting to Rs. 574-6-9, recovered from different parties and shown as Surplus Revenue.

Rs. 2,50,000 of the instalment of Rs. 2,57,000 for the repayment, with interest, of the new 44 Lakhs Loans have already been appropriated in the current year's Budget, as it was anticipated that no part of the loans would be raised during the past year. The actual saving on the total Debt grant had been as under after allowing for a transfer of Rs. 23,898-10-6 to Street Improvement grant as shown in Statement **B** :—

| | | | | |
|---|---|---|---|---|
| Saving on Interest (Municipal Fund) | | Rs. 1,08,297 | 4 | 4 |
| „ „ (Water Works Fund) | | „ 95,000 | 0 | 0 |
| „ Repayment of Principal, W. W. Fund | Rs. 15,978 | | | |
| „ „ „ Municipal „ | „ 21,022 | | | |
| | | 37,000 | 0 | 0 |
| | | Rs. 2 40,297 | 4 | 4 |

The whole of this sum has been renewed during the current year, as it is required for meeting the Malabar Hill Reservoir excess and payment of a portion of the 44 Lakhs Loan.

The unexpended balance of the Municipal contribution towards the maintenance of the Goculdass Tejpal Hospital for the year 1883-84

received from Government during the past year amounted to Rs. 5,988-7-5 against Rs. 8,167-14-0 received in the previous year on account of similar balance for 1882-83. The result was, I presume, due to high contract rates for supply of provisions, &c., sanctioned by Government as complained by Brigade-Surgeon H. Carter, M.D., in Medical charge of the Hospital.

The Jaffer Sulliman's Dispensary not having been opened to the public until the beginning of July, three months' (*viz.*, April, May, and June) Municipal contribution, at Rs. 500 per month, sanctioned by the Corporation towards its maintenance, remained unpaid.

The sum that remained unexpended on New Works at the close of the past year was Rs. 2,42,112-7-4, Rs. 2,23,331-4-1 of which have been renewed during the current year for works not completed or commenced in 1884-85. Thus Rs. 18,781-3-3 only should be treated as a real saving on completed works as detailed below :—

| | | | | |
|---|---|---|---|---|
| 1. Unexpended balance on account of incomplete works ..... | Rs. | 93,659 | 1 | 0 |
| 2. Allotment of works not commenced..... | „ | 1,29,672 | 3 | 1 |
| | „ | 2,23,331 | 4 | 1 |
| 3. Savings on completed works ..... | „ | 18,781 | 3 | 3 |
| | Rs. | 2,42,112 | 7 | 4 |

Out of the reserve of Rs. 50,000 sanctioned for the Municipal Building Fund, only Rs. 800-12-4 were paid for advertisement, &c., charges. The balance Rs. 49,199-3-8 remained uninvested, as all surplus cash was utilized for Loan Works expenditure. Hence the amount of the balance has been renewed during the current year.

There was a saving of Rs. 4,984-12-7 on Establishment, Repairs and Stores grants, and of Rs. 24,524-14-5 on New Charges, Fire Brigade. Rs. 18,000 for Fire Brigade Stations out of the last-mentioned sum, and Rs. 578-7-11 out of the former for repairing Fire Engines have been renewed during the current year.

The saving of Rs. 2,621-0-10 under Lighting chiefly accrued on Gas, Kerosine and Electric Lighting charges and Contingencies.

The third prize of Rs. 2,000 not having been recommended to be awarded by the Committee of experts consulted by the Commissioner, that sum remained as a saving out of Rs. 10,000 sanctioned for three prizes for the competitive designs of the Municipal Offices and Hall.

The sums sanctioned out of cash balance for the following Loan and other works were not spent, as the works were not completed. The whole amount has therefore been renewed during the current year :—

| | | |
|---|---|---|
| Bonus to Queen's Road Sewer Contractor for completing it before the 15 h June 1885 ..... | Rs. | 10 000 |
| Extra work done in connection with the Queen's Road Sewer ..... | „ | 15,975 |
| Malabar Hill Reservoir Roof..... Rs. 1,41,430 | | |
| Do. (difference in rates) ..... „ 17,320 | | |
| | | 1,58,750 |
| Additional works in connection with the Love Grove P. Station..... | „ | 39,724 |
| | Rs. | 9,94,449 |

Of the saving of Rs. 1,35,931-12-5 on Water Works Account, Rs. 95,000 have been shown above as part of the saving on the Debt grant. The balance of Rs. 40,931-12-5 was principally due to laying of water mains, &c., not having been completed during the past year, for which Rs. 33,243-14-4 have been renewed during the current year.

The principal items which made up the aggregate saving of Rs. 9,94,622-6-9 are given below :—

| | | | | |
|---|---|---|---|---|
| General Superintendence | Rs. | 4,026 | 2 | 5 |
| Assessment and Collection | ,, | 14,612 | 6 | 8 |
| Health Department | ,, | 83,972 | 1 | 10 |
| Engineer's Department | ,, | 44,091 | 14 | 4 |
| Markets and Slaughter-houses | ,, | 5,578 | 7 | 1 |
| Debt | ,, | 2,40,297 | 4 | 4 |
| Goculdas Tejpal Hospital and Jaffer Sulliman Dispensary | ,, | 7,488 | 7 | 5 |
| New Works | ,, | 2,42,112 | 7 | 4 |
| Building Fund | ,, | 49,199 | 3 | 8 |
| Fire Brigade | ,, | 29,509 | 11 | 0 |
| Lighting | ,, | 2,621 | 0 | 10 |
| Sundries | ,, | 5,702 | 7 | 5 |
| Loan Works Excesses | ,, | 2,24,449 | 0 | 0 |
| Water Works | ,, | 40,931 | 12 | 5 |
| | Rs. | 9,94,622 | 6 | 9 |

The following table shows that the Opening Balance, Income and Expenditure were on the aggregate Rs. 18,08,449-12-3 better than the estimates :—

| | Estimate. | Actuals. | Better than Estimate. |
|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. |
| Opening Cash Balance | 4,00,000 0 0 | 7,40,919 0 11 | 3,40,919 0 11 |
| Revenue | 37,40,550 0 0 | 42,13,867 13 7 | 4,73,317 13 7 |
| | 41,40,550 0 0 | | |
| Expenditure — Original Estimate | 37,23,045 0 0 | | |
| Expenditure — Subsequent do. as per Statement B | 48,75,233 9 0 | 38,81,020 11 3 | 9,94,212 13 9 |
| | | | 18,08,449 12 3 |

As explained at page 59 of my last Annual Report, the larger opening balance was entirely due to the fact that charges for 1883-84, amounting to Rs. 3,31,256-13-9, remained unpaid at the close of that year. The renewal of the grants out of which these charges were payable was one of the causes of the additional grants for 1884-85 reaching the large sum of Rs. 11,52,188-9-0 (*vide* Statement **B**).

The increase in Revenue and the savings on Expenditure have already been explained by me while reviewing the contrasted Statements **A** and **C**.

I now proceed to show to what extent and in what manner the large surplus above referred to was utilized, and what sum remained available for further appropriations:—

| | | | Rs. a. p. |
|---|---|---|---|
| Advances for Surface Drainage Works | Rs. 10,67,971 5 6 | | |
| Do. Drainage Works (1878) | „ 16,14,824 7 3 | | |

| Amount available | | Rs. 5,23,091 6 1 | |

The above sum, together with Rs. 1,23,528-14-11 received from the beginning of the current year up to date on account of Rates and Taxes for 1884-85 and previous years, will be required to meet the unpaid liabilities of the past year aggregating Rs. 6,65,803-4-9.

## APPENDICES.

No. 1 A & B.—It will be seen from the former statement that a further amount of Rs. 5,500 of the 6 per cent. Municipal Debentures was transferred by Bombay to London holders.

The latter statement shows that the outstanding at the close of the past year was Rs. 1,320 against Rs. 2,895 at the end of the previous year.

No. 1 C. & D.—From statement 1 C it will be observed that 5 per cent. Debentures of the value of Rs. 28,500 were paid off during the past year. The other statement shows the payments of interest made during the past year and the amount outstanding at the close of 1884-85.

No. 2 shows the amount of Town Duty levied and of the refunds granted during 1884-85. The following table shows the contrast between the Town Duty Revenue, &c., for 1883-84 and the past year :—

| | 1883-84. | | 1884-85. | |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Opening Balance ..... | 15,177 | | 13,421 | |
| Revenue ..... | 12,39,449 | | 14,35,383 | |
| | | 12,54,626 | | 14,48,804 |
| *Deduct*— | | | | |
| Refunds ..... | 5,74,092 | | 6,55,096 | |
| Closing Balance ..... | 13,421 | | 20,278 | |
| | | 5,87,513 | | 6,75,374 |
| | | 6,67,113 | | 7,73,430 |
| *Less*—Cost of Collections, &c. ..... | | 44,308 | | 49,253 |
| | | Rs....6,22,805 | | 7,24,177 |

The gross Town Duty revenue for 1884-85 was estimated at Rs. 11,55,000 and the refunds at Rs. 5,45,000. A net income of Rs. 6,10,000 was consequently provided for in the Budget.

The actual receipts and refunds, however, were Rs. 2,80,383 and Rs. 1,10,096, respectively, larger than the estimates given above. The balance in hand of the Railway Companies and the Port Trustees at the close of the year was also larger by Rs. 6,857 than what they had at the beginning of 1884-85.

The net yield was thus Rs. 1,63,430 in excess of the Budget Estimate as referred to at page 36 of this Report.

The revenue of the past two years from the different articles on which the levy of Town Duty is authorized by the Municipal Acts of 1872 and 1878 is contrasted in the margin. From these figures it will be noticed that there were increases in all the items (principally in Sugar) on account of heavy imports, except in Timber and Firewood.

| Articles. | Actuals for 1883-84. | Actuals for 1884-85. | Increase. | Decrease. |
|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. |
| Grain ..... | 5 07 682 | 5.50,054 | 42 372 | ... |
| Wines & Spirits | 1,83 962 | 2,05 661 | 21,699 | ... |
| Beer ..... | 6,673 | 7,141 | 468 | ... |
| Sugar ..... | 2.09.209 | 3 73.025 | 1,63 816 | ... |
| Ghee ..... | 1 18,671 | 1.32.010 | 13,339 | ... |
| Timber ..... | 1,41,113 | 98 969 | ... | 42 144 |
| Firewood ..... | 72,139 | 68,523 | ... | 3,616 |
| | 12,39,449 | 14,35 383 | 241,694 | 45,760 |
| | | | Net Increase. | 1,95.934 |

No. 3 is the usual detailed account of the receipts and disbursements of the past year including adjustments, from which it will be observed that the ordinary income of the year, exclusive of the adjustment items of Profit on Stores, &c., exceeded the ordinary expenditure by Rs. 3,44,010-15-8 as shown in the margin. The surplus more than covered the sums, aggregating Rs. 52,674-6-2, paid towards the reduction of Debt as per Statement **C**.

| Municipal Fund (exclusive of Water Works)— | | | |
|---|---|---|---|
| Income not including Profit on Workshops and Stores ..... | Rs. | 35,17,642 | 7 8 |
| Expenditure..... | „ | 31,73,651 | 8 0 |
| | Rs. | 3,44,010 | 15 8 |

Rs. 4,81,680-2-6, advanced from Surplus Balances to meet Water Works Loan expenditure, raised the debt of the Water Works account to Municipal Fund from Rs. 50,08,681-7-7 to Rs. 54,90,361-10-1.

Loan Works.—Including Rs. 2,53,179-10-3 expended during

1884-85, the total Surface Drainage Works expenditure amounted to Rs. 10,67,971-5-6 as shown in detail below :—

| | Amount expended up to 31st March 1884. | | | Amount expended during the year 1884-85. | | | Total. | | |

* Reserved on account of certain portions of the work that cannot be executed until the House connections are provided.
† Required for spare articles for the first pair of Engines.
‡ Credits on account of old pipes taken up.

The total expenditure on account of the Drainage works sanctioned to be executed out of the 15 Lakhs Loan, sanctioned in 1883-84 by the Government of India, aggregated Rs. 3,71,787-7-1 as per details given below. Pending the raising of the Loan the whole of the above amount was advanced from Surplus Cash Balance :—

| | Amount expended up to 31st March 1884 | Amount expended during 1884-85. | Total. |
|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. |

Rs. 83,619-5-6 were expended on account of the New Road from Bellasis Road across the Old Race Course.

Rs. 19,000, being the balance of special Improvement Fund and deposited with the Bank of Bombay at the close of 1882-83, were drawn during the past year and spent on special Street Improvements.

The advances to Municipal Officers were further raised during the past year from Rs. 7,818-5-4 to Rs. 10,247-11-0, chiefly on account

of advances debited to the Commissioner's and Engineer's Personal Accounts for certain Loan Works expenditure not adjusted before the close of the past year.

The balances of stock in the hands of the different Municipal Officers at the close of 1884-85 amounted to Rs. 13,07,606-3-11 against Rs. 12,54,971-9-10 on 31st March 1884. The large increase was principally due to purchase of Deacon's meters out of Loan Funds.

Rs. 1,04,000 having been advanced for works performed by the Deputy Engineer's Department for Drainage and Water Works to be adjusted against Loan Funds, more than account for the outstanding balances under Private and Departmental Works and the Municipal Workshops, amounting to Rs. 1,33,979-6-0, on 31st March 1885 against Rs. 51,798-4-4 on 31st March 1884.

The balance of the 27 Lakhs Loan deposited with the Bank was reduced from Rs. 1,47,560-2-0 to Rs. 560 in consequence of our having drawn the difference Rs. 1,47,000 during the past year to meet Loan Works expenditure.

Rs. 4,40,000 were similarly drawn from the Surface Drainage Loan Account, which left a balance of only Rs. 882-7-9 at the Bank to the credit of this account on 31st March 1885.

The Building Fund paper, together with interest thereon and the profit by their sale, amounting in all to Rs. 3,47,310-7-7, were appropriated for Loan Works expenditure in order to put off the raising of any portion of the 44 Lakhs Loan.

Advances to contractors, &c., stood at Rs. 3,702-4-0 at the close of the past year against Rs. 25,120-1-1 on 31st March 1884. This was due to advances made during 1883-84 to Drainage and Water Works contractors for materials, &c., having been adjusted during the past year by recoveries from their bills.

No. 4.—*Liabilities.*—The payment of Rs. 1,08,463-7-1 made to Government during 1884-85 in two half-yearly instalments reduced the consolidated loan balance from Rs. 55,42,122-4-4 to Rs. 54,33,658-13-3.

By our paying off Rs. 28,500 of our 5 per cent. Municipal Debentures the debt on account of the 27 Lakhs Loan of 1878 was reduced to Rs. 25,42,500.

Owing to our having received Rs. 20,000 from the G. I. P. Railway Company as deposit on account of rates and taxes disputed by them, and other large sums from Drainage and Water Works contractors, the deposits from contractors, &c., in our hands were enhanced from Rs. 1,30,047-8-6, on 31st March 1884, to Rs. 1,81,365-5-3 at the end of last year.

Rs. 4,205, recovered by us during 1884-85 on account of License Tax, have been paid to Government during the current year.

The actual cash balance in the Bank and Office Treasuries was Rs. 85,298-1-1, but owing to our having adjusted in the past year's books on the last day of the year cheques amounting to Rs. 1,65,134-15-8, which were not cashed by the Bank on that day, our books show a debit balance of Rs. 79,836-9-7.

The total liabilities of the Corporation (exclusive of the unbooked Vehar Debt of Rs. 9,78,995-11-0) aggregated Rs. 1,03,19,960-2-11 at the end of last year against Rs. 1,04,71,120-13-4 on 31st May 1884.

No. 5.—*Assets.*—The recoverable advances amounted to Rs. 1,61,578-2-7 at the close of the past year against Rs. 85,779-1-5 at the end of 1883-84. Our investments were reduced from Rs. 30,10,328-6-11 on 31st March 1884 to Rs. 21,61,772-2-6 owing to the Drainage, Surface Drainage and Building Fund balances having been appropriated for other sanctioned Loan works. The value of stock was Rs. 13,07,606-3-11. The value of our property and buildings was upwards of Rs. 63,32,241-4-0. But property of the value of Rs. 17,94,405-8-1 only appear in our books. Buildings, &c., representing the difference have not yet been adjusted in our books, as the Assistant Engineer who was entrusted with the revision of the lists of Municipal property and buildings, submitted by the Deputy Engineer on 31st March 1884, being otherwise engaged, was unable to amend them during the past year, and is now on sick leave. It is, however, very desirable that the list should be completed as soon as practicable. Our investments, advances, stock and buildings represented a total value of Rs. 99,63,197-13-0, and nearly covered our total liabilities amounting to Rs. 1,03,19,960-2-11.

The cost of Roads, Overbridges and Drainage works executed out of Loan Funds was Rs. 40,21,957-14-2.

The Water Works account owed the Municipal Fund Rs. 54,90,361-10-1. (This sum is more than covered by Tulsi, Bhandarwada and other water works of the value of Rs. 55,62,393-4-4 as shown in detail in Appendix No. 6, which, however, for the reasons already explained in my last report, does not include value of the Vehar Lake. Taking the value of the Vehar, Tulsi and Bhandarwada works at 1 crore and 1¾ lakhs as given by the Deputy Executive Engineer, our entire assets far exceeded twice the aggregate liabilities as shown in detail in the marginal table.)

| | | | | |
|---|---|---|---|---|
| Advances and Investments .... | Rs. | 23,23,350 | 5 | 1 |

No. 6 is the account of the Water Works Fund which we are bound, under the provisions of the Municipal Acts, to keep separate and distinct from the general account of the Receipts and Expenditure of the Municipal Fund.

It will be seen from the account that the Revenue exceeded the ordinary expenditure by Rs. 25,717-7-3. This sum was, however, quite insufficient to meet payments, amounting to Rs. 84,289 (as per Statement C) made during 1884-85 towards the reduction of the Tulsi and Bhandarwada Loan of 50 lakhs.

On the Malabar Hill Reservoir work, extension of the water-supply in the outlying districts, Bhandarwada works and Tansa Survey Rs. 5,07,397-9-9 were expended during the past year.

## STORES.

The balance of stock in charge of the Stores Clerk at the close of the past year was Rs. 2,34,288-10-0 against Rs. 2,72,834-12-0 at the end of 1883-84.

In the following statement I have contrasted the chief items of the above balances :—

| Names of Articles. | Balance on 1st March 1884. | | | | | Balance on 1st March 1885. | | | | |

| Total | ..... | | 2,58,817 | 10 | 1 | ..... | | 2,21,584 | 5 | 2 |

Stores amounting to Rs. 1,264-8-1 (inclusive of water meters) were sold to private parties during the past year.

It will be seen from the above statement that the balances of several of the principal items of stock are being gradually reduced by avoiding purchases from contractors and others of articles in excess of our requirements, and by not receiving into stores castings, &c., made at the workshops without indents from any of the Municipal Departments, which in former years helped unnecessarily to swell our stock.

Stores in hand utilized as stated above were chiefly as under :—

| | | | | |
|---|---|---|---|---|
| Bolts and nuts, iron | Rs. | 387 | 6 | 3 |
| Carts, scavengering | „ | 2,590 | 14 | 0 |
| Castings, brass | „ | 599 | 3 | 7 |
| Castings, iron | „ | 21,809 | 15 | 2 |
| Gun metal | „ | 1 101 | 12 | 8 |
| Iron plates | „ | 377 | 10 | 0 |
| Iron bars | „ | 2,261 | 10 | 5 |
| Watering posts | „ | 220 | 0 | 0 |
| Sand, moulding | „ | 666 | 4 | 9 |
| Tin block | „ | 248 | 0 | 10 |
| Spindles, brass | „ | 69 | 5 | 0 |
| Pig iron | „ | 1,941 | 9 | 0 |
| Coke, English | „ | 808 | 0 | 1 |
| Spokes, wooden | „ | 846 | 2 | 9 |

I shall be glad to see a marked reduction in items marked A to L. These have been lying on our hands for a number of years.

The new rules framed by you in 1883 in connection with the Workshops and the Stores have proved to be very beneficial to the Municipality, as the Chief Stores Clerk and his Assistant being permanently located at the Stores Office, could personally supervise the receipts and issues of stores and allow the prices to contractors and others in accordance with the quality of goods supplied. The marked depreciation in the purchases from contractors, and the castings, &c., executed by the Superintendent as shown in the following statement, was the undoubted result of the new rules :—

| | During whole of 1882-83. | During whole of 1883-84. | During 8 months, July 1882 to February 1883, when new rules were not in force. | During 8 months, July 1883 to February 1884, when new rules were in force. | During whole of 1884-85. |
|---|---|---|---|---|---|
| | Rs. | Rs. | Rs. | Rs. | Rs. |
| Purchase from Contractors | 62,407 | 41,596 | 51,411 | 25,214 | 38,791 |
| Castings, &c., delivered by the Superintendent of Workshops | 34,128 | 30,198 | 29,978 | 27,647 | 45,474* |
| Total Rs. | 96,535 | 71,794 | 81,389 | 52,861 | 84,265 |

* The increase in this item is due to the larger number of castings made at the Workshops for the Bhunderwada and Drainage Works.

Owing to the Bhandarwada and the new Drainage and Water Works being carried on simultaneously, the Stores Department have a great deal of additional work thrown upon them. A large number of castings, &c., of different sorts have to be received from the workshops and issued for the said works, accounts have to be kept of these articles, store statements or bills to be made out, &c.

Perhaps it would be to the interest of the Municipality to employ an extra clerk out of Loan Funds until the large works are in progress, as I find that the Chief Stores Clerk, even by working before and after office hours, is unable to keep pace with the current work and close the Store Accounts in time.

## WORKSHOPS.

I have contrasted below the receipts and disbursements of the Municipal Workshops for 1884-85 with those of the previous year:—

| | 1883-84. | | | 1884-85. | | |
|---|---|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | | Rs. a. p. | Rs. a. p. | |
| To Balance of last year's account ... | | 13,008 10 0 | | | 31,344 7 7 | |
| ,, Payments— | | | | | | |
| On account of Establishment ... | 51,303 13 3 | | | 62,860 4 2 | | |
| Do. Stores ..... | 72,527 9 2 | | | 94,878 12 5 | | |
| | | 1,23,831 6 5 | | | 1,57,739 0 7 | |
| | | 1,36,840 0 5 | | | 1,89,083 8 2 | |
| ,, Profit ..... | ..... | 2,574 14 2 | | | 240 6 10 | |
| | | 1,39,414 14 7 | | | 1,89,323 15 0 | |
| By Recoveries— | | | | | | |
| Private works ..... | 99 12 9 | | | 49 15 7 | | |
| Departmental works ..... | 1,06,598 15 7 | | | 1,56,454 0 7 | | |
| | 1,06,698 12 4 | | | 1,56,504 0 2 | | |
| ,, Iron, &c., sold ..... | 1,371 10 8 | | | 541 1 3 | | |
| | | 1,08,070 7 0 | | | 1,57,045 1 5 | |
| By Outstandings— | | | | | | |
| Departmental works ..... | 15,925 3 9 | | | 19,176 1 9 | | |
| | | | | { 91 13 6 | | |
| ,, Incomplete Priva'e works ..... | ..... | | | { 13,010 24 4 | | |
| | | | | 13,102 11 10 | | |
| ,, Departmental works ..... | 15,419 3 10 | | | | 32,278 13 7 | |
| | | 31,344 7 7 | | | | |
| | | 1,39,414 14 7 | | | 1,89,323 15 0 | |

It will be observed from the above statement that the past year's expenditure exceeded that of 1883-84 by nearly a quarter of a lakh of rupees. The increased outlay was incurred for making iron work for Queen's Road Sewer and Carnac Binder Pumping Station, 47 dust-bins, 15 drain and 2 water carts, and erecting 12 latrines.

Notwithstanding the sale of old iron, &c., which realized Rs. 541-1-3, the net profit on the working of the shops was only Rs. 240-6-10.

The following table exhibits the percentage of profit that accrued on the different classes of work executed in the Municipal Workshops :—

| Nature of Work. | Actuals. | Amount charged. | Profit. | Percentage. |
|---|---|---|---|---|
| | Rs. a. p. | Rs. a. p. | Rs. a. p. | |
| Private works | 39 9 3 | 49 15 7 | 10 6 4 | 25½ % |
| Departmental works | 1,38,619 15 0 | 1,44,973 15 5 | 6,354 0 5 | 4½ % |
| Scavengering and drain carts | 10,311 13 4 | 14,928 0 0 | 4,616 2 8 | 44¾ % |
| Night-soil carts | 6,016 15 4 | 7,740 0 0 | 1,723 0 8 | 28½ % |
| Watering carts | 6,158 4 3 | 8,592 0 0 | 2,433 11 9 | 39½ % |
| Scavengering, drain and night-soil carts | 16,328 12 8 | 22,668 0 0 | 6,339 3 4 | 38¾ % |

The gross profit on departmental works, including the trifling sum of Rs. 10-6-4 on private works, was Rs. 19,712-6-10, of which Rs. 8,772-15-1 accrued on repairs to carts alone. On the other hand, notwithstanding the complaint of Heads of Departments that the Workshop charges for iron castings were excessively heavy, the Workshop accounts showed a loss of Rs. 9,125-15-3 on these castings turned out during 1884-85. There was also a loss of Rs. 4,222-0-10 on meat vans repairs, sawing timber, making wooden felloes, making tree-guards and other sundry jobs. Thus the profit was reduced to Rs. 6,364-6-9.

Rs. 6,665-1-2 were defrayed for repairs to Workshop machinery, tools, &c. Thus had it not been for the sale of old iron, &c., realizing Rs. 541-1-3, there would have been a loss of Rs. 300-10-5 instead of a net profit of Rs. 240-6-10. This result is far from satisfactory, especially when we do not charge anything for the use of the Workshop plant and machinery, which has cost us upwards of Rs. 1,50,000, when we find the capital for working the shops (the sum required during the last year being more than rupees a lakh and-a-half) and when we pay so handsomely for the works done for us (we paid 40 per cent. more for all our cart repairs and 26 per cent. on carts, &c., constructed in the shops). The profit, or rather I should say the heavy cost, paid by us for repairs and other work done by the Superintendent was absorbed by the loss on castings and the repairs, &c., to Workshop machinery. I am surprised at the loss

made on castings when both the Executive and the Deputy Executive Engineers have complained that the Workshop charges for such work are exorbitant.

Moreover, the Workshop Iron Foundry is working at a loss since the last four years as will be seen from the following figures :—

| | | | |
|---|---|---|---|
| Loss in 1881 | Rs. | 893 15 | 4 |
| „ 1882-83 | „ | 7,596 9 | 2 |
| „ 1883-84 | „ | 3,031 15 | 5 |
| „ 1884 85 | „ | 9,125 15 | 3 |

I have from time to time drawn the Superintendent's attention to these losses, and have often reported to you that these heavy losses in my opinion result year after year on account of the employment of a larger labor staff than necessary. However this may be, the matter requires your early and serious consideration. If the yearly excesses could not be satisfactorily explained perhaps it would be as well to close this particular branch of the shops, which annually absorbs the profits made in other branches.

The increase in the outstanding was solely due to the cost of work done in connection with the Carnac Bunder Pumping Station not having been adjusted during the past year.

The Shop and Supervision charges amounted to 16 1/5 per cent. and 6 1/5 per cent., respectively, during the past year against 15 per cent. and 7 per cent. in 1883-84.

## GENERAL REMARKS.

The disbursements made by the Paymaster since his appointment in 1873 by the Hon'ble Mr. Peile and the unpaid wages credited every year to savings are given below :—

| Year. | Payments. Rs. | Savings. Rs. |
|---|---|---|
| 1872 | In this year there was no Paymaster. | 2,177 |
| 1873 | 8,40,451 | 3,098 |
| 1874 | 8,50,000 | 4,246 |
| 1875 | 8,56,265 | 3,751 |
| 1876 | 8,62,202 | 3,395 |
| 1877 | 9,43,565 | 4,077 |
| 1878 | 9,84,255 | 9,233—4,300 |
| 1879 | 10,35,050 | 3,800 |
| 1880 | 10,18,476 | 3,244 |
| 1881 | 10,14,139 | 3,478 |
| 1882 | 10,27,034 | 3,792 |
| 1st Quarter, 1883 | 2,63,746 | |
| 1883-84 | 11,32,907 | 3,427 |
| 1884-85 | 12,20.854 | 3,021 |

| | | | |
|---|---|---|---|
| Cash received | Rs. 58,73,454 | 5 | 5 |
| „ paid... ... | „ 60,62,236 | 3 | 11 |
| | Rs. 1,19,35,690 | 9 | 4 |
| Adjustments | „ 15,11,826 | 5 | 8 |
| Total... | Rs. 1,34,47,516 | 15 | 0 |

The total transactions of the past year aggregated Rs. 1,34,47,516-15-0 as detailed in the margin against.

| | | | |

| 1877 | 7,987 | |
| 1878 | 12,754 | |
| 1879 | 16,374 | |
| 1880 | 16,031 | |
| 1881 | 17,651 | |
| 1882 | 15,878 | 20,591 for 15 months. |
| 1st Qr. of 1883 | 4,643 | |
| 1883-84 | 16,023 | |
| 1884-85 | 22,573 | |

The marginal contrast shows that the number of Town Duty certificates passed during the past year (in addition to the progressive annual increase in their number) were 6,550 in excess of those passed in 1883-84, or more than seven times the number passed in 1873. The largest number of claims passed in any one day was 264.

The number of receipts and disbursement vouchers scrutinized and adjusted by this Department during the past nine years are given below :—

| Year. | No. of Receipt Vouchers. | | No. of Disbursement Vouchers. | | Total. |
|---|---|---|---|---|---|
| 1876..... | 4,862 | + | 12 045 | = | 16,907 |
| 1877..... | 5,013 | + | 14,384 | = | 19 397 |
| 1878..... | 5,511 | + | 18,731 | = | 24,242 |
| Average per annum for the 5 years ending 1883 84..... | 5,946 | + | 25,798 | = | 31,744 |
| 1884-85..... | 6,942 | + | 32,516 | = | 39,458 |

The inward letters, exclusive of 39,500 vouchers and 19,100 ward remittance reports received during the past year, were 3,000 more than those of 1883-84 and were nearly five times those of 1875. The outward letters, exclusive of intimations sent to parties to call for payments, were 400 more than those of 1883-84, and nearly three times those of 1875.

You will observe from the above figures that the work of this office is increasing every year considerably since the past six or seven years, and that there had been a very marked increase during the past year.

I regret that in the midst of such heavy work the Heads of Municipal Departments, by submitting a large portion of vouchers for earlier periods at the close of the year, rendered our work still more difficult. This difficulty, it will be noticed from the following figures, is becoming greater every year :—

| | | | | |
|---|---|---|---|---|
| Vouchers passed and paid in | | | March 1883..... | Rs. 3,161 |
| Do. | do. | do. | 1884..... | ,, 3,977 |
| Do. | do. | do. | 1885..... | ,, 5,190 |

Scrutinizing 5,200 Debit vouchers (*i.e.*, about $\frac{1}{6}$ of the whole number) in the last month of a year became a very trying job for my establishment. I had as usual to complain of the late receipt of adjustment vouchers, stock returns, sanctions for excesses, &c. Some of these were sent so late as the 23rd ultimo, and hence the delay in the submission of my report.

While concluding I cannot help mentioning that hitherto myself, my assistants, and almost every other member of my establishment have tried to cope with the annually increasing heavy pressure of work by working hard for prolonged office hours, sacrificing holidays and Sundays, and without taking any leave even during illness. But we cannot continue doing so without sacrifice of efficiency when we have the prospect of further increase in the work on account of Loan works and the raising of fresh loans staring us in the face.

Under the circumstances it would, I think, be better if the Finance Committee of the Town Council would see their way to strengthen and revise the establishment, assigning the Heads of the different branches, *viz.*, Loan, Cash, Store, Audit, &c., larger powers similar to those of Superintendents in the Accountant-General's Office.

I have finally to thank all those who assisted me in the performance of the work narrated in the above paragraphs.

I have the honor to be,

Sir,

Your most obedient servant,

SORABJI NAVAROJI COOPER,

Controller of Municipal Accounts.

BOMBAY, *8th August* 1885.

# APPENDICES

TO THE

# CONTROLLER OF MUNICIPAL ACCOUNTS' REPORT FOR 1884-85.

# REPORT OF THE EXECUTIVE ENGINEER FOR 1884-85.

---

No. 1680 OF 1885-86.

FROM RIENZI WALTON, ESQ., MEM. INST. C.E.,
Executive Engineer, Municipality,

To E. C. K. OLLIVANT, ESQ., C.S.,
Municipal Commissioner
for the City of Bombay.

BOMBAY, 19*th June* 1885.

SIR,

I have the honour to submit my Report on the various works which have been under my charge during the past year 1884-85.

These were as follows :—

1. First portion of the new Sewerage Works :—
   - (*a*) Pumping Station, Love Grove.
   - (*b*) Pipe Sewers.
   - (*c*) House connections.

2. (*a*) Queen's Road Intercepting Sewer.
   - (*b*) 9″ Pipe Sewer from Girgaum Night-soil Depôt.
   - (*c*) Marine Lines 15″ Pipe Sewer.
   - (*d*) Survey for House connections for Queen's Road Sewer district.

3. Clerk Road Branch of Main Sewer and Pipe Sewers, DeLisle Road and Arthur Road.

4. (*a*) Sewerage of Kamatipura.
   (*b*) Surface Drainage of ditto.
   (*c*) House connections of ditto.

5. Hornby Road Sewer.

6. Byculla Race Course Sewer.

7. Agripadda Pipe Sewer.

8. Mahalakshmi Dhobiwada new Pipe Sewer.

9. Sewerage of the Fort.

10. Surface Drainage Scheme.
   (*a*) Gowalia Tank, Tardeo, and Arthur Road Drain.
   (*b*) Widening Old Main Drain.
   (*c*) Clerk Road Culvert and Sluice Gates.
   (*d*) Paidhoni, Parell Road, and Bellasis Road Stormwater Drain.
   (*e*) Mahalakshmi Stormwater Reservoir.
   (*f*) Diversion of Tulsi Main from the site of Stormwater Reservoir.

11. Malabar Hill Reservoir :—
   (*a*) Filter Beds, Malabar Hill Reservoir.
   (*b*) Roof ditto ditto.

12. Carnac Bunder Pumping Station.

13. (*a*) Love Grove Sluices.
   (*b*) Blasting out old Channel at Love Grove and Worli and Dharavi Sluices.

14. Miscellaneous Drainage, &c.

15. Khetwadi Depôt Accounts.

I have the honour to be,

Sir,

Your most obedient servant,

RIENZI WALTON,

Executive Engineer, Municipality.

## 1.—FIRST PORTION OF THE NEW SEWERAGE WORKS.

### (*a*) *Love Grove Pumping Station.*

Mr. Reid, the Engineer in charge of this Pumping Station, reports that throughout the past year the engines worked very well, but not as satisfactorily or economically as will be the case when the improvements and additions now in course of adoption have been completed.

2. The steam pipes are at present uncovered, and consequently the steam becomes damp, but this will be overcome when the "Eagle" Cement has been applied. This is one of the items included in the list of additions and alterations to this station recently sanctioned by the Corporation.

3. Another drawback to the working of these engines is the contracted area of the tank from which the water for condensing purposes is drawn. Mr. Reid has it on record that at certain periods the temperature of the injection water has been as high as 132°. This condition retards condensation and increases the expenditure of steam. The tank was designed to meet the requirements of one pair of engines only, but since the engine power has been doubled, the area of water surface is not sufficient to secure economy of working. The Corporation has, however, sanctioned its extension, and when the work is finished it will be increased from 560 square yards to 2,978 square yards.

4. The leather valves of the pumps have worked better during the past year than in previous ones. This is due to a special treatment to which the material is exposed before being placed in position in the pumps.

5. The total quantity of sewage lifted during the year was 415,914,598 cubic feet, or 11,883,274·8 tons.

6. The average quantity of sewage lifted per 24 hours was 1,999,589 cubic feet.

7. The cost of coal allowed per Budget was Rs. 29,565 0 0
The cost of coal expended was ..... Rs. 26,503 6 0

Showing a saving of ..... Rs. 3,061 10 0

8. The number of cubic feet of sewage lifted per ton of coal was 423,753·8.

9. The Budget allowance for establishment was Rs. 9,108 0 0
Actual payment was ..... Rs. 8,885 11 2

Saving ..... Rs. 222 4 10

10. The following is a statement showing the new works, &c., to be undertaken at the Pumping Station and sanctioned by the Corporation under their Resolution No. 1311, dated 24th November 1884:—

Pumping Station, new, Warli, additional requirements for, as under:—

| ADDITIONAL BUILDINGS. | Rs. a. p. | Rs. a. p. |
|---|---|---|
| Fencing around front of Compound | 300 0 0 | |
| Work-shop | 1,015 0 0 | |
| Additional Reservoir | 19.740 0 0 | |
| Addition to Coal Shed and Weighbridge | 3.600 0 0 | |
| Shred-lifter Chamber, Kiln and Chimney Shaft | 7,139 0 0 | |
| | | 31,794 0 0 |
| ADDITIONS TO MACHINERY, DRAINS, &c. | | |
| Altering Venetians in Engine House | 189 0 0 | |
| 4 Iron Ladders to Sumps | 68 0 0 | |
| Iron Bars for Windows | 6 0 0 | |
| Stone Cushions under Injection Pipe | 15 0 0 | |
| 6" Stoneware Pipes for Drainage of Engine House and Boiler House | 100 0 0 | |
| Eagle non-conducting cement for Boilers and Steam Pipes for both sets of Engines | 2,984 0 0 | |
| Iron covering for Steam Pipes between Boiler and Engine House | 150 0 0 | |
| Cast Iron passage to Stop-Valves on the top of the Boilers. | 200 0 0 | |
| 2 Iron Ladders for Boiler House | 20 0 0 | |
| Supports to Donkey Engine Suction Pipe | 19 0 0 | |
| Manhole on Reservoir Drain | 20 0 0 | |
| 2 Manholes on Double Barrel Sewer | 54 0 0 | |
| Blow-off Pipes | 116 0 0 | |
| 1 Dynamo and 25 Incandescent Lamps for lighting Engine and Boiler House and Shred-lifter Chamber | 882 0 0 | |
| 3 Indicators | 360 0 0 | |
| Gear for Counters (4 sets) | 100 0 0 | |
| A set of 4 Valves for Suction-box | 100 0 0 | |
| 2½" Galvanized Pipe for Economizer Blow-off | 154 0 0 | |
| 6" Stoneware Pipe Drain from Boiler Blow-off to old Main Drain | 207 0 0 | |
| Self-acting Gauge in Sumps | 60 0 0 | |
| Clock with hour alarm | 150 0 0 | |
| Automatic Gear for preventing Steam Winch from over-winding | 70 0 0 | |
| | | 6,019 0 0 |
| RESERVE STOCK FOR MACHINERY. | £ s. d. | |
| 2 Pair Brasses top and bottom ends (connecting rods) | 4 9 0 | |
| 2 Set Indi Rubber Valves for air pump of both engines, 4 suctions, 4 buckets, and 4 delivery valves | 20 8 0 | |
| 1 Set fire bars for both boilers | 14 0 0 | |
| 2 Doz. Glass tubes for water gauge fittings | 1 8 6 | |
| 3 Doz. India Rubber Rings | 0 8 0 | |
| 1 Bourdon's Pressure Gauge | 3 11 6 | |
| 1 ,, Vacuum Gauge, extras | 3 11 6 | |
| 1 Richard's Indicator, with three springs and paper | 15 12 0 | |
| Full set of relief valves for four engines, including four 4" sluices or screw down valves, eight 4" elbows, pipes, &c. | 70 0 0 | |
| 1 Pyrometer or gauge for testing heat of water in economizers. | 6 0 0 | |
| | 139 3 6 | |
| @ 1s. 7¾d. Ex....Rs. | 1,691 3 10 | |
| *Add*—Contingencies @ 13 per cent. Rs. | 219 13 3 | |
| | | 1,911 1 1 |
| Rupees... | | 39,724 1 1 |

## 1.—FIRST PORTION OF THE NEW SEWERAGE WORKS.

### (b) *Pipe Sewers in the First Sanctioned Portion of the Drainage Scheme.*

*Contractors*—Messrs. DADABHAI NASARWANJEE & Co.

The completion of this work was mentioned in the Annual Report for 1883-84.

2. A final settlement has been made with the contractors and the contract disposed of.

3. For the want of house connections to conduct the sewage into the pipe sewers they are doing scarcely any duty. Only in a few cases of new buil lings and of some old connections (with the old drains) which were irreparably bad connections have been made with the new pipe sewers at the expense of the house-owners.

## 1.—FIRST PORTION OF THE NEW SEWERAGE WORKS.

### (c) *House connections in the First Sanctioned Portion of the Drainage Scheme.*

No contract has yet been let for these works, though it is most desirable that they should be taken in hand in order that the sewage which now runs in the old dilapidated drains should be turned into the new sewers.

## 2.—(a) QUEEN'S ROAD INTERCEPTING SEWER.

In my last Annual Report I stated that Mr. Hewson, the contractor, had intimated to the Municipal Commissioner his inability to continue the contract, and finally withdrew from the same on the 14th April, having completed Rs. 58,240·76 worth of work out of the whole contract of Rs. 1,38,104.

2. I should add that Mr. Hewson's withdrawal from the contract was not a voluntary action, for, although he complained of his inability to carry out the work with profit to himself and declared his intention not to proceed further with the work, he was compelled to withdraw in compliance with a notice served upon him in terms of Section IV. of his contract. By this arrangement, though the contractor is compelled to withdraw from the actual work of the contract, his liability to meet any excesses incurred in finishing the work does not cease.

3. On the 21st of April 1884 the Town Council passed the following Resolution :—

"That, inasmuch as the Executive Engineer sees no reason why the Queen's Road Sewer works should not be completed

for the contract rates with the extra payments reported in his letter, No. 391, of this date, and is hopeful of completing before the monsoon that portion of the road already opened up, the Town Council is still of opinion that the work should be proceeded with departmentally.

"That the Corporation be recommended to sanction, from Surplus Cash Balance, a sum of Rs. 15,975 for the extra payments referred to above, which are on account of—

(i) Masonry backing to rear of invert walls.

(ii) Additional foundations under invert blocks."

4. In accordance with the above Resolution the work was taken up departmentally, but in consequence of the difficulty in obtaining labor and to the dearth of both material and plant left on the work by the contractor, no progress could be made before the 1st of May following.

5. At the date upon which the above Resolution was passed the particulars of the work were as follows :—

6. Out of a total length of 8,898 feet of sewer the contractor had completed 3,718 feet, thus leaving 5,180 feet yet to be undertaken. The length of the portion which the Town Council was anxious should be finished before the monsoon being 4,153 feet. The work was pushed on with great vigour, and by the 1st of June the whole of the 4,153 feet was completed. As at this date there appeared no signs of the approach of the monsoon, I obtained the Municipal Commissioner's sanction to proceed with the remaining portion of the contract with the view of completing the whole contract, and by the 2nd of July this was accomplished. Thus in 63 days 5,180 feet of ovoid sewer has been finished.

7. In my letter, No. 2842 of 1884, in which I gave a resumé of this work, I especially mentioned the names of the Inspectors who were working under me, and I think it is only fair to them that I should repeat now what I then wrote :—

"I beg to call your attention to the exemplary manner in which the Inspectors on the works performed the duties entrusted to them. Mr. Baker, Mr. Cluy, and Mr. Powell had each two sections of the work to carry out ; Mr. Nadersha, L.C.E., was responsible for the levels, measurements and daily returns, and Mr. Pearson took up the special duty of the accounts. I cannot speak too favorably of the way each did his work. Their tact, energy and good temper throughout the work deserves special mention from me, and I trust it may be possible to recompense them in a substantial manner."

8. The discharge of sewage into Back Bay (from the Marine Lines Station to the level crossing at the Mathew Road) has now been entirely stopped, and the old outlets are now only used as inlets for sea water for the purpose of periodically flushing the sewer,

9. Some complaints were received in the latter part of 1884 about the smell caused by the sewer gas being allowed to escape through the ventilating openings of the manhole covers. It was impossible to close these openings before the proper ventilating shafts had been provided. These are now in course of erection, and when finished the openings at the road surface will be closed up.

10. The following is a copy of the final certificate of accounts.

STATEMENT showing Quantities and Cost of Work in connection with the Queen's Road Sewer Works.

| Quantities. | Particulars. | Rate. | Per | Amount. |
|---|---|---|---|---|
| | | Rs. a. p. | | Rs. |
| 720,452·88 c. ft. | Excavation for ovoid sewer and pipe sewer, including filling in, &c. | 6 12 0 | 100 c. ft. | 48,630·57 |

* This amount includes the sum of Rs. 4,662·11 for work of laying 9" pipe sewer from Girgaum Night-soil Depôt done by Mr. Littlewood.

### (*b*) *9" Pipe Sewer from Girgaum Night-soil Depôt.*

The necessity for this work arose from the intolerable nuisance, created by the discharge on the foreshore of Back Bay, of sewage from the Night-soil Depôt in Girgaum. The depôt is used as a centre to which basket collections of night-soil are brought for transfer into the carts. The process involves the copious use of water both for washing the baskets, cleaning the carts, and flushing the pavements. Hitherto this sullage was led away by a cast-iron pipe and was discharged on to the foreshore of Back Bay, west of the level crossing at the junction of the Queen's and Mathew Roads; but as the nuisance, consequent upon this arrangement increased to such proportions as to attract public attention, it was determined to construct a 9" pipe sewer from the depôt to the Queen's Road Ovoid Sewer, and thus intercept the discharge on to the foreshore.

2. This particular work formed a portion of the Queen's Road Pipe Sewer contract, but as the contractor for that work expressed his intention not to proceed with it, the Commissioner applied for and obtained the Corporation's sanction to its being undertaken as a special contract. Accordingly, under the Corporation's sanction, No. 256, of 14th of May 1884, a contract for carrying out the work was let to Mr. J. Littlewood for the sum of Rs. 4,866.

3. The work was immediately put in hand and was completed by the 5th of July 1884 at a cost of Rs. 4,662-1-9, or at Rs. 203-14-3 under the sanctioned amount.

4. The result has been most satisfactory, the stench at the old point of discharge having entirely disappeared, and the pipe sewers have worked well.

*(c) Marine Lines Pipe Sewer.*

This sewer forms an extension of the Queen's Road Ovoid Sewer. It is constructed of 15″ earthenware pipes, and commencing at the manhole opposite the Marine Lines Station, passes through the Marine Lines and a portion of Church Gate Street as far as the Public Works Office, where it turns down the Mayo Road and terminates opposite the centre of the Secretariat.

2. The work was estimated to cost Rs. 28,627, but the lowest tender received from contractors amounted to Rs. 33,244, consequently, on the Commissioner's recommendation, the Town Council sanctioned the prosecution of the work departmentally.

3. The Commissioner's sanction to the commencement of the work was received on the 22nd October 1884. It was started on the 22nd of the following month and completed on the 21st May 1885 at a total cost of Rs. 23,765·483.

*(d) Survey and Estimate of the Cost of House Connections for the District dependent upon the Queen's Road Sewer.*

A special establishment for this work was sanctioned by the Corporation (No. 9021 of 8th December 1881) at a total cost of Rs. 5,061. The work was commenced in December 1884 and was completed on the 17th April 1885. The information obtained includes the estimated cost of the various pipes, syphons, ventilating shafts, flushing chambers, and external privy fittings for all the houses situated within the sewerage area of the Queen's Road Sewer. The actual outlay upon this work was Rs. 4,561-13-3 against Rs. 5,061, the sanctioned sum.

## 3.—CLERK ROAD BRANCH OF MAIN SEWER (AND PIPE SEWERS IN DeLISLE ROAD AND ARTHUR ROAD).

*Contractors :*—MESSRS. NAGU SAYAJEE AND CO.

The extension of the Clerk Road Sewer from the Six-Way Station on the Flats to Parel Road has proceeded satisfactorily and is nearly finished. There is no doubt but that it will be fully completed well within the contract time, which expires on the 15th June 1885. The length of the sewer from the main sewer to the Six-Way Station is 2,584 feet, and from the latter point to Parel Road 2,537 feet, making a total length of 5,121 feet.

2. The DeLisle Road 18″ Pipe Sewer has not progressed quite as rapidly as could have been wished, the works having been delayed by the necessarily slow process of blasting rock in a narrow trench. The contractors are, however, making a vigorous effort to complete it by the 15th June 1885, and they will probably succeed. The necessity for this sewer has been notably manifested by the numerous applications which have been made by house-owners on the route for permission to drain into it. The applications cannot, of course, be granted until the sewer is laid throughout its whole length, and the connection is made with the Clerk Road Sewer. The total length of this pipe sewer will be about 10,725 feet or 2·03 miles.

3. The Arthur Road 15″ Pipe Sewer from Parel Road (near the Laoji Wadia Dispensary) to DeLisle Road has been retarded to some extent by the causes which have led to the delay in the DeLisle Road works. The Arthur Road Sewer cannot be used until the DeLisle Road Sewer is completed, and it is hoped that both will be finished without any serious delay.

The length of the 15″ pipe sewer will be 2,070 feet.

## (*b*) KAMATIPURA SURFACE DRAINAGE WORKS.

Messrs. Nagu Sayajee and Co. have completed the work of raising the dip in the surface of Kharshedji Suklaji Street between Grant Road and Bapty Road, of relaying the water tables to the new levels, of fixing cast-iron street gully traps, and of constructing a new semi-ovoid drain on the west side of the street.

The low-lying grounds referred to in the last Annual Report have been filled up.

The cost of these works is shown in the following statement.

* This is the sum expended in Surface Drainage works in Kharshedji Suklaji Street.

The relaying of water tables and the raising and reforming of several of the roads have been partially done by the Road Department. The remainder of the work will be carried out during the year 1885-86.

## KAMATIPURA SEWERAGE WORKS.

### (*c*) *House Connections for Nahanis.*

*Contractors for Casting:*—MESSRS. RICHARDSON & CRUDDAS.

*Contractors for Works:*—MESSRS. SITTARAM LUXUMON & Co.

The contract for the fixing of work was signed on the 23rd October 1884, the contract amount being Rs. 15,896.

2. The work was immediately taken in hand and carried on vigorously until the supply of castings failed, an excessive quantity having been damaged on the way out from want of packing and from bad voyages.

3. What has been done has effected a considerable improvement, but unfortunately much remains to be done.

4. It is to be regretted that the privies have not been taken in hand at the same time, because the ablution water and the urine from them still run on the surface of the paving of the sweepers' passages.

A better arrangement than the present temporary one for conveying these matters into the sewers will have to be adopted, as it would appear that the existing system of privies must be continued for some years yet to come.

## 5.—OVOID SEWER FROM THE CRAWFORD MARKETS ALONG HORNBY ROAD TO THE BORI BANDAR RAILWAY TERMINUS AND THENCE ALONG MINT ROAD.

*Contractors:*—MESSRS. FAKIR MOHOMED BABUNBHAI & Co.

This work was commenced from two places, *viz.*:—(*a*) From the Crawford Markets southwards; and (*b*) from near the Town Hall northwards.

2. From the Crawford Markets the construction has been completed to a distance of 785 feet partially finished, excavation being continued to a further distance of 755 feet.

3. From the Town Hall the sewer construction extends to a distance of 2,400 feet, and the excavation has been extended 850 feet farther on.

4. The contractors have not kept well up to time, the delay being due to very heavy rock excavation and to the necessity of cutting through large masses of the very solid masonry foundations of the old Fort walls and bastions.

## 6.—OVOID SEWER ACROSS THE BYCULLA RACE COURSE (RIPON ROAD).

*Contractors :*—MESSRS. RUGHUNATH BHASKERJEE & Co.

Owing to the difficulty experienced in acquiring the land, the owners in many cases having demanded exorbitant terms, the progress of the work has been very irregular.

2. The contractors have, however, exhibited a very commendable willingness to proceed promptly as soon as land could be obtained, although that course has involved carrying on the work in numerous isolated portions.

3. The rock cutting has been heavy, and there will be some further deep cutting in rock in portions of the land not yet acquired.

4. The point of junction with the Clerk Road Sewer at the Central Station on the Flats being taken as zero, the sewer has been constructed as follows, viz. :—

| | | | Length in Feet. |
|---|---|---|---|
| From | 0 to 805 | = | 805 |
| „ | 913 „ 1,998 | = | 1,085 |
| „ | 2,045 „ 2,272 | = | 227 |
| „ | 2,794 „ 3,227 | = | 433 |
| „ | 3,290 „ 3,928 | = | 638 |
| | Total ... | | 3,188 |

5. The whole length will be 5,175 feet from the Central Station to the junction of Bellasis Road and Clare Road.

STATEMENT showing the Quantities and Cost of Work done in connection with the Ripon Road Ovoid Sewer.

## 7.—PIPE SEWERS IN THE AGRIPADA DISTRICT.

*Contractors :*—MESSRS. FAKIR MAHOMED BABUNBHAI & Co.

The contractors have made good progress with these works.

2. Pipe sewers have been laid throughout the greater part of Love Lane, Victoria Road, Parel Road (from the Byculla Bridge to about midway between Albion Place and Clerk Road), Cham-

barwadi, Clare Road, Haines Road (from Byculla Bridge to the Central Station on the Flats), and DeLisle Road (from Haines Road to near Clerk Road).

3. The house branches across the roads for the purpose of future connections are well in hand.

4. The contract date for completion is the 30th June 1885, and there is every probability that the whole will be finished by that time.

## 8.—MAHALAKSHMI DHOBIWADA NEW PIPE SEWER.

*Contractors:*—MESSRS. NAGU SAYAJI & CO.

The contract for this work was let on the 26th April 1884, and the whole was completed on the 6th June 1884.

2. The sewer consists of a 9-inch stoneware pipe starting from near the Haines Road level crossing of the B. B. & C. I. Railway and discharging into a manhole on the Clerk Road Ovoid Sewer at the Six-way Central Station.

3. There are six manholes on the pipe sewer.

4. Two 9-inch siphoned and ventilated connections have been made, one from the north angle of the Dhobiwada and the other from the east angle. One 6-inch siphoned and ventilated connection has been made from the latrines.

5. The total length of the sewer is 1,120 feet.

6. The working of the sewer has been very good indeed, notwithstanding the large quantity of rags that passes into it.

7. The following statement shows the cost of the work:—

STATEMENT showing the Quantities and Cost of Work done in connection with the Dhobiwada Pipe Sewer.

| Quantities. | Particulars. | Rate. Rs. a. p. | Per | Amount. Rs. |

## 9.—SEWERAGE OF THE FORT.

The project for the sewerage of the Fort district by a system of pipe sewers with the estimated cost, amounting to Rs. 4,53,329 (including 15 per cent. contingencies), was submitted to the Town Council, and received the approval of that body by its Resolution No. 1349, dated 26th November 1884, and subsequently the sanction of the Corporation under its No. 1526 of 22nd December 1884.

2. Public tenders for the work were accordingly called for, and that of Messrs. Fakir Mohomed Babunbhai was accepted by the Town Council on 25th March 1885.

## 10.—SURFACE DRAINAGE WORKS.

### (a) *Gowalia Tank, Tardeo, and Arthur Road Drain.*

*Contractors* :—MESSRS. SYED EBRAHIM OOSMAN & Co.

This work was practically completed before the setting in of the monsoon of last year (1884), and its efficiency was put to the test, and, considering that at that time many of the storm-water entrances had not been constructed, the result was satisfactory.

2. The contractors continued the construction of these during the monsoon, and had so far completed them that, notwithstanding the heavy rainfall towards the close of that season, no floods occurred.

3. The only portion of work which remains to complete this drain is the arching over the chamber of the Gowalia Tank Waste Weir. This will be undertaken after the expiration of the coming monsoon. At present the chamber is merely planked over and the road laid upon it, and though this is satisfactory for a temporary arrangement, it will not do for a permanent one.

4. The amount paid for this work up to date is Rs. 1,60,053·84, and the total value of the contract is Rs. 2,46,768·38.

STATEMENT showing the Quantities and Cost of Work done in connection with the Tardeo Storm-water Drain.

## (*b*) WIDENING OLD MAIN DRAIN.

*Contractors*:—MESSRS. SYED EBRAHIM OOSMAN & CO.

The whole of the work included in this portion of the contract has been finished at a total cost of Rs. 38,537·06 against Rs. 86,171·93, the sanctioned amount.

## (*c*) CLERK ROAD CULVERT AND SLUICE GATES.

*Contractors*:—MESSRS. SYED EBRAHIM OOSMAN & CO.

This work has been completed with the exception of some minor finishing touches, and these are well in hand.

## (*d*) PAIDHONI, PAREL ROAD, AND BELLASIS ROAD STORM-WATER DRAIN.

*Contractors*:—MESSRS. NAGU SAYAJEE & Co.

At the end of the last fair season (June-July 1884) the whole of the large or bee-hive section (10 feet by 7 feet 3 inches), which extends from the open main drain near Bellasis Bridge to the south-east end of Bellasis Junction Road, where it intersects with Parel Road, was finished.

2. The side entrance at the north end of Gilder Street and all the water entrances in Bellasis Road and Bellasis Junction Road were also completed.

3. The ovoid or middle section in Parel Road (8 feet 6 inches by 5 feet 8 inches), extending from Bellasis Junction Road to Jail Road, is now in progress, including a dip under the 32″ Vehar Water Main at the end of Bellasis Junction Road and another dip under the 48″ Bhandarwada Service Main at Babula Tank Road. A length of 1,360 lineal feet of drain is completed.

4. For the purpose of constructing this section of the drain it has been necessary to take up the easternmost rail of the eastern track of the Tramway from Babula Tank Road to Jail Road, there not being room for the drain between this rail and the large gas main which runs all along Parel Road (Bhendi Bazar). This has necessitated the laying down of a temporary track for the Tramway along the west side of the road.

5. The circular or small section of the drain (5 feet 6 inches diameter) is in progress from Jail Road to within 1,120 feet of Paidhoni.

6. For this portion there is room for the drain between the Tramway (here only a single track) and the gas main, though there is but little space to spare.

7. The trench has to be partially boarded over and the fencing fixed over (not at the side of) the trench to make room for the projecting foot-boards of the tram cars to pass clear.

8. A length of 105 lineal feet of this section of drain has been completed.

## (e) MAHALAKSHMI STORM-WATER RESERVOIR.

*Contractors:*—MESSRS. NAGU SAYAJEE & Co.

The whole surface of the reservoir has been excavated down to the required level of 77 feet on Town Hall Datum, except the north-east portion between Haines Road and a line nearly parallel thereto about midway between Haines Road and the new main sewer which remains to be done.

2. The bank against the Hornby Vellard, the bank over the new main sewer, the bank skirting the Race Course, the north-west bank, and the north bank have been formed as far as the earth at present excavated will allow.

3. The waterways through the bank over the new main sewer are all finished except as to the balustrades for the protection of traffic.

4. The remaining work is in progress, and there is every probability that the whole will be completed by the end of December 1885.

STATEMENT showing the Quantities and Cost of Work done in connection with the Reservoir on the Flats.

## (*f*) DIVERSION OF THE TULSI MAIN AT MAHALAKSHMI.

*Contractors* :—MESSRS. NAGU SAYAJEE & Co.

The whole of the new main has been laid from the point where the old main crossed Haines Road, along the west side of Haines Road to near the level crossing of the B. B. & C. I. Railway, thence along the north-west side of the railway to Clerk Road, and along the north side of Clerk Road to near the Mahalakshmi Police Chauki.

2. The connections of the new main with the old at Haines Road and at the Mahalakshmi Chauki were begun and finished on the 16th October 1884.

3. The taking up of the old main and the removal of the bank across the reservoir was then proceeded with and have been completed, the pipes having been handed over for other works.

4. The new main has been working under the high pressure of Tulsi for several months, and the casualties have been comparatively few and unimportant.

5. Though several joints have blown at different times, yet in no case has a pipe burst.

STATEMENT showing the Quantities and Cost of Work done in connection with 24″ Tulsi Main.

## (*b*) MALABAR HILL RESERVOIR ROOF.

*Contractors*:—MESSRS. LITTLEWOOD, PALLONJEE & Co.

The contract for this work was sanctioned by the Town Council on 15th October 1884, and was let to Messrs. Littlewood, Pallonjee & Co. on the 23rd December 1884 at a cost of Rs. 3,38,218.

2. The work included in the contract is as follows :—

(*a*) A masonry roof over the storage basin measuring 7,568 square yards.

(*b*) A tiled roof over the settling tank covering 9,907 square yards.

(*c*) A tiled roof over the filter beds having an area of 5,828 square yards.

(*d*) Direct communication between the supply main and the filter beds.

(*e*) Direct communication between the distribution main and the storage chamber under the filter beds.

(*f*) Embankments around the walls of the reservoirs, construction of masonry tanks for washing, filtering materials, diversion of the road, and other minor works.

3. The following statement gives the quantities and cost of the work executed up to date :—

## 12.—CARNAC BUNDER PUMPING STATION.

The most important matter to notice in connection with this pumping station during the past year is the discharge of the night-soil into the new main sewer instead of into the harbour at Carnac Bunder. Until recently the night-soil was forced by steam-power into the harbour at Carnac Bunder, and, although this process was only carried out at the most favorable state of the tide (*viz.*, half an hour after ebb), yet it created an extensive and daily recurring nuisance.

2. To overcome this the Commissioner ordered the consideration and preparation of a project by which the night-soil could be discharged into the sewer. Accordingly I prepared a scheme by which this could be done, and by which also sea water could be pumped into the depôt for flushing and washing down purposes.

3. This proposal, estimated to cost Rs. 8,540, was submitted to the Corporation and received its sanction under Resolution No. 634 of 28th July 1884.

4. The works were carried out departmentally, Mr. Inspector Baker superintending the rock blasting, laying of the 18″ main, and the masonry work generally, while Mr. Rowe, the Superintendent of the Municipal Workshops, was responsible for the alterations to the engines and pumps, and for the laying of the large sea-water mains. The work was commenced on the 10th August 1884 and was completed by the 4th of November in the same year.

5. The result up to date is highly satisfactory. Not only has the nuisance at the depôt been reduced to its lowest possible minimum, but the facilities for discharging the carts have been so much increased that it is now no longer necessary for carts to await their turn at the hoppers, thereby increasing the offensiveness of the depôt, but the necessity for forming a long line of foul-smelling carts at the

approach to the depôt has also disappeared. A further favorable feature in connection with this work is the saving of fresh water. Hitherto it has been necessary to expend a large volume of either Vehar or Tulsi water to keep the depôt only tolerably clean, which, even at its best state, often formed the subject for complaints. Now the large steam-pump formerly used to pump the night-soil into the harbour is solely employed in pumping sea water into the reserve tanks, and in flushing the night-soil tanks, washing carts, &c. The supply of sea water is at all times copious, the fresh-water supply is, therefore, no longer required for these purposes, and is consequently limited to filling the boilers and for drinking purposes.

6. The work was carried out in a satisfactory manner, and to the credit of both Messrs. Rowe and Baker, who superintended it.

7. During the year the working of the depôt has been satisfactory, and a very great improvement on previous years.

8. The cost of the establishment was Rs. 900 against Rs. 900, the Budget grant.

9. The expenditure on coal, &c., was Rs. 1,736-1-0 against Rs. 1,928 allowed in the Budget.

## 13.—(*a*) LOVE GROVE SLUICES.

The sluices and gates at this station have been kept in thorough repair and efficiency during the year, and the only addition which has been made to them has been the provision of a gangway to add to the security of the Kalasies who work the gates during the heavy monsoon weather.

## (*b*) BLASTING OUT OLD CHANNEL AT LOVE GROVE, AND WORLI AND DHARAVI SLUICES.

No further progress beyond what was stated in my last annual report has been made with this work, beyond carrying out a careful survey of the foreshore, including the full width of the frontage occupied by the old and new sluices. I shall report upon the result of the survey in a short time.

2. The sluices at Worli have worked satisfactorily during the year.

3. The work of deepening the storm-water channel from Haines Road to the sluices down to its normal level has been put in hand.

4. In the original proposals for the surface drainage scheme it was intended to increase the width of these sluices in a manner similar to what has been done at Love Grove, but the matter was allowed to go into abeyance pending the results to be ascertained from the more important works in hand. I am of opinion that, independent of the

possession of the experience, the subject should be again taken up, as the neighbourhoods around Elphinstone Road, the north portion of DeLisle Road, and Dadur are fast being built over, and the paddy-fields, which, until recently, offered accommodation for the storage of storm water are now disappearing, thus making it necessary to provide improved means for the passage of rain water away from the vicinity of human habitations. This can only be done by widening the existing sluices, and by improving the channel thence to the sea.

5. The Dharavi sluices were worked satisfactorily during the past year, and within the amount of the sanctioned grant.

6. The tanneries in this neighbourhood, which, until recent years, were insignificant, have now so much increased in number, and in the amount of business they do, that the quantity of sewage flowing daily from the factories is now very considerable, and as it is of the most offensive kind, the foreshore of the bay into which it is discharged is both filthy and polluted.

7. Something must be done, sooner or later, to remedy this, unless this new and thriving industry is to be stifled; but the problem, "how this is to be done," is a difficult one to solve, for it means either an improved system of discharging the sewage into the bay where the water is deep, or the construction of a sewer to the nearest point on the main sewer, a distance of at least 4½ miles.

8. The first alternative has the disadvantage of being inconsistent with the general sewerage project, in that it entails the construction of a second outfall for sewage, and furthermore it must, in time, create a most intolerable nuisance in the bay, in which, from the contracted nature of its outlet into the sea, the water can be rarely, if ever, completely changed. The cost of this work would also be very considerable.

9. The second alternative has the initial disadvantage of cost, but, on the other hand, the sewer might be so laid (and of a sufficient size) to convey away all the sewage of the villages along its route and within a certain radius of it. I am, however, preparing a report upon this subject, when the matter will be dealt with in detail.

## THE EXPENDITURE DURING THE YEAR FOR THE LOVE GROVE, WORLI, AND DHARAVI SLUICES.

| 502 | Agreepada ... ... ... ... | Repaired arch of the Drain. |

## 15.– KHETWADY DEPOT.

This depôt, in Khetwady 10th Lane, has continued to be of the greatest use for the storage of stoneware pipes and specials, cast-iron fittings and cement, and their issue to the Municipal contractors for various works.

The following statements show the receipt and issue of stores at the depôt during the past year :—

# STATEMENT of Stoneware Pipes, &c., received and issued on account of Drainage and other Works during the year ending 31st March 1885.

| Annual repairs to Markets and Slaughter-Houses at a cost of ..... | 6,601 | 7 | 11 |

The supply of the iron work for the 24" main from Bombay to Vehar, the value of which is about 4½ lakhs, has been undertaken by Messrs. D. Y. Stewart and Co. of Glasgow, their Agents in Bombay being Messrs Wallace and Co. A considerable portion of it has already been supplied, and is of exceptionally good quality.

The laying the 24' main to Vehar has been entrusted to Messrs. Cowasji Sorabji Bhedwar and Co. The value of their contract is nearly 2 lakhs, and the time given for the completion of the entire work is up to 30th April 1886.

The construction of the filter beds at Vehar has been entrusted to Messrs. Jeewanjee Dhunjeebhoy and Mohanlal Becherdass; the time for completion is up to 30th April 1886.

The work of raising the Tulsi Lake dams and waste weir has been given to Messrs. Fackeer Mahomed Babunbhoy and Co.; the time for completion is up to 20th May 1885. The work is practically completed.

The work of the catch-water channels at Vehar and Tulsi has been given to Mr. Tookaram Vittoo ; the time for completion is up to 31st May 1885. The work is practically completed.

The miscellaneous receipts of the Engineering Department were as follows :—

| | Rs. | a. | p. |
|---|---|---|---|
| 1. Opening Roads for water pipes and drains | 3,815 | 0 | 0 |
| 2. Do. Footpaths for carriage entrances | 240 | 0 | 0 |
| 3. Projecting Galleries | 2,495 | 1 | 4 |
| 4. Do. Rewases | 1,626 | 11 | 7 |
| 5. Do. Scaffolding and building materials | 4,164 | 14 | 0 |
| 6. Do. Weather-frames | 676 | 4 | 4 |
| 7. Licenses to Plumbers | 230 | 0 | 0 |
| 8. Miscellaneous Fees | 1,101 | 2 | 0 |
| 9. Sale of Building Application Forms | 1,030 | 8 | 0 |
| 10. Sale of Application Forms for water connections | 826 | 8 | 0 |
| 11. Sale of Privilege of Catching Fish in Municipal waterways, &c. | 516 | 0 | 0 |
| 12. Cutting grass at Vehar, &c. | 950 | 0 | 0 |
| Total Rs. | 17,372 | 1 | 3 |

## BUILDING DEPARTMENT.

The number of applications for permission to build and re-build during the year under report amounted to 990, out of which 763 were sanctioned and the remaining 227 were refused on sanitary and other grounds.

Permission to repair was granted in the case of 260 houses.

300 Notices for pulling down houses and ruinous portions of houses, and 48 Notices requiring the carrying out of repairs to houses, were issued.

178 Orders were issued to Inspectors for the removal of ruinous houses in whole or in part ; 171 were executed by them, while no action was taken in the remaining 7 cases, as the owners themselves complied with the Notices.

212 Orders were issued for removing door-shutters opening outwards, projections, encroachments and other objectionable constructions made without permission ; of these 61 were executed by my Inspectors and the remainder by the parties themselves.

379 Removal Orders were issued for the pulling down of new huts built without the permission of the Municipal Commissioner and contrary to the rules and regulations in force : all of these were removed by my Inspectors.

As regards dangerous houses, compound walls, &c., coming under Section 200 of the Municipal Act, there were 31 cases during the year, of which 27 were trifling and 4 of a serious nature.

In the latter 8 persons were slightly injured.

The attached Statement **A** gives the whole of the abovementioned cases in detail.

The following is the list of Notices and Removal Orders issued by the Building Department :—

| | | | |
|---|---|---|---|
| 1. | Notices for | removing inflammable materials | 307 |
| 2. | Do. | pulling down ruinous houses | 300 |
| 3. | Do. | repairing houses | 48 |
| 4. | Do. | forwarding plans | 818 |
| 5. | Do. | building privies without permission | 100 |
| 6. | Do. | removing buildings erected contrary to sanctioned plans | 56 |
| 7. | Do. | fencing and enclosing wells, tanks and dangerous places | ... |
| 8. | Do. | removing old projections | 64 |
| 9. | Do. | removing new projections | 615 |
| 10. | Do. | removing door-shutters which opened on to the public roads | 83 |
| 11. | Do. | payment of Municipal fees | 616 |
| 12. | Do. | levelling and metalling private streets | 190 |
| 13. | Do. | cutting and trimming trees | 8 |
| 14. | Do. | building sheds contrary to Municipal By-Laws | 153 |
| 15. | Do. | providing rain-water troughs and pipes | 224 |
| 16. | Do. | 24 hours' notice of entry of houses | 910 |
| 17. | Do. | removing temporary projections | 522 |
| 18. | Do. | Removal Orders for pulling down ruinous houses, privy doors, benches, and other encroachments | 910 |
| 19. | Do. | Removal Orders for pulling down objectionable huts | 146 |
| 20. | Do. | fixing telephone brackets to buildings | 73 |
| | | Total... | 6,143 |

The number of summonses issued for different offences committed under the Act were 1,101. In 610 of these the parties complied before service. Convictions were obtained in all the remaining 491 cases. In 410 of these the parties were warned and then discharged by the Magistrate on account of their complying with the requirements of the Municipality immediately after the service of the summonses. In the remaining cases the parties were fined.

The total amount of fines inflicted was Rs. 464-10-8.

The amount allowed for street improvement was Rs. 1,44,789.

The total amount expended was Rs. 1,37,758.

Statement marked **B** shows the locality and area of each plot, and Statement **C** those cases in which compensation according to the rates approved by the Town Council has been paid. Statement marked **D** is a list of sales of plots of ground belonging to the Corporation. Other statements are given showing the ground taken up in each separate ward and actually added to streets during the year under report.

## WATER WORKS DEPARTMENT.

The total rainfall on the gathering ground of the Vehar Lake during the past year was 87·65 inches.

During the previous four years it was as follows :—

72·42 Inches..... in 1880
59·10 „ ..... „ 1881
54·63 „ ..... „ 1882-83
99·54 „ ..... „ 1883-84

The level of the lake at the commencement of the monsoon was 48·60 feet on the gauge and at its close 59·10. The level of the waste weir is 59·00 on the gauge. The highest level during the monsoon was 60·10. In 1883-84 it was 40·70 feet at the commencement and 59·15 at the close of the monsoon.

The total rainfall on the gathering ground of the Tulsi Lake during the past year was 94·84 inches.

During the previous four years it was as follows :—

93·76 Inches.....in 1880
86·11 „ ..... „ 1881
74·22 „ ..... „ 1882-83
109·46 „ ..... „ 1883-84

The level of the lake at the commencement of the monsoon was 30·80 feet on the gauge and at its close 51·70. The level of the waste weir is 53·15 on the gauge. The highest level during the monsoon was 53·60. In 1883-84 it was 17·14 feet at the commencement and 52·95 at the close of the monsoon.

Attached is a statement of rainfall and height of water in the lakes for the past year.

There was one burst in the 48″ Vehar main (the result of a pipe resting on a piece of solid rock causing a fracture through unequal settlement) and four in the 24″ Tulsi main besides several in the smaller mains. There was no burst in the 32″ main.

| Size of Mains. | Number of Bursts. |
|---|---|
| 48″ | 1 |
| 24″ | 4 |
| 9″ | 1 |
| 7″ | 2 |
| 6″ | 4 |
| 5″ | 6 |
| 4″ | 30 |
| 3″ | 77 |
| Total... | 125 |

The following list shows the number of dipping wells, drinking fountains, stand-pipes, &c., in use :—

| Wards. | Dipping Wells. | Drinking Fountains. | Stand-pipes. | Large Ornamental Fountains. | Cattle Troughs. | Total. |
|---|---|---|---|---|---|---|
| A | 7 | 10 | 8 | 7 | 4 | 31 |
| B | 6 | 4 | 1 | 1 | 7 | 19 |
| C | 7 | 11 | 3 | 1 | ... | 22 |
| D | 5 | 4 | 1 | ... | 1 | 11 |
| E | 11 | 17 | 5 | 5 | 3 | 41 |
| F & G | 10 | 10 | 11 | ... | 2 | 33 |
| Total... | 46 | 56 | 24 | 14 | 17 | 157 |

A new ornamental fountain erected by Government in the Parell Road on the site of the old Dick's Tank, lately filled in, was taken over by the Municipality and declared public.

All the dipping wells, drinking fountains, &c., were cleaned at short intervals.

There were 557 new connections made and 193 cut off, giving a net increase of 364.

The following gives the number of connections in each year from 1880 :—

| | |
|---|---|
| 1880 | 12,494 |
| 1881 | 12,817 |
| 1882-83 | 13,244 |
| 1883-84 | 13,545 |
| 1884-85 | 13,909 |

The total number of meters in use on 31st March 1885 were :—

| Private Meters. | Government Meters. | Total. |
|---|---|---|
| 715. | 102. | 817. |

In the previous year there were 690 private and 95 Government meters.

3,641 Notices were served for repairing leaks, &c. In the previous year the number was 3,089.

The aggregate length of the mains examined by the Waste Prevention Staff by Siemen's Meters was 34,945 feet, and leakage to the extent of about 250,000 gallons of water per diem was discovered and checked. In January this staff was placed under the orders of the Superintendent in charge of the fixing and working of the Deacon's patent differentiating waste water meters, 222 of which have been obtained from Liverpool from the Waste Water Meter Company through Messrs. Richardson and Cruddas. In the contract for the supply of these meters it was stipulated that the contractors

should supply an efficient Superintendent to supervise for one year the fixing and proper working of them. The Superintendent arrived in Bombay at the end of December 1884. 37 six-inch meters, 110 four-inch and 75 three-inch have been supplied. Of these 27 six-inch, 25 four-inch, and 34 three-inch, have been fixed up to date in the streets mentioned below :—

| No. | Localities. | Size of Pipes. | Size of Meters. |
|---|---|---|---|

## ROAD DEPARTMENT.

The amount sanctioned under the head of Road Repairs was Rs. 3,03,047. Of this sum, Rs. 30,000 was apportioned for paving footpaths (detailed further on), Rs. 4,000 for rebate allowed to the Port Trustees, and Rs. 15,515 for road scraping, leaving an available balance of Rs. 2,53,532 for actual repairs to roads.

The following footpaths were paved with blue-stone at a cost of Rs. 18,750 :—

| | Sq. feet. |
|---|---|
| Fort—Green Street, north side, from Bank Street to Apollo Street ..... | 9,582 |
| Apollo Street, east side, from Green Street to Elphinstone Circle ..... | |
| Bank Street, west side, from Green Street to Elphinstone Circle ..... | |
| Esplanade Road, west side, from University Road to Bombay Club ..... | |
| New Road from Parel Road to Moombadevi Road. | 4,420 |
| Parel Road both sides from Bellasis Junction Road to Shepherd Road ..... | 28,860 |
| | 42,862 |

## TRAMWAYS.

No extension has been made by the Tramway Company during the year under report.

## ROAD WATERING AND SCRAPING.

The watering by carts, as in previous years, was carried out departmentally at a total cost of Rs. 44,189. Those roads watered by Bhistees have been as before carried out by contract at a total expenditure of Rs. 11,764. The contractor was Mr. Byramjee Jehangir.

The expenditure on road scraping has been Rs. 12,694.

## LIGHTING DEPARTMENT.

The lighting generally has been satisfactory ; the illuminating power of the gas has been considerably above the standard of 12 sperm candles, and it was free from sulphur and other impurities. The pressure according to agreement has been maintained by the Gas Company. The number of lamps are :—

| | |
|---|---|
| Gas Lamps ..... | 3,205 |
| Kerosine Oil Lamps ..... | 767 |
| Electric Arc Lamps ..... | 23 |
| Total... | 3,995 |

The following streets have been lighted during the year 1884-85 :—

## WITH GAS LAMPS.

| | No. of Lamps. |
|---|---|
| Winter Road | 2 |
| Bellasis Road (Bridge) | 1 |
| Bapu Khote Street | 1 |
| " Total... | 4 |

## WITH KEROSINE OIL LAMPS.

| | No. of Lamps. |
|---|---|
| Hormusjee Lane, Lower Colaba | 2 |

## MUNICIPAL WORKSHOPS.

The Workshops have turned out work to the value of about Rs. 1,53,000. One hundred and seventy tons of castings have been made in the Foundry.

The rolling stock of the different Departments has been kept in good repair.

## BHUNDARWADA WATER WORKS.

These works are now completed. As there are some points in dispute with reference to the bills passed, and payments made to Messrs. Ellapa Ballaram and Co. in respect to the work done under their contract at Bhundarwada Hill, the final statement in detail of the cost of the several items of the Bhundarwada Works under the different contracts into which they were divided will be given in next year's Report. The chief works were those under the contract of Messrs. Ellapa Ballaram and Co. involving an outlay of over 5½ lakhs. These were of a very heavy and extensive nature, and were carried out in a most satisfactory manner with material and workmanship of the highest class. To Mr. Cawasji Sorabji Bhedwar was entrusted the work of laying the 48″ and 32″ mains leading to Bhundarwada Hill. The work under his contract cost Rs. 40,040, and was very satisfactorily performed : in every detail the contractor most readily carried out my wishes. Messrs. Wallace and Co. supplied the greater part of the ironwork, amounting to Rs. 1,94,777, Messrs. Macfarlane, Strange and Co., of Glasgow, being the manufacturers. The whole of it was subjected to the severest tests both in Glasgow and in Bombay, and is of the very best description and manufacture. The manner in which Messrs. Wallace and Co. carried out their contract, the terms of which were most strictly adhered to in the minutest particulars, was most commendable. Messrs. Richardson and Cruddas supplied ironwork to the value of Rs. 10,151 and the Municipal Workshops of Rs. 5,568.

The total sum allotted for the Bhundarwada Works was Rs. 10,00,000, and the actual expenditure, when all claims are disposed of, will fall within that amount.

The water from the Vehar main was diverted into the settling tank or storage reservoir at Bhundarwada Hill on the 17th April 1884, and from thence distributed direct to the city. It is found that by opening the supply to the city from 5 to 9 A.M. and again from 4 to 7 P.M. as much water as can be delivered from the Vehar Lake into the reservoir in 24 hours is exhausted. The greatest draw off from the reservoir south of Nesbit Road (Byculla) in any one hour was 1,400,000 gallons. The normal draw per hour in the month of May is 1,200,000 gallons. This would roughly indicate that a daily supply of 12,000,000 gallons for the whole of the Vehar districts for all purposes would meet the requirements of the present population in those districts, and should enable a constant supply of water at high pressure to be maintained, provided the measures now being taken for the detection and prevention of waste were strictly maintained. This calculation does not include any allowance for an increased demand for the new drainage scheme, or that due to the ordinary increase of the population of the city. The actual quantity the Vehar Lake now supplies falls considerably short of the above. What this quantity is cannot be with exact accuracy known until the new 24″ main is completed as far as Vehar and disconnected (as it then will be) with the 32″ main. Enough, however, has been at present ascertained to show (by means of shutting off all branch mains to the south of Nesbit Road and discharging into the reservoir at Bhundarwada Hill) that the 32″ Vehar main does not deliver as much water as it has been assumed from calculations based on the recognized theoretical formula to do. It would appear that through corrosion and incrustation of the interior of the main, and the consequent contraction of its area, and increase to the resistance of the flow of water through friction, that the formula applied to a main something about 30″ in diameter would give more accurately the actual present discharging capability of the 32″ main.

In view of the fact that the supply available from Vehar was consumed in the city in the space of about seven hours, it was thought unadvisable to diminish that supply in order to obtain the advantage of the filtration of the reduced quantity. The surface of the water in the settling tank was not therefore raised to the level of the filter beds. It was decided before doing so to complete the laying of the new 24″ main at least as far as Coorla, where it would be joined with the 32″ Vehar main. The use of this portion of the 24″ main in connection with the 32″ would enable the level of the surface of the water in the settling tank to be raised to that of the filter beds without any diminution in the supply available from Vehar at the expiration of the hot weather.

The new catchwater channels at Vehar were completed sufficiently to be brought into use before the monsoon of 1884. Although the rainfall at Vehar in 1884 was only an average one, a large quantity

of water passed over the waste weir and continued to do so continuously for nearly six weeks. A considerable accession of water to the lake by the construction of these catch-water channels was thus obtained, which will be utlised in the future by the laying of the 24″ main.

From the 6th April 1885, when the 24″ and 32″ mains were joined at Coorla, a large additional supply of water was brought into the city from Vehar. This increased supply, coupled with the improved distribution from the reservoir at Bhundarwada Hill, was found to be of such a measurable advantage that the usual complaints of want of water during the hot season from the Vehar districts was this year comparatively inappreciable.

When the water was first delivered from the reservoir the new conditions of distribution necessitated alterations in some of the smaller mains in certain streets of the city. The necessity of these alterations was foreseen, and an ample provision of funds made for them. Pending the completion of more important works I was unable to take them all in hand together. The benefits of the reservoir could not consequently be fully appreciated in those streets until they were effected. They are now completed with a few unimportant exceptions.

The laying of the 24″ main from Coorla to Vehar is being rapidly pushed on by Messrs. Cawasji Sorabji Bhedwar and Co. Another junction between it and the 32″ Vehar main will be made as soon as it is completed within 3½ miles of Coorla. With the completion of this junction, by the end of October next the full quantity of water that can with safety be drawn from the Vehar Lake (with the increased gathering ground added to it by the new catch-water channels at Vehar and Tulsi) can be brought into, and delivered to the city. During the hot weather, however, a special extra supply will be always given. This the full completion of the 24″ main to Vehar before April 1886 will enable to be done in the hot season of 1886.

C. B. BRAHAM, M. Inst. C. E.,
Deputy Executive Engineer.

No. 1679 OF 1885-86.

From RIENZI WALTON, ESQ., M. INST. C.E.,
Executive Engineer, Municipality,

To E. C. K. OLLIVANT, ESQ., C.S.,
Municipal Commissioner.

BOMBAY, 19*th June* 1885.

SIR,

I have the honor to submit the following report on the different Public Gardens in Municipal charge :—

## VICTORIA GARDENS.

During the past year beyond the extension of the fern-house no addition or alteration has been made to these gardens, but the attention of the Superintendent, Mr. MacEwen, has been more specially directed towards increasing the specimens of foliage plants, ferns, orchids, &c, and to keeping a larger area of the garden than hitherto under cultivation.

2. The fern-houses now contain many rare specimens of ferns, palms, orchids and other classes of foliage plants, and have proved a source of attraction and satisfaction to the intelligent portion of the public who visit this garden.

3. The roads and paths have also had special attention paid to them as far as the budget grant would permit.

4. The zoological collection has not been as successful as could be wished; some of the larger carnivora have died, but until spacious cages are provided this must be the case.

5. In the best zoological collections in Europe, and even in India, it is recognised that the larger animals, such as lions, tigers, panthers, &c., require an enclosed space attached to their dens, to which they can have free access at all times for the purpose of exercise. Without this provision it is not surprising that animals accustomed by nature to roam many miles daily in quest of food should succumb to confinement in a den scarcely three times their own length either way. With proper accommodation there is no valid reason why Bombay should not possess an attractive zoological collection, and which, in the course of a few years, would be second to none in India.

6. Many animals and birds have been presented during the year, and some common specimens have, for want of accommodation, been declined.

7. Seven ostrich eggs were hatched during the year, and out of the seven chicks five have survived and are now fine healthy birds, nearly as large as their parents. The two which died received

injuries from a crane, which unfortunately succeeded in gaining access to the enclosure where the young birds were kept.

| | | | |
|---|---|---|---|
| The amount sanctioned for these gardens including the keep of animals was .....Rs. | 19,872 | 10 | 11 |
| The total expenditure ..... ,, | 18,167 | 9 | 11 |
| Saving .....Rs. | 1.705 | 1 | 0 |

The amount of income received amounted to Rs. 8,930 12 11

## ELPHINSTONE CIRCLE GARDEN.

This garden has been kept in good order during the year, and is much frequented during the early hours of the morning and evening. The Mallees have, however, experienced considerable trouble in keeping people off the grass, but the assistance of the Police being lately called to this duty, this difficulty has disappeared.

2. The garden has been well stocked with flowers, and its appearance has been both attractive and creditable.

| | | | |
|---|---|---|---|
| The budget grant for the year was .....Rs. | 1,700 | 0 | 0 |
| The expenditure was ..... ,, | 1,408 | 10 | 9 |
| Saving .....Rs. | 291 | 5 | 3 |

## NORTHBROOK GARDEN.

This garden has proved itself a great boon to the poorer classes who live within easy reach of it. At all times of the day and up to late at night it will be found thronged with people.

2. With the present staff it is, however, quite impossible to make this garden attractive as a flower garden, for no sooner are the flowers planted than they are either plucked or destroyed by persons who wander over the flower-beds in search of shade or a cool spot in which to lie down and sleep. The Mallees are unable to prevent it, and until a Police Peon is put on duty to enforce the rule for keeping to the paths no other result can be expected.

| | | | |
|---|---|---|---|
| The grant for the year was .....Rs. | 1,090 | 1 | 9 |
| The expenditure ..... ,, | 1,079 | 14 | 3 |
| Saving.....Rs. | 10 | 3 | 6 |

## FALKLAND ROAD GARDEN.

This garden has been kept in good order during the year, but it is so contracted in area compared with the accommodation demanded of it by its visitors that all attempts at keeping the flower-beds in order or the grass plots verdant have failed.

2. During the midday hours Mill employés and others crowd into this little garden, squatting down wherever shade presents itself, quite regardless of the damage they may cause to plants or flowers.

3. I am of opinion that the convenience and comfort of the frequenters of this garden would be much better considered if all attempts at keeping it up as a garden were abandoned. I should be inclined to remove the dwarf wall and railing and to substitute posts merely to define the boundary and to keep out cattle and wheel traffic, remove the flower-beds and grass plots, encourage the growth of umbrageous evergreen trees, and place numerous substantial seats about in convenient and shady places.

| | | | | |
|---|---|---|---|---|
| The grant for the year was ..... | Rs. | 290 | 0 | 0 |
| The expenditure was..... | „ | 261 | 6 | 6 |
| Saving..... | Rs. | 28 | 9 | 6 |

## SIR COWASJEE JEHANGIR GARDEN.

This garden can never be a credit to the Corporation until money is spent upon it to finish it. It has neither gates nor a boundary wall on three sides; hence straying cattle nightly frequent the place and destroy all the plants and shrubs within reach.

2. The Mallees have done their best, under these circumstances, during the year, but under the conditions referred to, it is quite impossible to produce a satisfactory result.

| | | | | |
|---|---|---|---|---|
| The grant was ..... | Rs. | 322 | 9 | 2 |
| The expenditure..... | „ | 319 | 11 | 0 |
| Saving..... | Rs. | 2 | 14 | 2 |

## BAZAR GATE GARDEN.

This garden has much improved, and during the year has been kept in good order.

2. Two or three petitions have been received from persons living in its vicinity praying that the garden should be kept open until a late hour at night. With the presence of only two Mallees it is quite impossible to comply with this request. One man would have to remain to close the gates, and would then expect to be exempted from early duty in the garden next morning. Unless another man is employed for this special duty, I do not see how the request can be carried out.

| | | | | |
|---|---|---|---|---|
| The grant for the year was ..... | Rs. | 1,144 | 0 | 0 |

| Saving..... | Rs. | 109 | 15 | 3 |

I have the honour to be,
Sir,
Your most obedient Servant,
RIENZI WALTON,
Executive Engineer, Municipality.

# NINETEENTH ANNUAL REPORT OF THE HEALTH OFFICER.

---

MUNICIPAL COMMISSIONER'S OFFICE,
Public Health Department,
BOMBAY, 28*th July* 1885.

From

Surgeon D. C. DAVIDSON,
H. M.'s Indian Medical Service,
*Bombay Municipality,*

To

E. C. K. OLLIVANT, ESQ., C.S.,
*Municipal Commissioner*
for the City of Bombay.

SIR,

I HAVE the honor to submit the Annual Report for the year 1884.

2. It is, I think, very desirable that the present state of the building sections of the Municipal Act and the condition of buildings intended for human habitation, which are being daily erected in Bombay, should be prominently brought to notice. The Municipal Act, as it at present exists, is so defective as to afford little or no protection to the public against the erection of most insanitary dwelling-houses, which are directly injurious and dangerous to the health and lives of people, who are compelled by circumstances to occupy them, and are potent factors in bringing about and augmenting epidemics which give rise to much misery and expense, and by causing the imposition of quarantine seriously interfere with trade. So long as the building sections of the Municipal Act remain as they now are, dwellings of the most unwholesome description—direct causes of disease and pestilence—will from year to year be built with, at all events, the tacit sanction of the Municipality. Very large sums of money are being expended on sanitary improvements, and the importance of these improvements it would be difficult to overestimate; but surely when money is being thus expended for improving the sanitary condition of the city, the minimising of epidemics and reduction of the death-rate, it is not too much to ask that unwholesome buildings, opposed in their construction to the most rudimentary principles of sanitation, factors in the production of epidemics, direct causes, indeed hot-beds of disease, should not

only not be reproduced, but erected *de novo* and with impunity. By a large expenditure of money on the one hand certain sanitary advantages are procured, which are, in a measure, counterbalanced by defective legislation on the other.

Plans for almost every description of insanitary buildings are submitted. A not unfrequent form of plan is that for a chawl three or four rooms deep with, perhaps, gullies only three or four feet wide on each side. The centre rooms of such a building have no direct communication with the external air ; they are dark, unwholesome dens, into which the light of day never penetrates, and which must of necessity breed disease and pestilence. This is only one instance of the many unwholesome description of buildings being erected in Bombay. Much has been done during the past and previous years in regard to widening roads and streets, and the benefit to the health of the city, which, as a general rule, is the result, is too evident to need comment, and yet it is not unnecessary to enquire whether " set-backs " to improve the line or widen any street are an unmixed good. A man intends to rebuild his house, in the rear of which ten or twelve feet of open space had been left for ventilation. On submitting plans he is perhaps called upon by the Municipality to set back his house ten feet. What is the consequence ? He does not diminish the size of the house and still leave an open breathing space in the rear of ten feet ; he literally sets his house back ten feet, and builds on the open space which had originally been left for ventilation, thus shutting out light and air from the rear portion of his dwelling, and rendering the back rooms dark, unwholesome dens, into which light and pure air never enter.* It is not only useless, but detrimental to enlarge the breathing space of the streets at the expense of the ventilation of the houses. It is not in the streets that people materially suffer from the effects of imperfect ventilation ; it is in their own homes, and anything which interferes with the ventilation of human habitations is in the highest degree detrimental to the public health. The most perfect drainage, the purest water-supply, and the widest streets will not prevent a large amount of disease and a heavy death-rate, especially from affections of the respiratory system, while house sanitation is so woefully neglected as it is in Bombay at the present time. A privy is occasionally built inside a house and overhanging a well ; on another occasion a similar structure is built within three feet of a well of drinking water, and a drain is constructed to carry sewage within a foot and-a-half of the same well ; a privy is built or rebuilt underneath inhabited rooms ; and yet, notwithstanding the self-evident danger to the public health arising from this and that, such arrangements are opposed to the most rudi-

**Note.*—If this means that because house-ventilation is very insufficiently attended to, in the absence of much-needed by-laws, therefore street improvement and the provision of additional air-space outside the house should be stopped, and this may be the inference drawn—I must express my dissent from the Acting Health Officer's opinion. In both respects and in other elementary sanitary requirements improvement must be steadily sought for, but there is no reason in Bombay more than elsewhere that one improvement should be made at the expense of another.—E. C. K. O.

mentary principles of sanitation, so accustomed have people in Bombay become to them that I have been gravely informed by otherwise fairly intelligent men that such contrivances are "unobjectionable." In such cases it is hopeless to argue and useless to make comments; it is necessary only to state plain facts which any intelligent man ought to be able to comprehend and understand how his own health and life and the health and lives of his fellow-citizens may be sacrificed to a disregard of the first principles of house sanitation.

In his Annual Report for the year 1870 Dr. Hewlett wrote as follows on this subject :—

"As Dr. Lumsdaine says most truly, 'the number of respiratory affections that end fatally speak unmistakeably of impure air and over-crowding. How can it be otherwise in a city where, in that portion where the masses live, every square yard is of fabulous value, and where there exist no laws to regulate the height of houses and width of streets, or space between adjacent buildings, and where the internal arrangements are not under any control; where, for the sake of greed, owners of property run up ranges of buildings, divided into as many compartments as possible, whose air and light is in too many instances only to be obtained from a central passage running down the whole length of the building.'

"I know of places, and I will instance a three-storied house in Dewjee Dongria Street, with a street frontage of 11 feet wide which runs back 70 feet, where it is divided from the opposite house by the sweepers' gully 3 feet broad.

"How can such a building be properly ventilated? No wonder the people die of diseases such as fever and respiratory disease. The Municipal Officers in this city have, year by year, pressed on the question of a Building Act as one that was imperatively necessary, but the weary years go by, and it is disheartening to see so little real improvement taking place in a question of such vital importance."

What was true fourteen years ago is almost equally so at the present time. Now that the Municipal Act is about to be amended, it is sincerely to be hoped that this important matter will meet with the consideration it deserves.

3. I would beg particularly to draw your attention to the condition of the Mahomedan Burial Ground at Grant Road. The condition of this cemetery is such as to render immediate steps for having it finally closed a matter of urgent necessity. The ground has been buried in so often that it is impossible to dig a new grave without re-opening others which have not existed for any length of time. Bones are thrown up in quantities in a condition which too often shows that sufficient time had not been allowed to elapse before re-opening the graves.

The condition of this graveyard was such a few months since that it emitted an offensive odour quite perceptible in the public street, and was a source of complaint by the passers-by. When a cemetery is in such a condition as to be actually offensive to the

sense of smell, there can be no question that it has been permitted to remain open for a dangerously long time, and there ought to be no hesitation or delay in having it closed. The cemetery is, moreover, in a disgraceful condition ; bones of all descriptions are found lying about in various directions, and the graves have sunk far below the level of the surrounding ground. This state of things was brought prominently to the notice of the owner by me, but he has refused or neglected to take any adequate steps to have it put in proper order.

The new cemetery at Haines Road has this year been finally handed over to the Health Department, and it is most desirable that a sufficient sum of money should be sanctioned by the Corporation to have the whole of the ground raised to the level of the public road with good sweet earth. The low-caste Hindoo Cemeteries at Clerk and Arthur Roads should be finally closed by order of Government. The interment of the dead ought to be no longer permitted in these localities. The new Haines Road Cemetery is at present fairly well removed from houses, with the exception of a chall on the opposite side of Haines Road immediately facing it and occupied by potters, but houses will ere long spring up in this direction, and it is necessary that ground should be provided for the disposal of the dead far beyond the actual limits of the city. The Mahomedan burial-grounds at Sonapur and Mungalwadi are a source of danger to the public health and ought to be closed.

4. The question as to the disposal of town sweepings is still under consideration, the refuse in the meantime being deposited on the Flats, which proceeding ought to be discontinued, on sanitary grounds, as quickly as possible ; but apart from all such considerations a new method of disposing of the garbage will require to be adopted without delay, as the ground available on the Flats is now nearly filled in, and unless early steps are taken in regard to this important matter, the Corporation will find themselves involved in a grave sanitary difficulty. I am still of opinion that the only satisfactory method of disposing of the refuse which can be adopted is to remove it to Coorla, where there is a large tract of waste land belonging to the Municipality, practically unlimited in extent for this purpose, which could be reclaimed and would form a valuable estate and from which a large rental could be derived. Instead of trusting to the railway a tramway ought, I think, to be constructed, but this has already been strongly recommended by me in former Reports.

5. In 1883 I drew attention to the condition of milch cattle stables in Bombay in the following terms :—

"The nuisance arising from the rapidly growing number of buffalo stables in Bombay must, sooner or later, force itself upon the notice of the Municipality, and they will be called upon to provide a practical remedy. Were places set apart for this purpose outside the city, and no new stables, save under very special conditions, licensed in the town itself, the difficulty would in a measure be solved.

"Complaints are constantly received regarding the nuisance arising from those places, and I would mention two in particular, where the stables are in a most insanitary condition, viz., the Downi and those on Mody Bay belonging to the Port Trust, which during the rains especially are most injurious to the health of the neighbourhood."

I am glad to be able to report that the milch cattle have, owing to the persistent efforts of this Department, been removed from the Port Trust Property at Mody Bay, but the "Downi" still continues in an insanitary state. The remedy for the unwholesome condition of buffalo stables is entirely in the hands of the Corporation. Proper stables ought to be built by the Municipality on some suitable position or positions on the outskirts of the city, and when that has been done, there can be no hesitation in taking rigorous and persistent action against the owners of all insanitary cattle stables in Bombay and causing them to be vacated. At the present time, when cattle are driven out of any one stable, there is often no other in which they can be accommodated, and they frequently are, under such circumstances, located in quarters much more objectionable than those from which they had been expelled. Again action is taken, and the poor animals are driven elsewhere. No doubt the owners are punished as well as the buffaloes, but no permanent sanitary good is accomplished. The Health Officer is in the position of the London Policeman, who has orders to make the street Arabs "move on," but has received no instructions from the Municipal authorities as to where they are to go.

Every public milch cattle stable in Bombay should be under the entire control of the Municipality, and cleansed, flushed, and kept in proper order by their servants at the expense of the owners. The question of a pure milk supply is of such vast importance to the public health that no effort or expense should be spared to secure it.

6. The nuisance from smoke in Bombay requires special attention. Owing to the large and increasing number of mills and factories it will be necessary to adopt special and continuous measures to mitigate this evil. Spasmodic and transitory efforts on the part of the Municipality must of necessity prove ineffectual. A special Inspector, with a practical knowledge of boilers and engines, should, in my opinion, be appointed for this particular duty, and the owner of every mill which is a source of nuisance to the public should be prosecuted as a matter of course. It is quite impossible that our Inspectors can, in addition to their ordinary duties, cope in a satisfactory manner with this evil. An intelligent person should be appointed, who could combine this duty with the regular inspection and supervision of milch cattle stables.

7. The question of some system of medical relief for the poor at their own homes—something similar to the Union Medical system in England—is one well worthy of consideration. This has been pre-

viously brought to notice on several occasions, and; amongst others, by Drs. Weir and Blanc. At the present time the very poor receive no medical relief at their own houses as a part of any recognised system ; unless they are able to visit one of the various hospitals or dispensaries, they either die untended or recover as best they may. It is therefore, I think, right, both in the interests of the public health as well as from motives of humanity, that the Corporation should organize some system by which the benefit of medical science may be made available in the homes of the poor.

In almost every large town in England, in addition to Union or Poor Law Medical Officers, dispensaries exist, in connection with which medical men are appointed to visit poor patients at their own houses, while the smallest country village possesses a Union Medical Officer, and yet this large City of Bombay, with three-quarters of a million of inhabitants, is totally unprovided with any system of home medical relief for the suffering poor.

I would recommend that a medical practitioner be appointed to each ward of the city on a salary of one hundred rupees per mensem, with an allowance for medicines. During epidemics and outbreaks of cholera special medical officers have, during the last two years, been appointed to attend to cholera-stricken people at their own houses. The system was introduced by Dr. Weir when he was acting as Municipal Commissioner in May 1883, and has worked well, but it will, of course, be understood that it was never intended that this system would enable us to dispense with properly-appointed Cholera Hospitals. The following report was furnished by me at the request of the Town Council in regard to this subject :—

"To the MUNICIPAL COMMISSIONER.

"Sir,—I have the honor to acknowledge the receipt of your endorsement No. 11294 of 1884-85, and to state, in reply, that in my opinion the system of appointing special medical officers for cholera duty worked well, and I would recommend that their services should be again solicited in the event of another epidemic of that disease. I do not, however, consider that the treatment of the very poor at their own homes by medical officers at all so satisfactory as would be the treatment of such cases by the same medical men in well-appointed hospitals. There is in many cases an entire absence of that essential of all treatment, viz., good nursing and proper nourishment adapted to the disease and the condition of the patients. Many distressing cases of this description were brought to my notice during the late epidemic, and it was for this and other reasons that I so frequently urged the necessity of providing properly-appointed Cholera Hospitals within easy reach of cholera-stricken people. If the father and mother are ill, or have died of cholera, there is often no one left to attend upon the sick children, and neighbours and friends not unfrequently decline to hold any communication with them. Under such circumstances, there would be no resource but to

remove them to a hospital, when one is available, but if they have to be carried a long distance, as, for instance, from Mahim to Grant Road, this would be impracticable, as were the patients very ill, they would probably die on the way or shortly after admission. Even in less extreme cases, when a mother has two or more sick children to attend upon, and perhaps the father as well, she cannot devote to them that amount of attention which is necessary to afford them the ordinary chances of recovery, and neighbours are not anxious to render assistance in such cases.

" From the experience I have had I am led to believe that Cholera Hospitals afford to the cholera-stricken poor by far the best chances of recovery.

"*b.* I think that the measures adopted by the Health Department lessened in a very material degree both the severity and extent of the epidemic.

"*c.* I am not aware of there having occurred any inconvenience to the patients or others from the system adopted. So far as I could observe, the kindness and tact displayed by all the medical officers in dealing with the sick poor precluded any such inconvenience arising."

8. It is a matter for congratulation that there is now every probability of an increased water-supply being made available, and that some of the initiatory steps have already been taken in regard to the Tansa Scheme. As a Sanitary Officer the want, and the effects of the want, of a proper water-supply are constantly being, brought to my notice. An outbreak of cholera rarely occurs, but there is at least suspicion in connection with the water. This was in 1883 very marked at Mahim and other outlying districts which are imperfectly supplied. The present intermittent supply is quite insufficient for the wants of the people, and there can be no doubt that it is eked out from wells, the purity of which is often more than doubtful, and the surroundings in many cases of the most insanitary description. If a proper continuous supply were made available, few people would resort to wells, and the result would, I am persuaded, be marked by a decided improvement in the public health. There is no greater sanitary want than this, and no greater benefit could be conferred upon the city than a plentiful supply of pure water.

9. The registration of deaths in this city is now, and always has been in an unsatisfactory condition. Every effort is made by the Health Officer to obtain correct information of the causes of death; and regarding cholera, the information obtained, owing to the efforts of the Health Department, is I think, accurate, but the system which prevails in England, of all medical men furnishing a certificate of the death of those whom they have attended in their last illness, is not adopted here. I am endeavouring to introduce this system. In every case in which the deceased person had been attended by a medical man, the medical attendant will now be asked for a certificate as to the cause of death. Those cases in which a certificate is granted will

be entered in the Registrar's returns as "certified" and all others as "uncertified," so that the accuracy or otherwise of our mortuary returns will, in a great measure, in future, depend upon the co-operation of the medical profession of Bombay, and I venture to hope that they will be willing to assist in such a work of public utility and medical interest. As medical advice is more generally sought by all classes, our statistics will prove more and more accurate; and should the proposal elsewhere recommended, of establishing some system of Poor Law Medical Relief, be adopted, a great impetus would be given to this important work.*

10. *Gardens.*—In regard to this subject, I do not wish to make any remarks on our large gardens, which are so great a boon to the general public and so beneficial to health. I would merely point out the extreme desirability of purchasing, as occasion occurs, plots of land, no matter how small, in densely-populated and insanitary localities amongst the lowest parts of the city, and there establishing small gardens which would serve as breathing spaces to the inhabitants. It will, no doubt, be argued that those people can and should resort to the large public gardens, but many cannot, and others will not do so. Our object is to improve the health of the city; and if the people, especially women and children, either can or will not go to seek fresh air, then we must bring fresh air to them.

Exclusive of still-born, 22,542 deaths were registered, a mortality 988 less than in the preceding year, but 637 more than the mean of the previous five years. The death-rate, estimating the increase of population, is equal to 27·29 per 1,000 of population. The mortality, as in the previous year, consisted of a low male and high female death-rate; the male mortality was only 25·29 and the female 34·96 per 1,000 of population.

In 1883 the male mortality was 26·62 and the female 36·16 per 1,000 of population. The reduction was, therefore, more than one per 1,000 of population in both sexes since 1883.

Examining the deaths according to places of birth, we observe that 11,106 were born in Bombay, being 318 less than in the previous year, and 11,181 were born elsewhere, and that the place of birth of 255 could not be ascertained.

Examining the population by classes, it will be seen that the proportion of male to female deaths is higher in the immigrating population. The death-rate of females amongst the Jains during the year under report is higher than that of males by 65·2 per 1,000 of population of each sex, and there is reason to believe that it is in a measure owing to the migrating tendency the males of that community posses for trading. On the other hand, in the permanent and non-fluctuating class of population—the Parsees—the death-rate of females as compared with that of males is not so high, being in the proportion of 24·6 to 21·1 per 1,000 of population of sexes.

* The section of the Municipal Act relating to this matter is, for all practical purposes, null and void, there being no penalty for non-compliance.—D. C. D.

If we refer to age periods, we find that the fatality of females between 12 and 40 years of age is higher than that of males, and this is, I believe, partly due to diseases and conditions associated with child-birth. The mortality is further enhanced by additional causes, such as employment in cotton mills and wool-cleaning factories, occupations which are injurious to female life.

The rate of mortality from phthisis is higher amongst females than males, and this may be accounted for in a measure by the fact that women of certain castes remain almost entirely, or to a great extent, in their houses without taking exercise in the open air. The more or less vitiated atmosphere which they thus constantly inhale would prove a potent factor in the production of Phthisis, more especially when the ill-ventilated condition of a large number of human habitations in Bombay is taken into consideration. In other castes the impure air too often breathed in factories of various descriptions, where large numbers of women are employed, would to a certain extent account for the relative higher mortality.

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY PER 1000 OF POPULATION IN DIFFERENT CLASSES ACCORDING TO SEX DURING THE YEAR 1884.

| CLASSES. | Male population. | Number of Deaths. | Per1,000 of population. | Female population. | Number of Deaths. | Per1,000 of population. |
|---|---|---|---|---|---|---|
| Jains | 12,769 | 503 | 39·3 | 4,449 | 465 | 104·5 |

| Total | 9,750 |

It will be seen that Kamathipura still maintains its high rate of mortality amongst children as well as adults. This year it presents a higher death-rate amongst children than any other Section of the city with the exception of 1st Nagpada. It will be remembered that it is in the Kamathipura section that house connections have been tried, but I think sufficient time has not yet elapsed for an opinion to be expressed whether the new system of connections will have any decided effect upon the health and death-rate of the locality.

The death-rate of children under one year of age has, since 1882, been greatly increased in 1st Nagpada Section, where the highest mortality has been registered. In comparing the percentage of deaths to births we also observe that a high rate of mortality existed in that section, being 78·46 per 100 births.

The percentage of male children under one year of age is higher than that of females, but the difference is not so great as it was in 1881, when it was 134, being now 41 per 1,000 of population.

The female mortality between 12 and 40 years of age is less by 121 deaths than the last year, although we observe as in the

previous years, an excess female mortality at the nubile periods of life compared with the periods exceeding 40 years of age.

The lowest mortality is observed amongst Europeans, but the remark made on this point in the last annual report applies equally to the year under review.* The European mortality is less than the Parsee mortality by 3·61 per 1,000 of population. The Eurasian mortality has this year fallen by 12·84 per 1,000 of population.

* Examining the mortality according to classes, we find that, of the principal races occupying this city, the lowest mortality is registered amongst Europeans, but this is, no doubt, largely due to the fact that sick Europeans, when practicable, leave Bombay as quickly as possible and die or recover in England or elsewhere, thus reducing the mortality far below what it would be were they placed under the same conditions as other communities.—*Health Officer's Annual Report for* 1883-84.

Examining the mortality according to principal races and classes of population of the city, the lowest mortality was registered amongst the Europeans, Parsees and Brahmins. The death-rate amongst the Eurasians is considerably less than in 1883. As in the last year, a higher mortality is observed amongst the low-caste Hindus. The mortality of Bhatias and Hindus of other castes has fallen.

RETURN SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY AMONGST DIFFERENT CLASSES IN 1884.

| Classes. | Population by Census of 1881. | Number of Deaths. | Per 1,000 of Population. |
|---|---|---|---|
| Jains | 17,218 | 968 | 56·23 |

| Other and unknown Castes | ..... | 7 | ..... |
| Total... | 773,196 | 22,542 | 27·29* |

* Increment of population is calculated.

The mortality from small-pox has fallen to 112 against 1,461 in 1883 and 343 less than the mean of the previous five years. This is the smallest number of deaths, with the exception of 1881 and 1882, in any one year registered since 1849. The highest mortality was registered in Dhobie Talao ·45, Worlee ·40, and Kamathipura ·35 per 1,000 of population.

* Increment of population is calculated.

734 cases, in all 514 males and 220 females were reported during the year, of which 576 proved fatal; the death-rate was therefore equal to 0·70 per 1000 of population.

Of the total number of cases 97 persons were born in Bombay, and 637 outside of Bombay; of the cases born in Bombay, 81 died, and of those born elsewhere 495 died.

Of the cases reported to have suffered from cholera 569 used Vehar or Tulsi, 89 well water, and in 76 cases it could not be ascertained which water was consumed.

| | Attacked. | Died. |
|---|---|---|
| Vehar and Tulsi water drinkers | 569 | 444 |
| Well water drinkers | 89 | 71 |
| Not known | 76 | 61 |
| Total..... | 734 | 576 |

The following table exhibits the number of cases and deaths from cholera in different classes.

| Classes. | Attacked. | Died. |
|---|---|---|
| Jains | 7 | 5 |
| Brahmins | 15 | 15 |
| Lingaets | 1 | 1 |
| Bhatias | 1 | 1 |
| Hindus of other Castes | 429 | 350 |
| Hindu Low Castes | 58 | 43 |
| Mussulmans | 89 | 58 |
| Parsees | 24 | 23 |
| Jews | 1 | 1 |
| Native Christians | 97 | 69 |
| Eurasians | 2 | 1 |
| Europeans | 7 | 6 |
| Negro Africans | 3 | 3 |
| Total..... | 734 | 576 |

The mortality from cholera is 451 less than in the last year and 152 more than the mean of the preceding five years.

Examining the distribution of the mortality from cholera over the city by sections, we observe that in two sections no deaths from cholera were registered, viz., Upper Colaba and Southern Fort. The highest mortality was registered in Chaupati, Girgam, Esplanade, Mahim, Dhobi Talao, and Fanaswadi.

* Increment of population is calculated.

Comparing the sexes, we find that the proportion of male deaths from cholera is higher than of females as in previous years, being 0·85 to 0·57 per thousand of population.

The highest mortality from cholera was observed at the ages between 20 and 40 ; the female greatest number was at the period between 20 and 35.

* Increment of population is calculated.

The deaths from fevers were 6,830 in 1884, 927 more than the last year and 80 more than the average of the preceding five years ; 5,307 deaths were referred to remittent fever, being 868 more than the last year ; 1,223 to simple continued fever, 282 to ague, and 18 to enteric fever.

The highest mortality was observed in Sewri and Parell Sections. In Sewri a greater number of deaths from fever was registered in September, October, and November than the other months of the year.

The principal sections in which an increase of death-rate per 1,000 of population was observed higher than the last year are given below in their order of increment:—

| | |
|---|---|
| Sewri | 4·68 |
| 2nd Nagpada | 4·21 |
| Girgam | 3·24 |
| Chukla | 3·21 |

The highest proportion of deaths from fevers was registered amongst the Jains. The Hindu low castes stand next to them.

There is an increase of death-rate from fevers over 1883, particularly amongst the Jains and Bhatias.

Death-rate per 1,000 of population from phthisis in the following localities of the highest mortality :—

| 1882. | | 1883. | | 1884. | |
|---|---|---|---|---|---|
| LOCALITIES. | | LOCALITIES. | | LOCALITIES. | |
| 2nd Nagpada | 8·03 | Nal Bazar (Khara Talao) | 8·67 | Chukla | 9·04 |
| Nal Bazar (Khara Talao) | 6·65 | 2nd Nagpada | 7·97 | 2nd Nagpada | 8·47 |
| Chukla | 6·37 | Chukla | 7·53 | Khara Talao | 7·31 |
| Oomberkhari | 5·92 | Bhuleshwar | 7·00 | Bhuleshwar | 6·21 |
| Bhuleshwar | 5·43 | Oomberkhari | 6·97 | Kamathipura | 5·69 |
| Mandvi | 5·10 | Kamathipura | 6·18 | Oomberkhari | 5·47 |
| Kamathipura | 5·02 | Tarwady | 5·43 | Girgam | 4·93 |
| Kumbharwada | 4·34 | Mandvi | 4·86 | Kumbharwada | 4·40 |

3,091 deaths were referred to phthisis, 53 less than in 1883 and 338 more than the mean of the preceding five years.

The death-rate from phthisis is higher in Chukla and 2nd Nagpada than the last year. Contrasted with 1883 we observe a diminution in the mortality from phthisis in Khara Talao, a district of a high phthisical mortality registered in the preceding years, and it now occupies a third place of high mortality.

In Chukla, 2nd Nagpada, Khara Talao, Bhuleshwar, Kamathipura, and Oomerkhadi the ventilation of houses is in a large number of cases very defective, and unfortunately not only does this apply to dwellings which have existed for years, but also to many new buildings. I have elsewhere alluded to the absolute necessity there is, in the interests of the public health, of amending the building sections of the Municipal Act. It is universally acknowledged that defective ventilation is a potent cause of consumption, and unless we are enabled to deal with house sanitation in a more effectual manner than at present, I fear there is little hope of reducing the death-rate from phthisis. This question is second to none in the important bearing it has upon the public health, and I consider it my duty to avail myself of every opportunity of bringing it to notice and earnestly urging that something may be done to remedy the crying evils which at present exist.

Examining the mortality from all causes, there is an increase of death-rate over 1883, principally in 1st Nagpada by 3·52, in Chukla by 3·26, Sewri 2·88, and Mahalaxmi 2·57 per 1,000 of population.

To diseases of the respiratory system 3,744 deaths were referred, being 350 more than the last year and 835 more than the average of

the previous five years ; 2,186 were ascribed to bronchitis, being 358 more than the last year and 586 more than the mean of the past five years ; to pneumonia 1,188 were referred, 29 more than the last year and 175 more than the average of the past five years.

From diseases of the digestive system 2,288 deaths were registered, being 83 less than the last year, but 243 more than the mean of the previous five years ; 1,081, being 79 less than the last year and 4 less than the average of the previous five years, were referred to diarrhœa ; and 635, being 11 less than the past year and 222 less than the mean of the preceding five years, to dysentery ; to all other diseases of the digestive system 572 deaths were ascribed, being 7 more than the last year and 17 less than the average of the past five years.

From diseases of the nervous system 2,422 deaths were registered against 2,849 of the last year ; 1,980 deaths were referred to infantile convulsions.

To diseases of the circulatory system 166 deaths were ascribed being 32 more than in the previous year and 50 more than the average of the last five years.

74 deaths were registered under the head of leprosy.

Under the general term dropsy 122 deaths were registered, being 5 more than the last year, but 18 less than the average of the past five years.

From diseases of the generative system 187 deaths were registered, being 33 less than the previous year and 3 more than the mean of the last five years.

There were 49 deaths from diseases of the urinary system, being 19 less than the preceding year.

From diseases of the organs of locomotion and cellular tissue 88 deaths were reported, being 5 less than the last year.

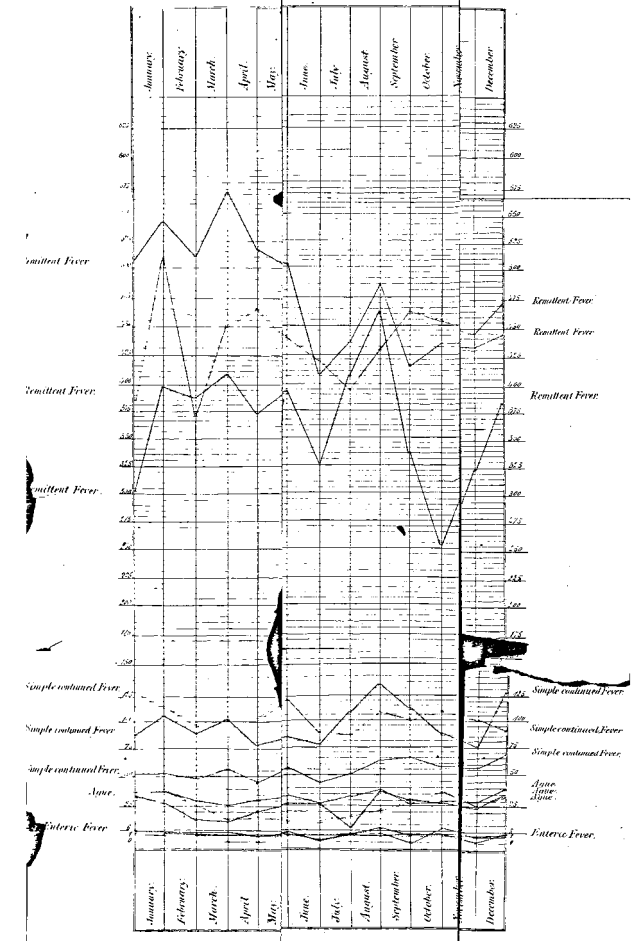
To diseases of the cutaneous system 21 deaths were ascribed, being 8 less than the past year and 15 less than the mean of the last five years.

29 premature births were registered.

To debility 1,258 deaths were registered, being 8 less than the last year and 87 less than the average of the past five years.

To accidents and violence 328 deaths were due, being 29 less than the past year and 38 less than the mean of the last five years ; 46 were referred to poisoning, being 16 less than the last year, of which 18 were accidental, 23 suicidal, 1 homicidal, and 4 due to snake-bite ; 106 deaths were caused by drowning, 37 accidental, 41 suicidal, 1 homicidal, and in 27 cases verdict of "found drowned" was given.

*DIAGRAM* - *Showing the number of deaths from Fevers in different months in 1843 (Green) as compared with the last years mortality (Red) and monthly mean of the previous 5 years (Blue)*



14,637 living births and 1,479 still-born were registered, being 545 less than the last year ; 7,634 of the children born living were males and 7,003 females. The proportion of male to female births was 109 to 100.

The birth-rate is equal to 17·72 per thousand of population. This year the birth registration in certain castes has improved. For instance, amongst Jews the birth-rate has risen from 29·50 to 29·81, and of the Europeans from 17·51 to 17·79 ; 8 births were registered amongst the Negro Africans against 2 in the previous year.

The system of birth registration is one requiring attention and reform. It is at present in an unsatisfactory state. The principal information is obtained from peons sent round to the different houses by this Department. These peons, or Registration Karkuns as they are termed, are under the general supervision of the Ward Inspectors, who have not sufficient time to devote to this portion of their duties. I think it is therefore very desirable that a special officer should be appointed to superintend the Karkuns on, say, a salary of 50 or 60 rupees per mensem. It will also be necessary to enforce the sections of the Municipal Act by which parents and guardians are required to give information to the Registrars of the districts in which they live.

The following advertisement has been inserted in the English and native newspapers :—

"Attention is invited to the following Sections of the Municipal Act, for non-compliance with which legal proceedings will be instituted :—

"Section 257 —The parents or guardians of every child born in the city, or in case of the death, illness, absence, or inability of the same, the occupier of the house in which such child shall have been born, or some person present at, or in attendance during, the birth, shall, within one week next after the day of every such birth, give information to the Registrar of the District, according to the best of his or her knowledge and belief, of the several particulars hereby required to be known and registered, touching the birth of such child

"Section 258.—Any person whose duty it shall be to give information to a Registrar under the preceding Section, who shall refuse or neglect to give such information within the above-mentioned time, shall be liable to a penalty not exceeding one hundred rupees for each offence."

## Return showing the Number of Births and the Birth-rate in 1884.

| Locality. | Population by Census, 1881. | Births. | Birth-rate per 1,000 of Population. |
|---|---|---|---|
| Upper Colaba | 2,867 | 88 | 30·69 |
| Middle & Lower Colaba | 14,265 | 267 | 18·71 |
| Fort, Southern | 3,515 | 23 | 6·54 |
| Do. Northern | 33,828 | 765 | 22·61 |

## ESTABLISHMENT.

An addition was made last year to the Scavenging Branch, but the establishment still falls very far short of what is required to maintain the city in a proper sanitary state, so far as regards conservancy. I think it is very desirable that our Inspectors and Sub-Inspectors should wear some distinctive uniform by which they could be known while on duty.

I have elsewhere urged the necessity of providing houses for the different Inspectors, and chawls for the bigaries and cart drivers in close proximity to their stables. The Inspector is responsible for the care of his animals and the discipline maintained amongst the work-people. If, therefore, he is forced by circumstances to live at a considerable distance, it is impossible that he can look so well after the interests of the Municipality as if he were always on the spot. I have strongly recommended that Inspectors' houses should be erected in connection with the new stables about to be built at Boree Bunder, even if it should be found necessary to apply to the Corporation for an additional grant for this purpose.

I regret to have to record the death of Mr. Kent, the oldest Inspector of this Department, which took place during the past year. He was valued and respected by all under whom he had served, and in him the Municipality has lost a trustworthy servant, who did good honest work during the fifteen years he was in their employment.

Mr. Leask, the Assistant Health Officer, has performed his duties in a most zealous manner, and has proved himself to be a valuable officer of the Municipality.

I have the honor to be,

Sir,

Your most obedient servant,

D. C. DAVIDSON,

Acting Health Officer.

In the table following will be found a record of the important work done during the year 1884 :—

| 1883. | | Details. | 1884. | |
|---|---|---|---|---|
| Rs. | 2,96,908 10 11 | Income of Health Department | Rs. | 3,50,468 4 5 |

# Appendix A.

## AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1884.

TABLE showing for the year 1884 the Sums of Velocities, and the Mean Velocities, in miles per hour, of the Winds which blew in each month, from each of the Sixteen Principal Directions, and also the number of Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several months, and of different Winds during the same month.

No. 232 OF 1885-86.

FROM THE SUPT. OF MARKETS, SLAUGHTER-HOUSES, &c.,
TO THE MUNICIPAL COMMISSIONER,
Bombay.

ARTHUR CRAWFORD MARKET OFFICE,
BOMBAY, *9th May* 1885.

SIR,

In compliance with the Municipal Commissioner's No 13265 of 1884-85 and 1126 of 1885-86, dated 16th March and 27th April 1885, respectively, I have the honor to forward herewith my annual report for the official year 1884-85, with tabulated statements showing, as usual, the number of Municipal and Private Markets throughout the city, the amount of Market and Slaughter House Fees, &c., collected in the usual way in the different Municipal Markets and Slaughter Houses under my management during the year under report.

The accompanying statements show the increase and decrease in the Markets and Slaughter-House and Fair Ground revenue from the year 1875 to 1884-85 ; also showing the number of horned cattle, sheep, goats, &c., slaughtered at Bandora and in Bombay for Butchers' meat and for private purposes; and also the quantity of unwholesome food destroyed by the Markets and Slaughter-Houses Establishment, the number of summonses issued, the number of convictions obtained under the Municipal Acts and By-Laws, with the amount of fines inflicted by the Presidency Police Magistrates during the year; and to state that there is a further increase of Rs. 15,647-8-7 in the revenue collected from the Markets and Slaughter Houses as per accompanying statements, which also show that the total amount derived from all the Markets and Slaughter-Houses for the twelve months ending the 31st of March 1885 amounts to Rs. 2,83,176-11-10 against Rs. 2,67,529-3-3 for the same period last year. The Markets were well stocked with fruit and vegetables, and the mutton supply was, as usual, good and plentiful, but the beef continues to be inferior to former years.

The fish supply was not up to the demand during the year. All my establishment have worked well and willingly, both at Bandora and in Bombay, with the exception of Cattle Inspector Webb and Pass Clerk DeSouza, both of whom were dismissed for general bad conduct.

In conclusion, and on behalf of myself, my Assistant, Mr. Saunders, and my Head Clerk, Mr. Nanabhoy Vishvanathji, I beg to thank the Municipal Commissioner, the Town Council, and the Corporation for their kind remarks and recognition of the services we have endeavoured to carry out to the satisfaction of the Municipal Commissioner.

I have the honor to be,
Sir,
Your most obedient servant,
P. C. HIGGINS,
Superintendent of Markets
& Slaughter-Houses, &c.

BOMBAY, 28*th April* 1885.

F. H. SOUTER,
*Commissioner of Police.*

# ANNUAL REPORT

OF THE

# MUNICIPAL AUDITORS.

To

H. W. BARROW, Esq.,

*Secretary, Town Council; and Clerk, Municipal Corporation,*

Bombay.

Sir,

In accordance with the XXXII. Section of the Bombay Municipal Acts of 1872 and 1878, we have the honor to send in our Report of Municipal Accounts for the year 1884-85 for submission to the Town Council and Corporation.

We have the honor to be,

Sir,

Your most obedient servants,

ARDASEER FRAMJEE MOOS,

NANABHAI RASTAMJI RANINA,

*Municipal Auditors.*

Bombay, 8*th September*, 1885.

# REPORT OF THE CONCURRENT AUDITORS ON THE MUNICIPAL ACCOUNTS OF THE YEAR 1884-85.

The Municipal Corporation, at their meeting, held on the 10th day of December, 1883, having appointed us Concurrent Auditors to audit the accounts of the Municipality for the year 1884-85, we have the honor to submit our Report thereon for the information of the Town Council and Corporation.

2. The official year under report comprises 12 months, commencing from 1st April 1884 to 31st March 1885.

3. We have examined the whole of the vouchers and papers relating to receipts and disbursements, and have compared the Day-book with General Ledger and Subsidiary Ledgers, Journal, &c., and found them all in order.

4. We have been able from our attendance, now given daily for four consecutive hours, owing to the work having, since the last eight years, greatly increased, to keep the concurrent audit of the daily accounts as close up to date as they were booked.

5. The number of vouchers which have passed our scrutiny amounted to 39,458 in 1884-85 against 31,744 in 1883-84.

6. In addition to the concurrent audit, we have also examined weekly statements of receipts and expenditure of Municipal Accounts at the end of each week and before they were published in the *Government Gazette*. The accuracy of this weekly audit was further tested at the end of each month by our preparing a summary of all accounts directly from the General Ledger and independently of the weekly statements. The summary contained totals of receipts and expenditure of each account as it stood in the Ledger at the end of the last week of the month, and which totals were tallied with the aggregate total of each head of accounts given in the weekly statements of the month, added together. By this method of scrutiny, any omission or a wrong posting could not remain undetected for more than a month at the most.

7. The summary so prepared by us was regularly forwarded every month to the Secretary for submission to the Town Council.

## Receipts.

8. The total receipts (proper) of the Municipal Fund for twelve months ending 31st March 1885, including receipts for Water Rate, amounted to Rs. 42,13,867-13-7 against Rs. 37,37,272-0-9 in 1883-84, being Rs. 4,76,595-12-10 more than the receipts of the past year.

## Expenditure.

9. Exclusive of Rs. 28,500 paid towards the reduction of the New Drainage Loan of 27 Lakhs, debitable to Water Works account, and Rs. 1,08,463-7-1 paid towards the reduction of the Consolidated Loan, making a total of Rs. 1,36,963-7-1, the total expenditure for 12 months ending 31st March 1885, amounted to Rs. 37,44,057-4-2 (including the amount of Sinking Fund on account of House and Market Loans and expenditure on account of Water Works) against Rs. 35,65,069-12-3 in 1883-84, being Rs. 1,78,987-7-11 more than the expenditure of the past year.

10. Taking the whole of the ordinary receipts of the twelve months of the year 1884-85 at Rs. 42,13,867-13-7, and the whole expenditure at Rs. 37,44,057-4-2, *inclusive* of the receipts and expenditure of Water Works account, there was, on the 31st day of March 1885, a credit balance of Rs. 4,69,810-9-5, being Rs. 2,97,608-4-11 more than the credit balance of the past year.

## Particulars of Receipts.

11. *Water Rate* realized Rs. 5,96,123-3-5 in 1884-85 after paying refunds amounting to Rs. 1,431-12-7, and including Rs. 950, being proceeds of sale of grass growing on the lands about the Vehar Lake, and Rs. 5,000 on account of water supplied for extinguishing fires, against Rs. 5,47,646-14-9 realized in 1883-84, being Rs. 48,476-4-8 more than the receipt of the past year.

Budget Estimate—Receipts, Rs. 5,96,000-0-0.

Total expenditure on account of Vehar Water Works amounted to Rs. 5,12,589-11-0 in 1884-85 against Rs. 4,05,878-5-5, being Rs. 1,06,711-5-7 more than expended in 1883-84. For particulars of Expenditure, *vide* para. 61.

12. *Consolidated Rates.*—The total revenue under this head, comprising *House*, *Police* and *Lighting* Rates, and Government and Port Trust contributions, collected in 1884-85, amounted to Rs. 11,80,307-0-6 against Rs. 9,83,538-1-11 in 1883-84, being Rs. 1,96,768-14-7 more than the net revenue realized in 1883-84.

Budget Estimate, Rs. 11,10,000.

Refunds amounted to Rs. 4,286-2-2 against Rs. 4,933-12-10 in 1883-84, being Rs. 647-10-8 less paid than in 1883-84.

13. Collections recovered on account of arrears of 1879 to the end of 1883-84, amounted to Rs. 1,48,930-14-6 and for the year

1884-85, to Rs. 8,85,662-4-2. Government and Port Trust contributed Rs. 50,000 and Rs. 1,00,000, respectively.

14. *Government Contribution to Police Expenses* amounted to Rs. 90,000 against Rs. 85,672-4-6.

Budget Estimate, Rs. 90,000.

15. Wheel Tax amounted in 1884-85 to Rs. 2,92,766-7-0 against Rs. 2,40,092-8-9 in 1883-84, being Rs. 52,673-14-3 more than the receipts of the past year.

Budget Estimate, Rs. 2,71,400.

Collections on account of arrears of 1879 to the end of 1883-84 amounted to Rs. 23,109-6-0, and for the year 1884-85 were collected Rs. 2,69,980-13-0.

Refunds during the year amounted to Rs. 323-12-0 against Rs. 54-2-0 in the past year.

16. *Toll Tax* levied on carts which pass the Sion and Mahim causeway and collected by the officers of the Port Trust Department, amounted in 1884-85 to Rs. 16,785-12-0 against Rs. 15,134-4-0, being Rs. 1,651-8-0 more than the receipts of the past year.

Budget Estimate, Rs. 16,000.

Establishment for collecting Toll Fees under the Traffic Manager of Port Trust Bunders amounted to Rs. 1,680, same as expended last year.

17. *Liquor Licenses* amounted to Rs. 1,43,750, the sum fixed by Government to be paid to the Municipality.

Budget Estimate, Rs. 1,43,750.

18. *Land Conveyance Licenses.*—Under this head were collected and paid by the Police Commissioner Rs. 4,304-14-11 against Rs. 3,417-4-3 in 1883-84, being Rs. 887-10-8 more than the receipt of the last year.

Budget Estimate, Rs. 1,400.

19. *Halalkhore Cess* yielded Rs. 2,89,626-1-6 in 1884-85 against Rs. 2,43,556-9-11 in 1883-84, being Rs. 46,059-7-7.

Budget Estimate, Rs. 2,63,000.

Collections on account of arrears from 1880 to the end of 1883-84 amounted to Rs. 38,430-14-8, and Rs. 2,52,508-6-2 were collected for the year 1884-85.

Refunds paid in 1884-85 amounted to Rs. 1,323-3-2 against Rs. 1,616-1-1 paid last year.

20. *Town Duties.*—The receipts under this head for 1884-85 amounted to Rs. 14,28,526-8-0 against Rs. 12,41,205-1-11 in 1883-84, giving an increase of Rs. 1,87,321-6-1 over the receipts of the past year.

Budget Estimate, Rs. 6,10,000.

This increase is explained as follows :—

| | Increase. | | | Decrease. | | |
|---|---|---|---|---|---|---|
| | Rs. | a. | p. | Rs. | a. | p. |
| Port Trust yielded ... ... ... | 1,37,138 | 8 | 3 | ..... | | |
| G. I. P. Railway Company ... ... | 79,696 | 7 | 0 | ..... | | |
| B. B. & C. I. do. ... ... ... | ..... | | | 29,513 | 9 | 2 |
| | 2,16 834 | 15 | 3 | 29,513 | 9 | 2 |
| *Less* ...Rs. | 29,513 | 9 | 2 | | | |
| Increase ...Rs. | 1,87,321 | 6 | 1 | | | |

21. Refunds of Town Duties amounted to Rs. 6,55,095-15-0 against Rs. 5,74,092-4-0, being Rs. 81,003-11-0 more than the refunds paid in 1883-84. Similarly, charges on account of commission paid for collecting Town Duties were also proportionately greater, amounting in 1884-85 to Rs. 49,253-3-1 against Rs. 44,307-10-9, being Rs. 4,945-8-4 more than paid last year.

Figures given below will show increase and decrease in the receipt of Town Duties levied on articles in 1884-85 compared with the receipts of 1883-84 :—

| | Increase. | Decrease. |
|---|---|---|
| | Rs. | Rs. |
| Grain ... ... ... ... ... | 42,372 | ..... |
| Wines and Spirits... ... ... ... | 21,699 | ..... |
| Beer... ... ... ... ... ... | 468 | ..... |
| Sugar ... ... ... ... ... | 1,63,816 | ..... |
| Ghee ... ... ... ... ... | 13,339 | ..... |
| Timber ... ... ... ... ... | ..... | 42,144 |
| Firewood ... ... ... ... ... | ..... | 3,616 |
| | 2,41,694 | 45,760 |
| | 45,760 | |
| Net Increase...Rs. | 1,95,934 | |

22. *Tobacco Duty Licenses.*—Receipts for 1884-85 amounted to Rs. 1,72,622-1-3 against Rs. 1,74,306-0-2 collected in 1883-84, being Rs. 1,684 less than the receipt of the past year. Rs. 238-11-8 were paid more in 1884-85 on account of Tobacco Duty Establishment than the sum paid in the past year.

Budget Estimate, Rs. 1,62,000.

23. *Market and Slaughter-House Receipts.*—The receipts amounted to Rs. 2,83,176-11-10 in 1884-85 against Rs. 2,69,338-11-8 in 1883-84, being Rs. 13,838-0-2 more than the income of the past year.

Budget Estimate, Rs. 2,47,000.

The increase in the receipts of Markets, &c., of Rs. 13,838-0-2 is explained below :—

| | Increase. | Decrease |
|---|---|---|
| | Rs. a. p. | Rs. a. p. |
| Slaughter Fees yielded | 5,932 14 0 | ..... |
| Stall Rent | 2,459 8 0 | ..... |
| Fair Ground and Feeding Fees (from Contractors) | 5,025 0 0 | ..... |
| License Fees | 418 0 0 | ..... |
| Squatters' Fees (Department) | 352 13 8 | ..... |
| Do. (Contractors) | ..... | 240 0 0 |
| Recoveries for Carriage of Meat from Commissary Contractors | ..... | 3 0 0 |
| Garden Produce | ..... | 80 0 0 |
| Price Current | 1 12 0 | ..... |
| Amount of Proceeds of Articles found in the Market | 3 9 11 | ..... |
| Fee for attending Courts and Inspection Fees | ..... | 5 0 0 |
| Revenue from Toddy | ..... | 25 0 0 |
| Rent of Chawls | ..... | 101 0 0 |
| Fees for the right of removing blood (from Contractors) | ..... | 116 10 8 |
| Private Markets | 430 0 0 | ..... |
| Revenue for right of catching Fish | 30 0 0 | ..... |
| Fees for water and other extra accommodation provided for the Commissary Cattle | ..... | 244 13 9 |
| | 14,653 9 7 | 815 9 5 |
| *Less*...Rs. | 815 9 5 | |
| Net Increase...Rs. | 13,838 0 2 | |

24. The expenditure of the Market Establishment amounted in 1884-85 to Rs. 84,765-15-7 against Rs. 73,268-0-4, being

Rs. 11,497-15-3 more than the expenditure in the past year, as per particulars given below :—

| | Increase. Rs. a. p. | Decrease. Rs. a. p. |
|---|---|---|
| Superintendence | 102 1 5 | ..... |
| Superintendence at Bandora Slaughter-House | ..... | 99 6 4 |
| Labor | 159 2 5 | ..... |
| Lighting Markets and Slaughter-Houses | 321 1 0 | ..... |
| Meat Carriage | ..... | 2,785 8 7 |
| Disposal of Offal | ..... | 5 0 0 |
| Stores | ..... | 211 6 4 |
| Contingencies, Stationery and Printing | 138 4 1 | ..... |
| Repairs | 13,444 15 8 | ..... |
| Rent | ..... | 16 4 1 |
| Peons' Clothing | 450 0 0 | ..... |
| | 14,615 8 7 | 3,117 9 4 |
| *Less*...Rs. | 3,117 9 4 | |
| Rs. | 11,497 15 3 | |

25. *Contributions from Municipal Servants towards Pension, &c., Fund* amounted to Rs. 9,187-5-11 against Rs. 9,200-5-6, being Rs. 12-15-7 less than the receipts of the last year.

Budget Estimate, Rs. 9,600.

26. *Tramway Rent* yielded Rs. 28,366-13-8 in 1884-85, the same as in the last year.

Budget Estimate, Rs. 28,000.

27. *Contribution from Insurance Companies* amounted to Rs. 25,517 in 1884-85 against Rs. 24,708, being Rs. 809 more than the income of 1883-84, owing to additional Companies having been assessed in the year under report.

Budget Estimate, Rs. 25,000.

28. *Miscellaneous Fines and Penalties* amounted to Rs. 10,641-14-7 in 1884-85 against 15,575-1-0, being Rs. 4 933-2-5 less than the receipts of the last year, as per particulars given below :—

Budget Estimate, Rs. 10,500.

| | Increase. Rs. a. p | Decrease. Rs. a. p. |
|---|---|---|
| Presidency Magistrate of Police | ... | 2,205 8 10 |
| Establishments | ... | 122 11 11 |
| Contractors | ... | 2,080 0 0 |
| Health Department | ... | 478 7 11 |

| Executive Engineer's Department | ... | 27 13 8 |
| Dhobies | 29 8 0 | ... |
| Town Duty Chittiwallas | ... | 1 0 0 |
| | | 4,962 10 5 |
| | *Less*...Rs. | 29 8 0 |
| | Decrease in Fines ...Rs. | 4,933 2 5 |

29. *Miscellaneous Fees* amounted to Rs. 72,375-3-3 against Rs. 78,559-14-10 in 1883-84, being Rs. 6,184-11-7 less received than last year.

Budget Estimate, Rs. 69,700.

This decrease of Rs. 6,184-11-7 is explained as follows :—

| | More received. Rs. a. p. | Less received. Rs. a. p. |
|---|---|---|
| From Assessor and Collector's Department | 1,239 2 1 | ..... |
| „ Municipal Engineer | ..... | 2,875 6 8 |
| „ Controller's Department | 348 5 0 | ..... |
| „ Health Officer | 668 4 0 | ..... |
| „ Police Commissioner | ..... | 5,583 0 0 |
| „ Municipal Commissioner | 18 0 0 | ..... |
| | 2,273 11 1 | 8,458 6 8 |
| | Deduct... | 2,273 11 1 |
| | Decrease...Rs. | 6,184 11 7 |

The decrease of fees, Rs. 2,875-6-8, from the Municipal Engineer's Department, is shown as follows :—

| | More received. Rs. a. p. | Less received. Rs. a. p. |
|---|---|---|
| Constructing and clearing Drains | 22 0 0 | ..... |
| Opening of Public Roads | 481 0 0 | ..... |
| Do. Footpaths | ..... | 25 0 0 |
| Projecting Galleries | ..... | 2,407 11 1 |
| Do Rewas | ..... | 1,376 7 4 |
| Scaffolding | 870 0 0 | ..... |
| Weather Frames | ..... | 32 4 3 |
| Plumbers' License | ..... | 545 0 0 |
| Fee for supplying copies of Office Records | 163 0 0 | ..... |
| Occupying Municipal Ground | ..... | 25 0 0 |
| | 1,536 0 0 | 4,411 6 8 |
| | Deduct... | 1,536 0 0 |
| | Decrease...Rs. | 2,875 6 8 |

The decrease of fees from the Police Commissioner's Department, amounting to Rs. 5,583, is explained as follows :—

| | More received. Rs. a. p. | Less received. Rs. a. p. |
|---|---|---|
| Fees, Blasting | 273 0 0 | ..... |
| „ Coffee, Chandol, &c., Houses | ..... | 133 0 0 |
| „ Occupying Public Road | ..... | 1,473 0 0 |
| „ Music Licenses | ..... | 4,250 0 0 |
| | 273 0 0 | 5,856 0 0 |
| | Deduct... | 273 0 0 |
| | Decrease...Rs. | 5,583 0 0 |

30. *Miscellaneous Savings* amounted in 1884-85 to Rs. 3,020-14-2 against Rs. 1,639-0-4 in 1883-84, being Rs. 1,381-13-10 more than the savings of the past year.

Budget Estimate, Rs. 3,000.

This increase of Rs. 1,381-13-10 was received chiefly from the Engineer's, Assessor and Collector's and Controller's, Departments, against decrease in some other departments, as shown in the particulars given below :—

| | Increase. Rs. a. p. | Decrease. Rs. a. p. |
|---|---|---|
| Engineer's Department | 1,942 1 9 | ..... |
| Health „ | 33 11 2 | ..... |
| Halalkhore „ | 27 12 8 | ..... |
| Controller's „ | 147 6 7 | ..... |
| Assessor and Collector | 168 0 2 | ..... |
| Municipal Commissioner | ..... | 0 1 0 |
| Market Establishment | ..... | 73 9 4 |
| | 2,319 0 4 | 73 10 4 |
| *Less* | 73 10 4 | |
| Rs. | 2,245 6 0 | |
| Less paid on account of other departments, including past year's wages. „ | 863 8 2 | |
| Increase..... Rs. | 1,381 13 10 | |

31. *Miscellaneous Receipts* amounted to Rs. 88,984-6-4 in 1884-85 against Rs. 80,799-9-7 in 1883-84, being Rs. 8,184-12-9 more than the receipts of the last year.

Budget Estimate, Rs. 75,500.

This increase is explained as below :—

| | Increase. Rs. a. p. | Decrease. Rs. a. p. |
|---|---|---|
| Sale of land yielded | ..... | 7,267 4 7 |
| Assessor and Collector | ..... | 48 6 10 |
| Health Department | 9,196 15 10 | ..... |
| Engineer's „ | 3,674 8 4 | ..... |
| Municipal Commissioner | 184 0 0 | ..... |
| Engineer on Special Duty | 1,393 0 0 | ..... |
| Rent of Police Quarters | 1,247 0 0 | ..... |
| Controller's Department | ..... | 195 0 0 |
| | 15,695 8 2 | 7,510 11 5 |
| *Less* ..... | 7,510 11 5 | |
| Increase..... Rs. | 8,184 12 9 | |

32. *Public Gardens.*—Receipts under the head of Victoria Gardens amounted to Rs. 8,932-15-11, against Rs. 7,717-12-6, being Rs. 1,215-3-5 more than the receipts of the past year.

Budget Estimate, Rs. 8,500.

For expenditure relating to Public Municipal Gardens, *vide* para. 47 under the head of Expenditure.

33. *Interest on Drainage Loan*,—deposited in the Bank of Bombay amounted to Rs. 8,308-1-10, against Rs. 27,928-9-10 in 1883-84.

*Interest and Profit on the Municipal Building Fund.*—The invested amount on this account yielded Rs. 27,310-7-7 during the year 1884-85.

34. *Census.*—Rs. 2,232-6-11 were recovered from Government in 1884-85, being the moiety of the amount of Census charges incurred by the Municipality in 1883-84, in excess of Rs. 27,000 originally sanctioned for this purpose, and half of which sum Government had paid in advance last year.

35. *Municipal Workshops.*—Total recoveries during 1884-85 amounted to Rs. 1,57,045-1-5, which included Rs. 31,344-7-7, being the balance of outstandings for 1883-84. Deducting the amount of the balance from the amount of total recoveries, the net recovery for the 12 months ending 31st March 1885, amounted to Rs. 1,25,700-9-10, and Rs. 32,278-13-7 were to be recovered from private and departmental works and for works which were completed and some works left incomplete, making an aggregate total of Rs. 1,57,979-7-5 for the year 1884-85. Against this credit, a total of expenditure for the year amounting to Rs. 1,57,739 was booked, being the amount of payments on account of Establishments and of Stores, leaving on the 31st day of March 1885 a small balance of Rs. 240-6-10 to the credit of the Workshop.

Looking to the large amount of outlay and the expenditure incurred every year in the working of the shop, and taking into consideration the high rates charged by the Workshop for executing private, departmental and Government works, the realization of such a small sum of Rs. 240, as the amount profit derived from such a large establishment, is indeed very unsatisfactory.

It is, therefore, very desirable to investigate into the particulars of the working of this establishment, curtail its expenditure, and to adopt such measures as may improve its utility, and thereby increase the annual income of this very useful department of the Municipality.

## Expenditure.

36. *General Superintendence.*—Under this head the total expenditure amounted to Rs. 1,65,257-14-10 against Rs. 2,01,021-5-6 in 1883-84, being Rs. 35,763-6-8 less than the expenditure of the past year.

Budget Grant, Rs. 1,69,284-1-3.

This decrease is explained as follows:—

| | | More Expended. | Less Expended. |
|---|---|---|---|
| | | Rs. a. p. | Rs. a. p. |
| *a* | *Town Council and Corporation*— Establishment Expended ..... Budget Grant Rs. 48,528-1-3. | 1,588 10 0 | ..... |
| *b.* | Municipal Commissioner ..... Budget Grant Rs. 69,001-3-1. | ..... | 40,211 11 3 |
| *c.* | Controllers ..... Budget Grant Rs. 50,990-4-2. | 2,859 10 7 | ..... |
| | | 4,448 4 7 | 40,211 11 3 |
| | | *Deduct*... | 4,448 4 7 |
| | | *Less* expended...Rs. | 35,763 6 8 |

The increase in the expenditure of Town Council and Corporation Establishment is explained as follows :—

| | Increase. | Decrease. |
|---|---|---|
| | Rs. a. p. | Rs. a. p. |
| Secretary, Town Council ..... | *183 8 8 | ..... |
| Office Establishment ..... | 34 2 6 | ..... |

| | 1,061 4 10 | 41,273 0 1 |
| | Deduct... | 1,061 4 10 |
| | Decrease...Rs. | 40,211 11 3 |

* Owing to annual increment.

† Due to the cost of acting arrangement when the Commissioner had gone on leave and subsequently to his being employed on Special Duty.

‡ Due to heavy payments in a Law suit against the Municipality instituted in 1883-84.

The increase in the expenditure of the Controller's Department is as follows :—

| | Increase. Rs. a. p. | Decrease. Rs. a. p. |
|---|---|---|
| Salary of the Controller | §600 0 0 | ..... |
| Office Establishment | 1,690 4 2 | ..... |
| Store do. | 496 6 10 | ..... |
| Contingencies, Stationery and Printing, &c. | ..... | 111 6 5 |
| Peons Clothing | 184 6 0 | ..... |
| | 2,971 1 0 | 111 6 5 |
| Deduct... | 111 6 5 | |
| Increase... Rs. | 2,859 10 7 | |

37. *Assessor and Collector's Department.*—This department expended Rs. 93,708-6-5 in 1884-85 against Rs. 83,878-5-6 in 1883-84, being Rs. 9,830-0-11 more than the expenditure of the past year, as per particulars given below :—

Budget Grant, Rs. 1,08,350-13-1.

| | Increase. Rs. a. p. | Decrease. Rs. a. p. |
|---|---|---|
| Salary of Assessor and Collector | *4,107 12 6 | ..... |

| | 14,003 11 7 | 4,173 10 8 |
| Deduct... | 4,173 10 8 | |
| Increase.....Rs. | 9,830 0 11 | |

38. *Public Health Department.*—The total expenditure of the Health Department in 1884-85 amounted to Rs. 8,38,547-14-10 against Rs. 8,46,324-3-6 in 1883-84, being Rs. 7,776-4-8 less than the expenditure of past year.

Budget Grant, Rs. 9,22,520-8-0.

* Partly due to an increase in the salary of the Assessor and Collector in 1884-85, and a portion of the Assessor's salary having been saved in 1883-84, owing to the death of Mr. Hutchinson in June 1883 and to the permanent arrangement in his place having been made only from February 1884.
† To increased establishment.
§ Usual annual increase.

This decrease is explained as per following particulars :—

| | More. Rs. a. p. | Less. Rs. a. p. |
|---|---|---|
| General Supervision (Budget Grant, Rs. 39,643-10-8) | ..... | 7,170 0 10 |

| Rs. | 209 13 3 | |

50. *Discretional Contingencies.*—Rs. 4,576-14-2 were expended in 1884-85 against Rs. 4,514-10-5 paid last year.

Budget Grant, Rs. 5,021-5-3.

The following sundry expenditure was incurred during the year 1884-85 and was paid by additional grants sanctioned by the Town Council and Corporation :—

1. Cost of illuminating address to the retiring Viceroy and to the Viceroy Elect ..... Rs. 3886
2. Cost of carrying out the necessary arrangements for the laying of the foundation stone of the New Municipal Offices and Hall by the Marquis of Ripon..... „ 10,000
3. Fees paid to professional advisers consulted by the Municipal Commissioner for the selection of the best competitive designs and specification ..... „ 1,890
4. Prizes for designs and specifications for the New Municipal Offices and Hall ..... „ 8,000
5. Contribution to Jaffer Suleman's Female Dispensary... „ 4,500

51. *Primary Education.*—The whole of the grant of Rs. 22,500 given under this head was expended in the year.

Budget Grant, Rs. 22,500.

52. *Goculdass Tejpal Hospital*—Rs. 30,011-8-7 were paid for the hospital expenses this year against Rs. 27,832-2-0 expended last year, being Rs. 2,179-6-7 less than paid in 1883-84. But on the other hand, receipts or the unexpended balance returned by the hospital amounted, in 1884-85, to Rs. 6,608-1-5 against Rs. 9,098-4-0 in 1883-84, being Rs. 2,490-2-7 less than the balance returned last year.

Budget Grant, Rs. 36,000.

53. *Pensions* amounted to Rs. 17,995-13-6 against Rs. 16,354-0-2 paid in 1883-84, showing an increase of Rs. 1,641-13-4 over the last year.

Budget Grant, Rs. 18,703.

54. *Gratuity and Compassionate Allowance.*—Rs. 5,296-8-10 were paid under this head during the year.

Budget Grant, Rs. 6,514-1-11.

55. *Auditors' Allowance.*—The whole grant was expended in payment of this allowance.

Budget Grant, Rs. 5,000.

56. *Rent of Municipal Office.*—The whole of this grant was expended in payment of rent of Municipal Office at Rs. 1,400 per mensem.

Budget Grant, Rs. 16,800.

57. *New Works.*—Rs. 1,41,664-5-6 were expended in 1884-85 against Rs. 2,62,113-5-4 in 1883-84, being Rs. 1,20,448-15-10 less than expended last year.

Budget Grant, Rs. 3,83,776-12-10.

The following are some of the principal works :—

| | Rs. | a. | p. |
|---|---|---|---|
| Constructing Stables at Mody Bay | 14,500 | 1 | 3 |
| Erection of New Public Latrines | 16,540 | 2 | 7 |
| Purchase of Ground at Haines Road and west of existing Cemetery thereat required as a Burial Ground | 18,110 | 7 | 2 |
| Construction of New Road from Parel Railway Station to the Junction of Haines and Worlee Roads | 16,943 | 12 | 0 |
| Metalling Municipal Roads recently taken over from Port Trust | 18,919 | 0 | 0 |
| Purchase of Metres and spare Gear for Metres for issue to consumers | 10,587 | 1 | 3 |
| Taking up a private roadway from Godapdeva to Chinchpoogly and constructing a public road thereon | 8,593 | 0 | 0 |
| Constructing road from Sewri by Frere Road to Arthur Road at Chinchpoogly | 7,741 | 11 | 4 |
| Erection of new pattern Urinals | 5,032 | 9 | 2 |
| Filling in a portion of the Haines Road Burial Ground | 4,433 | 15 | 6 |
| Police Quarters at Byculla | 3,697 | 0 | 5 |
| Construction of Pipe Sewer from Dhobiwada to Clarke Road Junction | 3,667 | 10 | 0 |
| Constructing a Storm Water Drain in Cursetjee Sookhlajee Street | 3,418 | 4 | 7 |
| For particulars of the remainder of New Works executed in 1884-85, amounting to | 9,478 | 10 | 3 |
| *Vide* Appendices to the Controller's Accounts and Report. | | | |
| Total of New Works...Rs. | 1,41,664 | 5 | 6 |

In the total sum expended on New Works about Rs. 55,000 were appropriated in purchasing lands and constructing public roads thereon, and the remainder in the construction of latrines drains, stables, diverting experimentally sewerage outfall from Carnac Bunder to Worlee, in the erection of an experimental kiln for burning rubbish, and supplying stretchers to all Police Stations.

58. *Police Account,* including Police Hospital and Fire Brigade: expended Rs. 4,26 725-12-0 in 1884-85 against Rs. 4,17,897-0-9 in 1883-84, being Rs. 8,828-11-3 more than the expenditure of the last year.

Budget Grant—
Rs. 3,61,752, *Police.*
„ 94,487, *Fire Brigade.*

This increase of Rs. 8,828-11-3 is explained as follows :—

| | More expended. Rs. a. p. | Less expended. Rs. a. p. |
|---|---|---|
| General Police, including Fire Brigade ..... | ..... | 759 12 9 |
| Fire Brigade Establishment ..... | 4,798 15 4 | ..... |
| Repairs to Engines..... | 598 0 6 | ..... |
| Contingencies for extinguishing Fires ..... | ..... | 202 2 11 |
| Compensation for damage to Police Officers' Clothing ..... | ..... | 502 0 0 |
| Charges for Buggy hire, Feed of Horses, &c. | 85 14 10 | ..... |
| Lighting Fire Engine Sheds..... | ..... | 20 1 7 |

| Assessment and Collection, and Refund and Remission Charges ⅛ Share | 2,043 2 2 | ..... |
| | 1,12,979 3 7 | 8,167 13 6 |
| Deduct | 8,167 13 6 | |
| Increase | Rs. 1,04,811 6 1 | |

During the year under report the following further expenditure was incurred on the undermentioned works in connection with the Water Works :—

| | Expended up to 1883-84. Rs. | Added in 1884-85. Rs. | Total up to 31st March 1885. Rs. |
|---|---|---|---|
| Vehar Outlet Tower | 2,80,852 | ..... | 2,80,852 |
| Tulsi Water Works, raising Tulsi Dam | 35,81,778 | 22,345 | 36,04,123 |
| J. H. Grant New Service Reservoir at Bhandarwada | 8,18,242 | 63,957 | 8,82,199 |
| Malabar Hill Reservoir | 3,63,116 | 14,012 | 3,77,128 |
| New Catch-water Channel | 11,006 | 51,006 | 62,012 |
| Rs. | 50,54,994 | 1,51,320 | 52,06,314 |

LOAN WORKS—

61. *Surface Drainage Works.*—The total expenditure on these works during the year amounted to Rs. 2,53,179-10-3, making, with the amount expended on these works, Rs. 5,37,775-5-9, in prior years, an aggregate total of Rs. 7,90,955 from the commencement up to 31st March 1885.

For particulars of the work executed during the year 1884-85, *vide* Appendices to the Controller's Account.

62. *New Drainage Works.*—Further payments of Rs. 3,44,045-0-9, including receipts of Rs. 1,793-6-0 on account of materials, &c., were made during the year on account of New Drainage Works, raising the total, together with the amount expended from the commencement of the work, to Rs. 27,05,515-10-7.

The total receipts for the past year from this work amounted to Rs. 1,793-6-0, making from the commencement an aggregate total of Rs. 5,04,267 up to 31st March 1885.

Deducting the total of these receipts, amounting to Rs. 5,04,267, the net expenditure on account of New Drainage Works amounted to Rs. 22,01,247 up to 31st day of March 1885.

63. *Panvell Brick Factory.*—This useful establishment has been sold and the Municipality thereby has incurred a loss of Rs. 1,60,997-12-0.

64. *Assets and Liabilities.*—The total assets of the Municipality amounted on the 31st day of March 1885 to Rs. 1,49,37,114-14-10, including Rs. 54,90,361-10-1 on account of Water Works Fund.

The total assets is summarized as follows :—

| | | Rs. 1,21,50,989 11 8 | |
| Excess of Assets over Liabilities..... | | 27,86,125 3 2 | |
| | | Rs.... 1,49,37,114 14 10 | |

*Property of the value of Rs. 45,37,835-11-11 still remains unbooked.

65. *Scrutiny of Collections and of Outstanding Bills of Rates and Taxes for the year* 1884-85 *and of previous years—*

*Collections.*—During the year under report there were issued by the Assessor and Collector Rs. 70,462 net demand assessment bills, amounting in value to Rs. 19,98,384-9-2

To the above number of bills, were added 554 additional bills for the year 1883-84 and for previous years up to 1881 inclusive, of the value of Rs. 1,52,403-5-1, including Government and Port Trust bills, making the total of all collection bills to 71,016, and amounting to Rs. 20,00,787-14-3. Add to this the amount of the Outstanding for the year 1883-84, amounting to Rs. 4,03,036-4-2, the total amount of collection bills for the year 1884-85 amounted to Rs. 25,53,824-2-5.

Out of the abovementioned Rs. 25,53,824-2-5, Rs. 20,93,663-15-11 were collected by the Assessor and Collector, and Rs. 1,50,000 were paid by Government and Port Trust direct to the Municipality, making a total of collections received of Rs. 22,43,663-15-11, which left a balance of Rs. 3,10,160-2-6.

From this balance, deducting Rs. 553-4-6, being the amount of Time-barred bills, and Rs. 27,360-3-9, being the amount of remission allowed on old bills up to the 1st Quarter of 1883 ; and Rs. 2,320-12-1 being the amount of reduction made in Demand bills for 1883-84, there remained Rs. 2,79,925-14-2, as the outstanding on the 31st day of March 1885.

We give in detail, in the annexed four Appendices, marked **A, B, C** and **D**, the result of our scrutiny of the outstanding balances for the year 1884-85 and of previous years.

Appendix **A** shows outstandings for 1884-85 amounting to Rs. 1,97,098-0-5.

Appendix **B** shows outstandings for the years 1883-84 and of previous years up to 1879 inclusive amounting to Rs. 80,549-11-2.

Appendix **C** shows outstandings of remissions, disputed and law-suit bills, amounting to Rs. 2,278-2-7.

Appendix **D** is a summary of the abovementioned three Appendices, which shows the grand total of all outstanding balances on the 31st day of March 1885, being 9,133 bills amounting to Rs. 2,79,925-14-2, being Rs. 1,23,110-6-0 less than the outstandings of the past year.

66. We give below a resumé of the above in figures :—

| | | | | Amount. Rs. | a. | p |
